755 copies—Approximate Cost of Printing (labour and material), £11 19s. 6d.

To His Excellency the Right Honorable HENRY ROBERT VISCOUNT HAMPDEN,
Governor and Commander-in-Chief of the Colony of New South Wales
and its Dependencies :—

MAY IT PLEASE YOUR EXCELLENCY,—

We, the Public Service Board appointed under the provisions of the Public Service Act of 1895, have the honor, in accordance with the provisions of Section 18 of the said Act, to submit the following Report.

We have the honor to be,
Your Excellency's most obedient servants,

GEO. A. WILSON, } Members of the
J. BARRLING, } Public Service Board.
W. HOUSTON, { Deputy Member of the
{ Public Service Board.

REPORT.

FOR many years prior to the passing of the Public Service Act, the question of reform in the Public Service had been looked upon as one of great urgency, and public opinion clearly indicated that the first step towards reform was the abolition of political patronage. This the Act effectually accomplishes; but at the same time it goes much further, and absolutely abolishes all patronage, whether of the political heads of departments or of the higher officials. It also proclaims that admission to the Service is only to be obtained by the door of competitive examination, and that when admission is gained promotion shall be granted to those alone who show special qualifications and aptitude for the discharge of official duties.

The Board were appointed on the 15th day of January, 1896. Mr. G. A. Wilson was elected to the position of Chairman; and, in order that perfect equality should be maintained between the members, it was resolved that the Chairmanship should be held in rotation by each member for a period of twelve months.

REGULATIONS.

The first duty undertaken by the Board was to frame regulations for the internal government of the Public Service, as those made under the previous Act lapsed with its repeal. The regulations of the Board were approved by the Governor-in-Council, and took effect from the 19th March, 1896. The changes made, as set out in the regulations, are not of a very important character, for the principles which ought to govern the Service were well understood, and, if not already embodied in the code of regulations framed by the Civil Service Board, had at least been tacitly acknowledged. The annual holiday was reduced from three to two weeks; and the right to three months' leave after ten years' service was abolished. The principle that officers of the State should not engage in pursuits unconnected with the Service was affirmed; and the right to receive fees was withdrawn, for it was plain that, if an adequate salary was fixed for a public servant, fees received for the performance of statutory or other duties during departmental hours were justly claimable by the State, as having an exclusive right to his services and to the whole product of his labour during that time. The Board, it may be said, have experienced some difficulty in enforcing the rule in regard to fees. It is not to be supposed that officers would readily give up what they have so long enjoyed; but the Board are determined to carry out the regulations in their integrity, and have directed that in future all fees are to be paid into the Treasury. The regulations have already been laid before Parliament, and it will therefore not be necessary to discuss them further.

WORK

WORK OF GRADING.

The task imposed upon the Board in regard to the reform of the Service is set forth in section 8 of the Public Service Act, which requires the Board "to ensure the establishment and continuance of a proper standard of efficiency and economy in the Public Service," and, with that object in view, to inspect all departments, grade the officers, and determine their salaries. The Board's examination of the various departments was begun on the 11th February, 1896, with the department of Public Works, and, with the sole exception of the Marine Board, all the departments of State, with their various branches, have been subjected to a strict investigation. The Board are happy to say that all necessary assistance in this work was afforded to them by the heads of departments, and by all other officers, from the highest to the lowest. In no case, however, were the Board exclusively guided by the advice of the permanent heads of the departments; indeed, in many cases they were compelled to reject such advice as being inadequate to the occasion or against the best interests of the Service; and for the recommendations that have been made, and the changes consequent thereon, they wish to take upon themselves the whole responsibility.

The work of carrying out the first reforms of the Board covered practically about twenty-two weeks. To many persons this must have seemed very rapid work, and there is undoubtedly a suspicion in the minds of some that so gigantic a task could not have been well done in such a comparatively short period. The Board, however, are convinced that they are not open to the charge of acting with undue haste; on the contrary, the most patient consideration was given to every department and to every branch, and if there are any imperfections in their work, these must be assigned to a cause other than haste in dealing with the question of reorganisation.

The work of the Board may be judged in two ways—by its effect on the morale of the departments, and by its resultant economies. The Board claim that they were able to bring about a state of greatly increased efficiency, and at the same time to effect a saving of something like £300,000 a year. Nevertheless, they desire to point out that, although economy is insisted upon by the Act as a leading principle of reform, they did not make this their most important duty: the securing of efficiency stood first among the objects which they endeavoured to attain, and economies were sought chiefly in the stoppage of useless work, and in the retrenchment of superfluous officers. It will be found, however, that in doing their duty to the taxpayers of the country, the Board have been able also to benefit the public servants: men of meritorious service have received promotion, while others, who were lost to sight in unimportant offices under the old system, now find themselves placed in positions corresponding with their merits, and the Board have to a large extent been able to do away with the reproach, often justly levelled at the Service, of large salaries being drawn by persons whose work was done by juniors.

PAINFUL NATURE OF BOARD'S WORK.

As might be supposed from the abuses known to exist, and from the helpless character of many of the public servants, the work of the Board was in very many respects extremely painful; but it was recognised both by Parliament and by the public that the Board were called upon to perform a work of great delicacy, and one essentially judicial in its nature; and they are pleased to be able to say that very few attempts were made by Members of Parliament and other persons of social eminence to influence them by personal solicitation. Nor can this commendation be withheld from the public servants themselves. As a whole, the officers acknowledged the need of reform and loyally accepted the spirit of the Act; and even when suspecting that their positions were in jeopardy, they refrained from seeking by means of their friends to influence the Board on their behalf.

Having undertaken the task of reform, the Board regarded themselves as trustees for the public; and though, as far as it was possible for them to do so, they avoided all appearance of harshness, yet they did not hesitate to place before everything else efficiency and economy. These important results being secured, the Board felt that it was for them to leave with the Executive the amelioration of such cases as called for special consideration. It would doubtless have been easier, as far

far as the personal comfort of the members was concerned, to have allowed solicitude for an officer's family to weigh with them in the retrenchment which they were called upon to effect; but such sentimental considerations were entirely out of place, especially as it was speedily borne home to the Board that the persons whose pecuniary circumstances called most loudly for sympathy were invariably those whose retention in the Public Service was absolutely impossible.

CONDITION OF DEPARTMENTS.

A casual inspection of the public departments showed many things which demanded a speedy remedy. An excess of officers was a matter of quite common occurrence, and a want of concordance between salaries and duties obtained in almost all departments. In dealing with the excess of officers, the alternatives which presented themselves to the Board were either to stop admission to the Service, and so trust to a reduction being gradually effected by deaths and resignations, or to proceed with the work of reform and bring it to a close as speedily as possible. The first plan was undoubtedly the one which found most favour with persons not well acquainted with the true condition of the Public Service; but the disease was far too deeply seated to leave it to time to effect a cure. Through the working of the system of seniority, men had been pushed up from the bottom to the top of the Service by the mere inertia of long service, and the Board found that there were not a few officers with salaries ranging from £300 upwards whose capacity and exertions would have been amply rewarded with a salary of £150. To continue such men in their appointments until they dropped off through old age or death would simply have been to prolong inefficiency. There were other officers also, not altogether without a certain kind of ability—men who had conceived an impression, which long indulgence had rendered ineradicable, that the Public Service was not a serious occupation such as a commercial business—who were a source of trouble to their superiors, a pernicious example to their inferiors, and a reproach to the Service generally. To allow such men to remain until their voluntary retirement or death would have been to go far towards ensuring the defeat of the Board's proposals. Then, again, it was plain that a reform of the Public Service was impossible unless the principal officers and heads of branches were not only competent to perform the duties attaching to their positions, but willing to enter into the spirit of the Board's work. Very little investigation showed that for the Board effectually to secure the reforms which they had in view, the carrying into effect of their proposals, at least in some instances, must needs be placed in other hands than those of the officers who then controlled the departments; and the Board were compelled to recommend the removal of some public servants who, although men of ability, were not such as they cared to entrust with the carrying out of the far-reaching reforms which they felt were necessary. Taking every circumstance into consideration, the Board saw clearly that their work of reform was only to be accomplished by adopting the principle of immediate action, and by the removal of every person from the Service who was either himself inefficient or was likely to be the cause of inefficiency in others.

The condition of each department, as found by the Board and after the work of grading was accomplished, will be a matter for further report as soon as the appeals now pending have been determined. In most of the departments of the Public Service, though not in all branches, an excess of officers was found. And this overcrowded condition of the Service, and the excess of expenditure to which it led, were seen to be not only evils in themselves but to conduce to other evils; for in spite of the fact that there were far more officers in some departments than were demanded by the nature and quantity of the work to be done, it was found that the public were sometimes very ill served—the very excess of officers tending to promote the inefficient discharge of such duties as there were to be performed, and the knowledge that some persons were idle part of their time having the effect of inducing a struggle amongst all to see to whom the idle time should fall. In some departments where idleness was strictly discountenanced, the excess of officers led to the manufacture of work to keep the staff employed. Even this plan, however, must have had a demoralising effect where it was adopted, since officers with a common share of intelligence must inevitably have discovered the inutility of the work on which they were employed, and have had, therefore, little respect for the system which rendered such devices necessary.

INCREASE

INCREASE OF OFFICERS.

It may be difficult for persons unacquainted with the conditions under which the business of the State is carried on to understand how it has come about that unnecessary officers were to be found in the Public Service, seeing that the Estimates of the departments are annually submitted to the scrutiny of Parliament. Year after year the number of officers whose salaries are shown on the Estimates has remained somewhat the same, while the number of persons actually employed has been steadily growing. The explanation of this anomaly is not far to seek. The votes for expenditure are of two kinds—salaries and contingencies; and though the voted salaries show no very important expansion during the past ten or fifteen years, the vote for contingencies has been constantly growing, and it has been from this vote that the salaries of many of the officers improperly introduced have been paid. There have, of course, been some abuses in connection with the ordinary salaries submitted to Parliament; but it may be said that the large votes taken for contingencies have been the most fruitful source of extravagance. It may here be remarked that it is a mistake to suppose that the evils of the Service are entirely due to the system of political patronage. That system has undoubtedly been the source of many improper and unnecessary appointments; but it is probable that the patronage of high officials was quite as extensive as that claimed by the political heads of departments, and there can be little doubt also, that such patronage was not always exercised with proper regard for the public interests.

TEMPORARY OFFICERS.

It will be observed that the Board, as required by section 11, have transferred all nominally temporary officers whose work was of a permanent character to the staffs of the various departments. By so doing they were enabled in most cases to remove altogether the vote for extra clerical assistance; and Parliament will in future have before it in the Estimates of Expenditure the salaries of nearly all persons employed in the Public Service, the vote out of which temporary officers can be employed being now extremely small. The Board are of opinion that it would be wise still further to limit the vote for extra clerical assistance, and that instead of appropriating an amount for each department separately, a sum should be placed on the Estimates in connection with the Board's own office, and when extra clerical assistance is required in any department this should be furnished by the Board from the supernumerary staff at their command.

Nor, in regard to employment in the Public Service, is this matter of the payment of temporary officers from the vote for extra clerical assistance and for contingencies the only one in which Parliament has been kept in a state of ignorance. It has long been a practice to pay the salaries of certain officers from Loans Votes; and although the principle on which such payments are made is strictly defensible, in very few cases has Parliament been aware of the number of persons whose salaries were so paid, or of the amounts which they received. This system the Board have now changed; and although the practice of charging certain salaries to the Loans Votes has not been disturbed, the number of officers employed and their salaries are for the first time shown on the Estimates, the amounts, however, not being included in the Appropriation Act.

FEES AND EMOLUMENTS.

Even when a salary was shown on the Estimates, it frequently happened that the amount did not properly represent the emoluments of the officer to whom it belonged; and in voting the salaries set before them, the Legislature was in very many cases quite in the dark as to what it was doing; for what between fees, emoluments, house-rent, rations, and such like, the salaries of officers of a certain class were very much higher than Parliament realised. This is an evil which the Board have remedied. As far as they have been able to do so, they have assigned to every officer a fixed salary equal to the work which he is called upon to perform, and where he occupies a house which is the property of the State, or receives rations or other privileges, the Board have set a value upon these emoluments and charged it to him, the sum so charged forming a reduction in the amount of the salary which he is entitled to receive.

Reference

Reference has already been made to the Board's regulations in regard to fees. The system of remuneration by fees the Board look upon as a vicious one. It has led to a neglect of the public business in the interests of the private emoluments of the officers, as, practically speaking, the fees received are paid by the public for work done during office hours; and it has frequently been found that, in order to do the work to which these fees are attached, officers have not hesitated to neglect the duties for which they are paid a fixed salary, while it has also happened that the Government has provided to officers assistance, often not absolutely required, to perform the very duties for which the fees were paid. The State, therefore, has been doubly wronged: it has suffered the loss of the fees earned by its officers in the public time, while at the same time it has paid the salaries of junior officers to perform the neglected duties of the persons receiving the fees. Throughout their grading, the policy of the Board has been to place before Parliament an officer's whole emoluments, and the Estimates as now framed are upon this basis.

In connection with this subject, it may be remarked that the right to receive fees was not associated in the minds of officers, especially those connected with the Courts, with any obligation or duty which they had to perform, nor did they consider that they were given such a privilege in order to facilitate public business; on all sides there seemed to be an impression that the right to charge fees was a kind of personal property, not to be confounded in any way with official duties, though the Board have been unable to discover that the matters in respect of which fees were paid were attended to outside the ordinary office hours. In dealing with this matter, the Board were not able to distinguish between officers of the Courts and other public servants, and they therefore withdrew the right to receive fees from all alike. This determination has since been given effect to by Act of Parliament.

CHARGE FOR QUARTERS.

Apart from the few exceptional cases in which officers still draw fees for performance of certain legal functions, the estimated value of each officer's emoluments is set out on the Estimates; but in their endeavour to place before Parliament the full salary received by each person, the Board acknowledge that in some instances they have created another anomaly. In determining the sum which should be charged for house-rent, they have had to proceed according to an empirical rule, and it has sometimes happened that officers who chanced to have poor accommodation have been charged the same rent as others whose quarters are of a superior description. The Board, however, are endeavouring to adjust these anomalies, but the solution of the question is not quite so free from difficulty as it might appear at first sight. It is the intention of the Board to value the house accommodation afforded to all persons in the Service, and they hope to be able to come to an equitable determination in regard to the rent question before the next Estimates are prepared.

OFFICERS' SALARIES HOW DETERMINED.

In determining the salaries assignable to the various officers, the Board had always in view the rule laid down by section 10 of the Act—that is, that the office itself should be considered entirely apart from its occupant, and the salary fixed for the post and not for the person who chanced to fill it. This rule was the only sound one upon which the Board could act, for, as already pointed out, there was frequently no co-relation between the office and the salary attached thereto. In all cases, therefore, the salary was fixed for the office, and not for the man. Where the man was found to be incapable of performing the duties of his office, he was retrenched or placed in an inferior position; where he was capable of doing better work, the Board had no difficulty in providing that work for him. Their chief difficulty, and one which confronted them at every turn, was the impossibility of finding a sufficient number of suitable men to fill superior positions; and in their work of grading and re-arranging the Public Service, the Board would have suggested more far-reaching changes if they had been able to discover officers fit to occupy leading posts: not that the Public Service does not contain a large number of capable persons; but these were not always found in leading positions, and it will be a work of some little time before the Board can with confidence say that they have removed all those who, from the accident of seniority or other cause, have drifted into positions which neither their capacity nor their industry qualifies them to fill. The

The difficulty of selecting thoroughly competent persons for the higher posts is due as much as anything to the manner in which the Service has been recruited; but there can be little doubt that the fact that the prizes of the Service are extremely few, and that, as a rule, the responsible offices are underpaid, has had something to do with the condition of the Public Service. Even now, under their grading, the Board cannot say that the high officers are adequately remunerated; but they are of opinion that reform in this direction is one which may wait for more mature consideration. In answer to the somewhat thoughtless complaint that high salaries have not been reduced, it may be pointed out that for services of a like character persons in private employ would be paid on a far higher scale than now obtains or is ever likely to obtain in the Public Service.

Omitting from consideration the higher offices which find few counterparts in commercial business, it may be said that the result of the Board's grading has been to leave the salaries of the lowest grades approximately 25 per cent. higher than would be paid for similar employment by private persons; while superior clerks receive about $17\frac{1}{2}$ per cent., and special clerks about 12 per cent., above commercial rates. This higher remuneration the Board consider to be not unreasonable, as they hope that the service of the State will be looked upon as a profession sufficiently well paid to attract a good class of men, and one which offers opportunities of advancement sufficient to retain such men when once they have entered upon an official career.

An analysis of the graded salaries shows the following to be about the average rates now paid in the Public Service for clerks and others. The averages exclude heads of departments and sub-departments, as well as professional positions which are not susceptible of classification into general groups:—

Chief Clerks in Ministerial Departments	£500 to £550
Do Sub-Departments...	First Class	...	350 to 400
Do do	Second „	...	300 to 350
Do do	Third „	...	250 to 300
<i>Correspondence—</i>						
Clerks in Charge	First Class	...	£400
Do	Second „	...	300
Do	Third „	...	200
Senior Assistants	First „	...	275
Do	Second „	...	225
Other Assistants who are shorthand-writers or are capable of drafting the less important letters	140 to £200
Other Assistants who are merely copyists	75 to 125
Youths	30 to 60
Typewriters	First Class	...	£125
Do	Second „	...	100
Do	Third „	...	75
<i>Special Clerks—</i>	First Class	...	£300 to £375
	Second „	...	225 to 300
	Third „	...	150 to 225
	Fourth „	...	100 to 150
	(Partly employed in clerical work, and partly in ordinary labour.)		
<i>Records—</i>	First Class	...	£300
Record Clerks	Second „	...	250
Do	Third „	...	200 to £225
Do	Assistants	...	100 to 150

ACCOUNTS.

<i>Accountants</i>	First Class	...	£500 to £600
Do	Second „	...	350 to 450
Do	Third „	...	250 to 350
Do	Fourth „	...	200 to 250
<i>Examiners</i>	First Class	...	400
Do	Second „	...	275 to 350
Do	Third „	...	175 to 250
<i>Paymasters</i>	First Class	...	400 to 600
Do	Second „	...	300
Do	Third „	...	200 to 250
<i>Ledger-keepers</i>	First Class	...	225 to 250
Do	Second „	...	175 to 200
Do	Third „	...	100 to 150
<i>Cashbook-keepers</i>	100 to 175
<i>Assistants, Account Branch</i>	100 to 175

MESSENGERS

MESSENGERS AND DOORKEEPERS.

<i>Ministerial Messengers—</i>										
With quarters	£160
Without quarters	180
<i>General Messengers—</i>										
First Class	With quarters	£110
Do	Without quarters	125
Second Class	90 to £100
Third Class	75
Boy Messengers	30 to 52
<i>Doorkeepers</i>	£125

No good is likely to be gained by a statement of the reasons which weighed with the Board in determining the salaries of individual officers. In some instances the salaries as fixed will be found to be a good deal in excess of the average scale just given. The Board followed no hard and fast rule, and the divergence of salaries of different classes from the average of the whole may be taken as the Board's estimate of the range in value between the different offices. The increases of salary which the Board considered it desirable should be given, were mostly awarded to officers the value of whose posts had already been recognized by their departments; and in regard to decreases, which were also numerous, all that need be said is that the Board did not venture to propose a reduction until they were quite satisfied that the importance of the office graded did not warrant the salary previously paid. The reductions made by the Board affected for the most part middle-class salaries, which in many instances had been obtained merely by reason of long service, and not on account of an accession of responsibility such as would have warranted the increases which the officers had gained. Some of the reductions made ranged from 30 to 50 per cent.; but the Board had little hesitation in deciding upon these decreases, as the officers concerned in no way earned the amounts which they were receiving, and the Board were unable to see that the possession of an undue salary for a period however long was to be taken as involving a right to its continuance.

DIFFICULTY IN REGARD TO OFFICERS REDUCED IN SALARY.

It will be readily understood from what has been said that some difficulty was experienced in dealing with officers who were in receipt of salaries far in excess of their merits or of the value of the work which they performed. Though many of these officers could not be considered incompetent, still the policy of retaining them was, at least, doubtful. They comprised men who, through long enjoyment of it, had come to look upon a large salary as the right of everyone, whatever his qualifications, who had been in the Public Service for a fairly long period; and men whose estimate of their own abilities was far higher than was the Board's. The difficulty in dealing with such officers as these was that if it were decided to retain their services they would likely have to be subjected to a large reduction of salary, and as they would probably fail to see that their own demerits were the cause of their loss of position, they might become an active leaven of discontent, and their retention in the Service in the end have proved a disadvantage as well to the State as to themselves. Such, at least, was the Board's opinion. That the Act anticipated a difficulty of the kind may be gathered from section 12; and it would seem that Parliament intended that all officers capable of good work should be permitted by the Board to remain in the Service, but to do away with dissatisfaction, officers whose salaries were reduced by more than one-fourth were allowed the right to retire with a gratuity in accordance with their length of service. Acting, therefore, in what they considered to be the spirit of the Act, the Board as a rule preferred to retain all officers, unless it was manifest that their presence in the Service would militate against efficiency. Each officer had, therefore, the option of remaining in the Service or, where he came within the provisions of section 12, of taking advantage thereof and retiring if he considered that the reduction which he was called upon to suffer was in any way unfair, or that he could do better for himself than by continuing in the employ of the State. So far as the Board are aware, only two officers have elected to retire on account of reduction of salary, and these officers have been granted the compensation which is provided by the Act.

DIVISIONS

DIVISIONS AND GRADES.

The forty-first section of the Act requires that the professional and clerical divisions of the Service shall be divided into an upper and a lower series of grades. Accordingly, the Board have adopted in their classification the following series, each grade being distinguished by a special letter and numeral—the upper grades in both the professional and clerical divisions being called A, and the lower grades B:—

<i>Clerical Division.</i>	
Higher Grades ...	Salaries of £500 and upwards —A 1. " 400 and under £500—A 2. " 300 " 400—A 3.
Lower Grades ...	Salaries of £235 and under £300—B 1. " 175 " 235—B 2. " 120 " 175—B 3. " 75 " 120—B 4. " under £75 —B 5.

<i>Professional Division.</i>	
Higher Grades ...	Salaries of £550 and upwards —A 1. " 400 and under £550—A 2. " 300 " 400—A 3.
Lower Grades ...	Salaries of £225 and under £300—B 1. " 150 " 225—B 2. " 75 " 150—B 3. " under £75. —B 4.

For the Special Division of the Service the Board have nominated, and the Governor has approved of the appointment of, the holders of the following offices:—

The Principal Under Secretary.
 The Under Secretary for Finance and Trade.
 The Under Secretary for Lands.
 The Under Secretary for Public Works.
 The Under Secretary of Justice.
 The Under Secretary of Public Instruction.
 The Under Secretary for Mines and Agriculture.
 The Deputy Postmaster-General.

The results of the Board's classification have been published from time to time in the *Government Gazette*, so that it will not be necessary to recapitulate the grading in this Report. When the whole of the appeals have been heard and determined, the *Public Service List* will be completed. This *List* will take the place of the *Blue Book*, which has hitherto afforded information in regard to officers and their appointments.

WORK YET TO BE DONE.

The Board by no means consider that their work of reform has been completed with the grading of the departments. They are of opinion that in some departments there is still room for much improvement, and that many more men are employed than would suffice if all were efficient to do the work of the State. In the transition stage from the old condition of affairs to the organization contemplated by the Act, it was thought advisable to proceed with caution, as the effect of suddenly bringing the Service down to its proper limits might be to lead to the unsettlement of official business and public inconvenience. Bearing this in mind, the Board have left the departments full-handed; nevertheless, they are keeping distinctly in view the policy of the Act—that only the proper number of officers should be employed in the Service which the work to be done demands; and it will be their duty to see that as vacancies arise no unnecessary officers are continued. There are, however, several mechanical difficulties which the Board have to contend with, and it may be mentioned that one obstacle to placing the Service on an economical basis is the smallness of the rooms in which some of the departments are housed. The Board feel quite sure that were the public offices properly constructed for the accommodation of the business to be transacted, the Service could be worked with many less hands than are at present employed.

SECESSIONS FROM SERVICE.

Since the Board were appointed, several competent officers have left the Public Service of New South Wales to join that of a neighbouring colony, having been induced to take this step by the offer of a large increase in salary. The Board regret that they were unable to retain the services of these officers for New South Wales;

Wales; but in no instance, so far as they are aware, will it be difficult to replace the persons who have gone. At the same time, it is admitted that the difficulty or otherwise of replacing lost officers is not the question of chief importance. It is the duty of the Board, and one of their most important functions, to make officers contented with their position, and contentment is only likely to follow just treatment and adequate remuneration. It is obvious, however, that an officer's value to the New South Wales Service is limited by the work on which he can be employed; and he may often have qualifications which cannot be availed of to their full extent in the Public Service of this colony, but which are in demand elsewhere. The Board must necessarily fix an officer's remuneration according to his employ, and it may sometimes happen that they must stand by and see one whom they know to be a good man negotiating with a neighbouring Government for a higher salary than they feel justified in recommending for him. The Board regretted the loss of the fruit expert, whose position they considered was sufficiently paid at £400 a year and quarters. With this remuneration the officer himself was satisfied; but an offer of £600 a year on the part of the Queensland Government for the performance of more responsible work secured him for that colony, and the Board were unable, even if they had been willing to do so, to compete with the Government of the northern colony for his services, as they considered that there was no post in the Agricultural Department of New South Wales which the fruit expert could fill and which they could conscientiously grade at £600 a year.

There is always a temptation on the part of a colony beginning to establish a Public Service to turn to a long-established Government like that of New South Wales for recruits, and it necessarily follows that the officers so recruited will be of more value to the colony which is seeking to secure their services than to that which they are induced to leave. The part of the Public Service under the jurisdiction of the Board has not been the only one from which officers have been tempted to leave for other colonies, as it is a matter of common knowledge that in the middle of the current year at least one hundred officers of the Railway Department were induced to quit the service of the Commissioners for employment in Western Australia at higher remuneration than they were receiving in New South Wales. The Board hope, however, that the conditions which now obtain in the Public Service, and the prospects which every good man has of bettering his position and ultimately obtaining a high place in the Service, will be sufficient inducement for officers to remain at their posts, while it is not likely that the demand for officers from New South Wales will long continue.

SUPERANNUATION FUND.

The Civil Service Fund has been subjected to actuarial examination on three occasions. The first examination was made by Mr. Richard Teece, and showed a deficiency of £1,325,706; the second examination was made by Mr. Trivett, and showed a deficiency of £1,592,568; while the examination of Mr. Coghlan, now a member of the Board, disclosed a deficiency to the extent of £2,905,199.

The Public Service Act made very considerable changes in the working of the Superannuation Account. In the first place, section 62 gave all officers then contributing to the Fund the privilege of saying whether they would continue their contributions, or whether they would cease and allow the amount they had paid into the Fund to remain to their credit and bear interest at the rate of 3 per cent. until they should absolutely retire from the Service. Under the operations of this clause, 5,249 persons, out of a total of 9,593 contributors, elected to discontinue. A very large proportion of the persons discontinuing were female pupil teachers; indeed, the Department of Public Instruction contributed the largest quota of discontinuants. The number of persons in each Department who took advantage of the provision of section 62, and ceased to contribute, was as follows:—

Colonial Secretary	73
Treasury	144
Public Works	32
Lands	283
Mines	84
Public Instruction	3,540
Justice	188
Attorney-General	19
Post Office	886
Total	5,249

The effect of the discontinuance of so large a number of persons cannot be exactly stated until another examination of the Fund has been made. This examination it is desirable should be undertaken as soon as possible after the expiry of the period, specified by the Act, during which officers may exercise the privilege of discontinuance, and the Board hope to have the results of the actuarial examination referred to ready for publication early next year. It may here be remarked, however, that the effect of discontinuance has been to relieve the Fund of a very large amount of liability, seeing that the actuarial value of the contributions of nearly all the persons who elected to discontinue was considerably less than the value of the prospective pensions to which they would have been entitled on retirement from the Public Service.

The Superannuation Fund has also received sensible relief from the operation of sections 59 and 62 taken together, as section 59 absolutely suspended the right of superannuation for a period of twelve months in respect of all persons who should be retired by the Board, unless at the date of their retirement they had already attained the pension age. The gratuities payable to persons retired by the Board have been thrown by the Act upon the public revenue; and as no large scheme of retrenchment is ever likely to be again undertaken, it will be seen that by the retirements effected by the Board, numbering 670, which would otherwise have become a charge upon the Superannuation Account, the Fund has virtually been a gainer; for the great bulk of the retrenched persons were those who sooner or later were likely to become pensioners, whereas the contributions which the Fund could have expected to obtain from them were so small in amount as to form but a fraction of the value of the pensions which they would have been entitled to receive.

The retrenchment operations of the Board have thrown on the Fund 62 persons, all over 60 years of age, who are entitled to receive pensions aggregating £10,861 8s. 8d. per annum. The gratuities granted to officers not entitled to pensions amounted to £57,497 18s., payable from the Consolidated Revenue, and £20,873 6s. 5d. in respect of the 4 per cent. deductions, refunded and payable from the Superannuation Account. Thirty-seven persons besides the above elected to retire, 27 being over 60, and the other 10 in ill-health. Their pensions amount to £3,436 2s. 5d. per annum. Ten officers of the Department of Public Works were retired in June, 1895, their offices having been abolished. Their pensions date from the current year, and amount to £1,253 5s. 1d. Only 3 of these were 60 years of age or over.

There is one view of the superannuation question which has not been sufficiently considered. Section 54 of the "Civil Service Act" declares that "if the contributions at the rate of 4 per cent., together with the amount contributed from the Consolidated Revenue, shall appear to be insufficient for the maintenance of the scale of superannuation allowances and gratuities contemplated, then the Governor may make a *pro rata* reduction in all such superannuation allowances and gratuities and such reduction shall apply to the future payments of such as shall have already been granted as well as those which may in future be granted." Notwithstanding the fact that on three occasions the actuaries have reported the inability of the fund to meet existing and prospective pensions, no attempt has been made to enforce the prudent provision just recited. The last actuarial report showed that the funds in hand amounted to £488,653, while the value of pensions already entered upon was not less than £687,659, showing a deficiency of nearly £200,000, without taking into consideration the accrued rights of subscribers to the fund.

Seeing that, if the whole capital of the fund were set aside to meet pensions now being paid, it would be insufficient for the purpose, it becomes a matter of obvious duty to take steps to protect the interests of persons now in the Service.

To bring pensions within the limit of the accumulated fund would involve a reduction of 30 per cent. on all pensions now current or which may hereafter be granted.

The question at once arises, should this relief be sought entirely at the expense of the pensioners, or should the State be asked to bear a share. The Board are of opinion that as the Fund has been very largely used as a means of enabling the Executive to dispense with the services of persons who otherwise might have remained in enjoyment of their full salaries, there is a moral obligation on the part of the State to bear the cost of its own action.

It is well known that the intention of the Government which passed the Act creating the Superannuation Account was to endow it with a sum of £10,000 a year, and the Board consider that the Fund has a very strong claim that this intention should

should be given effect to. The weakness of the Fund is, however, such that this endowment, welcome as it would be, will not bring solvency, and it will be necessary to reduce pensions, as provided by section 54 of the "Civil Service Act." The Board regret to be compelled to have to make such a recommendation, but a reduction of 15 per cent., which is what they propose, in view of the annual endowment just referred to, cannot be looked upon as unduly hard, seeing that no person now in receipt of a pension has paid in contributions a tithe of the value which such pension represents to him. If, however, it becomes a question of hardship, it must not be forgotten that the pensions now enjoyed by retired officers come out of the payments of persons at present in the Service, and it would be a still greater hardship were those who are now contributing to find themselves at the close of their career without any provision for their old age, although during their service they may have paid something like an equivalent for the pension which they hoped some day to receive.

The Board have not yet matured any scheme for the future of the Fund; but they are advised that it is possible to carry out a scheme of superannuation in regard to all new entrants to the Service on the basis of a deduction of 4 per cent. on the amount of the salaries paid to such persons; and in their report on the Superannuation Account, which, as already stated, will be ready for publication early next year, the Board hope that they will be able to present a workable scheme by which persons hereafter joining the Service will have the privilege of insuring their lives with the Fund at a much smaller premium than ordinary life assurance companies could afford to charge, the sum so assured being payable on death or on the assured attaining the age of 65 years, or on retirement before that age—in the latter case the present value of the sum which would have been payable at 65 being given to the assured. In the event of an officer not wishing to insure his life, he might be allowed to contribute to the Superannuation Account for the purpose of securing a pension for his old age. The scheme which the Board have in view will be self-supporting, and will not require to be in any way subsidised by Parliament.

APPEALS.

Section 15 provides that an officer may appeal against his grading or classification, and the Board have received a number of appeals from individuals, as well as some from officers appealing as a class. Considerations of convenience led them to deal with applications from officers appealing in classes before turning to individual cases. They have, therefore, heard and determined the appeals in respect to the officers and attendants in the Department of the Inspector-General of Insane, and to the teachers employed in the Department of Public Instruction; and they have now under consideration individual cases. As, however, the proper consideration of many of these appeals requires that the Board should visit the country, it has been decided that in all but exceptional cases the individual appeals shall remain over for consideration until the Board have had an opportunity of examining the officers in the country districts. This examination they have already begun.

EMPLOYMENT OF WOMEN.

Section 35 requires that the Board shall make regulations facilitating the employment of women where it is desirable to make use of their services. The employment of women in the public departments involves many considerations besides their actual capacity for clerical and professional work, and in the face of more pressing business the Board have allowed the settlement of the matter to remain over until they have had an opportunity of making a special investigation into the question. So far, therefore, they have not taken the steps required by law for the framing of regulations in regard to women. They have, however, decided that the switchboard attendants in the Telephone Department shall be exclusively females, as it is found that in these positions girls are superior to young men; and they have also decided that the appointment of women as typewriters shall in future be encouraged as far as possible. But these two pursuits do not in any way indicate the limits of employment for which the Board think that women are eligible; on the contrary, they do not see any reason why the intentions of Parliament with respect to the employment of women in public offices should not receive a wide interpretation. It is found that females may be very successfully employed in the drawing offices and in many forms of clerical work; and carrying out what they conceive to be the policy of the Act, the Board will endeavour to frame regulations which will permit of the employment of women in these branches of the Service.

CHANGES

CHANGES NECESSARY FOR IMPROVED WORKING OF SERVICE.

By section 18 the Board are required to indicate the changes and measures necessary in their opinion for the improved working of the Public Service. They have, therefore, to report that it will be desirable to entirely remodel the Department of Public Stores. An important saving has already been effected in this department; but the Board have in view a scheme which will make a complete change in the Stores Branch, and by which they hope not only to save a large additional sum, but to secure a better supply of stores, and generally an arrangement that will be more satisfactory to the departments supplied.

The Board consider that the method of working the public accounts is susceptible of very great improvement; and they are disposed to think that the present practice of maintaining separate accountancy branches in the various departments for the payment of money to contractors and other public creditors is a mistake, and that the whole of the pay branches could be amalgamated under the Treasurer. By such an arrangement the Board see that greater efficiency would be ensured, while at the same time a very considerable saving in the public expenditure would be effected. Even if the present system be continued, there is a considerable degree of duplication and unnecessary labour in various departments which might be avoided. It is found that accounts are kept in some sub-departments, and also in the Ministerial Department to which such sub-departments belong. These accounts are to some extent also kept in the Treasury and in the Audit Department, and the Board hope, by doing away with unnecessary repetition of work, not only to render the payment of accounts more prompt, but to save a considerable sum in clerical salaries.

The Board have also in view the simplification of other departmental work which they find is at present done several times over in various departments. As an example of this, it may be mentioned that the Crown Lands Agents keep complete sets of books regarding transactions in respect to conditional purchases. The revenue branch of the Treasury Department also keep very elaborate books in regard to the payments of conditional purchasers, while the Lands Department, at its head office, likewise keep such books, although not precisely on the lines followed by the Treasury; and, over and above this, the Audit Department has books designed to check the payments of instalments made by Crown debtors. There can be no question that these four sets of books can be greatly simplified; and the Board are of opinion that it will be sufficient for the public business if, in addition to the ordinary accounts of the Crown Lands Agents, one set of books be kept in Sydney, the other two sets being abolished and the staffs now engaged thereon more profitably employed.

There are other arrangements which the Board consider ought to be made in regard to the management of the public departments, but the carrying into effect of such rearrangements would be largely a question of policy for the Government, and consequently outside the purview of the Board. It is, therefore, thought that it will be sufficient to indicate the nature of these changes, and leave the desirability of carrying them out to be considered by the Government.

The accounts of the military forces might be amalgamated with those of the Military Secretary. By such an amalgamation increased efficiency can be obtained at a saving of £1,500 per year.

The Registrar-General's Department might be transferred to the Department of Justice, to which it more properly belongs. This transference would give relief to the Department of the Chief Secretary, which is burdened with more work than can be properly attended to by one Minister.

The Public Watering Places and Artesian Bores Branch of the Mines Department might properly be attached to the Works Department, the works when constructed being handed over to the Stock Branch.

The Conservation of Forests is a work which properly belongs to the Lands Department; indeed, the statutory powers under which the forests are conserved are included in the various Lands Acts.

Similar anomalies occur in connection with the administration of Public Parks and Reserves for public recreation.

The

The Botanical Gardens, the Domain, the National Park, and the Centennial Park are at present in the charge of the Chief Secretary, although the control of the Centennial Park is by the Act 51 Vic. No. 9 vested in the Premier. As the Statutes which provide for the regulation and care of parks or recreation reserves, other than the Centennial Park, are administered by the Department of Lands, the duty of controlling all public parks might with propriety be handed over to that Department.

The care of Public Cemeteries is at present divided between the Lands and Justice Departments, the latter department having the control of the suburban cemeteries, while the former deals with all others. The Board are of opinion that the Department of Justice might with advantage be charged with the care of all cemeteries, and the functions of the Lands Department limited to the procedure requisite for the dedication of the sites.

The administration of the "Animals Infectious Diseases Act," which involves the issue of licenses for the introduction into the Colony of noxious and infectious microbes, and for their propagation and application to various purposes, might be removed from the Department of Lands and placed under the Stock Branch of the Mines Department.

A very important change has already been suggested by the Board to the Government, but so far it has not been adopted. It is considered that the persons charged with the important functions of deputy-registrar of births, deaths, and marriages should in all cases be public officials. At present the connection of many of these deputy-registrars with the Government is merely casual. In consideration of the payment of a fee of two shillings for each entry, these persons undertake to make the necessary registration, and are empowered to marry. As there are public officials in every part of the country to whom these duties could be conveniently assigned, there appears to be no reason why such should not be done. In the metropolitan area the suburban registrations are made by persons who are not absolutely under the control of the Registrar-General; and the Board have formulated a workable scheme by which a more satisfactory arrangement may be brought about, ensuring both economy to the State and satisfaction to the public.

INQUIRIES.

The Board have made three inquiries on oath since their appointment. The first was into a charge of bribery against Mr. H. W. Battye. The offence with which Mr. Battye was charged was alleged to have taken place prior to the passing of the Public Service Act, and it was necessary, therefore, that the Board should be appointed a Royal Commission to investigate the matter. The Board held their investigation at Molong and at Forbes, and after hearing evidence in support and in refutation of the charge, they found Mr. Battye to be guilty of receiving a bribe. Mr. Battye was accordingly removed from the Public Service.

An inquiry was held as to the alleged use of inferior bricks and other material in the carrying out of repairs to Mudgee Gaol. The persons charged were Mr. Roberts, Clerk of Works, and Mr. Little, Overseer. It was found that the charge was not sustained.

An investigation was also held into a charge of malversation on the part of Mr. M. T. Hobday, Sheriff's Officer. The charge was found to be proven, and Hobday's removal from the Service has been recommended.

In the two cases last mentioned the Board delegated their powers to the Chairman, as provided by section 18, and the inquiries were held by Mr. G. A. Wilson, with the results indicated above.

CONTINGENCY VOTES.

The attention of the Board has not been exclusively devoted to the question of salaries paid in the various departments; they have undertaken an inquiry as to the manner in which the contingencies of the departments have been expended. This inquiry is implied and suggested by the terms of section 19; and under this section the Board are required to draw up regulations dealing with the various matters therein enumerated. The field open to the Board in this regard is a very extensive one, and although no definite sum can be named as that which they hope to save, the Board do not think they will be very far out in promising a substantial saving to the general revenue from the contingent votes of the various departments.

EXAMINATIONS.

EXAMINATIONS.

The Board have held five examinations, including an informal examination of clerks hurriedly required in the Land and Income Tax Department.

On the 19th September, 1896, a competitive examination was held for the position of typewriter, at a salary commencing at £75 per annum. There were 27 candidates, of whom Miss Longstaff was the most successful, obtaining 99 marks out of a possible 100.

On the 26th September, 1896, a competitive examination was held for two positions—a chief clerkship in the Supreme Court and a clerkship in the Crown Solicitor's office. To each post a salary of £400 per year was assigned. There were in all seventeen candidates, the most successful being Mr. A. G. Saddington, B.A., appointed chief clerk in the Supreme Court office; and Mr. J. S. Cargill, B.A., clerk in the Crown Solicitor's office. Both these gentlemen are solicitors of the Supreme Court of New South Wales, and the examiners, Mr. James Lang Campbell, barrister-at-law, and Dr. George James Sly, solicitor, have certified that each of the gentlemen named passed the examination in a creditable manner.

The experience which the Board have so far had of competitive examinations warrants them in the supposition that they will have no difficulty in recruiting the Public Service in the manner provided by the Act, and they hope that any other means of filling vacancies will only be resorted to under very special circumstances—where competition is entirely out of the question, or where it would not be the means of effecting a good selection.

An examination was held on 4th September, 1896, for the position of temporary clerks. There were no special vacancies to be filled, but as the work in connection with the Land and Income Tax was urgent, the Board thought it desirable that a large number of persons should be employed to push it on. Three hundred and fifty persons presented themselves for examination, and of these the examiners, Dr. Morris and Mr. A. E. Hibble, were only able to recommend fifteen for employment by the Board. Out of the large number of candidates, the great bulk failed to write even moderately well; and as the Board naturally considered that writing should be the first qualification of a clerk, the examiners were instructed not to pass anyone unless his handwriting should be fairly good.

HANDWRITING.

In the course of their examination of the public departments, the Board were very much struck with the entire unfitness of many officers for the performance of clerical duties. A large proportion of the public servants engaged in clerical occupations have not been trained as clerks, and having joined the Service at an age when such training has become practically impossible, their work, especially as far as handwriting is concerned, is, the Board regret to say, distinctly inferior. It is one of the objects which the Board have placed before them, to secure a high class of handwriting throughout the Public Service, and in the examinations which they propose to hold they have decided that, unless his handwriting is up to their standard no person shall be admitted to competition.

APPOINTMENTS WITHOUT EXAMINATION.

Section 30 of the Public Service Act declares that if in any special case it is expedient or desirable in the interests of the Public Service to appoint some person who is not then in the Service, such person may be appointed without either examination or probation, provided that no such appointment shall be made until the Board have been informed of the proposal to make such appointment, and have reported whether in their opinion there is any person in the Service capable of filling the position to which it is proposed that the appointment shall be made.

A barrister being required to act as Secretary to the Attorney-General, the Board recommended the appointment of Mr. Hugh Pollock, barrister-at-law, at a salary of £650 a year, no person in the Service having the qualifications required for the position, and a competitive examination being out of the question.

An Examiner of Mines being required in the Mines Department, the Board selected for the position Mr. Henry Hooke. Mr. Hooke had already submitted himself to competitive examination before the Board's appointment, and on two occasions

occasions passed second out of 47 candidates, the most successful in each case having received an appointment; and it seemed to the Board that the requirements of the Act had thus been sufficiently complied with.

Including the officers just mentioned, the following is a list of persons not in the Public Service who were recommended by the Board for appointment to the Professional Division of the Service without examination. It will be seen that in all cases the appointments were to posts requiring technical knowledge which no written examination is likely to bring out, and where the Board had to be guided in a large degree by the testimonials of applicants and their demeanour under *viva voce* examination. The Board was not able to find persons in the Service competent to fill the vacancies named:—

Office.	Salary.	Name of Person appointed.
Junior Medical Officer, Hospital for Insane, Gladesville.	£ 300	C. A. Hogg, M.B.C.M., Edin.
Secretary to the Attorney-General	650	Hugh Pollock.
Dispenser, Goulburn Gaol	100	Otto Bergmark.
Inspector of Mines	245	Henry Hooke.
Government Printer	800	W. A. Gullick.

So far as the Board are aware, one appointment only has been made under section 30 apart from their recommendation. The Attorney-General having reported to the Board that a managing clerk was necessary in the office of the Crown Solicitor (Common Law Branch), and the Crown Solicitor having reported to them that there was no one in his department qualified for the post, the Board, guided by Mr. Colquhoun's certificate, informed the Attorney-General that in their opinion there was no one in the Service capable of filling the position of managing clerk of the Crown Law Branch of the Crown Solicitor's Office, and accordingly the Attorney-General appointed to the post Mr. J. V. Tillet. In his communication to the Board, the Attorney-General declared that the filling of the office was a matter of very great urgency; otherwise, in accordance with the spirit of the Act, the Board would have considered it incumbent upon them to hold a competitive examination for the post.

The most frequent applications to the Board for appointments are from persons coming under the General Division of the Service. The Act contemplates that regulations shall be framed under which all appointments of this class shall be made. The Board have almost completed regulations dealing with the Dredge Service and the General Post Office, and they are preparing regulations for other general appointments. When these have received the Governor's approval, all appointments to the Service will be regulated by fixed rules and open to all applicants of suitable age, and thereafter patronage of all kinds will cease, so far as the departments are concerned over which the Public Service Board exercise jurisdiction.

The following persons, not in the Service, were recommended by the Board for appointment to the General Division. In the cases marked, the services of the persons named are only partially at the disposal of the departments:—

Office.	Salary.	Name.
Housekeeper, Hawkesbury Agricultural College	£ 132 less £60 for quarters, &c.	Mrs. Catherine Richardson
Matron, Hospital for Insane, Newcastle	140 less £55 for quarters, &c.	Miss Mary Newton
Court-cleaner, Tuena	7	Mrs. Lily Deane*
„ Lismore	20	Mrs. Catherine Mann*
„ Burrowa	20	Jane Foster*
„ Murwillumbah	10	Mrs. Ellen J. Byrne*
„ Nymagee	7	Aminda Young*
„ Lithgow	17	Maria Atkinson*
„ Moss Vale	10	Laura Torpey*

* Partially employed.

The Board cannot close this Report without expressing the sense of obligation under which they lie to their colleague, Mr. T. A. Coghlan, who is at present on leave of absence, for the able counsel and valuable assistance at all times rendered by him to the Board in the discharge of the important duties entrusted to them, and for the share he took in the work of reorganising the Public Service.

GEO. A. WILSON, }
J. BARRLING, } Members of the
Public Service Board.

Inasmuch as the work of grading and reorganising the Departments was virtually over before my appointment as a Deputy Member of the Board, I am not in possession of all the facts on which the observations relating to the condition of the Service are founded. I have, however, every reason to suppose that had I had the same opportunities as the Members of the Board, my conclusions would have been the same as are embodied in this Report. With the arrangements and proposals for the reorganisation of the Service, and other recommendations and suggestions contained in the Report, I entirely concur.

W. HOUSTON, { Deputy Member of the

CIVIL SERVICE.

(REPORT OF ROYAL COMMISSION APPOINTED TO INQUIRE INTO CASE OF MR. CHARLES HERBERT BATTYE, INSPECTOR OF CONDITIONAL PURCHASES, CHARGED WITH HAVING ACCEPTED A BRIBE.)

Printed under No. 3 Report from Printing Committee, 4 June, 1896.

To His Excellency the Right Honourable HENRY ROBERT, VISCOUNT HAMPDEN, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies :—

MAY IT PLEASE YOUR EXCELLENCY,

We, Her Majesty's Commissioners, appointed by Letters Patent, under the Great Seal of the Colony of New South Wales, dated the seventeenth day of March, 1896, to inquire concerning the case of Mr. Charles Herbert Battye, Inspector of Conditional Purchases of the Orange District, who is charged with an offence committed prior to the passing of the Public Service Act of 1895, namely, the acceptance of a bribe, have the honor to submit to your Excellency the following Report :—

GENERAL STATEMENT OF THE CASE.

Charles Herbert Battye, who, in consequence of the charge which has been preferred against him, is at present suspended from duty as Inspector of Conditional Purchases for the Orange District, was, in the course of the year 1893, required to report to the Minister for Lands on the *bona-fides* of certain selections taken up on Nanima Run, then held by Mr. Frank Thomas Jenkins, subject to mortgage to the Union Bank of Australia. Mr. Battye's report was favourable to the occupiers.

In the month of May, 1895, the wife of Mr. Jenkins, who at that time had lost the run by foreclosure on the part of the Union Bank, wrote to the Minister for Lands informing him, amongst other things, that the Inspector of Conditional Purchases (Mr. Battye) had been bribed, by the payment of £35 down, with the promise of an additional sum of £15 should the selections be finally passed, to report favourably in the case. These serious allegations were communicated to Mr. Battye, who replied that there was absolutely no truth in them, and asked that an inquiry should be made into the charges in order that his integrity might be vindicated.

The Local Land Board accordingly held an inquiry, with the object of eliciting whether there was any ground for the inference that the conditional purchasers had made false declarations when they made application for the land. The evidence forthcoming was such as to cause counsel for the selectors to retire from the case, and to seriously compromise Mr. Battye. In

In view of these developments the Minister for Lands suspended Mr. Battye from duty, and ordered him to show cause why he should not be dismissed from the Public Service. His reply was a demand, conveyed through his solicitors, that another and a more complete inquiry should be held into the circumstances of the case. Mr. Battye was then informed that he must either himself explain or state that he relied on the explanation of his solicitors, and consequent on this Mr. Battye wrote to the Clerk of the Executive Council in the following terms:—

The Clerk of the Executive Council, Executive Council Office, Sydney,—

Orange, 27 November, 1895.

Sir,

Re my Suspension.

With reference to your letter of 26th inst., I have to inform you that A. H. Brown, late manager of Nanima Holding, offered to give me a cheque for £50 if I would make a favourable report in respect of certain selectors on Nanima Holding. I absolutely refused to accept the cheque. As a matter of fact, I did not then nor did I subsequently see anything which would warrant me making anything but a favourable report in respect of the said selectors.

Subsequent to the above-mentioned offer a cheque for £25, drawn by Nicholas Osberg, a store-keeper of Eugowra, who, I knew, supplied the Nanima Holding with stores, was forwarded under registered cover to me at Orange. I was away from Orange at the time, but my wife opened the envelope and forwarded the cheque to me at Cowra, where the Land Board was sitting.

Concluding, from the fact that Brown had already made overtures to me, that the cheque had been forwarded on Brown's behalf, I made a point of seeing and handing him the cheque drawn by Osberg.

Osberg swore at the inquiry lately held in Forbes regarding the Nanima selections that Brown gave him £25 in cash, and requested him to draw his (Osberg's) cheque for £25 in my favour and to forward same to me.

At the same inquiry Brown admitted that I returned him the said cheque for £25.

Brown, subsequently to inducing Osberg to forward cheque to me and to the time when I returned cheque to him, wrote and requested me, *as he was in trouble with the Bank* (the Bank having called upon him to account for a cheque for £35), to write and acknowledge that I had received from him a cheque for £35—that is, a cheque for £10 *more* than the cheque he caused to be forwarded to me, and which I returned him.

I have been since informed that the Bank indemnified Brown from any proceedings whatever by them against him in consideration of his giving evidence on their behalf at the inquiry lately held at Forbes.

In conclusion, I absolutely deny that I have received any bribe—monetary or otherwise—from any person in the conduct of my duty.

I am prepared to substantiate the above statements by my statutory declaration, or by my affidavit, if the Executive Council should consider it necessary.

I have, &c.,

CHAS. H. BATTYE.

Mr. Brown was then called upon to make a statutory declaration in support of certain statements he had made in regard to Mr. Battye at the inquiry held by the Land Board. He did so, and a copy of the document was sent to Mr. Battye, who gave a further denial to the charges.

In January of the present year the case was referred by the Minister for Lands to the Public Service Board. As, however, the offence with which Mr. Battye was charged was alleged to have taken place prior to the appointment of the Board, the members had no power to deal with it, and accordingly for the purpose of making an investigation into the truth of the charges against Mr. Battye they were appointed a Royal Commission under Act 44 Victoria No. 1, intituled "An Act to regulate the taking of Evidence by Commissioners under the Great Seal."

THE INQUIRY BY ROYAL COMMISSION.

Our inquiry was opened in the Court-house at Molong, on Thursday, the 26th March, 1896, and was continued at Forbes on the two following days.

In all, there were examined fourteen witnesses, some of whom were required to submit to re-examination.

The

3.

The evidence given by some of the witnesses was very conflicting, and gross perjury was committed on one side or the other.

Mr. Battye admitted that on three occasions he was approached by Mr. Brown, and offered money in connection with the putting through of the selections; first, on the Nanima Run, where the amount mentioned was £50; second, after the lapse of three months, by means of a cheque for £25 which came by post to him at Orange; and third, at Canowindra, where Brown offered him a sum in cash.

The cheque for £25 was drawn by Mr. Nicholas E. Osberg, a storekeeper at Eugowra, and at Mr. Brown's request was posted to Mr. Battye at Orange. When the letter arrived Mr. Battye was attending a sitting of the local Land Board at Cowra, and in his absence Mrs. Battye opened the envelope and then sent on the cheque to her husband. Instead of reporting this serious attempt to sap his integrity, either to the Under Secretary for Lands or to the local Board at whose deliberations he was then assisting, he retained the cheque in his possession for some days. As to the feelings with which he received this attempt to drag him from honorable courses, Mr. Brook, deposition clerk—who, it must be noted, was specially called by Mr. Battye himself to prove that such a conversation had taken place between them—stated that Battye showed him the cheque and consulted him as to the propriety of his retaining it, knowing well that it was sent to him by way of a bribe.

That Battye did keep the cheque for some days is admitted by himself. He went, he says, from Cowra to Meadowbank in order to see Brown, so that he might return the cheque to him if he should find that Brown had sent it. He apparently had no scruples about accepting the hospitality of the man who, he says, had insulted him; he stayed in Brown's house over night, and in the morning drove to Canowindra in Brown's buggy. It may be here noted that, according to his own evidence, Mr. Battye never thought of going to the drawer of the cheque, Mr. Osberg, to inquire the reason of its being sent, but concluded at once that it came from Brown, although the conversation in regard to the Nanima selections had occurred three months before, and, he and his wife state, there was nothing in the envelope covering the cheque or on the cheque itself that would connect it with Brown. But Brown and Osberg both assert that a slip was enclosed with the cheque, and the former makes the further assertion that Battye's visit to Meadowbank was for the sole purpose of turning the cheque into cash.

When Canowindra was reached, Brown, who drove Battye, desired to cash the cheque at the Commercial Bank, but the Manager informed him that as it was crossed it would be necessary for Brown to open an account, pay the cheque to his credit, and then draw the money out again by means of his own cheque. This was done, and notes for £25 were received. Brown and Battye afterwards met at Clyburn's Hotel, where the former tendered the notes to the latter. So far they are agreed; but at this point Brown says Battye took the notes, Battye says he refused them.

Here should be noted a circumstance which throws grave doubt on Battye's evidence. Although he admits that he went from Cowra to Nanima on the 26th July, and from Nanima to Canowindra on the following day, his movements are not set down in his progress report or field-book. On the contrary, the entries in his progress report indicate that on the day on which he actually proceeded to Nanima he was supposed to be inspecting some selections twenty-nine miles from Cowra in an opposite direction. When asked to explain this discrepancy, he stated that in consequence of his indisposition he had requested a friend to write the progress report,

report, and that the entries had been incorrectly copied from the field-book. An examination of this book, however, showed that the entries in the report were an accurate transcript of those set down originally in Battye's own handwriting; his own admissions prove, therefore, that the report of his movements on the day in question was in both cases false.

In contrast to this damaging evidence, that given by Brown was clear and consistent throughout, and showed no trace of animus. In view, therefore, of the following facts:—

- That on three separate occasions Brown attempted to bribe Battye;
- That Battye retained for some days the cheque for £25, instead of reporting the matter to his superior officers;
- That Battye did not attempt to find out from Osberg, the drawer of the cheque, the reason of its being sent to him, although, as he states, no slip was enclosed with it;
- That after receiving the cheque (the second attempt to bribe him), Battye visited Brown and accepted his hospitality, staying with him over-night and driving off in his buggy in the morning;
- That Battye consulted with his friend Mr. Brook as to the propriety of retaining money admittedly coming to him by way of a bribe;
- That Battye made a false entry in his field-book and caused a false entry to be made in his progress report; and
- That Battye reported favourably on the selections under circumstances of grave suspicion;

We are forced to the conclusion that the charge against Charles Herbert Battye, namely, the acceptance of a bribe while acting in his official capacity as Inspector of Conditional Purchases, is proved.

With this Report we forward, for your Excellency's information, the evidence taken by us and the exhibits produced in the course of our inquiry.

Certified under our hands and seal, this eleventh day of May, 1896.

Totals	8,429	8,371	128	186

(*a*) This return does not include warders, &c., who are appointed by the Heads of the Charitable Institutions and Hospitals for the Insane.

(*b*) Sixty-seven persons, most of whom are employed temporarily in the new Land and Income Tax Department, are included in this increase.

(*c*) Does not include warders who are appointed by the Comptroller-General.

(*d*) This return includes staff of the new Department of Labour, but does not include school-teachers who graduate from pupil-teachers, nor are the latter included.

(*e*) Since the Government accepted office twenty-four officers of the Water Conservation Branch were transferred to this Department, thus accounting for the increase. This return does not include labourers or those engaged in forest-thinning operations.

(*h*) Most of these appointments were made at the minimum salary of 10s. per week.

NOTE.—The whole return shows an actual decrease in the service of fifty-eight persons since the present Government came into office up to the date of the appointment of the Public Service Board.

* Previously employed in line-repairing gang. † Non-official Postmaster
Of the above about seventy-seven were appointed to fill vacancies and thirty-three were new appointments.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

APPOINTMENTS TO THE CIVIL SERVICE.

(AMENDED RETURN, TOGETHER WITH CORRESPONDENCE IN CONNECTION WITH.)

Printed under No. 23 Report from Printing Committee, 22 October, 1896.

AMENDED RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 25th June, 1896, That there be laid upon the Table of this House,—

“ A Return of all appointments to the Civil Service (not being promotions) since the accession to power of the present Government.”

(*Mr. Schey.*)

J. Johnston, Esq., to The Under Secretary for Finance and Trade.

Department of Public Works, Sydney, 1 September, 1896.

Subject :—Parliamentary Return.—Appointments to the Civil Service.

REFERRING to the above it seems to me that, before I can do anything with it, it will be necessary for you to furnish me with definite rulings on the following points, *viz.* :—

Firstly,—What is the correct interpretation of the words “ All appointments to the Civil Service ” ?

The Chief Secretary gives a return of thirty-four appointments under the Chief Electoral Officer, but of these nineteen are “ Deputy Registrars ” at a merely nominal salary of £2 or £3 per annum. Are such looked upon as “ Appointments to the Civil Service ” ?

Again, the Public Instruction Department includes in its return persons employed as “ Gangers ” at Centennial Park, drawing a wage of 6s. per day. If “ Gangers ” are appointments, why not also the “ Labourers ” ? The “ Ganger ” of one week is very likely to be a “ Labourer ” the following week. The Public Works Department does not return such as “ Appointments to the Civil Service. ” If it were to do so in respect of all the works under its control, its list of appointments would soon reach the dimensions of a good-sized army. On the other hand, the Mines Department omits from its list “ persons taken on casually as Caretakers of Tanks, ” while the Public Works Department includes appointments of a somewhat similar character, such as “ Bridge Overseers ” and others, who are taken on for a particular job, but are dispensed with when the work is finished.

Secondly,—Are appointments made by the Public Service Board to be included ? Most Departments do include them, but the Lands Department expressly omits them.

Thirdly,—I submit it is a one-sided and misleading return which gives “ Appointments ” only, and that, in order to furnish a correct answer to the question asked, the “ Retirements ” during the same period should also be shown. For instance, the Taxation Commissioners return 117 appointments, but at the date of the return fifty-nine of these were no longer in the Service. Other Departments may be able to show “ Retirements ” equal in number and salaries to the “ Appointments, ” and it is but just that they should be shown side by side.

JAMES JOHNSTON,

1/9/96.

I am of opinion that “ Deputy Registrars ” at £3 per annum cannot be regarded as coming within the meaning of the words “ Appointments to the Civil Service, ” nor do persons, such as “ Gangers, ” receiving daily wages ; but perhaps it would be desirable to ask Mr. Schey for an interpretation of the words. The “ Retirements, ” I consider, should, undoubtedly, be shown to make the return complete.—F.K., 1/9/96.

The expression “ All appointments to the Civil Service ” clearly only includes “ permanent clerical and professional appointments. ” The return to stop when the operations of the Public Service Board began.—G.H.R.

Dear Mr. Johnston,

The Treasury, N.S.W., Sydney, 3 September, 1896.

With reference to your minute, dated 1st instant, *re* Parliamentary Return—Appointments to the Civil Service, I beg to inform you that I submitted the points raised by you to the Honorable the Premier, who states that the expression "All appointments to the Civil Service" clearly only includes "permanent clerical and professional appointments." The return to stop when the operations of the Public Service Board began.

Yours faithfully,

F. KIRKPATRICK.

J. Johnston, Esq., to The Under Secretary for Finance and Trade.

Minute Paper.

Subject :—Appointments to the Civil Service from 3rd August, 1894, to 25th June, 1896.

Department of Public Works, Sydney, 19 October, 1896.

HEREWITH I beg to hand you the *Revised* Return, which has been compiled on the lines laid down in your letter of the 3rd ultimo (P.O. 2,455), and after personal consultation with the several departmental heads or other responsible officers.

As compared with the *Original* Return, it shows a net decrease in the number of appointments of 272, of which the greater proportion is made up by the elimination of those casual and purely ephemeral appointments, numbering some 211, which could only, by a severe straining of the meaning of the term, be looked upon as *appointments to the Civil Service*.

The notes appended to the various returns will explain what classes of appointments have been excluded.

In addition to the appointments, I also furnish a return of the *retirements* for the same period, this supplementary return being, I submit, absolutely necessary in order to properly exhibit the workings of the Service.

From the "Summary" it will be seen that while the appointments totalled 461, with aggregate annual salaries of £44,789, the retirements during the same period amounted to 693, with aggregate annual salaries of £117,891. There was, therefore, on the 25th June, 1896, as compared with 3rd August, 1894, a decrease of 232 in the number of the staff, and of £73,102 in the amount of annual salaries.

As showing the great difference in status between the appointments and retirements, the average annual salary of the former (although including such salaries as £1,000 for Chairman of Public Service Board, £800 for Taxation Commissioner, and £400 for Secretary to Public Works Committee) is only £97, while that of the retirements mounts up to £170.

JAS. JOHNSTON.

[*Enclosure.*]

ADJUSTMENT between "Original" and "Revised" Returns of Appointments to the Civil Service, from 3rd August, 1894, and 25th June, 1896.

"Original" Return—Number of appointments	733
<i>Deduct</i> —	
Casual appointments of Nurses, Attendants, Seamen, and others, made by Heads of Departments, irrespective of Ministers; and of Deputy Registrars, Chaplains, Technical Instructors, and others whose services are only partially at the disposal of the Government, viz. :—	
Botanic Gardens	2
Electoral Office	24
Medical Adviser	39
Charitable Institutions	40
Lunacy	29
Government Printer	8
Board of Health	9
Marine Board	11
Justice	16
Public Instruction and Labour	30
Mines and Agriculture	3
	211
Appointments made by Public Service Board—	
Land and Income Tax	34
Public Works	11
Postal and Electric Telegraph	19
	64
Transfers from other Departments and errors—	
Treasury, 1; Land and Income Tax, 1	2
Attorney-General, 1; Justice, 1	2
Mines, 1; Public Instruction, 1; Postal, 1	3
	7
	282
<i>Add</i> —	
Appointments omitted from "Original" Return—	451
Public Service Board	1
Public Works Committee	1
Government Statistician, 2; Attorney-General, 1	3
Public Instruction, 4; Postal, 1	5
	10
"Revised" Return—Number of appointments { 27 Permanent	461
{ 434 Temporary	
Showing net decrease in number of appointments as compared with "Original" Return	272

JAS. JOHNSTON,
19/10/96.

RETURN

RETURN Amending and Correcting (for reasons stated in the attached correspondence) the Return of Appointments to the Civil Service, ordered on 25th June, 1896, and ordered to be printed 23rd July, 1896.

Appointments to, and Retirements from, the Civil Service, from 3rd August, 1894, to 25th June, 1896, exclusive of those effected by the Public Service Board.

CIVIL SERVICE.
(RETURN RESPECTING)

Printed under No. 5 Report from Printing Committee, 18 June, 1896.

[Laid upon the Table of the House in answer to Question No. 22 of the 3rd June, 1896.]

Question.

(22.) VACANCIES IN THE LANDS DEPARTMENT:—MR. COPELAND asked THE SECRETARY FOR LANDS,—Will he have any objection to lay upon the Table a return with respect to the Lands Department, showing the number of vacancies which occurred in said Department between the 23rd October, 1891, and the 2nd August, 1894, and the like information for the period between the 3rd August, 1894, and the 3rd June, 1896, giving the names and salaries, also the cause of such vacancy, whether by death, resignation, dismissal, or other cause, in each case respectively?

Answer.

Name.	Salary.	Position.	Death.	Retired.	Transfer	Resignation.	Dismissal.

1896.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CLAIMS OF CAPTAIN ROSSI.

(PETITION FROM FRANCIS ROBERT LEWIS ROSSI, CAPTAIN VOLUNTEER FORCE, OF ROSSVILLE, GOULBURN, PRAYING THE HOUSE TO APPOINT ANOTHER SELECT COMMITTEE TO INQUIRE INTO AND REPORT UPON HIS CLAIMS.)

Received by the Legislative Assembly, 2nd June, 1896.

To the Honorable the Speaker and the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of Francis Robert Lewis Rossi, Captain Volunteer Force, of Rossville, Goulburn,—

HUMBLY SHOWETH :—

That your Petitioner, in the year one thousand eight hundred and seventy, was appointed to an office in the Civil Service as Registrar of the District Court, Goulburn, at a salary of £300 per annum; that salary was, before the expiration of one year, reduced to £75 per annum.

That your Petitioner's continuation in office was the result altogether of the invitation of the head of his Department—Sir James Martin—and of the assurance of the expectation that your Petitioner's salary would be restored, and a sum given "to make good to him the difference between the £75 voted and the amount originally proposed," and your Petitioner was asked by Sir James Martin "if he would continue to hold office in this expectation."

That your Petitioner remained in the office until the end of one thousand eight hundred and eighty at such reduced rate (receiving throughout that time repeated assurances that the promises held out would be fulfilled), at which period he was deprived altogether of the office which he had so long honorably filled, and the duties pertaining to which he had faithfully performed.

That after your Petitioner's removal from office his claim was again and again admitted by the Minister, on behalf of the Government, and repeated assurances were given that his case was under consideration, and that he should receive the first suitable vacancy that occurred.

That notwithstanding these assurances no suitable position was offered to your Petitioner.

That matters remained in this state, the promises during the while being kept alive, until September, one thousand eight hundred and eighty-seven, when your Honorable House appointed a Select Committee, "with power to send for persons and papers, to inquire into and report upon the claims of Captain F. R. L. Rossi." That such Committee sat and investigated your Petitioner's claims as required of them, and reported as follows :—

"Your Committee having examined the witnesses named in the list (whose evidence will be found appended hereto), and carefully considered the Return to Address referred to them, find,—

"That Captain Rossi has been reduced from £300 per annum to £75, which office he held for nine years, and that promises of restoration of salary and position have been repeatedly made by various Governments.

"Your Committee seriously recommend the Government to favourably consider his case, and make such retribution as his case deserves."

That notwithstanding such report and recommendation, nothing has been done to satisfy your Petitioner's claims.

That, therefore, your Petitioner humbly prays that your Honorable House will appoint another Select Committee of your Honorable House to inquire into and report upon his claims, as your Petitioner is informed and believes that such finding of the Select Committee above referred to has lost force and is in no way binding upon your Honorable House by reason of its having been appointed by a previous and now defunct Parliament.

And your Petitioner, as in duty bound, will ever pray.

F. R. L. ROSSI,
Captain,
2/6/96.

LEGISLATIVE ASSEMBLY.

VOTES NO. 34. TUESDAY, 28 JULY, 1896.

8. CLAIM OF CAPTAIN ROSSI:—Mr. Neild moved, pursuant to *amended* Notice,—
- (1.) That a Select Committee be appointed to inquire into and report upon the claim of Captain Rossi against the Government.
- (2.) That such Committee consist of Mr. Brunker, Mr. Lee, Mr. Waddell, Mr. Morgan, Mr. O'Sullivan, Mr. Cann, Mr. Jessep, Mr. Travers Jones, Mr. Griffith, and the Mover.
- (3.) That all papers and reports in connection with such case be referred to such Committee.
- Debate ensued.
Question put.
The House divided.

Ayes, 28.

Mr. Morgan,	Mr. Chanter,
Mr. Black,	Mr. Smailes,
Mr. Newman,	Mr. O'Reilly,
Mr. Fegan,	Mr. Affleck,
Mr. Wood,	Mr. Ashton,
Mr. Wright,	Mr. A. B. Piddington,
Dr. Ross,	Mr. Davis,
Mr. Lee,	Mr. Watkins,
Mr. H. H. Brown,	Mr. Cotton,
Mr. Rose,	Mr. Barnes,
Mr. Thomas,	Mr. Travers Jones.
Mr. Hughes,	<i>Tellers,</i>
Mr. Edden,	
Mr. Griffith,	Mr. Moore,
Mr. McGowen,	Mr. Neild.

Noes, 26.

Mr. Brunker,	Mr. Harvey,
Mr. Carroll,	Mr. Bavister,
Mr. Mackay,	Mr. Cook,
Mr. Reid,	Mr. Molesworth,
Mr. Raymond,	Mr. Bull,
Mr. Sydney Smith,	Mr. Wheeler,
Mr. Gould,	Mr. Greene,
Mr. Law,	Mr. Nicholson,
Mr. Howarth,	Mr. Wilks.
Mr. Sleath,	<i>Tellers,</i>
Mr. Hawthorne,	
Mr. Hassall,	Mr. Lonsdale,
Mr. McFarlane,	Mr. Watson.
Mr. Nelson,	
Mr. Pyers,	

And so it was resolved in the affirmative.

VOTES NO. 63. THURSDAY, 1 OCTOBER, 1896.

11. CLAIM OF CAPTAIN ROSSI:—Mr. Jessep, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 28th July, 1896, together with Appendix. Referred by Sessional Order to the Printing Committee.

1896.

CLAIM OF CAPTAIN ROSSI.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on 28th July, 1896, "*to inquire into and report upon the claim of Captain Rossi against the Government,*" and to whom was referred, on the same date, "*all papers and reports in connection with such case,*"—beg to report to your Honorable House :—

Your Committee having examined the witness named in the margin (whose evidence will be found appended hereto) and considered the papers and reports referred to them, find :—

R. L. Rossi.

That Captain Rossi has been reduced from £300 per annum to £75, which office he held for nine years; and that promises of restoration of salary and position have been repeatedly made by various Governments.

Your Committee consider that Captain Rossi has some claim, and recommend his case to the favourable consideration of the Government.

THOMAS JESSEP,

Chairman.

No. 3 Committee Room,

Legislative Assembly,

1st October, 1896.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 30 JULY, 1896.

MEMBER PRESENT :—

Mr. Neild.

In the absence of a Quorum, the meeting called for this day lapsed.

WEDNESDAY, 5 AUGUST, 1896.

MEMBER PRESENT :—

Mr. Neild.

In the absence of a Quorum, the meeting called for this day lapsed.

THURSDAY, 6 AUGUST, 1896.

MEMBER PRESENT :—

Mr. Travers Jones.

In the absence of a Quorum, the meeting called for this day lapsed.

TUESDAY, 25 AUGUST, 1896.

MEMBERS PRESENT :—

Mr. Lee, | Mr. Travers Jones,
Mr. Waddell.

The Clerk read a requisition from Mr. Griffith, Mr. Cann, and Mr. Waddell to the Clerk of the Legislative Assembly, requesting him to call a meeting of the Committee for to-day.

Resolved (*on motion of Mr. Lee*),—That Mr. Jessep be Chairman of this Committee.

Mr. Lee called to the Chair *pro tem*.

Entry from Votes and Proceedings appointing the Committee, and referring all papers and reports in connection with this case, *read* by the Clerk.

Printed copies of the reports and papers referred before the Committee.

Reassembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 15 SEPTEMBER, 1896.

MEMBERS PRESENT :—

THURSDAY, 1 OCTOBER, 1896.

MEMBERS PRESENT :—

Mr. Jessep in the Chair.

Mr. Travers Jones, | Mr. Waddell.

Chairman submitted Draft Report.

Same read and agreed to.

Chairman to report to the House.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

CLAIM OF CAPTAIN ROSSI.

TUESDAY, 15 SEPTEMBER, 1896.

Present:—

MR. O'SULLIVAN, | MR. WADDELL.
T. JESSEP, ESQ., IN THE CHAIR.

Captain Francis Robert Lewis Rossi sworn and examined:—

1. *Chairman.*] The object of this Committee is that you should have an opportunity of making a statement with respect to your claim;—do you desire to submit a statement? Yes; I have drawn up some notes in writing, and with the permission of the Committee I will read them, as follows:—

(Capt.
F. R. L. Rossi.
15 Sept., 1896.

The mere statement, standing alone, that my claim has been going on now for the last twenty-six years is not only misleading but inaccurate. The fact is, the grounds or causes upon which the claim is based began twenty-six years ago. I was Registrar of the Court from 1870 to 1880, and for nearly nine years of that time the salary was at the reduced or smaller amount. Necessarily, then, I applied for its reinstatement, in accordance with the promise held out to me, and the correspondence in this respect in some way or other continued until I was altogether deprived of my office. These "applications" cannot be called making "claims." The truth is this matter first took the form of a claim at the invitation of the then Minister of Justice, who asked me to formulate a claim. This was done in 1880 for the first time, and in such form came before various Ministers, and though dealt with sympathetically generally, it was not brought into final shape for settlement, the general opinion being that to enable the Government to deal satisfactorily with the matter it would be advisable to obtain the opinion of a Select Committee of Parliament. Such Committee was obtained in 1888, and after full inquiry a report was made in my favour. When subsequently the matter came before the House it was lost by the ringing of the "tea-bell," the debate not being resumed. Since then I have, on many occasions, approached the Government, but by some extraordinary ill-luck, as soon as I get the matter before the Minister, and himself inclined to deal with it, some kind of change takes place, leaving me to begin again to prosecute my claim with his successor. Before 1888, when I obtained the Select Committee, both Mr. Slattery and the present Minister, Mr. Gould, were in favour of my obtaining a Select Committee, to report upon my claim, Mr. Slattery being especially anxious to do something for me, but being unable subject to my obtaining a Select Committee report. So the matter goes on until 1895, and I then learn that practically (or technically) the finding of the previous Select Committee is obsolete, so far as this present Parliament is concerned, and to obtain a consideration of my position I must obtain a fresh inquiry at the hands of a Select Committee appointed by the present House. After the finding of the Committee in 1888, as has been shown, the debate was stopped by the ringing of the tea-bell, but I did not allow the matter to rest there. During the Session I lost no opportunity of endeavouring to get the motion restored to the "paper," but without success; it was crowded out. I then sought and had an interview with Sir Henry Parkes, who was then in office, and he assured me the finding of the Committee would be carried out. This was not done, however, before his Government left office. Then came in Sir George Dibbs. I saw this gentleman and placed the matter fully before him. He referred me to his Minister of Justice, Mr. R. O'Connor. I had an interview with the latter gentleman, and he promised to place a sum upon the Estimates to compensate me for my losses; before, however, this could be carried out the Government left office. Mr. G. H. Reid succeeded the Ministry of Sir George Dibbs. I applied to this Government for some settlement of my claim in accordance with the finding of the Select Committee, and thereon saw Mr. Brunker, who requested me to put the matter in writing, and he would bring it before the Cabinet. He did not do so, and Parliament was dissolved. The same Government again came into power—the present one—and to this I have twice applied, without success, for a consideration of my claim. Hence my present action.

2. *Mr. O'Sullivan.*] Is your case fully explained in the report of the previous Committee? Yes, exhaustively so.

3. Do you wish to add anything to that? I have read through that report, and I do not think there is anything to add, except in explanation, as to the cause of delay. I looked upon it that the *onus probandi* rested

Capt.
F. R. L. Rossi.
15 Sept., 1896.

rested with me, because to any person not acquainted with the case it must appear very strange that the claim should have been in a moribund condition for so long a time. The only thing that the Government or anyone else had to complain of was that I was too persistent. If the claim has failed up to the present it is not on account of my sleeping upon it.

4. Have you any further evidence to add to what has been already printed in the report of the previous Select Committee? I do not think that I have. It has been said that I repeatedly refused appointments when they were offered to me. I say most positively that I never had an offer except at Tumut; and three years later, after I had ceased to be Registrar, I had the offer of Clerk of Petty Sessions at Grenfell, as stated by me in the published evidence in 1888. Sir George Innes was then Minister of Justice, and when he understood the facts, as narrated, he said—"The Government will not ask you to go under these circumstances."

5. What is the total amount of your claim? At that time it was made up to £6,000.

6. Is there anything to be added to that amount? The answer I give to that is this: That it is a principle of government that if a claim or debt is recognised reasonable interest is paid. It is no fault of mine that the delay has taken place. I wish to say particularly that I do not find fault with anybody, because I do not believe there was a soul who was desirous of intentionally wronging me. I was the victim of circumstances.

7. Do you still claim this amount of £6,000? I do, on account of its being interest added to the principal.

8. Would you be inclined to compromise with the Government? I did, without prejudice, make an offer to the Government.

9. *Chairman.*] About what time was that offer made? Some time during the present year.

10. *Mr. Waddell.*] What amount did you offer to take? I said to Mr. Reid that the claim up to the present time would be about £8,000, *i.e.*, £6,000 going on from 1888 until 1896. But I said that, without prejudice, I would accept £4,000. I have with me a paper which I submitted to Sir Henry Parkes, and which contains replies to statements made in the House by Mr. William Clarke, then Minister of Justice, which [*see Appendix*] I hand in to the Committee.

11. *Chairman.*] Are you satisfied with the evidence which was placed before the previous Select Committee as giving a fair and complete statement of your case? Yes; I have given sworn evidence as to the verity of the case.

12. Since that evidence was given have you made application to the successive Governments for a consideration of your claim? Yes; that will be seen in the papers which I have produced.

13. *Mr. O'Sullivan.*] How do you make up the amount of £6,000? It includes interest from 1880 up to 1887. Of course it is subject to the correctness of the calculation. I have charged 5 per cent. interest for that number of years. When I went to see Sir George Dibbs, he said to me, "You had better go and see the Minister of Justice, Mr. O'Connor." I went to him, and he said, "I will attend to the matter." Time after time, when I went to him, the refrain was, "I will attend to this matter." At last, when I went to him, he said, "I have been thinking of offering you an appointment." I said, "That is very kind of you; but if you give me an appointment, any payment I get will be for work performed; that will not repay me for the past, and for what I have lost." Then Mr. O'Connor replied, "If you take that view of the matter, I must put something on the Estimates for you." About a month after that date he went to England. Before he returned, or immediately afterwards, the Dibbs Government ceased to exist. Before he went to England, I went to Sir George Dibbs, and he said, "You put in writing what you want, and I will put it before the Cabinet." I did so at his invitation. At that time I proposed to get a portion of my old home, which the Dibbs Government did not intend to use for its original purpose, and I asked that I might receive it in lieu of money. At that time it would have been very acceptable to me. I put my claim in writing; but through the pressure of business, I suppose, Sir George Dibbs never seemed to be able to put it before the Cabinet, and I obtained no satisfaction.

14. *Chairman.*] Did you get a reply acknowledging your request? Yes.

CLAIM OF CAPTAIN ROSSI.

APPENDIX.

[*To Evidence of Captain F. R. L. Rossi.*]

PARLIAMENT OF NEW SOUTH WALES, SESSION 1888. CLAIM OF CAPTAIN ROSSI.

(Hansard, No. 36.)

1. THE HON. MR. CLARKE, on above, says :—

He (Captain Rossi) was offered the position of Clerk of Petty Sessions at Tumut, which he at first accepted ; but afterwards asked leave to withdraw his acceptance in order that he might become a candidate for the position of Police Magistrate at Goulburn.

1. So far from Captain Rossi asking leave to withdraw his acceptance of the office at Tumut, he told Sir George Innes he would go there even at the cost of his life, as he sought for something better, and he feared to be prejudiced if he did not take the office. Sir George Innes made a promise, and placed it on record, in a minute, that if there was a withdrawal it should not be to the prejudice of Captain Rossi.

2. The Hon. Mr. Clarke continues :—

He was also offered the position of Clerk of Petty Sessions at Forbes, at a salary of £260, the position of Clerk of Petty Sessions and Mining Warden at Grenfell, with a salary of £400, both of which he declined.

2. This is an inaccuracy. Forbes or Grenfell was offered—so it cannot be said both were declined. The reply to the offer was that Captain Rossi would have felt it his duty to accept the offer at Grenfell, but the circumstances surrounding it were similar to those which had caused the Minister to relieve him from going to Tumut. He (Captain Rossi) did not refuse.

3. The Hon. Mr. Clarke says :—

Sir George Innes made a minute :—“ I do not feel justified in recommending the placing of any sum of money on the Estimates to compensate Mr. Rossi, nor do I think he has any claim to compensation.”

3. It was, as will be observed on reference to the published correspondence, Sir George Innes who first himself suggested to Captain Rossi that he should state in figures the amount of his claim, and that it was after Sir George Innes received that claim so made out in figures—probably surprised at the amount it had reached—that he wrote the minute.

4. The Hon. Mr. Clarke quotes Sir George Innes, in continuation of above, as saying :—

I may add that I have placed the matter before my colleagues in Cabinet, and they unanimously concur with me in the view I have expressed.

4. However, upon Captain Rossi's reiteration, Sir G. Innes again placed the matter before the Cabinet, who then, upon a clearer view, wrote to inform Captain Rossi (through the Department of Justice) that they acknowledged his claim to a position of £300 per annum ; while Sir G. Innes, at a later date again (as published), wrote that Captain Rossi had strong claims for the higher position he sought.

5. The Hon. Mr. Clarke says :—

The District Court sat only four times a year, and in the intervals Captain Rossi could have engaged in any pursuit that he pleased.

5. The duties demanded Captain Rossi's daily and regular full attendance at the office of Registrar, which he faithfully gave, and during the ten years he never had an hour's leave of absence, as the evidence discloses, without paying a substitute, which had to be sanctioned. It is understood not to be permissible for an officer of the Government to engage in any other paid duties.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 34. TUESDAY, 28 JULY, 1896.

7. EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION BY MR. H. C. L. ANDERSON:—Mr. Lyne moved, pursuant to *amended* Notice,—
- (1.) That a Select Committee be appointed to inquire into and report upon the truth or otherwise of the evidence given on the 11th of March, 1895, before the Civil Service Commission by Mr. H. C. L. Anderson, the Principal Librarian and Secretary of the Free Public Library.
- (2.) That such Committee consist of Mr. Cann, Mr. Henry Clarke, Mr. Hogue, Mr. Russell Jones, Mr. McElhone, Mr. McMillan, Mr. Molesworth, Mr. Sydney Smith, Mr. Wright, and the Mover.
- Debate ensued.
- Question put and passed.

VOTES No. 46. TUESDAY, 25 AUGUST, 1896.

5. EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION BY MR. H. C. L. ANDERSON:—Mr. O'Sullivan presented a Petition from Thomas Michael Slattery, of Sydney, stating that a Select Committee had been appointed by the House to inquire into and report upon the evidence given before the Civil Service Commission by Mr. H. C. L. Anderson; and praying to be represented by counsel or attorney, or in person, before the said Committee, with the right to call witnesses, and to examine and cross-examine all witnesses that may give evidence.
- Petition received.
- Ordered to be referred to the Select Committee.

VOTES No. 51. THURSDAY, 3 SEPTEMBER, 1896.

16. EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION BY MR. H. C. L. ANDERSON:—Mr. Lyne presented a Petition from Henry Charles Lennox Anderson, stating that a Select Committee had been appointed by the House to inquire into and report upon the evidence given before the Civil Service Commission by Mr. H. C. L. Anderson; and praying to be represented by counsel or attorney, or in person, before the said Committee, with the right to call witnesses and adduce evidence, and to examine and cross-examine all witnesses that may give evidence before the said Committee.
- Petition received.
- Ordered to be referred to the Select Committee.

VOTES No. 80. WEDNESDAY, 11 NOVEMBER, 1896.

- [4. EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION BY MR. H. C. L. ANDERSON:—Mr. Lyne, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 28th July, 1896.
- Referred by Sessional Order to the Printing Committee.

**EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION BY
MR. H. C. L. ANDERSON.**

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on 28th July, 1896, to inquire into and report upon the truth or otherwise of the evidence given on the 11th March, 1895, before the Civil Service Commission by Mr. H. C. L. Anderson, the Principal Librarian and Secretary of the Free Public Library,—beg to report to your Honorable House :—

YOUR Committee having examined the witnesses named in the List* (whose *See List, p. 8. evidence will be found appended hereto), find :—

1. That the following appears as a record of the evidence given by Mr. H. C. L. Anderson before the Civil Service Commission on the 11th March, 1895, and contains the principal portions of the statements complained of by Mr. Slattery :—

7253. *Mr. Teede.*] When you were Director of Agriculture did you ever have people thrust upon you against your will? Yes. I submitted a scheme to the Minister by which the Colony should be divided into four parts, and administered by a resident inspector in each division. The first division was the sub-tropical one, from the Tweed to the Clarence, to be in charge of an inspector, who should be an expert in the cultivation of sugar-cane and other tropical plants. Secondly, I proposed that there should be a farming district in New England, to be in charge of an expert in sheep-raising, turnip-growing, and English farming, with its head-quarters at Armidale. The third district was to be the Western Plains, where wheat and sheep are the specialties at present. The fourth division was to be the Coast District south of the Manning, which should have a dairy expert to teach the farmers. I laid this scheme before the Minister, who said it was an excellent idea, but that the country could not afford it. He was willing, however, to start with one inspector. We thereupon advertised for an inspector, and got twenty-six applications, only one of which was good enough to please the Minister, who therefore postponed the matter and made no appointment, nor did he make any provision on the Estimates then being framed. I never heard anything more about it. The Minister (Mr. Sydney Smith) went out of power in October, 1891, and Mr. Slattery came in. One day a gentleman came to me and said, "I want you to appoint my son-in-law inspector of agriculture. He is downstairs, in the Stock Department, earning 10s. a day. He has had great experience down at Fiji." I said, "You must see the Minister. I have nothing to do with it." I hinted that the inspector should be a man of good scientific and practical training. He replied, "It is all right; I will get him appointed." I said, "Don't say that. The Minister will never do it without consulting me." He laughed and said, "I will have him appointed in a few days." Previously to that time no appointment had ever been made in the department without my having been first consulted as to the necessity for the position and the qualification of the candidate. Mr. Smith never appointed even an office boy without conferring with me. A few days after this interview five inspectors of agriculture were appointed, and another appointment was made of inspector of agricultural shows, the last being to fill a vacancy. This man had never seen an agricultural show in New South Wales.

7254. What salary did the inspectors receive? The five new ones, £300 a year each. I had recommended to the Minister that they should have graduated salaries, from £200 to £300.

7255. They were all bracketed at £300 a year? Yes.

7256. And they were not required? No, because they were not agricultural experts; I could not find work for them.

7257. Then men were appointed in the Public Service who were not required? Certainly. If they had been good men they would have been very valuable, and would have done most necessary work. I could have done magnificent work for the Colony with highly-trained practical men, men trained in an agricultural college, with expert knowledge in their respective lines. But the five men were all appointed on the recommendation of political friends—always irresponsible and often incompetent to judge of the candidate's qualifications. I had picked out the eight candidates with the best testimonials, and expected a rigid examination of these candidates and their records before even one should be appointed on probation.

7258. *Mr. Storey.*] Are these men in the department now? One is. The Minister who prepared the Estimates only provided for one.

7259. Are they still in the Service? I do not know if all are. I can give the history of one who is; he charged travelling expenses of 12s. a day on an occasion when I saw him in town. I asked him to explain how it was that he was charging for travelling expenses when he had not left Sydney. He said he had been out of town, and gave me full details of his proceedings on the day in question. I told him to look at his diary. He afterwards confessed that he was not travelling that night on departmental business, and it transpired that he stayed behind a day, sent in a false return to show that he was at Tamworth, falsified his diary, and charged his travelling expenses. I reported him. I said he ought not to remain in our Service. He gave as an explanation that it was an oversight, and it was accepted. He repeated this serious offence within a few weeks, and was then admonished—nothing more. All this can be proved from the papers. He was reported afterwards for drunkenness in my office. Witnesses were not even asked for evidence. His explanation was deemed satisfactory.

7260. *Mr. Teece.*] Is he still in the Service? Yes. He was retrenched from the Department of Agriculture, and soon afterwards appointed to the department in charge of tanks, and I believe he has a farm there in connection with his tank.

7261. You spoke of a gentleman who asked you to appoint his son-in-law inspector? He was not a trained expert in agriculture, but he was a gentleman. I had no trouble with him at all. He did his routine work very satisfactorily, and improved very much in usefulness.

7262. Did he know his business? He was not an expert. Another of the men appointed celebrated his first day in the Civil Service by getting drunk, and came to my office in that state, his excuse being that he had been travelling all night. I told him to go and get sober, which he did. He came back afterwards fairly sober. He was a very intelligent man, and I sent him up the country to represent the department, and visit the farmers to instruct them. He was reported as drunk there. I went into the country to investigate the case, and found he had been beastly drunk for two weeks, and had done no work. I reported him, and recommended that he be dismissed. He was allowed to continue for two weeks longer, and draw his salary all the time, when he resigned. He was not censured, but I was, for suspending a drunken man from duty.

2. That any charge or insinuation, expressed or implied, against Mr. Slattery of improper administration of the department is absolutely without foundation, as will be seen from the following:—

Q. 1455. Whom do you blame, or wish to blame, for ignoring you? The Under Secretary. *I have said over and over again, and I now put it on public record, that Mr. Slattery treated me with the greatest courtesy and kindness. But unfortunately he did not think fit to hold the scales up between us two and decide who was wrong; he always took the part of the Under Secretary.*

Q. 1460. In answering, Mr. Anderson says:—

I disclaim the remotest idea of impugning Mr. Slattery's honor as a Minister, or of insinuating that he appointed men to positions which were not necessary. I have said before, and I say again, that he made bad appointments, and I think on the advice of men who were not competent to express an opinion.

Mr. Anderson withdraws any imputation that the Service was packed, or crammed. Replying to Q. 1459 he says:—

In my evidence before the Royal Commission I was asked (Q. 7294)—During the time you were in the Agricultural Department, were there many other cases of persons being put in your department against your will, or were the ones you mention the only cases that occurred? There were many other cases. I intended that to mean, if it had been amplified, that there were many other cases similar to the ones I had already adduced. In those I most clearly showed what I meant by persons being placed in the department against my will. I have never hinted that these men were crammed into the Service unnecessarily. My own language is quite explicit—that they were necessary, but the wrong men were appointed. That is a matter of opinion.

Then again, in replying to Q. 1460, Mr. Anderson distinctly states:—

I never dreamt that my evidence could be construed as meaning that the Service was packed or crammed. The word was not used, nor was the meaning implied, so far as I can understand English.

Again, Q. 662:—

Then really, from your answer, now the charge of packing the Service falls to the ground? I never made a charge of packing the Service. There is not a word that can be so construed.

The same explanation was given in answer to Q. 1454. He there says:—

I purposely gave this explanation to show that I did not wish to hint that the men had been "crammed" into the Service. The word "crammed" I never heard used in connection with the matter until it was used in this Committee. I would take the word "crammed" to mean that men were put into the department for whom work could not be found, and who would be unnecessary in the Service. I said in my evidence that they were necessary, and they would have been very valuable had they been thoroughly good men.

3. That with regard to the inspectors named in Mr. Anderson's evidence as unfit for appointment, it seems that thirty-four applications were received in reply to an advertisement for the positions. Mr. Anderson marked on this list ten names with blue pencil, accompanying the list with the following minute for the Minister's information:—

(Q. 19.) The men whose names I have marked with a blue cross have one and all very fair qualifications for the position, and I can give full details as to their special qualifications, as they have interviewed me.

In

In that minute Mr. Anderson recommended the appointment of four inspectors, and further stated (Q. 22) that "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed." Of those names so marked and recommended by Mr. Anderson, Mr. H. B. Macklin and Mr. A. E. Hook were appointed by Mr. Slattery, Mr. Macklin's appointment having to be cancelled nine days after it was made, Mr. Hook being later informed that unless he resigned he would be dismissed in consequence of intemperate habits. (Q. 259.) Besides these two, Mr. Dunningcliff, Mr. De La Motte, and Mr. O'Kelly were appointed. Mr. Dunningcliff was employed in the department before these applications were called for, and is still in the department and holds his appointment (Q. 31). He was recommended to Mr. Slattery as eminently qualified for the position by Mr. Harrie Wood, Under Secretary. Mr. De La Motte had also been in the department (Q. 39), and was also recommended to Mr. Slattery by the Under Secretary Mr. Wood, and by Mr. Anderson. The fifth inspector, Mr. O'Kelly (who was already in the Stock Branch of the department), was appointed as sugar expert. He had had ten years' experience (Q. 122 and 123) in the manufacture of sugar in Fiji, and Mr. Slattery took steps to satisfy himself as to his experience and qualifications before making the appointment.

4. That the evidence taken discloses the fact that there was a considerable amount of friction in the department, caused by Mr. Anderson, as Director of Agriculture, not being allowed, as formerly, to communicate direct with the Minister in charge of the department, but being required to make his representations to the Minister through the usual official channel, viz., the Under Secretary. Mr. Anderson had previously been allowed, under the regime of Mr. Sydney Smith, to communicate direct with the Minister, but, on Mr. Slattery's accession to office, he directed that all communications should come to him through the Under Secretary, Mr. Anderson being placed in the same position as Mr. Bruce, Chief Inspector of Stock, and other heads of departmental branches.

5. That as to the statement in Mr. Anderson's evidence before the Royal Commission, that the five inspectors were all appointed on the recommendation of political friends, there is evidence that political influence was brought to bear in favour of some of them, but Mr. Slattery allowed no such influence to weigh with him in making the appointments.

WILLIAM JOHN LYNE,
Chairman.

No. 2 Committee Room,
Legislative Assembly,
11th November, 1896.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 27 AUGUST, 1896.

MEMBERS PRESENT:—

Mr. Henry Clarke,		Mr. Hogue,
	Mr. Wright.	

Resolved (on motion of Mr. Wright), That Mr. Lyne be Chairman of this Committee.

Mr. Henry Clarke called to the Chair *pro tem*.

Entries from Votes and Proceedings appointing the Committee, and referring the Petition of Thomas Michael Slattery, praying to be heard by counsel or attorney, or in person, before the Committee, read by the Clerk.

Reassembling of the Committee to be arranged by the Chairman.

[Adjourned.]

WEDNESDAY, 2 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.		
Mr. Cann,		Mr. Molesworth,
Mr. Hogue,		Mr. Henry Clarke.
	Mr. Sydney Smith.	

T. M. Slattery, Esq., appeared on his own behalf.

Duncan Clark McLachlan (*Under Secretary for Mines and Agriculture*) called in, sworn, and examined.

Witness produced original papers in connection with the appointment of Inspectors of Agriculture.

Witness withdrew.

Harrie Wood called in, sworn, and examined.

Witness withdrew.

[Adjourned till To-morrow at half-past *Eleven* o'clock.]

THURSDAY, 3 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.		
Mr. Henry Clarke,		Mr. Hogue,
Mr. McElhone,		Mr. Sydney Smith.

T. M. Slattery, Esq., appeared on his own behalf.

David Grant Forbes (*a Judge of the District Court of New South Wales*) called in, sworn, and examined.

Witness withdrew.

Henry Charles Lennox Anderson (*Principal Librarian, Free Public Library*) called in, sworn, and examined.

Witness withdrew.

Ordered,—That Mr. G. F. Sutherland be summoned to give evidence next meeting.

[Adjourned till Wednesday next at half-past *Eleven* o'clock.]

WEDNESDAY, 9 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.		
Mr. Henry Clarke,		Mr. Molesworth,
Mr. McElhone,		Mr. Wright.

Entry from Votes and Proceedings, referring the Petition of Henry Charles Lennox Anderson, praying to be heard by counsel or attorney, or in person, before the Committee, read by the Clerk.

T. M. Slattery, Esq., appeared on his own behalf.

H. C. L. Anderson, Esq., appeared on his own behalf.

George Finlayson Sutherland called in, sworn, and examined.

Witness withdrew.

Henry Charles Lennox Anderson recalled and further examined.

[Adjourned till To-morrow at half-past *Eleven* o'clock.]

THURSDAY, 10 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.		
Mr. Cann,		Mr. Henry Clarke,
	Mr. McElhone.	

T. M. Slattery, Esq., appeared on his own behalf.

H. C. L. Anderson, Esq., appeared on his own behalf.

William Henry Moseley called in, sworn, and examined.

Witness withdrew.

Fred. Turner called in, sworn, and examined.

Witness withdrew.

Henry Charles Lennox Anderson recalled and further examined.

[Adjourned till Wednesday next at half-past *Eleven* o'clock.]

WEDNESDAY,

WEDNESDAY, 16 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.

Mr. Cann,
Mr. Hogue,

Mr. Henry Clarke,
Mr. Molesworth,

T. M. Slattery, Esq., appeared on his own behalf.
H. C. L. Anderson, Esq., appeared on his own behalf.
Henry Charles Lennox Anderson further examined.
Alfred Atten Dunnicliff called in, sworn, and examined.
Witness withdrew.

[Adjourned till Wednesday next at *Eleven o'clock.*]

WEDNESDAY, 23 SEPTEMBER, 1896.

MEMBER PRESENT:—

Mr. McElhone.

In the absence of a quorum the meeting called for this day lapsed.

THURSDAY, 24 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.

Mr. Cann,
Mr. Hogue,

Mr. Henry Clarke,
Mr. Russell Jones,

Mr. McElhone.

T. M. Slattery, Esq., appeared on his own behalf.
H. C. L. Anderson, Esq., appeared on his own behalf.
Alfred Atten Dunnicliff recalled and further examined.
The Chairman having left the Chair, Mr. Henry Clarke called to the Chair *pro tem.*
Witness withdrew.

Walter Scott Campbell (*Chief Clerk, Department of Agriculture and Forests*) called in, sworn, and examined.

Witness withdrew.

Alfred Atten Dunnicliff recalled and further examined.

Witness withdrew.

[Adjourned till Wednesday next at *Eleven o'clock.*]

WEDNESDAY, 30 SEPTEMBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.

Mr. Cann,
Mr. Hogue,

Mr. Henry Clarke,
Mr. Sydney Smith.

T. M. Slattery, Esq., appeared on his own behalf.
H. C. L. Anderson, Esq., appeared on his own behalf.
Richard Teece (*General Manager and Actuary of the A.M.P. Society*) called in, sworn, and examined.
Witness withdrew.

John Low Thompson (*Principal of the Hawkesbury Agricultural College*) called in, sworn, and examined.

Witness withdrew.

Arthur Reynolds called in, sworn, and examined.

The Chairman having left the Chair, Mr. Henry Clarke called to the Chair *pro tem.*

The Chairman resumed the Chair.

Witness withdrew.

Arthur Price called in, sworn, and examined.

Witness withdrew.

[Adjourned till To-morrow at *Eleven o'clock.*]

THURSDAY, 1 OCTOBER, 1896.

MEMBERS PRESENT:—

Mr. Hogue.

Mr. Lyne,

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY, 7 OCTOBER, 1896.

MEMBERS PRESENT:—

Mr. Lyne in the Chair.

Mr. Cann,
Mr. Molesworth,

Mr. Russell Jones,
Mr. Wright.

T. M. Slattery, Esq., appeared on his own behalf.
H. C. L. Anderson, Esq., appeared on his own behalf.
Thomas Michael Slattery sworn and examined.
Henry Charles Lennox Anderson further examined.

Edward Arthur Clifton Wainwright (*Record Clerk, Department of Agriculture*) sworn and examined.

The Clerk submitted the transcript of the evidence of Mr. Arthur Reynolds, which had been considerably altered by the witness on revision, and was directed to admit only such alterations as are allowed by the Standing Order.

[Adjourned till Thursday, 15th October, at half-past *Eleven* o'clock.]

THURSDAY, 15 OCTOBER, 1896.

The meeting called for this day postponed by order of the Chairman.

WEDNESDAY, 21 OCTOBER, 1896.

MEMBERS PRESENT :—

Mr. Lyne in the Chair.
Mr. Cann, | Mr. Hogue,
Mr. Molesworth.

Nathan Augustus Cobb (*Pathologist to the Department of Agriculture*) called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

Reassembling of the Committee to be arranged by the Chairman.

[Adjourned.]

WEDNESDAY, 4 NOVEMBER, 1896.

MEMBERS PRESENT :—

Mr. Cann, | Mr. Henry Clarke,
Mr. Hogue, | Mr. Molesworth,
Mr. Wright.

In the absence of the Chairman, Mr. Henry Clarke called to the Chair *pro tem*.

[Adjourned till Wednesday next at half-past *Eleven* o'clock.]

WEDNESDAY, 11 NOVEMBER, 1896.

MEMBERS PRESENT :—

Mr. Lyne in the Chair.
Mr. Cann, | Mr. Henry Clarke,
Mr. Hogue, | Mr. McElhone,
Mr. Molesworth.

Chairman submitted Draft Report, which was read a first time *pro formá*.

Report considered.

Paragraph 1 read and *agreed* to.

Paragraph 2 read.

And certain amendments having been made in the paragraph,—

Mr. Molesworth moved to leave out in line 38 the word “withdraws” with a view to the insertion of the words “denies having made.”

Question put,—That the word proposed to be left out stand part of the paragraph.

Committee divided.

Ayes.

Mr. Cann,
Mr. Henry Clarke,
Mr. McElhone.

Noes.

Mr. Hogue,
Mr. Molesworth.

And so it was resolved in the affirmative.

Paragraph, as amended, *agreed* to.

Paragraphs 3 and 4 read, amended, and *agreed* to.

Paragraph 5 read and *omitted*.

New paragraph to stand as paragraph 5 read and *agreed* to.

Chairman to report to the House.

LIST OF WITNESSES.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION
BY MR. H. C. L. ANDERSON.

WEDNESDAY, 2 SEPTEMBER, 1896.

Present:—

MR. CANN,
MR. HENRY CLARKE,
MR. HOGUE,

MR. LYNE,
MR. MOLESWORTH,
MR. SYDNEY SMITH.

W. J. LYNE, Esq., IN THE CHAIR.

Mr. T. M. Slattery appeared in person on his own behalf.

Duncan Clark McLachlan called in, sworn, and examined:—

1. *Chairman.*] What position do you hold? Under Secretary for Mines and Agriculture.
2. *Mr. Slattery.*] Do you produce the original papers in regard to the appointment of inspectors of agriculture? Yes, with the exception of Mr. de La Motte's and Mr. Hook's. We were not able to find the originals in those cases, but there are copies here. D. C.
McLachlan.
2 Sept., 1896.
3. You produce those papers for reference only? Yes. I think you will find that all the essential papers are here.

Harrie Wood called in, sworn, and examined:—

4. *Mr. Slattery.*] You were formerly Under Secretary for Mines and Agriculture? Yes. H. Wood.
2 Sept., 1896.
5. You have only recently retired from the Public Service? Yes.
6. Were you Under Secretary for Mines when I accepted office as Minister for Mines and Agriculture? Yes.
7. During the time you were Under Secretary for Mines and Under Secretary for Agriculture, when I was Minister, did I ever on any occasion thrust any one, man or boy, on the department against the will of any officer to my knowledge? No. Of course I do not know what the feelings of some of the officers might have been about appointments; but not as far as I know against any express objection by anybody—by anybody who had a right to object at any rate.
8. But I am talking about this thrusting—that is, putting into office or appointing to office either a man or a boy—putting into office one who was not required, or who was not reported to me as Minister as being required? No, I do not know of any instance.
9. And during the time I was Minister did you know of any single act of mal-administration on my part? No.
10. Do you remember the appointment of the inspectors of agriculture? Yes.
11. Do you remember what salary was recommended for each inspector of agriculture? My impression is that it was £300.

- H. Wood. 12. Were these appointments to be temporary or permanent? Temporary, I think.
 2 Sept., 1896. 13. According to my minute produced, dated 18th January, 1892, was the salary fixed at £300 per annum? Yes.
 14. Is it true that before the appointment of inspectors of agriculture, Mr. Anderson, who was then Director of Agriculture, had recommended to the Minister that they should receive salaries graduated from £200 to £300? No such recommendation had come before me.
 15. Did you ever see such a recommendation before the appointments were made? No.
 16. *Chairman.*] Are there any papers in reference to any such recommendation? I think there is a paper of a subsequent date, but I am not quite sure.
 17. *Mr. Slattery.*] On what dates were the inspectors appointed? Your minute is dated 19/1/92.
 18. In his evidence before the Civil Service Commission, Mr. Anderson was asked: "What salaries did the inspectors receive," to which he replied as follows:—

The five new ones £300 a year each. I had recommended to the Minister that they should have graduated salaries from £200 to £300.

Up to the time of the appointment of the inspectors of agriculture, had Mr. Anderson made any such recommendation? Not through me.

19. This minute date 23rd September, 1891, was written by Mr. Anderson:—

Herewith I submit to the Minister the thirty-four applications received in reply to the advertisement for the position of inspector of agriculture. I would take this opportunity of pointing out that it will be practically impossible to secure any one man from amongst these who can act efficiently and with satisfaction to both the farmers and the department for the whole of this Colony, for the simple reason that no one man can possibly have had such a wide experience as will fit him to speak with equal authority to the sugar-planters of the north, the wheat-growers of the table-lands, and the dairy-farmers of the South Coast. Bearing this in view I shall be glad if the Minister can see his way to dividing the Colony into four distinct districts—the North Coast, South Coast, North Table-land, and South Table-land. If an inspector were appointed for each of these districts he could give the whole of his attention and study to the crops most suited to his own district, and would, therefore, very soon become such an expert in his own subjects that his advice would be sought after by the farmers and others interested. He would likewise be well up in all agricultural matters appertaining to his district, could conduct investigations, make reports, and in every way keep the department informed as to the condition of agriculture and agricultural education in the whole of his district. Thus, the man in charge of the North Coast would need to have good experience in sugar-cane, maize, and other subtropical products. The man in the South Coast should have an excellent knowledge of stock, dairy farming and ensilage, together with a fair knowledge of such subjects as bee-keeping and fruit-growing. The man in the North Table-lands should be a thorough English farmer, who could advise as to all ordinary crops of good English farming, more especially as to root crops, which are unfortunately very little cultivated in this favourable district. The man on the Southern Table-lands should have had experience of a much dryer climate, should be well informed as to all the best methods of wheat cultivation, and have a general intelligent knowledge of vine cultivation and fruit rearing. In considering these applications I would also remind the Minister that the position lately held by Mr. Prentice, of inspector or visitor to the different agricultural shows, has not yet been filled up. I believe some of the gentlemen who are now applying have special qualifications for such a position. The position of experimentalist, or overseer of experimental plots at the college, might also be filled up from these applications, as Mr. J. G. Smith, B.Sc., has had special training in this kind of work at the experimental station in connection with the university of Nebraska. The men whose names I have marked with a blue cross have one and all very fair qualifications for the position, and I can give full details as to their special qualifications, as they have interviewed me.

In that minute Mr. Anderson recommends the appointment of four inspectors? Yes.

20. Is there a minute written upon it by the Minister, Mr. Sydney Smith? Yes; the minute is in these words:—"This matter may stand over until Estimates have been considered by Cabinet."

21. Was anything done on that paper before Mr. Smith left office? Nothing more than that.

22. In a minute by Mr. Anderson, dated 11/11/91, do you find these words: "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed. The officers are very much needed"? Yes.

23. Do you see another minute written by Mr. Anderson on the next day, to this effect: "I would respectfully impress upon the Minister the necessity of appointing some men with a good practical and scientific training. The applications received in response to an advertisement have been submitted"? Yes, that is here.

24. Do you notice also that Mr. Anderson marked with a blue pencil ten names out of the thirty-four applicants? Yes.

25. And do you notice that in his minute he states: "The men whose names I have marked with a blue cross have one and all very fair qualifications for the position"? Yes; and he continues, "and I can give full details as to their special qualifications as they have interviewed me." That is in his minute of the 23rd September, 1891.

26. During the whole time I was there as Minister did I not in every way try to carry out the intentions of my predecessor, Mr. S. Smith, in regard to the Agricultural Department? Yes, as far as I know.

27. Is it not a fact that I stated that as Mr. Smith had founded this department, I felt it my duty to do all I could to carry out his intentions? Yes, I am quite sure you said something to that effect; but I cannot recollect the exact words.

28. During the whole time of your connection with me as Minister, did you ever, from start to finish, find me in any way trying to destroy that department;—on the contrary, did I not try to assist the department because it had been founded by my predecessor? Yes, certainly.

29. With reference to those appointed whose names were marked with a blue-pencil—take first the name of Mr. Macklin—he was appointed? Yes. Mr. Hook, whose name was marked with a blue cross, was also appointed. Mr. de La Motte, who was appointed, was not marked.

30. But is it not a fact that Mr. de La Motte was in the department? There is a minute by yourself to this effect: "Mr. de La Motte has been most highly recommended to me." The other two appointed were Mr. Dunnicliff, and Mr. O'Kelly. The names of these gentlemen were not marked in blue; they were not included among the applications.

31. What was Mr. Dunnicliff? He was employed in the department before these applications were called for, and he is still in the department.

32. Do you know anything about an application Mr. Dunnicliff had made for the appointment? I recollect seeing something in the papers to the effect that Mr. Dunnicliff made application for such an appointment some time in August, 1891; but as far as I know it never came to me.

33. The application of Mr. Dunnicliff then was never submitted, so far as you know? Not the one in August; but I think he made another application in January, 1892.

34. You were appointed at that time Under Secretary for Agriculture? I think so; I cannot be quite sure of the date of my appointment. The second application of Mr. Dunnicliff, I am almost sure, came to me direct.

H. Wood.
2 Sept., 1896.

35. Did you, as Under Secretary, recommend Mr. Dunnicliff as a man well qualified for this position? Yes.

36. I suppose you know he was a perfect stranger to me? Yes; I do not know that you had ever seen him. Mr. Dunnicliff's application that came to me was dated 19th January, 1892.

37. Mr. Dunnicliff was in the department, and you, as Under Secretary, recommended him as in every way qualified for this position? Yes. I see that the application of the 19th January, 1892, was addressed to me as Under Secretary for Mines and Agriculture, so I suppose I had been appointed before that. Mr. Dunnicliff's application of the 19th August, 1891, was addressed to the Director of Agriculture. It does not seem to have been minuted by anybody.

38. You recommended him as in every way qualified for this position? Yes, I think so. My minute was as follows:—"Mr. Dunnicliff is at present employed in the Agricultural Department on clerical work. Personally, I know nothing of his qualifications for the position of inspector, but from what I have heard of him from gentlemen specially qualified to form an opinion, he should be well qualified for the position. If the appointments be made on the lines suggested by me, he would perhaps be better suited for cereal and root crops, or for dairying than other branches." The words, "lines suggested by me," refer to a minute I wrote, as well as I recollect, recommending that instead of the inspectors being appointed to special districts they should have special lines.

39. Mr. de La Motte was also employed in the department? He had been employed in the department.

40. In regard to these inspectors, did you ever have any complaint against them as to their fitness for the position? No, I do not recollect any complaint from outside in regard to the fitness of anyone of the inspectors.

41. In regard to their fitness nothing official came before you from any quarter? I cannot recollect anything.

42. In his evidence before the Civil Service Commission, Mr. Anderson states, in answer to question 7257, "I had picked out the eight candidates with the best testimonials, and expected a rigid examination of these candidates and their records before even one should be appointed on probation." Was there ever such a minute made? It never came before me. That seems to be contradicted by his minute were he says he can furnish full details as to their qualifications, having interviewed them.

43. Is there any minute in which Mr. Anderson stated that he expected a rigid examination of the candidates and their records, before even one should be appointed on probation? No such document ever came before me to my knowledge.

44. Do you remember one of the inspectors being charged with drinking up the country? Yes.

45. In reply to question 7259 Mr. Anderson said:—

Are they still in the Service? I do not know if all are. I can give the history of one who is. He charged travelling expenses of 12s. a day on an occasion when I saw him in town. I asked him to explain how it was that he was charging for travelling expenses when he had not left Sydney. He said he had been out of town, and gave me full details of his proceedings on the day in question. I told him to look at his diary. He afterwards confessed that he was not travelling that night on departmental business, and it transpired that he stayed behind a day, sent in a false return to show that he was at Tamworth, falsified his diary, and charged his travelling expenses. I reported him. I said he ought not to remain in our Service. He gave as an explanation that it was an oversight, and it was accepted. He repeated this serious offence within a few weeks, and was then admonished—nothing more. All this can be proved from the papers. He was reported afterwards for drunkenness in my office. Witnesses were not even asked for evidence. His explanation was deemed satisfactory.

What can you say with regard to that? My impression is, with regard to one of the cases mentioned, where there was a charge for travelling expenses, that Mr. Anderson objected to, that this man ought to have gone off to a certain place—probably it was Tamworth, I cannot recollect—I presume being sent away hurriedly, and he had not his portmanteau with him, and he went to Bulli, where he lived with his family, to get his portmanteau, and so lost a night. He had to go there at night to get his portmanteau, and consequently did not really start for the place to which he was ordered to go until the next day.

46. That was explained, was it not, to you as Under Secretary, and, after investigation, you were satisfied that there was no wilful attempt to defraud the Government? Yes; no intentional fraud.

47. In regard to being reported for drunkenness, do you remember what took place in reference to that? I recollect that a doctor's certificate was put in to the effect that he was suffering from heart disease, and that he had to take stimulants occasionally in connection with this heart affection. I am not sure whether it was not fatty degeneration of the heart, or something of that sort. The certificate was from a doctor somewhere down Bulli way.

48. When he was reported for drunkenness he got a medical certificate to say he had been suffering from his heart, and that was his explanation. You investigated that, did you not, as Under Secretary? Yes.

49. And you were satisfied? As well as I recollect, I was satisfied with the doctor's certificate.

50. At question 7262 Mr. Anderson gives this evidence before the Civil Service Commission:—

Did he know his business? He was not an expert. Another of the men appointed celebrated his first day in the Civil Service by getting drunk, and came to my office in that state, his excuse being that he had been travelling all night. I told him to go and get sober, which he did. He came back afterwards fairly sober. He was a very intelligent man, and I sent him up the country to represent the department, and visit the farmers to instruct them. He was reported as drunk there. I went into the country to investigate the case, and found he had been beastly drunk for two weeks, and had done no work. I reported him, and recommended that he be dismissed. He was allowed to continue for two weeks longer, and draw his salary all the time, when he resigned. He was not censured, but I was, for suspending a drunken man from duty.

Was it ever reported to you that the man referred to in that question celebrated his first day in the Civil Service by getting drunk? No, I do not recollect that.

51. Or that he came to Mr. Anderson's office in that state? No; I recollect his being reported for getting drunk up country.

52. That was afterwards; I am talking about the first portion of the answer;—was any representation of that kind made to you? I have no recollection of that.

53. As far as you know, there is no paper of that kind among the records? Not so far as I know.

54. In regard to the same person, when he was up country, is it true that Mr. Anderson was censured by me, as Minister, for suspending a drunken man from duty? No. As far as my memory serves me, he was censured for going away without authority to investigate a matter which it was thought could have been investigated without any such expense being incurred.

55.

H. Wood. 55. Is it not a fact that Mr. Anderson, without consulting you, or getting the authority of the Minister, went away to deal with the case himself? Yes; without my knowledge, and, I presume, without yours.
 2 Sept., 1896. I think the explanation of the fourteen days referred to in Mr. Anderson's evidence was that the officer was called upon in the usual way to show cause; because it was always the practice, at any rate during my twenty odd years service as an Under Secretary, never to allow a man to be condemned without his being heard.

56. It was the rule of the department that no man, no matter what his position might be, should be removed from office without being called upon to show cause? Just so.

57. *Mr. Hogue.*] Is that rule applied in the case of censuring an officer? You could censure him certainly, but even that you would not do unless he had an opportunity of explaining.

58. Had Mr. Anderson an opportunity of being heard before he was censured for going away? A minute was written which might imply censure; I do not know that it was absolutely a censure.

59. *Mr. Slattery.*] When Mr. Anderson says: "He was not censured, but I was for suspending a drunken man from duty,"—I want to know if that is true or untrue? That is not true, as far as my memory serves me.

60. If there was any censure, it was on Mr. Anderson's action in leaving the city and going away into the country without reporting this matter either to the Under Secretary or the Minister? Yes.

61. *Mr. Hogue.*] Mr. Anderson was under your authority, I presume? Yes.

62. He had not an independent position? No.

63. *Mr. Slattery.*] At question 7292 Mr. Anderson gives this evidence:—

Was there any reduction in his salary as compared with yours? Yes; he receives £600; my salary was £740.

How many positions did Mr. Campbell take at that time? The staff of both the Agricultural Department and the Forest Department was cut down tremendously. We had to do so because we only got a very small sum, a lump sum, for the department, and we had to get rid of Mr. Ednie Brown, Mr. Holdsworth, and Mr. Piper out of the Forest Department, and Mr. Anderson, Mr. Price, and Mr. Reynolds were the three highest officers in the clerical branch of the Department of Agriculture. All these officers were dispensed with, and Mr. Campbell was removed from his position of chief draftsman, where he had £600 a year, to take charge of the two branches of Forest and Agriculture, which were then brought together, Mr. Campbell continuing to receive a salary of £600 a year.

64. Could you state what the saving was? The salaries of the officers dispensed with would amount to something over £2,000.

65. So that instead of the saving being £140, as would appear from Mr. Anderson's answer, there was a saving of something like £1,400? Yes; there was a much larger saving than £140. That was merely the difference between Mr. Anderson's salary and Mr. Campbell's salary.

66. At question 7294 Mr. Anderson gives this evidence:—

During the time you were in the Agricultural Department were there many other cases of persons being put in your department against your will, or were the ones you mentioned the only cases that occurred? There were many other cases.

Is that true or untrue? It is untrue as regards the department after I had any control in the matter. As to what transpired before that I cannot say.

67. You made no appointments before? I could fix it in that way—that after you took office there was nothing of that kind to my knowledge.

68. As far as I am concerned, while I was there, is that true or untrue? It is not true.

69. You have already stated that I never appointed a man or boy except when he was required, and on recommendation? That is true.

70. Did I ever say you must make room for anyone all the time I was there? No.

71. Within a few days after the appointment of Mr. Macklin, and before he entered upon his office, his appointment was cancelled? Yes. There is a minute dated 28/1/92 to this effect: "Mr. H. P. Macklin's appointment cancelled.—T.M.S."

72. There was a Mr. O'Kelly appointed also to look after the sugar-cane in the northern parts of the Colony? Yes.

73. *Chairman.*] Was he recommended by Mr. Anderson? No. His name is not on the list.

74. *Mr. H. Clarke.*] How many of those whose names were marked in blue pencil were appointed? Two.

75. Out of ten? There were only five appointed. Two out of the five were those whose names were marked with a blue cross by Mr. Anderson.

76. *Chairman.*] What position did Mr. Anderson hold in reference to yourself—his was a branch of the Mines Department, I suppose? Yes; the Mines Department and the Department of Agriculture were both under the same Minister, and in some respects, at any rate, they were always under me. For example, I used to pay Mr. Anderson's salary, and I used to have to do certain things which he could not do, and yet in other respects I was not recognised.

77. Does that mean that communications between the Agricultural Branch and the Minister went direct without reference to yourself? Yes.

78. Up to what time? From soon after the department was formed until Mr. Slattery came into office.

79. In his evidence before the Civil Service Commission, Mr. Anderson was asked, "How was the department managed after you left?" to which he replied, "I presume the chief clerk does his best to manage it, as far as the Under Secretary permits him";—have you any idea what that means—"as far as the Under Secretary permits him"? No; I do not think I was ever guilty of obstructing any officer under me in the performance of his duty.

80. Are you aware whether Mr. Anderson wanted to be appointed Under Secretary for Agriculture? I heard so. I know he wanted to be appointed Assistant Under Secretary. That was in Mr. Slattery's time, and the application was referred to me by Mr. Slattery. I said that personally I had no objection to it, but I thought it might affect the position of the Assistant Under Secretary for Mines, and before saying anything official on the subject I should like to consult him, and I did consult Mr. Herring, who was then Assistant Under Secretary for Mines, and who had a very long service, and his objection was that as he was only receiving £700 a year, and Mr. Anderson was receiving £800; if Mr. Anderson were appointed Assistant Under Secretary for Agriculture he would really take a superior position to Mr. Herring, notwithstanding the latter's long service. Upon that I objected to Mr. Anderson being appointed Assistant Under Secretary.

81. Is it the custom always for official papers from any branch to go through the Under Secretary? Yes, it was the rule while I was in the department, until quite recently. Within the last twelve months of my service I recommended to the Minister that formal papers might be sent by other officers direct to the Minister so as to save my time, on account of pressure of work. But prior to that the rule had been for all papers from every branch to go through me as Under Secretary. H. Wood.
2 Sept., 1896
82. Was there any unpleasantness between you and Mr. Anderson? Yes; he was the most insubordinate officer I ever had to do with.
83. *Mr. Hogue.*] From what cause did the friction between you and Mr. Anderson arise—if there was any friction? Mr. Anderson sought to ignore me altogether in the matter.
84. When was Mr. Anderson appointed Director of Agriculture? I could not tell you the exact date, but it was early in the year 1890.
85. That would be under Mr. Sydney Smith's administration, I presume? Yes. It was Mr. Smith who started the Department of Agriculture.
86. Have you the minute by you appointing Mr. Anderson, or any instruction? It is quite possible that I wrote the minute recommending his appointment. I recollect that the Minister consulted me about the applicants for the position and I gave him my opinion of those whom I knew, and I told him that as regarded Mr. Anderson I did not know him. I had never heard of him before at that time.
87. It was under your recommendation that he was appointed? Yes, I can quite believe that—but in that way. What I mean is that it was not a recommendation upon knowledge. Mr. Smith told me that he was satisfied as to Mr. Anderson's qualifications, and it would be upon that I should recommend his appointment.
88. That is, practically, you, as Under Secretary for Mines, had no objection to his appointment—that is what it would amount to? I had no objection. I knew nothing against him.
89. But that is what your recommendation would amount to—that you saw no objection to his appointment? Certainly.
90. Did he occupy the position quite independently of you, as between himself and the Minister? His position, as I viewed it, should not have been independent of me.
91. But did he, as a matter of fact, occupy that position? Yes; as a matter of fact, he dealt direct with the Minister.
92. In all matters pertaining to the Department of Agriculture? Yes.
93. Did the friction arise from the independent position Mr. Anderson assumed he held? Yes, I think so.
94. And his insubordination would no doubt arise from the fact that he believed himself to occupy an independent position? Yes, if he did so believe.
95. *Mr. S. Smith.*] Was not Mr. Anderson in the employ of the Government prior to his appointment to the Department of Agriculture? Yes; I believe he was employed in the Public Instruction Department.
96. Are you aware if he had high credentials in that department as to his qualifications? Not of my own knowledge; I never saw them.
97. Is there any minute amongst the papers in which I approved of the appointment of four inspectors? Mr. Anderson, in his minute of 23rd September, 1891, says: "Bearing this in view, I shall be glad if the Minister can see his way to dividing the Colony into four distinct districts." Upon that you say: "This matter may stand over until Estimates have been considered by Cabinet." I think the paper quoted says something more on the subject.
98. Are you aware if provision was made in the Estimates for the salaries of any inspectors? Not as salaries, I think.
99. *Chairman.*] A lump sum? Yes; I think the Inspectors of Agriculture were always paid out of a lump sum.
100. *Mr. S. Smith.*] Are you aware that the Estimate was submitted, and that the item of inspectors was struck out? No; I fancy it would not go through me.
101. *Mr. Slattery.*] Although Mr. Sydney Smith may not have approved of four inspectors being appointed, is it not a fact that on the 11th November, 1891, Mr. Anderson, in resubmitting the applications, said: "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed. The officers are very much needed." Yes, those words occur in Mr. Anderson's minute.
102. *Mr. S. Smith.*] But there is no minute of mine among the papers to that effect? No, that is Mr. Anderson's minute.
103. *Mr. Hogue.*] While Mr. Anderson was Director of Agriculture, was it the practice for appointments to be made to the department on his recommendation without regard to you? Yes; I think so. In the case of Mr. Anderson's own appointment the Minister discussed the matter with me; but I do not think any other appointment was brought under my notice.
104. The appointments came through Mr. Anderson, and not through you? Yes.
105. And in that respect his department was quite independent of yourself, although you were Under Secretary? There were certain things, as I said before, that had to be done through me; but appointments and all matters of importance were settled between Mr. Anderson and the Minister.
106. *Mr. H. Clarke.*] Did that practice continue until Mr. Anderson left the department? No. As soon as Mr. Slattery came into office he required all matters to come to him through me.
107. *Mr. Slattery.*] And you were appointed, then, to be Under Secretary for Agriculture, as well as Under Secretary for Mines? Yes.
108. *Mr. Hogue.*] The practice was altered, then, when Mr. Slattery came into power? Yes.
109. *Mr. Molesworth.*] Prior to that I understand Mr. Anderson held a position in which he was responsible to the Minister, and not to you? It was never so declared, but in practice it amounted pretty nearly to that.
110. He did transact his business through the department without reference to you as Under Secretary? Yes.
111. *Mr. Hogue.*] Then we are to understand that the answer you gave to my question just now, in reference to appointments to the Agricultural Department on the recommendation of Mr. Anderson, did not apply to Mr. Slattery's administration? No; any appointments that were made by Mr. Slattery came through me.
112. The whole of them? Yes.

WEDNESDAY, 3 SEPTEMBER, 1896.

Present:—

MR. H. CLARKE,
MR. HOGUE,MR. McELHONE,
MR. S. SMITH.

W. J. LYNE, Esq., IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor in his own behalf.

David Grant Forbes called in, sworn, and examined:—

D. G. Forbes. 113. *Chairman.*] What position do you occupy? Judge of the District Court for the South-western district.

3 Sept., 1896. 114. *Mr. Slattery.*] You have been judge for many years? I have been judge for over twenty-one years, and for sixteen years I was Crown Prosecutor round the same district.

115. Would you look at the question 7253 in the evidence of Mr. Anderson, Director of Agriculture, given before the Civil Service Commission, at page 277. In answer to a question by Mr. Teece, you notice that Mr. Anderson said:—

One day a gentleman came to me and said, "I want you to appoint my son-in-law Inspector of Agriculture. He is downstairs in the Stock Department, earning 10s. a day. He has had great experience down at Fiji." I said, "You must see the Minister. I have nothing to do with it." I hinted that the inspector should be a man of good scientific and practical training. He replied, "It is all right, I will get him appointed." I said, "Don't say that. The Minister will never do it without consulting me." He laughed and said, "I will have him appointed in a few days."

Is that evidence true or untrue? I most distinctly say that it is untrue—not that I accuse Mr. Anderson of stating a lie against me, but I think his memory must have been very treacherous, and that he has given an entirely different account from what really took place. I may say in the first place, that if I had said what Mr. Anderson here states I said, it would have been a distinct piece of impertinence on my part towards Mr. Anderson, and what motive could I possibly have had for being impertinent to him? I saw Mr. Slattery, and I told him that I understood they wanted some person in the Agricultural Department who was acquainted with sugar-growing, and so forth. I told him that Mr. O'Kelly had been in Fiji for ten years engaged in the pursuit of growing cane and other tropical plants, bananas for instance, and that he had great experience, that he was in charge for several years of one of the largest sugar-growing establishments down there, and that if he was considered competent to take an appointment he was a gentleman, a man of good education and so forth, and I thought he might be useful in the Government service. After seeing Mr. Slattery, who made me no promise in the matter, I went to see Mr. Anderson, because I understood that he was the person, if Mr. O'Kelly was appointed, through whom all the correspondence would go—in point of fact he would be in a manner his superior officer—and I stated to him the same thing that I stated to Mr. Slattery. He said to me, "Is he an expert?" and he said something about nobody being appointed except the person he recommended. My notion was, that the matter would certainly be in the hands of the Minister, and that although Mr. Anderson might recommend yet it would be a matter entirely for the Minister to decide upon. When Mr. Anderson spoke of an expert I said that I did not know there was any expert in sugar-growing, that I had never heard of anybody who had a diploma for growing sugar-cane, that I thought an ounce of experience was better than a pound of theory, and that a person who had been engaged ten years in this pursuit would have obtained a sufficient knowledge to enable him to be useful in such an appointment. I can state most positively, from my own knowledge, that not only was Mr. O'Kelly useful after his appointment, but that he gave the farmers up there some very valuable information.

116. *Mr. Hogue.*] Are you now stating what you said to Mr. Anderson? No, not exactly.

117. You partly stated what you said to Mr. Anderson, and partly what you thought? What I said to Mr. Anderson was what I knew of Mr. O'Kelly's capacity—that he had been ten years in Fiji, that he had been in charge of one of the largest establishments down there, and that I thought he was well qualified to fill the appointment. I told him this to let him know who the gentleman was about whom I was speaking to him. I had no idea of being rude in any way to Mr. Anderson, or of having the manner of a bully or anything of that kind. There are gentlemen round this table who have known me for years, and they certainly would never give me the character of being a man who was a bully, or a man who was inclined to be rude or discourteous.

118. *Chairman.*] I understand you to say that your conversation could not have been construed into the words used in Mr. Anderson's evidence? No, nor could I have had any possible motive for such a thing. My motive would be rather the other way. Therefore I say that Mr. Anderson's recollection of what took place is not correct, and that in all probability, owing to his other business, he has mixed up what somebody else said with what I said.

119. *Mr. Slattery.*] When you saw him about recommending Mr. O'Kelly for this position, you made exactly the same statement as you have made to-day on oath? I made the same statement that I made to you, and that was what I have stated to the Committee. Moreover, I think I bear the reputation of a man who would not, under any consideration, no matter how nearly connected a person was with me, recommend an incompetent person—a man whom I knew to be incompetent. I think the Committee will give me credit for a sufficient amount of honour to be above anything of that kind. I would not recommend my own son or my own father unless I thoroughly believed he was capable of doing what I recommended him for.

120. In regard to his qualifications, you state that you believed then that he was competent, and you believe so now? Yes.

121. Mr. O'Kelly, I believe, is in England at the present time? Yes; he holds an appointment there.

122. If it is necessary to prove his qualifications, can you refer to anyone in Sydney who would give evidence on that point? I am not quite certain; but I think Mr. Knox, the manager of the Sugar Company in Sydney, would be able to verify what I say, as to his having been in Fiji for ten years, and had great experience there, and having been employed down there by a branch of the Sugar Company.

123. *Mr. McElhone.*] In sugar-growing? Not only in sugar-growing, but in crushing the cane, and in the manufacture of sugar. To show that he had some special knowledge of sugar-growing, I may mention

mention that he was able to give useful instruction to the farmers of the north. He found that the farmers took the cuttings for planting from the top of the cane. This he said was wrong, as the result was the growth of a weak kind of cane, with a greater liability to disease. He showed the farmers their mistake in this respect; and he also told them how to get rid of the disease which attacked the cane at that time. Moreover, when he was in the district, he was asked to lecture upon the subject, which he did, giving all the knowledge he had acquired at Fiji. Not only was he very much approved of by the people up there in reference to his lecture, but leading articles were published in the newspapers praising him very highly. Afterwards, when there was retrenchment, and a number of the officers were dispensed with, Dr. Cobb said that Mr. O'Kelly was the best man the department could have appointed of all the inspectors for the purpose of speaking about the different diseases of the cane—that he knew more about the subject than anybody else.

D. G. Forbes.
3 Sept., 1896.

124. *Mr. Slattery.*] In recommending your son-in-law for the appointment of Inspector of Agriculture for the northern portion of the Colony, you recommended one whom you believed to be thoroughly qualified in every respect? I recommended one whom I thoroughly believed to be qualified. I would not have recommended anyone whom I did not think was qualified; and what he did in the Northern district, and the reports made regarding his services, prove that what I said was perfectly correct.

125. *Mr. McElhone.*] Mr. Anderson in his evidence before the Civil Service Commission said:—

One day a gentleman came to me and said, "I want you to appoint my son-in-law Inspector of Agriculture. He is downstairs in the Stock Department, earning 10s. a day. He has had great experience down at Fiji." I said, "You must see the Minister. I have nothing to do with it." I hinted that the inspector should be a man of good scientific and practical training. He replied, "It is all right, I will get him appointed."

Is that a fact? No; I did not say that, I am perfectly certain.

126. Because that looks like a threat? I did not say it, I am doubly sure; first, because I know I did not say it; and secondly, because I could have had no possible motive.

127. From your experience, you know it would have been a wrong thing? Of course, utterly wrong. I would just as soon think of intimidating a witness before me.

128. *Mr. Anderson (through the Chairman.)*] Did you write to the Premier and say my evidence was absolutely untrue? I did. I kept no copy of my letter; but if I did write, and I have very little doubt you are correct in saying I did, I said it was absolutely untrue.

129. Does "absolutely untrue" mean that all the facts I alleged were untrue? Yes.

130. Therefore, you did not enter my room and interview me about your son-in-law? I mean, that what you said was absolutely untrue.

131. Did you ask the Minister to appoint your son-in-law Clerk of Petty Sessions at Hay, in April, 1891, the same year—the same gentleman, Mr. O'Kelly? I have no recollection of having done so.

132. When Mr. Slattery was Minister? I have no recollection of asking him; but I am quite certain that if I did ask him, I should have written to him or told him what Mr. O'Kelly's qualifications were, and Mr. O'Kelly would in all probability have been called upon to write an application, which I do not think he ever did. I may be wrong; but I have no recollection of asking any such thing, and I do not believe I ever did.

133. Do you remember writing this:—

My dear Sir,—You would do me a great favour if you would appoint Mr. O'Kelly Acting Clerk of Petty Sessions at Hay. The statement that he makes that he has passed the preliminary examination for the Army is quite correct, and from my knowledge of him and his capabilities, I am quite sure he would give satisfaction in the performance of his duties to the people at Hay.

? If there is a letter of that kind, of course I did send it; but I have no recollection now of it. My mind has not been called to it since I wrote the letter, if I did write it. He was not appointed.

134. Are you certain that your son-in-law was manager of an estate at Fiji, or was he sub-overseer under a man named Hedges, who was manager of a plantation? I was never down at Fiji myself, but members of my family have been there; and one gentleman, Mr. James Mitchell, a second son of Mr. Mitchell, of Eltham, was down there, and I understood from him and from others that Mr. O'Kelly was for some time in management of a sugar plantation, with which, I think, Mr. Knox had something to do, that he managed for some years, and that at the time he married my daughter he was managing. I know he went there and was living there, and that he had a place at another part of the island of his own—a sugar plantation.

135. Did you ever see any criticisms and severe reflections upon Mr. O'Kelly's competency in Fijian papers, or in papers published in the Clarence River district where Mr. O'Kelly resided? No, I never did. But I saw leading articles in the papers of the Clarence River, speaking of him in the highest terms and with the greatest amount of praise.

136. Was that after Mr. O'Kelly had acquired valuable experience in the department, and had been trained by the scientific officers of the department? On the contrary, I do not believe he got any experience from the department. I think the knowledge he had previously stood him to great advantage. I do not think there was anybody in the department who had any experience in the cultivation of cane—except Dr. Cobb. I knew perfectly well at the time—at least I fancied I knew—that you had no experience in sugar-growing or any other sort of growing, and that you could not have ploughed an acre of land if your life depended upon it.

137. *Mr. Slattery.*] Outside the experience that Mr. O'Kelly had, was he a highly educated man? I have already said he was.

138. And with regard to this appointment, was it only a temporary appointment? As far as I knew, as regards the whole of the inspectors, they were all temporary appointments. If the persons who filled them, as I understood, were found not to be qualified, they could be immediately dismissed.

139. Do you remember that I told you that if Mr. O'Kelly was found not to be competent for the appointment, he only held it temporarily and could be removed at a moment's notice? Certainly.

140. *Mr. McElhone.*] You have known Mr. Slattery for a good many years? I have known him for a good many years.

141. You have been a friend of Mr. Slattery? Yes.

142. Did you bring any influence of a friendly nature to bear upon Mr. Slattery to make this appointment? None whatever. When I went to Mr. Slattery, I went to him simply because he was Minister for Mines.

- D. G. Forbes. 143. And Mr. O'Kelly was your son-in-law? Yes; and I would not have recommended my son-in-law for anything, for which I did not thoroughly believe him to be competent.
- 3 Sept., 1896. 144. Did you use any political influence? None whatever.
145. You applied to Mr. Slattery, and Mr. O'Kelly was your son-in-law? Yes.
146. Otherwise you did not try to bring any pressure? No; and when I spoke to Mr. Anderson it was simply to let him know what in point of fact he knew of my son-in-law, as Mr. Anderson would be his superior in the department if he were appointed.
147. Did you tell Mr. Anderson he was your son-in-law? I told Mr. Anderson that Mr. O'Kelly was my son-in-law, and I told him of his competency to fill the position, of the experience he had had at Fiji and so on.
148. You simply wished to help your relation, if you could do so, to get this appointment? I simply gave Mr. Anderson the information so that he might have it before him.
149. You used no unfair influence in any way to try to get Mr. O'Kelly the appointment? None whatever.
150. *Mr. Hogue.*] When you say that Mr. Anderson's evidence is absolutely untrue, you do not, of course, mean that in a literal sense? I do not mean that the sun was not shining, and I do not mean it was not a fine day. I do not mean that I never interviewed him, or anything of that kind, because I have already said that I did say certain things which I have stated these things to him. But what I say is absolutely untrue is his account of the conversation that took place between us.
151. That is to say, that his version of it is materially incorrect? Absolutely incorrect—not only absolutely in the words, but also in the motives that would induce it.
152. When you saw Mr. Anderson, did you tell him that your son-in-law “was down in the Stock Department earning 10s. a day, and that he had had great experience down in Fiji”? I did.
153. Did Mr. Anderson say: “You must see the Minister, I have nothing to do with it”? So far from that, I understood Mr. Anderson to say he had everything to do with it, and that is what made me smile.
154. At any rate some conversation took place on that point? He said, “Is he an expert,” and I said I did not know what he meant by an expert, that he had had great experience in sugar-growing, and that was all I thought was necessary.
155. Mr. Anderson says in his evidence:—“I hinted that the inspector should be a man of good scientific and practical training”;—did he say that? No, I do not think he did. He said the man ought to be an expert.
156. In your own evidence just now, you said that Mr. Anderson said something about the man having to be an expert? Yes. I did not say “something”; he did say the man ought to be an expert.
157. There is a slight difference, for Mr. Anderson says in his evidence, “I hinted that the inspector must be a man of good scientific and practical training”? He did not say that. He said he must be an expert. I will swear he used the word “expert.”
158. Going on further, did you say to Mr. Anderson, “It is all right, I will get him appointed”? No.
159. Did Mr. Anderson say, “Do not say that. The Minister will never do it without consulting me”? No, nothing of the sort. I did not speak to Mr. Anderson about his getting appointed. What I talked to him about was in reference to his being competent if he should be appointed.
160. Then some conversation took place as to whether he would be appointed or not? No, not in that way. I merely told him I had made the application for his appointment.
161. Did Mr. Anderson say anything at all as to the likelihood of his being appointed without reference to him? He said that no person could be appointed unless recommended by him.
162. You said in your evidence that you went to Mr. Slattery and stated to him the qualifications of Mr. O'Kelly? Yes.
163. And that you afterwards went to Mr. Anderson and said the same thing to him? Yes.
164. Was that on the same day? I think it was on the same day.
165. You said that Mr. Anderson asked if he was an expert? Mr. Anderson said that all the inspectors would have to be experts, and he asked, was he an expert.
166. You say he said something about no one being appointed, except he was recommended by himself? He said that, and then I smiled.
167. You stated in your evidence that your notion was that the matter would be entirely in the hands of the Minister? Yes.
168. Did you state that to Mr. Anderson? I do not think I did state that to Mr. Anderson.
169. Did you tell Mr. Anderson that your idea was that an appointment of this kind would be entirely in the hands of the Minister of the Crown? I do not think I told him that, but that was my impression. I do not think I said that, because it would have been an impertinence on my part. When a man said that nobody would be appointed unless he recommended him, it would be an impertinent thing for me to turn upon the man and say, “I do not follow you, because it entirely depends on the Minister,” and I am not in the habit of being impertinent.
170. You went from Mr. Slattery to Mr. Anderson? I am not quite sure about that, I may have seen Mr. Slattery a day or two before, or I may have seen him on the same day.
171. At any rate, you are certain you saw Mr. Slattery first, and Mr. Anderson afterwards? Yes.
172. Will you kindly tell us what was your object in visiting Mr. Anderson after having seen Mr. Slattery? I was going on circuit, and if Mr. O'Kelly was appointed while I was away, I knew that all his correspondence and other matters would go through Mr. Anderson, and under those circumstances, I wished to introduce myself to Mr. Anderson, for I had not the pleasure of his acquaintance before, and to inform him that my son-in-law had had experience in Fiji, as I told Mr. Slattery. I did not think there was any harm in my telling him that, in order that he would know who the man was.
173. Then there are circumstances that transpired between you and Mr. Anderson on which there is a substantial agreement between you; you agree in certain points? I agree in these points:—I agree that I saw Mr. Anderson; I agree that I saw him for the purpose of informing him what I knew of Mr. O'Kelly; but I absolutely deny that I told him that I would get Mr. O'Kelly appointed whether he liked it or not; I absolutely deny that he said, “You must see the Minister—I had seen the Minister—I have nothing to do with it.” So far from that, he said he had everything to do with it.
174. *Mr. McElhone.*] You deny that you threatened you would get him appointed in a few days? Yes.
175. *Mr. Hogue.*] There was no threat made of any kind? No; I never said I would have him appointed in a few days, or anything of the sort.

Henry Charles Lennox Anderson called in, sworn, and examined:—

176. *Chairman.*] What is your position? Principal Librarian of the Public Library of New South Wales.

H. C. L.
Anderson.

177. You were in the Agricultural Department? Yes; from 1890 to 1893.

178. *Mr. Slattery.*] You remember giving evidence before the Civil Service Commission on the 11th March, 1895? Yes.

3 Sept., 1896

179. With reference to my administration of the Department of Agriculture? It was with reference to the Department of Agriculture—not specially your administration.

180. As far as I am concerned, and my administration of that department, do you still say that the evidence you gave on 11th March, 1895, is correct? Absolutely correct, as far as I know.

181. You were examined on that occasion as Principal Librarian and Secretary to the Free Public Library? No; I think not.

182. The evidence from question 7234 to question 7252 has relation to the Free Public Library? Yes.

183. Would you look at question 7253, put by Mr. Teece;—before you gave evidence before the Civil Service Commission had you seen Mr. Teece to put that question? I had never spoken to him in my life about the Civil Service in any shape or form.

184. Or to anyone else? Nor to any member of that Commission.

185. Is this your evidence—that after the President examined you in regard to the Free Public Library, then, suddenly, Mr. Teece comes in, without your having seen him or written to him or communicated with anyone, and asks this remarkable question, “When you were Director of Agriculture did you ever have people thrust upon you against your will?”—you say so? I do. I had never written to him or spoken to him about the Civil Service in any shape or form.

186. Or to anyone else? Or to anyone else on that Commission.

187. Or outside the Commission? I must have spoken to my friends about the Civil Service.

188. Had you suggested the putting of that question by a member of the Commission to anybody? Most emphatically not.

189. Referring to that question, No. 7253, I ask you now on your oath did I ever thrust a single person, man or boy, on the Department of Agriculture who had not been recommended for a vacancy, except in the one case of Mr. O’Kelly; you understand what I mean by thrusting—saying that so and so must be appointed where there was not a vacancy;—did I during the time I was Minister thrust anyone into the Department of Agriculture, either man or boy, except to fill a vacancy, except in the one case of Mr. O’Kelly? There was no vacancies for any of these inspectors. No such positions had been made.

190. You were asked, “When you were Director of Agriculture did you ever have people thrust upon you against your will?” and you said, “yes”;—I now ask you, during the whole time I was Minister and you were Director of Agriculture, did I ever make one appointment in the Department of Agriculture, either of a man or boy, except in the one case of Mr. O’Kelly, without it had been recommended that there was a vacancy to be filled? My answer to the question was that appointments were thrust upon me against my will.

191. You wanted, then, to be the Minister and select the candidates;—is that it? No; I was the responsible officer who had to work the department for good or for ill. My good name was concerned practically for ever, and I thought I should have been consulted about any appointment in the department.

192. But do you not know that shortly after I became Minister for Mines and Agriculture Mr. Harrie Wood was appointed Under Secretary for Agriculture? Yes.

193. And do you not know that in that position you were subordinate to Mr. Wood? I believe I was officially, but Mr. Wood was not consulted any more than I was about these appointments.

194. Whether you were consulted or not, will you tell me if I ever appointed a man or boy in the department, except to fill up a vacancy that had occurred, or where an appointment had been recommended? There were no vacancies at all to fill up, for the positions had never been made.

195. Did I ever put in a man or boy, excepting the one single case of Mr. O’Kelly, all the time I was Minister for Mines and Agriculture, unless it was where a vacancy existed, or where an appointment had been recommended by one of the officers—either you or Mr. Harrie Wood? Appointments were necessary, but bad men were appointed.

196. What you mean is this, that you did not have your own selection of the officers in the Department of Agriculture while I was Minister? I never asked for selection, I asked for consultation with the Minister, as the man who knew the department from start to finish, and had a most intimate knowledge of every detail of its history, and of its aims and objects.

197. In the answer already quoted you made a most serious accusation, and I ask you again for the third or fourth time—during all the time that you were Director of Agriculture and I was Minister, did I, with the single exception of Mr. O’Kelly, ever appoint one man or one boy, except to fill a vacancy, or except where an appointment was recommended by one of the responsible officers of the department? I could not speak for anyone but myself. You certainly filled positions which I had recommended to be made. I say at once that I was earnestly anxious to get four good inspectors appointed. You appointed five. But those four positions should have been certainly filled up.

198. *Mr. McElhone.*] You recommended four? Yes, strongly.

199. And there were five appointed? Yes.

200. *Mr. Slattery.*] I was Minister there for nearly three years? I believe you were; but, of course, I was not with you for three years. I had not acquaintance with you for three years as Minister. I was with you from October, 1891, to May, 1893.

201. During that period can you mention the name of one man or one boy that was put into that department—thrust into it—except to fill a vacancy, or where an appointment had been recommended? I never said a word to that effect. I answered the question as to whether appointments had been thrust against my will. They were thrust against my will.

202. In making the recommendation for the appointment of four inspectors of agriculture, did you not mark in blue pencil ten names out of the thirty-four applicants? Yes; I marked ten names.

203. And did you not say in your minute of 23rd September, 1891, addressed to my predecessor, Mr. Sydney Smith, and which came on to me with a subsequent minute after I came into office, “The men whose names I have marked with a blue cross have one and all very fair qualifications for the position, and I can give full details as to their special qualifications, as they have interviewed me”? That is part of my

- H. C. L. Anderson.
3 Sept., 1896.
- report to Mr. Smith on the thirty-four applications which we got in response to an advertisement in the papers—a straightforward way of getting men into the Service.
204. *Mr. McElhone.*] You think there are crooked ways? I am sure there are crooked ways.
205. *Mr. Slattery.*] Can you state one crooked way by which any man was put into the Department of Agriculture during the time I was Minister? I do not wish to make any personal remarks at all.
206. I ask you, if you know of anyone who was put into the Department in a crooked way, to mention it? I think there were some men grossly incompetent appointed to very honorable positions in the Service, which made the department ridiculous.
207. *Chairman.*] Who were they? The whole of the men I have pointed out. Three of these inspectors were grossly inefficient men.
208. *Mr. Slattery.*] Name them? Mr. De La Motte, Mr. Dunicliff, and Mr. Fitzgerald.
209. Mr. Fitzgerald is not an Inspector of Agriculture? He was an inspector, appointed on the same day—an Inspector of Shows.
210. Was not Mr. Fitzgerald's appointment to fill up a vacancy? Yes, it was.
211. What you say about incompetence is, that you think your opinion as Director of Agriculture ought to prevail against my opinion as the Minister responsible to Parliament and the country? Most emphatically. I was better qualified to judge of the qualifications of experts than you could possibly be.
212. What experience had you that I had not had? I had studied the science of agriculture for twenty years most minutely, and I venture to say that I had the best knowledge of the chemistry of agriculture of any man in New South Wales, and I am willing to be examined on the subject before any University Board. I can say no more than that. I took the gold medal in agricultural chemistry at the University of Sydney given by Earl Belmore specially to encourage agriculture.
213. Before you were appointed Director of Agriculture, what practical experience had you had? I owned an orchard and farm of my own, on which I worked more or less every week. I pruned my own trees, planted them, and manured them. I had experimented with manures to the extent of £200 before I ever heard of the Department of Agriculture. I was an acknowledged authority in the papers and the press on agricultural chemistry.
214. Do you say that you were competent to decide on the qualifications of an expert for sugar-growing? In sugar-growing I had no experience whatever.
215. Could you decide on the qualifications of an expert in tobacco-growing? Certainly. I could easily tell a good man by his testimonials, and by a conversation with him.
216. That being the case, did you mark with a blue pencil the name of Mr. H. B. Macklin as having very fair qualifications, stating in your minute, "The men whose names I have marked with a blue cross have one and all very fair qualifications for the position, and I can give you full particulars as to their special qualifications, as they have interviewed me"? Yes; that is right.
217. Is it not a fact that in marking the names of ten men you marked, in your judgment, the names of the ten most qualified out of the thirty-four applications? Yes, I think they were, as far as I could possibly judge. Some of them, of course, I had not seen.
218. Mr. Macklin was appointed on the 19th January, 1892? Yes.
219. Do you not know that his appointment was cancelled on the 28th January, 1892—nine days afterwards? I know now that it was. I did not know then.
220. Did you not know that there was some question asked in Parliament by Mr. J. C. Neild in regard to Mr. Macklin? No; I was away in the country at the time, at Bodalla.
221. *Mr. McElhone.*] You heard of it afterwards? I heard of it afterwards, of course.
222. *Mr. Slattery.*] Is it not a fact that after Mr. Macklin's appointment was cancelled on the 28th January, you wrote a minute on the same day, in which you said—
- I was very much struck with the fact that Mr. Macklin omitted all reference to his scholastic career in his application, but understood from him that he left the department of his own accord.
- Until the 28th January did you put anything to that effect before me as Minister? I only heard it on the 28th January.
223. If, as you say, you were very much struck with the fact "that Mr. Macklin omitted all reference to his scholastic career in his application, but understood from him that he left the department of his own accord," why did you not place that before me as Minister? Because I was dealing with Mr. Sydney Smith, and Mr. Sydney Smith had a totally different way of dealing with men. He sent for them himself. Mr. Sydney Smith never appointed a man without sending for him, and I knew he would send for them and see them in my presence. I must explain that my recommendations were made to one Minister and they were acted upon by another Minister, which makes a great difference in the case.
224. There is a minute of yours dated 11th November, 1891—I was in office at that time—in which you state :—
- The Minister.—By direction of the late Minister, applications were invited from gentlemen qualified for the position of Inspector of Agriculture. Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed. These officers are very much needed to bring the department into touch with the farmers, to lecture on appropriate subjects, to investigate diseases, to report to the department on all matters of interest, and to collect statistics. The salaries could be provided out of the item of £10,000 for contingencies for 1891 (£2,942 still available), and the same item placed on the Estimates for 1892. The positions, therefore, would be temporary ones, at least until the end of 1892. Four such officers, if thoroughly competent, would very largely increase the usefulness of this department. Herewith all applications.
- Are not those the applications, of which ten were marked in blue pencil, that you sent on? Those are the applications I had received.
225. When you sent on that minute of the 11th November, 1891, how is it you did not state that you were very much struck with the fact "that Mr. Macklin omitted all reference to his scholastic career in his application, but understood from him that he left the department of his own accord"? It never occurred to me. I had not looked at the applications since September.
226. Is it not a fact that it was only after I had cancelled Mr. Macklin's appointment that you wrote this latter minute? It was not. The cancellation of his appointment did not reach me till three days afterwards. I wrote five minutes to you on that one day, the 28th January, and the cancellation of his appointment did not reach me for three days afterwards. I had not the slightest notion of it. I was told that day that Mr. Macklin had been guilty of disgraceful conduct towards a female pupil in his school, and I at once had a minute written in shorthand to warn you.
227. *Mr. McElhone.*] Was not Mr. Macklin under you in the Education Department? Not personally; I knew of him by repute. 228.

H. C. L.
Anderson.

3 Sept., 1896.

228. Did this conduct of his come under your notice when you were in the Education Department? No; it was quite recent I believe.

229. *Mr. Slattery.*] It was nine days after Mr. Macklin was appointed, and when his appointment was cancelled, that you wrote the minute? I do not believe his appointment was cancelled. It was cancelled on the same day, but one cannot prove that it was before or after my minute. Nobody can possibly say that.

230. Then I understand you doubt the words of my minute? Can you say whether your minute was written before or after mine, when they were both written on the same day?

231. Do you doubt on this minute that I did cancel the appointment? Mine was written on the same day, and neither you nor any other human being can prove which was written first. Mine was written directly I had the chance, when I got back from Bodalla. You are well aware that these papers do not reach the officers for several days after you have dealt with them. You will find the date when they reached me.

232-33. On the back of your minute of the 28th January, did I not write this:—

In consequence of statements made to me on the 27th instant—confirmed by official documents in the Department of Public Instruction—I, on the 28th instant, after the Assembly had been sitting all night, sent before half-past 9 o'clock in the morning for the papers relating to the Inspectors of Agriculture, and before 10 o'clock I cancelled the appointment of Mr. Macklin, and returned the papers to the Under Secretary, Mr. Wood. After the cancellation referred to, Mr. Anderson, for the first time, discovers that Mr. Macklin is not a fit person to be appointed as an inspector. When I appointed Mr. Macklin I had no idea whatever that he had been connected with the Department of Public Instruction or any other department, and it appears to me surprising that a gentleman of Mr. Anderson's experience should fail to obtain a certificate from the department from which, Mr. Macklin informed the director, "he had left of his own accord," before submitting his application for my consideration. And if Mr. Anderson, as far back as the 23rd September last, before I became Minister, was "very much struck with the fact that Mr. Macklin omitted all reference to his scholastic career in his application," how is it that he did not make an inquiry at the Department of Public Instruction, or inform me thereof, before Mr. Macklin's appointment was actually made and subsequently cancelled. In his minute Mr. Anderson says, "It was very far from my intention to convey the impression that I considered Mr. Macklin in any way equal to many of the other candidates." Now, in his minute paper, No. 6,491, dated 23rd September, 1891, Mr. Anderson says:—"The men whose names I have marked with a blue cross have one and all very fair qualifications for the position." A blue cross was marked against Mr. Macklin's name, but not a word that Mr. Macklin was in any respect inferior to any other applicant. There were then thirty-six applicants. Ten were marked in blue pencil, and Mr. Macklin was one of the ten, and only that his connection with the Department of Public Instruction was unsatisfactory he would now be one of the Inspectors of Agriculture.—T.M.S., 30/1/92.

You got that minute, did you not? Yes; three days afterwards.

234. But it was in reply to your minute of the 28th January? Exactly.

235. And it was dated 30th January, 1892? Yes; I got it on the 31st.

236. You stated that Mr. Smith approved of four inspectors being appointed? Yes.

237. Do you say so now? Yes, he was strongly in favour of that.

238. If Mr. Smith states that he was only in favour of appointing one, then he is in error and you are right? No. Mr. Smith said we could not afford to appoint four at the one time. The inspectors were a part of the basis of the department's formation in the year 1890; and I have here the basis drawn up by Mr. Smith himself approving of district inspectors. But they were to come by degrees. Mr. Smith was not going to appoint all these men at once, and he therefore said, "We will have one at present," and he picked out a man named Pearce, whom I did not know by sight. But he afterwards said that as the expense would be too great he would put none at all on the Estimates. I have here a copy of the Estimates submitted to Mr. Smith, as Minister, showing four inspectors, and I have also the revised copy of the Estimates, in which they were all struck off, leaving only the one whom we had already—Mr. Despeissis.

239. He was in the department? Yes. So that Mr. Smith knocked them all off the Estimates.

240. When you sent in your minute of the 11th November, 1891, Mr. Despeissis was in the department? Yes.

241. Then, did you not send on this minute:—

The Minister,—By direction of the late Minister applications were invited from gentlemen qualified for the position of Inspector of Agriculture. Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed. These officers are very much needed to bring the department into touch with the farmers, to lecture on appropriate subjects, to investigate diseases, to report to the department on all matters of interest, and to collect statistics.

Is that so? That is so. That minute, I think, was on an application from Mr. Newman, M.P., asking for consideration of the claims of one of the applicants, and, of course, it had to go on to you, as Minister.

242. Do you notice that there is a minute of mine among the papers, in which I state:—

I agree with the view of my predecessor. It may become necessary to appoint more than four inspectors. That, however, is a matter for future consideration.

? Yes.

243. Another gentleman who was appointed was Mr. G. E. Hook—appointed by me? Yes.

244. Was his name not marked with a blue pencil? Yes; he had very fair qualifications, I considered.

245. Did you not intend that the Minister should select the four out of the ten whose names were marked with blue pencil? I think he would have got the best four out of those ten.

246. In marking the ten with blue pencil, did you not intend that the Minister, whoever he might be, should select four out of those ten, and appoint them? I wished that, certainly.

247. Do I understand this, that what you objected to was that I, being Minister, responsible for any appointment I made to my colleagues, and to the Parliament, and to the country, should have taken your nominations, and not exercised my own individual judgment at all? I consider that, in my position as responsible executive officer, I should have been consulted by any Minister.

248. Was not the Under Secretary for Agriculture the responsible executive officer? Certainly not. I should say he was merely what you defined him to me—the channel of communication between me and you. That is your definition.

249. Did you at any time put your views in writing before me as Minister, and represent that you were entitled to this extraordinary power as a departmental officer, and that the Minister should be a mere automaton to register your appointments? Yes, and you gave very good effect to it on one occasion. You appointed a man whom I thought inefficient, and you cancelled his appointment. You appointed another, or sent another for my approval. I did not approve of him and you did not appoint him.

- H. C. L. Anderson.
3 Sept., 1896.
250. Do you say that I ever sent a person for your approval all the time I was Minister? You most emphatically did.
251. *Chairman.*] Who was it? A man named O'Sullivan.
252. Was he one of the agricultural inspectors? No; he was to be registrar at the College.
253. *Mr. Slattery.*] You thought that, being Director of Agriculture, you had a right not only to recommend, but by your recommendation to absolutely appoint, all the officials in your branch? Most emphatically not. I never thought such an absurdity. I said that I should have been consulted—that I, with my technical knowledge, my great experience in education, and my intimate acquaintance with the most minute details of my own department, could have warned you against making fatal mistakes in the persons you might have appointed. You had not much experience in agriculture, I had a great deal.
254. *Mr. McElhone.*] That is why you recommended Mr. Macklin? I did not have any personal experience of him; I went by his testimonials.
255. *Mr. Slattery.*] There was scarcely an appointment I made from start to finish of which you approved? They were a very poor lot, Mr. Slattery.
256. In your opinion? Nearly all. There were two or three really good men, but they were a poor lot.
257. You could recommend Mr. Macklin and Mr. Hooke? Mr. Hooke was a very intelligent man, but he was a drunkard.
258. But he had to go? No; he resigned.
259. Do you not know that I intimated to a friend of his that unless he sent in his resignation I would dismiss him for drunkenness? No; I never heard such a thing. I recommended his dismissal.
260. *Chairman.*] Did you at any time make any request that you should be appointed Under Secretary for Agriculture? That I should be recognised as the official head of the department. I was not anxious about the title of Under Secretary.
261. That you should have direct communication with the Minister, irrespective of the Under Secretary? Yes; which I always had during the office of Mr. Smith.
262. That desire of yours was not carried out? No.
263. *Mr. Slattery.*] Did I not authorise you to see all the Ministers, and ask them if they were agreeable to appoint you Under Secretary for Agriculture, and say that if they were I would offer no objection? No; I never heard of such a suggestion.
264. Then, I suppose you did not see any of the Ministers in pursuance of that offer of mine? I certainly saw some of the Ministers, but it was not in pursuance of an offer.
265. Is it not a fact that I told you that I would not have any one except the Under Secretary as the channel of communication between me and any of the branches of the service over which I presided—that I would not allow the old system that had been in existence to continue while I was Minister? Yes; you said to me, "I cannot have two heads."
266. And do you not remember that I pointed out to you that if you were entitled to send your papers direct to the Minister, Mr. Bruce, as head of the Stock Department, the Government Geologist, the Chief Mining Surveyor, and other heads of branches would claim the same right; did I not point that out to you? Yes; you used that argument.
267. Did I not also say to you, "If the Cabinet will appoint you as Under Secretary for Agriculture I will offer no objection, but I will not deal with you direct unless you are an Under Secretary"? I believe you did say something to that effect.
268. And in pursuance of that did I not authorise you to see each Minister, and ask the Ministers if they would appoint you Under Secretary for Agriculture; did I not give you permission? I do not remember that; but I think it is possible that you gave me that permission, though I do not remember you specifically saying such a thing.
269. Did you not carry that out; do you not remember that you saw Mr. R. E. O'Connor? Yes; as a personal friend.
270. Did you not see Mr. John Kidd? Certainly not.
271. Did you not see some of the other Ministers? I saw Mr. Barton and Mr. R. E. O'Connor, two old college friends of mine, and I asked their advice about the matter.
272. Was not that in pursuance of my suggestion to you and my authority to consult the Ministers? I think it is possible it was. I may say at once that Mr. Slattery was exceedingly courteous and kind to me in the matter. I have not the slightest fault to find in that respect. Mr. Slattery probably did give me such permission, but I never asked for such permission.
273. Do you not know that the matter came before the Cabinet? Yes; I have an idea that you wrote to me something to that effect.
274. Did I not point out to you also in that connection that the Inspector-General of Police had to communicate through the Principal Under Secretary, and that the Comptroller-General of Prisons, the Master-in-Equity, the Prothonotary, and all the other heads of branches had to communicate through the one channel of the Under Secretary for Justice? Officially they have to do so; but it was a very different thing in our department.
275. *Mr. McElhone.*] How could it be different in your department? Because the gentleman who was at the head of the Mines Department was in the habit of interfering and controlling matters connected with agriculture, of which he knew absolutely nothing. Mr. Harrie Wood was appointed Under Secretary in November, 1891. He was absolutely ignorant of the history of the department.
276. You say that Mr. Hooke was appointed as one of the ten whose names you marked with blue pencil? Yes.
277. He was dismissed for drunkenness? No; he was not dismissed; he was allowed to resign.
278. Is he the man who drew his travelling expenses while he was walking about town? No; that was Mr. De La Motte.

WEDNESDAY, 9 SEPTEMBER, 1896.

Present:—

MR. H. CLARKE,
MR. McELHONE.

MR. MOLESWORTH,
MR. WRIGHT,

W. J. LYNE, Esq, IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor in his own behalf.
Mr. H. C. L. Anderson appeared in his own behalf.

George Finlayson Sutherland called in, sworn, and examined :—

279. *Chairman.*] Where do you reside? My domicile is in Sydney, but I practise my profession in Fiji.
280. What is your profession? Tobacco planting.
281. *Mr. Anderson.*] You were appointed a tobacco expert for the Department of Agriculture for New South Wales, in January 1893, were you not? I received the appointment in the last week of December, 1892.

G. F. Sutherland.
9 Sept., 1896.

282. Had you applied for that position when Mr. Smith was Minister for Mines and Agriculture? Yes.
283. And you repeated the application when Mr. Slattery was Minister? I applied twice to the best of my belief.

284. *Chairman.*] The second time when Mr. Slattery was Minister? Yes.

285. *Mr. Anderson.*] Did you present testimonials from competent authorities in India to certify as to your value as a tobacco planter and curer? Yes.

286. Did you interview me in the matter? Yes.

287. Each time? Not on every occasion, but I recollect seeing you during Mr. Smith's period of office—seeing you twice. On the occasions when I called I saw you personally as well as Mr. Smith.

288. And did you also see me during Mr. Slattery's term of office? On one occasion.

289. Did I ever give you the slightest reason to suppose that I arrogated to myself the appointment of you or any other officer in the department? No; most distinctly not.

290. Did I make you very clearly to understand that the Minister (either Mr. Smith or Mr. Slattery) had the appointment entirely in his own hand? Yes.

291. That I had nothing to do with it? Yes; you led me to understand that the Minister had the sole appointment in his hand.

292. Do you happen to know that I wrote to Mr. James Inglis, who had recommended you, and made diligent inquiries about your qualifications? That I do not know.

293. When you were appointed was another gentleman appointed on the same day as tobacco expert? Yes.

294. Do you consider that it was necessary to have two tobacco experts for New South Wales? It is a matter of opinion. No; I think one would have been quite sufficient.

295. Are you aware that at the same time very high officers in the Department of Agriculture were being retrenched? Yes; the chemist and pathologist of the department were retrenched the previous week, I think, to my appointment.

296. Were you amazed to find another man appointed with you to teach tobacco-growing to the people of New South Wales? Very much.

297. Do you remember Mr. Slattery, in reply to some question asked in the House, giving this information: "The other gentleman had credentials of the very highest. He had been brought from America by the Queensland Government for the purpose of making inquiries in the same matter in that colony"? I recollect seeing that statement in the newspapers.

298. Did you speak to Mr. Lamb about that? Yes.

299. What did he say? Regarding his being in America he said he had never been there; and in the course of many conversations I gleaned from him that he had never had any practical experience as a tobacco planter. At least I had his statement to that effect—that he had not practised tobacco planting before coming to Australia, before his appointment by the Queensland Government.

300. After a considerable intercourse with him officially, did you form the opinion that he was a qualified man to teach our farmers tobacco planting and tobacco curing? After the first twenty-four hours passed in his company on a visit to the Hawkesbury College, I formed a very strong opinion that the man had no previous experience, and was perfectly unfitted for the duties he had undertaken. By the end of the week I was perfectly assured of the fact.

301. Had your own experience in India been under American experts—men imported from America to grow tobacco in India? The status of the men under whom I served was that they were brought by the Government of India from America. They were engaged through the Bureau of Agriculture in Washington for the purpose of initiating and carrying on the tobacco industry on American lines in India.

302. You therefore know the Indian system and the American system thoroughly? The American system—there was no Indian system. The production of tobacco in India as an article of commerce did not exist prior to that time.

303. Over how many years did your experience extend? Nearly twelve years.

304. How much salary did Mr. Lamb receive when he was appointed? He told me himself £300.

305. How much did you receive? £3 per week.

306. You feel quite certain that if you had been the sole tobacco expert you could have done all the teaching needed for this Colony, and all the work required for the Department of Agriculture? The circumstances only justified the appointment of one person, and one person would have been quite sufficient to perform the duties.

307. Were your services acceptable to the practical farmers of the Colony in whatever districts you visited? Yes; I was on excellent terms with all the farming people in the Colony.

308. Are you aware that Dr. Mason, one of the largest tobacco planters in the Tumut district, personally thanked the department for your valuable services? I was not aware of it.

309. Did Mr. Brown, the member for the district, and a very large tobacco buyer, express his entire confidence in you as a tobacco expert? Yes; that feeling was generally expressed, I am glad to say, wherever I went.

- G. F. Sutherland.
9 Sept., 1896.
310. You now live in Fiji? Yes.
311. When you went down there did you find that the Department of Agriculture in New South Wales had a bad name? It was held in contempt.
312. Why? On account of newspaper criticisms that were received; but chiefly on account of the fact that one man, well known in Fiji, had been appointed an expert in sugar-growing.
313. Who was that gentleman? Mr. O'Kelly.
314. Are you well aware that Mr. O'Kelly's reputation in Fiji was not that of a man qualified to teach farmers to grow sugar or any other tropical products? His intimate friends always made a joke of it to me personally.
315. Was he manager of a plantation in Fiji? No, not to the best of my belief.
316. Do you know that he was a coolie overseer on the Homehurst Estate under a gentleman named Hedges, who was the manager? Yes.
317. Do you know that that estate absolutely failed and cost an enormous amount of money to the proprietors? Yes; I have heard so.
318. *Mr. McElhone.*] Do you know of your own knowledge that Mr. O'Kelly was not managing a sugar-plantation in Fiji? I was not there.
319. Then what you have just said was only hearsay? In the same way that I know that there is such a place as St. Petersburg, though I have not been there.
320. *Mr. Anderson.*] Did you gather from Mr. O'Kelly's intimate friends that he was not a success in Fiji? As I was not in Fiji when Mr. O'Kelly was there, I cannot say of my own knowledge anything on the point.
321. *Chairman.*] Can you give the names of the intimate friends of Mr. O'Kelly who gave you this information? I decline to give the names, as it would be a breach of confidence to do so.
322. *Mr. Anderson.*] Do you know a gentleman named Phillipot in Fiji? Yes.
323. What is his position? Mr. Phillipot is manager of the Banana Company, and a planter of twenty-five years' standing. He is a man who is held in the highest repute amongst the people of Fiji, from Sir John Thurston downwards.
324. Did he know Mr. O'Kelly very well? He was his intimate friend.
325. What was Mr. Phillipot's opinion in regard to Mr. O'Kelly's career in Fiji, and his reputation as a sugar-grower? That he had been employed as a coolie overseer on Homehurst, and had been banana-growing on his own account; but that he was absolutely unqualified for the position to which he had been appointed by the Department of Agriculture in New South Wales.
326. *Chairman.*] That is what Mr. Phillipot said to you? Yes.
327. *Mr. Slattery.*] Where? In Fiji.
328. *Mr. Anderson.*] What opinion did you form from your own observation, and from your intercourse with practical farmers in many districts of the Colony, as to the value of the inspectors who had previously visited those districts? I can only reply in a general way. I only know the estimation in which many, not all, of the officials of the department, were held. I am referring to the inspectors. A large number of them were held in the estimation of the public to be incompetent to fulfil their duties as specialists or to instruct.
329. Which of the inspectors did you come into contact with yourself? I was not brought into professional contact with any of them, with the exception of Mr. Benson and Mr. Despeisses. I had no opportunity of gauging their abilities.
330. *Chairman.*] Then you do not know anything about them? No; with the exception of the two I have named, who I consider were fully competent.
331. You never had an opportunity of judging of the qualities of the others? No.
332. *Mr. McElhone.*] Only what you heard about them? Only by public repute.
333. *Chairman.*] You made a statement in reference to your opinion of Mr. Lamb? Yes. I except Mr. Lamb, because, of course, I was associated with him.
334. After forming the opinion which you did concerning Mr. Lamb a week after you had seen him at the Hawkesbury College, did you repeat that opinion to anyone in the department? Not immediately. I did subsequently when I had an opportunity.
335. How long after? I am not certain; it may have been a period of several months.
336. To whom? To Mr. Wood, the Under Secretary, and to Mr. Campbell, the head clerk.
337. When did you leave the department? In January, 1895.
338. What was the reason? The Government of Fiji applied for the loan of my services, first to the Colonial Secretary, and subsequently to the Minister of the Department, and they would not let me go.
339. *Mr. McElhone.*] Mr. Smith or Mr. Slattery? Mr. Smith. They applied for the loan of my services for twelve months. Subsequently a commercial company, formed in Sydney for the purpose of developing the tobacco business in Fiji, in conjunction with the Government, made advances to me, and I accepted their proposals.
340. To grow tobacco there? To manage the enterprise down there.
341. In connection with the cultivation of tobacco? Yes.
342. *Chairman.*] You know nothing of the cultivation of sugar, I suppose? No.
343. *Mr. McElhone.*] You said just now that the proprietors of some plantation in Fiji with which Mr. O'Kelly was connected were ruined? That I do not know personally.
344. Have you been living in Fiji for some time? Since the period I mentioned.
345. Do you know, as a matter of fact, that nearly all the sugar-growers were ruined sometime ago for many reasons—that large numbers of the sugar-growers of Fiji failed? Yes; I heard of planters failing.
346. You said that Mr. Phillipot told you something about Mr. O'Kelly;—what is Mr. Phillipot in Fiji? Mr. Phillipot is manager of the Fiji Banana Company, and he is a planter on his own land.
347. Has he been managing sugar-plantations there? No.
348. Then he only spoke of his knowledge of Mr. O'Kelly as a banana-grower? I believe he knew Mr. O'Kelly during the time of his residence down there.
349. Where did you obtain your knowledge of tobacco-growing? In India first, under an American manager.
350. In what part of India? The province of Tirhoot, on the State-subsidised farm of Poosa.
351. Then you have no knowledge of general agriculture, such as wheat-growing? A man must necessarily be a very fair farmer before he can take up tobacco-growing.

352. But you had no knowledge of general agriculture except as regards tobacco? No; I do not claim to have any special knowledge except as regards tobacco.
353. You were simply a tobacco expert, who thoroughly understood the cultivation and curing of tobacco? Yes.
354. Did you come across Mr. O'Kelly in Fiji at all? No; I came across Mr. O'Kelly in the Agricultural Department.
355. As a matter of fact, of your own knowledge, you know nothing about Mr. O'Kelly's career in Fiji, and as to whether or not he was a qualified man? Of my own knowledge I know nothing.
356. You did not know Mr. O'Kelly at all in Fiji, and all you know about him there is from hearsay? Yes, in Fiji, from his intimate friends.
357. You do not know, of your own knowledge, whether what you heard of him there was true or untrue? No.
358. *Mr. Slattery.*] Do I understand that you are now living in Fiji? Yes.
359. How long have you been living in Fiji? Since January, 1895.
360. How did you come to communicate with Mr. Anderson about this matter? As to giving my evidence here to-day; Mr. Anderson summoned me.
361. Did you communicate with Mr. Anderson before he summoned you? I have communicated with Mr. Anderson casually whenever I —
362. Will you answer the question. Did you communicate with Mr. Anderson about giving evidence in this matter before you received your summons? Probably twenty times altogether prior to my departure to Fiji.
363. How did you come to do that; did Mr. Anderson request you to make inquiries in Fiji with regard to Mr. O'Kelly? No.
364. Or did you write from Fiji to say that you had on your own account made inquiries about Mr. O'Kelly? No, I never made any inquiries at all about Mr. O'Kelly.
365. Then, how did you come to communicate with Mr. Anderson to the effect that you could give evidence—hearsay evidence as you admit—against Mr. O'Kelly? Mr. Anderson summoned me.
366. But before you were summoned did you not either directly or indirectly communicate with Mr. Anderson as to the evidence you could give before this Select Committee? I have discussed with Mr. Anderson several things.
367. Did you communicate with him directly or indirectly before you were summoned to give evidence before this Select Committee? I must explain; I did not call on Mr. Anderson with any such view. The subject of Mr. O'Kelly casually cropped up.
368. When you were on a visit to Sydney? Yes; during my present visit.
369. How long ago was it? It may be a week or two ago.
370. *Mr. Anderson.*] Did I ever in my life write a single line to you in Fiji? No.
371. *Mr. Slattery.*] Did you communicate with Mr. Anderson as to what evidence you could give before the Select Committee before you were summoned? No, I did not. I paid what was solely a courtesy visit to Mr. Anderson, and any reference to the Agricultural Department that occurred cropped up incidentally, and only to a very slight degree.
372. Do I understand that you had no communication at all with Mr. Anderson, with reference to Mr. O'Kelly, during the last fortnight? Exactly, you may understand that to be the case.
373. *Mr. McElhone.*] Since you arrived in Sydney? Yes.
374. *Mr. Slattery.*] Within the last fortnight or three weeks? Certainly.
375. Before that you had no communication with Mr. Anderson in regard to Mr. O'Kelly's qualifications for the position of Inspector of Agriculture? Absolutely none.
376. If you have only communicated with Mr. Anderson during the last fortnight or three weeks, how did you come to communicate with Mr. Phillipot in regard to Mr. O'Kelly? That is a very simple matter. I was known to have come from the Department of Agriculture in Sydney; and it gained me no credit, on going to Fiji, where that department and its officers were held in profound contempt on account especially of the knowledge of this one appointment.
377. When I appointed you as tobacco expert you were a perfect stranger to me were you not? Yes.
378. And it is correct that you were recommended by Mr. James Inglis who was formerly Minister for Public Instruction? I believe he recommended me some time before.
379. Do you not know that it was on Mr. Inglis recommending you as a tobacco expert, and to carry out the work of teaching the farmers how to grow tobacco, that I appointed you? Yes.
380. And do you not know that Mr. Inglis at that time was a member of the Opposition in the Legislative Assembly, and not a supporter of the Government? I was not aware that it was on Mr. Inglis' recommendation. That had been submitted about two years or a year and a half before.
381. Do you not know that you requested Mr. Inglis specially to see me about appointing you as a tobacco expert? That may be so, I forget.
382. Do you not know that Mr. Lamb, to whom you took exception on the ground of unfitness, has been ever since, and is now, in the Department of Agriculture, as the tobacco expert for the Colony? I understand he was dismissed by the Public Service Board, which was the first tribunal that could test him.
383. Up to the time, at all events, of the Public Service Board coming into existence you know that Mr. Lamb continued in the position to which I appointed him? He got a two years engagement prior to your leaving office, and the present Minister could not interfere with the appointment.
384. Will you, on your oath, say that any engagement beyond a temporary engagement, was ever offered to you or Mr. Lamb? I can only say that when I desired to be properly considered on my business merits the present Minister, Mr. Smith, told me that Mr. Lamb had a two years' engagement, and that the Colony was not in a position to give me that justice he thought I ought to receive owing to that fact.
385. Will you swear that I gave Mr. Lamb one day's engagement more than I gave you? I do not know who gave it.
386. At all events, you say that Mr. Smith said that he was appointed for two years? Mr. Smith was under the impression that an appointment for two years existed, because he told me so in good faith, and said that on that account he was unable to give me the consideration he thought I was entitled to.
387. *Chairman.*] Are you aware that Mr. Lamb is still in the Service? Yes, temporary, until an expert is appointed.
- 388.

G. F. Sutherland.
9 Sept., 1896.

G. F.
Sutherland.
9 Sept., 1896.

388. Are you aware that the Public Service Board retrenched him and reappointed him to the same position? I have heard of that. I do not know what part the Public Service Board may have had in temporarily reappointing him. I know he was discharged by the Public Service Board as being incompetent.

389. Do you know that he was reappointed temporarily? I have heard so—appointed temporarily until an expert was appointed.

390. *Mr. Slattery.*] During all the time you were in the department did you ever, either in writing or verbally, report to me anything against the inspectors of agriculture? No, certainly not.

391. Did you ever put in writing addressed to me, or the Under Secretary, or anyone else, that you had heard objections from so-called experienced farmers against the inspectors of agriculture? I put nothing in writing. On several occasions I complained to Mr. Wood about the arrangement that had been made, and its unjustifiable character, and he consoled with me to a certain extent.

392. That is in regard to yourself? Yes.

393. *Chairman.*] You considered that you should have been superior to Mr. Lamb? My contention was that Mr. Lamb had no claim whatever to the appointment.

394. *Mr. McElhone.*] As far as ability was concerned? Yes; no claim for the position of instructor in tobacco-culture.

395. *Mr. Slattery.*] I suppose you know I never saw Mr. Lamb in my life? Very likely; I quite believe that.

396. Did you ever travel about with any of the inspectors of agriculture? I travelled only with Mr. Lamb.

397. Did you know Mr. Hook? Yes.

398. Did you ever travel with him? No.

399. Did you know Mr. Macklin? No; I never saw him, to the best of my knowledge.

400. Did you know Mr. de la Motte? I have met him on two or three occasions.

401. Did you ever travel with him? No.

402. Do you know Mr. Dunnicliff? Yes.

403. Did you ever travel with him? No.

404. Would you say that Mr. Dunnicliff was a man who did not understand his business as an inspector of agriculture? I have had no opportunity of knowing anything about Mr. Dunnicliff's capacity personally.

405. And that would apply also to Mr. O'Kelly, as well as the others whose names I have mentioned—of your own knowledge? Yes, of my own knowledge.

406. In your experience of the department did you ever know of my having put any one person into the department who was not required—of your own knowledge? I have already controverted that in the case of Mr. Lamb. Not being a professional man, he had no qualifications for the appointment.

407. But the appointment was recommended, was it not? I do not know.

408. For instance, I did not appoint you for the mere sake of doing you a favour, did I? No, certainly not.

409. Do you know that, as a matter of fact, I did not know one of the inspectors personally? Very possibly.

410. *Mr. Anderson.*] Did I ever write a single line to you at Fiji, from the 1st of January, 1895, till this minute? No, certainly not. There was no communication by letter or even in conversation.

411. Did you pay me a visit of courtesy about a fortnight after you arrived in Sydney? Yes.

412. Did I know you were in Sydney? No.

413. Was I very much surprised to see you? Yes.

414. Incidentally we discussed the department, and I told you about this inquiry? I introduced the subject by saying that the fact of my going from the Agricultural Department of New South Wales was no recommendation to me in Fiji, and adducing a very sound reason for it.

415. I did not instigate in any shape or form any evidence you might give? Certainly not.

416. *Mr. Slattery.*] Did I understand you to say that the Fijian Government had such a high appreciation of the officers of this department that they specially wanted to get your services for twelve months, and our Government would not accede to their request? That is taking a lot for granted. I was known personally to several people in Fiji, and my experience as a tobacco planter was known.

417. Are you an applicant now for the vacant appointment of tobacco expert here? No, nor do I intend to become an applicant; I am better off where I am.

418. *Mr. Anderson.*] You are well aware that the position of tobacco expert is vacant, because the Public Service Board have invited applications for it? Yes.

419. *Mr. Slattery.*] Are you an applicant for it? No.

420. Will you take it if is offered to you? Under my present circumstances, certainly not.

421. *Mr. McElhone.*] Are you working in Fiji now for a private company? Yes, managing.

422. *Mr. Wright.*] What salary are you getting as manager in Fiji? £370 and a tenth share of the business.

423. *Chairman.*] And quarters and rations? Yes. I wish to say that the attitude I have taken up now in regard to Mr. Lamb I consistently assumed towards the Under Secretary and the head of the department from the time I was there. Personally, I have no grudge against Mr. Lamb, but I consider he had not the slightest claim to be regarded as an expert in tobacco-planting.

424. *Mr. McElhone.*] But you did not know him before you got a Government appointment here? No.

425. *Mr. Slattery.*] Did you at any time put in writing any word of objection in order that it might go before the Minister against Mr. Lamb? No.

426. *Mr. Anderson.*] Did you report to me that Mr. Lamb was not an efficient officer? To yourself, as my personal head, and subsequently to Mr. Campbell, and again to Mr. Wood, and I bitterly remonstrated against the treatment I was receiving from the department.

427. *Mr. Molesworth.*] Is it customary for subordinate officials to furnish reports in writing concerning their fellow officials to the head of the department? I do not know.

428. *Mr. McElhone.*] You had never been in the Government employ before? No.

Henry Charles Lennox Anderson, further examined:—

429. *Mr. Slattery.*] Would you look at your minute of the 23rd September, 1891, in which you state "The man in charge of the North Coast would need to have good experience in sugar-cane, maize, and other tropical plants; would be required to speak with equal authority to the sugar planters of the north";—do you remember that? Yes, I remember that.

H. C. L.
Anderson.
9 Sept., 1896.

430. Would you look also at your minute dated 12th November, 1891, in which, when urging the appointment of the four inspectors of agriculture, you say, "At present there is a serious disease menacing the sugar-cane in the north. I would respectfully impress upon the Minister the necessity of appointing some men of good practical and scientific training to examine into these diseases?" That is right.

431. Do you not know that it was in pursuance of that minute of yours that I appointed Mr. O'Kelly? It was; but Mr. O'Kelly was not able to deal with questions of disease, and we had to send Dr. Cobb, the pathologist of the department, to do that special work.

432. Is it not a fact that Dr. Cobb went to the various portions of the Colony where there were inspectors for the purpose of inquiring into the diseases, such as diseases in wheat, and that that was his duty as pathologist? He would not have had to do so if the men had been competent to make the investigations on the spot.

433. Then if they had been competent he would not have been required as pathologist? Yes; he would have had to compare the investigations at head-quarters.

434. Does not the whole of this dispute come down to this, that you thought that you, yourself, ought to have the appointment of the inspectors of agriculture? Certainly not.

435. From the commencement to the end of my connection with the department, did you ever make any charge in writing against any of these men of incompetence? I made a most serious charge against Mr. de la Motte and Mr. Dunnicliff as soon as possible after your appointment.

436. In writing? Yes, in long minutes.

437. But you made no objection in writing against any of the others? I did not know the other men, they were strangers.

438. Did you make no objection to Mr. Hook? I reported Mr. Hook for being drunk.

439. I am talking about incompetent? I think he was a competent man in certain directions. Of course he was not an agricultural genius.

440. Up to the time of your separation from the Department of Agriculture until you took the office of Librarian at the Public Library, did you not receive your salary without any break? I got three months' leave.

441. I am referring to salary? Yes; I got leave of absence on full pay. I was entitled to that under the Civil Service Act.

442. You were appointed to the position of Principal Librarian of the Free Public Library by the Government of which I was a member? Yes.

443. Do you not know that I recommended your appointment to my colleague, Mr. Suttor, who was then Minister of Public Instruction? I believe you did. I do not know of it, but I am quite convinced you did.

444. There was a Mr. Fitzgerald appointed inspector of agricultural shows? Yes.

445. He was appointed to fill a vacancy, was he not? Yes. There was no need for the position, though, if you appointed four inspectors of agriculture.

446. Was the appointment to fill a vacancy? It was.

447. Do you know that Mr. Fitzgerald was very highly recommended—that he was recommended by Mr. Copeland, who was then Minister for Lands? No, he was not. He was not recommended as an inspector of agricultural shows; he was recommended as an inspector of stock.

448. Was he recommended for appointment in the Public Service? As inspector of stock.

449. At all events you will admit that he was recommended for employment in the Public Service? He was recommended as inspector of stock, but that needs an examination.

450. I suppose you know that the office of inspector of stock is a much higher office than that of inspector of agricultural shows—the salary of one being £350 a year, and of the other only about £150? Yes, but the former needed an examination, and the latter did not.

451. Do you know that Mr. Fitzgerald was also recommended by Mr. Ednie Brown? He had a testimonial from Mr. Ednie Brown as being a public officer under the South Australian Government.

452. Of high character? I cannot remember that.

453. Do you not know that he was recommended for public employment? I cannot remember that he was recommended for public employment. This is the testimonial of Mr. Ednie Brown:—

Sydney, 8 January, 1892.

MR. JAMES J. FITZGERALD has been known to me for over a period of thirteen years, and chiefly in South Australia where he was engaged by the Government as an inspector of land and stock.

Mr. Fitzgerald holds a very high character in South Australia, and had to leave the Service on account only of retrenchment.

I shall be glad to hear that the Government here will engage his services, as thereby I am sure it would secure a good officer.

J. EDNIE BROWN,

Director-General of Forests.

Mr. Copeland distinctly recommended him for the position of inspector of stock, which he understood was vacant.

454. What do you say about Mr. Fitzgerald;—do you say that all the testimonials given in favour of Mr. Fitzgerald are incorrect? No; I speak of him as I found him. I found him a very lazy man. He went away from the department frequently without my permission, and I could not keep disciplinary control over him.

455. You know that he is out of the Colony now? I do not know; I know nothing at all about him. I never spoke to him from that time. I made a *résumé* of his record to you as Minister when he was there.

456. You know he charged you with persecuting him all the time? Exactly.

457. And you know also that that is the charge that Mr. Dunnicliff makes against you and also Mr. de la Motte; do you not know that all the persons whom I appointed, unless specially nominated by you, complained that you were persecuting them? When I reported them for drunkenness.

458. Do you not know that all the persons whom I appointed as Minister, made, rightly or wrongly, the same complaint against you—that you persecuted them? I never heard such a thing.

459. You know Mr. Fitzgerald did? Yes, he did.

- H. C. L. Anderson.
9 Sept., 1896.
460. You know Mr. Dunningcliff did, and does now? No.
461. Do you not know that Mr. de La Motte did? No, I never heard of such a thing. I am glad to say that you severely reprimanded Mr. Fitzgerald for such unbecoming language, which was not borne out by the papers. I never reported a man to you for anything but a gross offence against discipline. I am quite convinced that Mr. Slattery did the best he could. Mr. Slattery was made a tool of. I never made an aspersion against Mr. Slattery; he did the best in his judgment. I say he might have consulted men who could have saved him from making silly mistakes. He did make grievous mistakes.
462. Do you not know that in consequence of retrenchment the services of Mr. Turner were dispensed with? Yes.
463. And do you not know that Mr. Maiden, who is now Director of the Botanical Gardens, was appointed to do his duty? Not to do his duty.
464. I mean to do that duty in connection with his other duty? He could not possibly.
465. Was he appointed? He was appointed as consulting botanist, and Mr. Turner was botanist.
466. Have you not yourself recently designated Mr. Maiden, who has now been selected as the Director of the Botanical Gardens, as a mere amateur botanist? Leave out the word "mere." He is an amateur botanist. I say that now. He is not a professional botanist, or he was not when I made that remark. Perhaps he will be called that now.
467. Have you not made that remark in regard to him within the last few months? I do not know about the time. I made the remark. Mr. Maiden was an applicant for the position when Mr. Turner was appointed.
468. And then you thought Mr. Turner was the better of the two? Mr. Smith did.
469. Did not you think so? I was quite positive myself that he was.
470. But the Public Service Board, with the approval of the present Government, have appointed Mr. Maiden Director of the Botanical Gardens, to succeed Mr. Moore? Yes.
471. I suppose you would say that Mr. Maiden was unfit for that position? I would not express an opinion. But I may mention that Mr. Turner is not in the Service.
472. Do you decline to express an opinion as to whether Mr. Maiden is a fit person to be appointed Director of the Botanical Gardens? I would express no opinion about that. That is a different position from that of botanist of the Agricultural Department—totally different.
473. *Mr. Wright.*] Do I understand from you that you never had any wish to impugn the purity of Mr. Slattery's administration? Certainly not. I take the exact words of my evidence. I am willing to be bound by those exact words.
474. You consider that Mr. Slattery was simply misled in certain appointments he made? He was grievously misled, and he did not consult as much as he might have done with men who could have given him valuable help. For example, he will remember that I wrote him a very courteous letter when he was appointed and asked him to receive all the heads of the departments, among others Dr. Cobb.
475. The only reason of your feeling aggrieved was that you thought Mr. Slattery had taken the advice of people other than the official heads of the department? Yes, that was my feeling.
476. And that in consequence of that he had made certain appointments that you did not think were judicious in the Public Service? Yes; and he had made some that were unnecessary.
477. But you are prepared to acquit Mr. Slattery of any intention to overburden the department, or to appoint incompetent people? Of any intention, certainly.
478. *Mr. Slattery.*] Do you not remember that on the first day I took office you sent a letter something to this effect: "When will it be convenient for the Minister to receive me and the officers of my department"—merely to be introduced to the Minister? Yes.
479. And do you not know that it was in consequence of that letter that I made inquiries to know how it was that you were holding a position in which you did not communicate through the Under Secretary of the department? I do not know. You never mentioned the matter to me at all.
480. Do you not know that it was owing to that that I saw you and told you that that kind of thing could not go on as long as I was Minister? You never sent for me at all. I pressed for an interview several times.
481. Did I not tell you that I declined as Minister to allow you to communicate direct with the Minister, and that you would have to communicate through the Under Secretary of the department, as every other head of a branch had to do? Yes.
482. *Mr. Molesworth.*] Mr. Sutherland, in his evidence, stated that he made verbal reports to you as to the inefficiency of some of the inspectors? As to one of them, Mr. Lamb.
483. Those reports, I understand, were verbal? Yes.
484. Was it his duty as an officer of the department to submit such reports in writing? No.
485. It is no breach of departmental discipline to make verbal reports? No. I think I ought to explain that. This is my recollection of it. I wanted valuable bulletins to issue to our farmers to instruct them in tobacco-growing, and I also wanted articles for the *Agricultural Gazette*. I asked both these gentlemen, Mr. Lamb and Mr. Sutherland, to write such articles for the *Gazette*. Mr. Sutherland protested to me that Mr. Lamb's articles were valueless. I therefore wrote to the Queensland Department of Agriculture, and asked them for their opinion of Mr. Lamb. Professor Shelton, the expert of the department, told me they were glad to get rid of Mr. Lamb; that he was a failure with them, and that both Professor Shelton and the Under Secretary, Mr. Peter McLean, were amazed that we should take on a man in our department without a testimonial from the Queensland Department; and there is no testimonial here from that which was his last place. I therefore wish to draw attention to Mr. Lamb's application. He does not give any testimonial from the last place he was in, and he was appointed by Mr. Slattery unwittingly to a very important position.
486. *Mr. Slattery.*] Did you ever report what you have just stated to me? No; because I had reported other inspectors, and had been severely snubbed for doing so.
487. Did I ever snub you personally in regard to any inspector of agriculture, or any other officer of the department,—I will take it personally? What do you mean by personally?
488. Did I see you personally and snub you? No.
489. Will you now produce one document in the whole department to show that I snubbed you from start to finish about any officer? On the 28th January, 1892, after the appointment of these inspectors, when I had returned from Bodalla, I wrote to the Minister earnestly protesting against the appointment of one of the subordinate officers of the department, Mr. Dunningcliff, who had applied for the position of

an inspector behind my back. I gave a *résumé* of his record in the department, which was, in my opinion, very bad. I therefore recommended:—

H. C. L.
Anderson.

1. That Mr. Dunnicliff be appointed on three months probation with the distinct understanding that his present position will be filled, and that if he be found unfit for the new position his services may be dispensed with.
2. That his salary be at the rate of £200 a year, with travelling expenses of 10s. per day.

Upon this Mr. Slattery said:—

This is the fourth minute, dated 28th January, relating to the appointment of Inspectors of Agriculture; are there any more, of the same date, coming on? I agree with Mr. Anderson, that Mr. Dunnicliff should have submitted, through him, his application for promotion. He did so, as far as I can learn, in August, 1890; but that application was never placed before me. What then could Mr. Dunnicliff do? After Mr. Dunnicliff has been appointed the objections on this minute paper are taken. They come too late, and I decline to interfere with his promotion.

I knew Mr. Dunnicliff's record in the department. I wished to guard Mr. Slattery against making a bad appointment, and I therefore urged caution. I showed no animus. I said, let the man get another probationary period, which he had already had under Mr. Sydney Smith. Mr. Slattery snubbed me by saying: This man must be appointed; without any reference to me as his superior officer, who had an intimate acquaintance with his record in the department, and who had put it in black and white for Mr. Slattery's guidance.

490. *Chairman.*] Was that minute written before Mr. Dunnicliff's appointment was approved? His appointment was made on the day he applied; and I was away in the country, at Bodalla, and did not know he had applied.

491. Had Mr. Dunnicliff been apprised before the date of your minute that he was appointed? Not officially—not through the official channel of the department.

492. Not by you? Every communication in the department went through me.

493. Are you aware whether he had been informed in any other way? I do not know; he could not have been informed officially.

494. *Mr. Slattery.*] Beyond the minute just quoted, is there any other minute in which I snubbed you? The next thing that I consider was a very severe snub, occurred on the same date. I wrote another minute as follows:—

I wish to draw the Minister's attention to the previous connection with the department of Mr. de la Motte, who has been approved by the Minister as a suitable candidate for the position of Inspector of Agriculture.

Mr. de la Motte is a Dane by birth, who speaks fair English, and writes it tolerably correctly for a foreigner.

He is at present a teacher in the service of the Public Instruction Department, and, as I had occasion to examine him several times, I can testify that his literary and scholastic attainments are of a very poor order. He never succeeded in getting a classification.

Immediately upon assuming my present position I received lengthy communications from Mr. de la Motte, which caused me to inquire into his qualifications as an agriculturist, as I was very much impressed with the learned and scientific nature of his articles. I found that Mr. de la Motte was fond of borrowing from books and pamphlets, and using quotations which he could not explain. He quoted chemical terms and scientific language which were absolutely Greek to him. As, however, he was strongly recommended by gentlemen who had a high opinion of him, the late Minister, on my recommendation, appointed him, with the permission of the Public Instruction Department, to inspect, during his holidays, some of our experimental wheat plots, and report thereon to the department.

His reports were always very neatly written, very carefully drawn up, and very punctually returned; but they showed no signs of the scientific education, combined with practice, that would be so desirable in an inspector of this department. The Minister, therefore, did not see his way to continue his services beyond the month of probation.

From my experience of Mr. de la Motte, and the opinion of him formed by the practical men whose farms he visited, I am led to conclude that he has much to learn, and still more to unlearn, before he can be worth anything like £300 a year to this department, and win the confidence and respect of our farming community. I therefore recommend—

1. That he be appointed only on three months' probation, so that he may have a chance of getting leave of absence for that period from his present department, and then return if found unsuitable for our work.
2. That his salary be at the rate of £150 a year, with travelling expenses—10s. a day.

I may mention that at present his salary is £96, with a residence.

On that Mr. Slattery said that the man must remain at £300 a year, with 12s. a day travelling expenses, and I felt it a very serious snub.

495. Was he not appointed nine days before you sent that minute on? He was.

496. And you wanted me to undo what I had done? I did not wish to undo the appointment. I wished to reduce his salary to what I thought he was worth.

497. After I had, as Minister, appointed a man at a salary of £300 a year, whom I believed to be fit for the position, you wanted his salary reduced? I did; he had not been informed of his appointment, nor of his salary.

498. By you? He could not have been officially informed without my knowledge, because all the clerical correspondence was conducted through me, and this gentleman lived near Bulli at the time.

499. These appointments were made by my minute of 19th January, 1893? Yes.

500. And your minutes objecting to certain of them and their salaries did not reach me till the 28th January, 1892—nine days afterwards? That is correct.

501. And I declined to interfere with what I had done nine days previously? You did.

502. Is there not among the papers a letter from Mr. de la Motte, dated 27th October, 1891, addressed to the Minister for Mines and Agriculture, in which he states:—

I have the honor to apply for an appointment under the above department as an inspector or experimentalist.

I beg to state that for a short period during last December it pleased the late Minister for Agriculture to appoint me as acting inspector (*pro tem*) to inspect and report upon certain experimental wheat plots in the south-western district, and that after my work was finished I had the satisfaction to learn from the Director of Agriculture that "my reports were admirably drawn up."

I was further told by that gentleman, in reply to one of my questions, that I was qualified for one of the above-mentioned appointments.

Did you put any minute on that application of Mr. de la Motte's to show that he was incompetent in any way? That application was addressed to the Minister, and was never referred to me for report.

503. Do you not know that the original of this application was lost, and that this is a copy which came on with the papers from you? It is quite possible that I never saw it. I could not have seen it.

504. You know that the originals of some of these papers are missing from the department? I heard that they were.

505. Will you swear that you did not send on that application, dated 27th October, 1891, and that I had these papers before me when I made the appointments on 28th January, 1892? There is nothing here to show that I ever saw the application. Whenever I sent on a paper I always minuted on the margin "Sent to the Minister."

- H. C. L. Anderson.
9 Sept., 1896.
506. Do you know that there was also a letter from Mr. de la Motte, dated 21st December, 1891, making application for the position of Inspector of Agriculture, in which the writer states:—
- Lastly, I beg to state that about twelve months ago I was for a brief period employed by the late Minister for Agriculture as acting inspector *pro tem.*, and on my return from the country was complimented by the Director for the efficient manner in which I performed my duties as inspector.
- Is it not a fact that that application, with that paragraph in it, also came on, and that you never stated one word against Mr. de la Motte's qualifications until nine days after he was appointed? I think that was a letter to Mr. Chanter.
507. No, it is to the Minister for Agriculture? I had nothing to do with your correspondence. I never saw it, probably.
508. Were not the whole of these papers—the application of the 27th October and the application of the 21st December, from Mr. de la Motte, containing the paragraphs I have read—sent from you, as Director of Agriculture, when you marked the ten names with blue pencil? They were included in the bundle of papers very probably—must have been, I should think, because any communication coming in referring to a case is connected with the previous papers by the clerical staff. But I do not see half of those papers.
509. Do you not know that the applications of all these people—thirty-four of them, including Mr. de la Motte—came before me without one word against Mr. De la Motte's suitability for the appointment? Those applications were submitted to Mr. Sydney Smith, who knew Mr. de la Motte personally, and knew his record.
510. Afterwards, when Mr. Sydney Smith went out of office, the papers came before me? They did, without any succeeding action on my part. I had not seen the papers afterwards.
511. Had you not recommended the appointments on the 1st November, 1891, and did you not send on the thirty-four applications for the appointment, with those two letters from Mr. de la Motte, without a single word contradicting his statement that you had complimented him on the efficient manner in which he had performed his duties? Those papers went on to you as a bundle. I certainly never looked over them from the date when I carefully examined them for Mr. Sydney Smith's information. I never glanced at them again. I had expressly omitted Mr. de la Motte's name, and one would think that that would have excited your suspicion, even if you had noticed those commendatory remarks. But I gave Mr. de la Motte the fullest credit for the way he prepared his reports. That, however, did not make him fit to be an inspector of agriculture by any means.
512. *Chairman.*] A statement was made just now in reference to Mr. Dunnicliff—that he had previously made an application through you which had not been sent on? In August, 1890. But these applications which I sent on to the Minister were in response to a public advertisement in the daily press in August, 1891, and at that time Mr. Dunnicliff did not apply, although he was one of my own officers in the department under Mr. Smith, who knew him well.
513. You complained to Mr. Slattery that Mr. Dunnicliff had made an application direct, and Mr. Slattery said the reason he did that was because he had sent an application to you previously which had never gone on to the Minister? It could not have been sent on because it was not for the position for which we advertised in the press. It was immediately after the department was formed, while he was a temporary officer in the department, a clerk in fact—in August, 1890.
514. *Mr. McElhone.*] You spoke of Mr. de la Motte's want of knowledge of wheat-growing. Is it not a fact that gentlemen were appointed by all the colonies to make inquiries about rust in wheat? Yes.
515. Is it not a fact that none of these men could come to any decision as to a cure for rust in wheat? Certainly not; they have furnished most valuable reports.
516. Is it not a fact that they have not been able to cope with the difficulty, and that they could not find any rust-resisting wheat? They have found wheats that are decidedly rust-resisting.

THURSDAY, 10 SEPTEMBER, 1896.

Present:—

MR. CANN, | MR. HENRY CLARKE,
MR. McELHONE.

W. J. LYNE, ESQ., IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor in his own behalf.
Mr. H. C. L. Anderson appeared in his own behalf.

William Henry Moseley called in, sworn, and examined:—

- W. H. Moseley.
10 Sept., 1896.
517. *M. Slattery.*] I believe you were engaged in sugar planting in Fiji for many years? I could not say for many years; I was engaged for some time sugar planting in Fiji.
518. For how long? I was personally acquainted with Fiji for two years. I was down there for two years.
519. Did you know a Mr. O'Kelly who was appointed an inspector of agriculture in New South Wales? I knew a Mr. O'Kelly in Fiji, who was afterwards appointed an instructor in agriculture.
520. Do you remember when he was an applicant for the appointment of inspector of agriculture, speaking to me and recommending him as in every way qualified for the position in connection with sugar planting, and the growth of other tropical plants? I cannot exactly recall to mind the when and the how, but I remember perfectly well having a conversation with you about his qualifications, and telling you what I knew about him.
521. Will you tell the Committee what you told me at that time in respect of his qualifications? I told you then that he was employed at Holmhurst on our sugar plantation for about 2 or 3 years. I do not know now the exact dates. I knew him there for two years, and I think he was there for a year before I went down.
522. In what position? As overseer over the Fijian labour on the sugar plantation at Holmhurst. He left Holmhurst, and was for some time with a named Hedges further up the coast, on Taviuni. He was engaged

engaged there in growing tropical products—yams, I think, principally. After that he was employed, I think, by the Union Bank to look after a plantation down on the Navua River belonging to Sharpe, Fletcher, & Co.

W. H.
Moseley.

10 Sept., 1896.

523. In what capacity was he there employed? I believe, although I only speak from hearsay, that he was overseer and general superintendent of the plantation, which was a sugar plantation.

524. You informed me of what you have now stated when recommending Mr. O'Kelly for the position of an inspector of agriculture? I told you at the time we had the conversation what I have now stated to the Committee, and that I believed him to be a hardworking, intelligent young fellow, and one who knew his business, as far as sugar-cane and all those things were concerned, as well as most young fellows.

525. *Mr. Anderson.*] Did you give this recommendation to Mr. Slattery before Mr. O'Kelly was appointed? I could not tell you that. Beyond the circumstance of the conversation with Mr. Slattery I do not remember anything as to dates, but my impression is very strongly that it was before Mr. O'Kelly was appointed. I saw Mr. O'Kelly in Sydney, and he told me he was an applicant for an appointment of this sort, and I think the conversation referred to would naturally have been before his appointment.

526. Do you remember giving Mr. O'Kelly a testimonial about three months after he had been appointed? I do not remember, but I may have done so. I should have given him one if he had applied for it. I may say that Mr. O'Kelly was no friend of mine—quite the reverse.

527. Is this a copy of a testimonial you gave to Mr. O'Kelly:—

In reply to your letter of 17th April, I am glad to be able to testify to your energy, ability, and sobriety during the time that you were employed in our service on Holmhurst, and afterwards when you were in your late employment in Fiji. I am quite sure that if you should succeed in obtaining the appointment for which you are applying you will fill it with credit to yourself and to the satisfaction of the Government. I hope that you may be successful, seeing that the climate is so prejudicial to your wife's health; and I feel with you that there is not scope enough for a man there to make a success commensurate with the hardships one has to encounter in that climate. Wishing you all success.

That is a copy of your testimonial, the original, along with other papers, having been lost. The copy does not bear a date,—can you give me any idea of the date when you gave that testimonial? I cannot give you an idea of the date; but I never gave Mr. O'Kelly a testimonial in connection with anything except the appointment of inspector of agriculture in the northern district. That was the only time he ever applied to me, and it was the only testimonial I ever gave him.

528. Mr. O'Kelly's application for the position of inspector of agriculture is dated 17th December, 1891, and amongst the papers is a copy of the following letter from Mr. O'Kelly, dated 16th April, 1891:—

Dear Sir,—I thought it desirable to send the papers, which you will receive this afternoon, attached to my application. They are the only papers I have with me. One refers to my having passed my examination as a lieutenant, the other is a letter from the managing director of a large sugar company in Fiji, in whose employ I was.

Can you give us any idea when your letter was written to Mr. O'Kelly? I cannot remember; but to the best of my knowledge I only gave that one testimonial. I never heard of his applying for any other appointment.

529. If it can be shown that Mr. O'Kelly applied for the position of Clerk of Petty Sessions in the month of April, 1891, is it not probable that you gave him this testimonial to help him in that matter? I do not think so. I do not think I ever heard anything about his applying for the position of Clerk of Petty Sessions. I do not remember anything about that.

530. Assuming that your testimonial was in support of his application for a position as an expert in sugar-growing, is there one word in it to give any idea of his value as an expert in sugar? No; except in reference to his having been employed in Fiji.

531. That would mean nothing, would it? If he had told me that he was applying for an appointment in connection with sugar-cane, I consider that the mention of Fiji would imply that he had some knowledge of sugar-growing, as nine-tenths of the people in Fiji are employed in connection with that industry.

532. As a matter of fact, of your own knowledge, Mr. O'Kelly was never manager of an estate in Fiji? Not of my own knowledge, but my impression is that he was employed by the Union Bank for a couple of years as manager of a plantation which they took over from Sharpe, Fletcher, & Co.

533. Will you listen to this letter, dated 11th March, 1891, addressed by W. Fletcher to Mr. O'Kelly:—

Dear O'Kelly,

Post Office, Melbourne, 11 March, 1891.

I greatly regret the failure of my endeavours to keep Sharpe, Fletcher, & Co. (Ltd.) alive, and the disagreeable position you have been placed in by the action of the Bank at Suva. I take this opportunity of thanking you for the energy and willingness you have constantly shown in your work whilst in the company's employ. You have had excessively long hours and hard work in a difficult post, and I thank you for your loyalty to myself as manager and cheerful readiness at all times to save the company's interests in any emergency. I am sorry you have not had an opportunity to show your ability to manage a plantation on our estate, which you should have had had we continued operations, but I can testify to your ability to manage Fijians and Polynesians, especially the former, out of whom you have been peculiarly successful in obtaining a fair day's work, at the same time retaining the good-will of the men. If I can possibly help you in any way I shall be glad to do so, and I wish you every success.

Does not that letter show that Mr. O'Kelly had no practical experience in managing an estate for these people? A man who has worked on an estate, managing Fijian labour, though perhaps he may not be the head manager, must be in a position to acquire a very considerable knowledge of the management of sugar-cane, because the Fijians are employed exclusively in the fields, not about the mill at all. A man employed out in the fields with the Fijians, seeing to the sugar-cane in every stage of its development, from the plant-cane until it is fit to go to the mill, would acquire as good a knowledge of the habits and growth of the sugar-cane as a man could well acquire, as regards practical knowledge. It is the best schooling a man could possibly have for a knowledge of the management of cane, and of the diseases in cane, far better than if he had been in a mill.

534. I ask if Mr. O'Kelly was the manager? No; the word manager implies that a man not only manages the field work, but also all the operations at the mill.

535. *Chairman.*] You said before you thought Mr. O'Kelly was the manager, and after hearing the letter of Mr. Fletcher read, do you say now that it appears that he was not the head manager? Yes; it appears he was not the general manager.

536. *Mr. McElhone.*] Still he might have been the manager? No; the man who was directing the labour would never be the manager.

537. He would be looking after the growth of the cane in the fields? Entirely. The man in charge of the Fijian labour is the man who would be entirely responsible under the manager for the cane.

538.

W. H.
Moseley.
10 Sept., 1896.

538. His work as manager of the Fijians would be in connection with the growth of the sugar-cane for the mill? Yes, absolutely.
539. *Mr. Slattery.*] Has the letter by Mr. Fletcher, dated the 11th March, 1891, is written to Mr. O'Kelly for the purpose of getting him some position, is it not highly probable that your letter was written in the following April of 1891, for the same purpose? As far as my memory serves me the only recommendation I gave Mr. O'Kelly was in connection with the appointment which he was going to take up on the Northern River.
540. But whether you recommended him in writing or not, and apart from the question of date, you are satisfied that you recommended him to me personally before he was appointed? I am quite satisfied that you mentioned his name to me, and I told you then what I have stated now.
541. *Chairman.*] Did Mr. Slattery inquire from you with the view of getting information as to his qualifications? I think he did. As far as I remember he said "What sort of a fellow is O'Kelly?" I do not know whether he said anything in connection with an appointment.
542. And you gave Mr. O'Kelly a good character? Yes.
543. *Mr. Slattery.*] And you considered him fit to be an inspector of agriculture for the northern part of the Colony in connection with sugar-cane? I certainly thought he knew all about sugar-cane.
544. And you therefore recommended him as a fit person to be employed for that purpose? I did.
545. *Mr. McElhone.*] It has been stated that owing to Mr. O'Kelly's bad management some plantation with which he was connected went to the bad, and the proprietors lost a lot of money;—do you not know of your own knowledge that sugar-growing was a very bad speculation for all connected with it in Fiji for some years—that everybody connected with sugar lost money? I do not know any plantation in Fiji that has not lost money. With the exception of the Colonial Sugar Company, every single plantation in Fiji that I knew, with the exception of one that is managed by a Mr. Murray on the Navua, has gone bankrupt.
546. All these plantations failed as a general rule? Yes.
547. No matter whether they were managed well or badly? Mr. Murray is the only man, so far as I know, who has pulled through.
548. So that a man might be a good manager connected with a sugar plantation, and the growth of cane and the making of sugar, and yet from the force of circumstances and bad times there might have been a lot of money lost in sugar-growing? Yes; I know of men who were excellent managers in connection with sugar-cane who have gone bankrupt.
549. So that if Mr. O'Kelly was manager of a sugar plantation and the concern failed, it would not necessarily be his fault? No.

Fred Turner called in, sworn, and examined:—

F. Turner.
10 Sept., 1896.

550. *Chairman.*] What is your position? I am on the literary staff of the *Town and Country Journal*.
551. *Mr. Anderson.*] You were appointed consulting botanist to the Department of Agriculture in the year 1890? Yes.
552. Were you at first appointed on probation or for a limited period? For three months.
553. Did you apply for the position at first? No.
554. Did I interview you by order of the Minister at the time? Yes.
555. *Chairman.*] Who was the Minister at the time? Mr. Sydney Smith.
556. *Mr. Anderson.*] Did I take diligent steps to find out your qualifications for the position? Yes.
557. Did you use any influence whatsoever outside the department to get the position? None whatever.
558. Was the position offered to you then as consulting botanist presumably because you were the best man available in New South Wales? Yes. Indeed, the Rev. Dr. Woolls, F.L.S., said that I was the most fit man for the position in New South Wales or Australia. The late Rev. Dr. Woolls wrote me a splendid testimonial.
559. Have you read my evidence given before the Royal Commission on the Civil Service? Not very carefully; I just skimmed it through.
560. Did you see anything in it that you considered in the slightest degree untruthful or exaggerated, so far as your knowledge of the case went? No, I did not.
561. *Chairman.*] Having heard read to you the evidence given by Mr. Anderson before the Civil Service Commission, in answer to question No. 7,253, pp. 275–6, will you say whether you know anything about the matters there referred to? No; I had nothing whatever to do with the inspectors of agriculture.
562. *Mr. Anderson.*] You were consulting botanist for three months? Yes.
563. After that you were taken on the staff as botanist to the department? Yes.
564. When you were retrenched from the Department of Agriculture, was another gentleman employed as consulting botanist to the Department of Agriculture? Yes.
565. What was his name? Mr. J. H. Maiden.
566. Was he a candidate for the position of consulting botanist at the same time that you were, in 1890? Yes.
567. Did I show you a letter at the time you were appointed, which I had received from Mr. Maiden, in which he showed very great chagrin at being overlooked in favour of you? You did.
568. He was, therefore, a disappointed applicant for the position which you obtained? Yes.
569. *Mr. McElhone.*] Who was in office then? Mr. Sydney Smith.
570. *Mr. Anderson.*] What salary did you receive as consulting botanist when you were first appointed? £50 a year.
571. What salary do you know was on the Estimates for Mr. Maiden after you were retrenched? £100 a year.
572. Would you have been willing to have taken the position of consulting botanist again at £50 a year, in view of the urgent need of retrenchment? Yes; in connection with my other duties.
573. *Chairman.*] Were you ever asked to do so? No; I was sent away at one hour's notice, and with only six days' salary.
574. *Mr. Anderson.*] When you were retrenched, did you interview Mr. Harrie Wood? Yes.
575. What did he tell you about your retrenchment? I saw Mr. Slattery first, and he told me that there was not a whisper against my character or my qualifications for the position. I then went to Mr. Harrie Wood,

F. Turner.
10 Sept., 1896.

Wood, and I said "Would you kindly tell me for what reason I have been retrenched from this department," and he hummed and ha'ed and said, "You know I cannot help what the Minister does," and he said, "I will give you my word of honour that there will be no new men taken on in the Department until the old officials have been provided for." A day or two afterwards an outsider was appointed to inspect and report on agricultural farms, and one day, when the proprietors of the *Town and Country Journal* had sent me to report on the resources of the Hay district, I heard some very uncomplimentary remarks made in the train about that particular appointment.

576. *Mr. Slattery.*] Will you mention the names of the persons? I could not tell you who they were.

577. *Mr. Anderson.*] When you interviewed Mr. Slattery, did you gather from him that he blamed Mr. Wood for your retrenchment? Mr. Slattery said, "I can assure you I had nothing whatever to do with the retrenchment in my department. The only persons I saved were two boys, the sons of two widows whom I really could not find the heart to dismiss," and I told him he had acted very kindly towards them.

578. In other words, Mr. Slattery put the responsibility of the retrenchment on Mr. Wood? Yes.

579. *Mr. Slattery.*] Did I not say I had only got a certain amount of money? No; you never mentioned money.

580. And that the only two persons I had interfered with in regard to retrenchment were two little boys, the sons of two widows? Yes; but you never said anything about money.

581. *Mr. Anderson.*] Did Mr. Slattery say that Mr. Wood was responsible for the scheme of retrenchment? He said, "I had nothing to do with the retrenchment, and the only two persons I saved were two boys, the sons of two widows."

582. Did you have an officer named Dunicliff under your charge distributing seed for the department? Yes.

583. Was he a satisfactory officer? No.

584. Did you ask me to remove him from the work, and appoint a young man named Valder to do it? Yes.

585. Did Valder do it to your entire satisfaction? Yes, he did.

586. From what you saw of Dunicliff as a subordinate officer in the department at all times, was he in your opinion a competent officer for the department? The work of which he had charge might have been done a great deal better, as it was done afterwards, by somebody else.

587. From your experience of Mr. Dunicliff as an inspector, and from reports which he made upon grasses for example, in which you are an expert, did you conceive the opinion that he was a competent man to teach the farmers of New South Wales dairying and about pasturing? Very far from it.

588. *Mr. McElhone.*] I believe you are an authority on grasses and write reports on the subject? Yes. The pastoralists write to the *Town and Country Journal*, requesting that I may be sent to name trees, shrubs, and herbage, and report on their economic value.

589. You are a scientific expert on the various grasses, and your principal work in the department consisted in naming and classifying grasses? I dealt with all botanical subjects. I was the first to figure and describe Australian grasses, and salsolaceous plants, and through my figures and descriptions public attention has been drawn to their value, and hundreds of pounds have been saved to the country. In the Cape Colony and other countries, they reproduce my articles, and have sent here for seeds of some of the trees, shrubs, and grasses I have described. The other day the Hon. P. L. C. Shepherd, M.L.C., of Sydney, executed an order for £50 worth of seed, which was sent to him in consequence of my articles.

590. What was Mr. Maiden? He was in charge of the Technological Museum.

591. Is he a botanist? He calls himself a botanist. When I first knew him he used to worry the life out of me for the name of plants. When Mr. Anderson showed me that letter of his I found out then for the first time that he was a disappointed applicant for the position in the Agricultural Department, and I can assure you that if he had written such a letter about any of you gentlemen you would have made him smart for it. And that was his gratitude for the work I did for him in Australian economic botany.

592. Do you think a man can be a thorough agriculturist from reading books? No, I do not.

593. Then you would not deem Mr. Anderson to be an expert in agriculture? Mr. Anderson has the credit in the country of being one of the best agricultural chemists we have in Australia.

594. He said the other day he was one of the best agriculturists in the Colony;—can a man be a good agriculturist who has not gone through the experience of farming? No, he cannot. But he has gone through the experience of farming.

595. He said the other day that he had pruned some trees, and spent £200 in manuring;—would that make him an expert in growing wheat and corn; would that qualify him as a good agriculturist? No.

596. As a matter of fact you know that all the experts in the different colonies have met here year after year trying to find out a remedy for rust in wheat and they have not succeeded? That is quite true.

597. Do you think they are ever likely to succeed? I do not think so.

598. *Mr. Anderson.*] In your experience of me as Director of Agriculture, did you form the opinion that I was a thoroughly competent head of the department? I did.

599. Was I able to guide you and direct you in your operations in that department, as well as all the other members of the scientific staff? In the first instance you laid down a line of action which we were all to take, and that line of action, singular to say, has been copied by other Agricultural Departments not only in Australia but at other agricultural stations in the United States.

600. From your experience of the department, do you think that the head of it should be a ploughman, or a highly-trained scientific man? Certainly a highly-trained scientific man.

601. Therefore, you do not think it is necessary for the Director of Agriculture to have any knowledge of work that could be done by a man for a few shillings a week? No, indeed. He should have some practical knowledge certainly.

602. *Mr. McElhone.*] Would not a man be all the better, suppose he was a thorough theoretical man, for having a practical knowledge of farming? Yes.

603. *Mr. Slattery.*] Do you not know when you were retired from the Public Service, in consequence solely of retrenchment, that Mr. Maiden was holding another office in the Public Service? Yes; he was at the Technological Museum.

604. And is it not a fact that your duties were passed over to Mr. Maiden while he was holding that other appointed as well? He is not competent to carry out the duties I performed.

- F. Turner. 605. At all events, he was appointed, in connection with the other office he held under the Government to perform the duties, whether ill or well, that you were performing,—he was appointed to be consulting botanist? Yes; after I left.
- 10 Sept., 1896. 606. And you say now that he is not a botanist at all? I do not say any such thing. I said that when I first knew him he used to worry the life out of me for the names of plants.
607. Do you consider that he is a competent botanist? I should prefer not to answer that question.
608. Did you not know that Mr. Maiden has been quite recently appointed by the Public Service Board, with the approval of the Government, to be Director of the Botanical Gardens in succession to Mr. Moore? Yes.
609. Did you ever know me to cram a man or boy into the department all the time I was connected with it? I never knew you in the department.
610. *Chairman.*] Do you know of your own knowledge whether Mr. Slattery ever forced anyone on the department unnecessarily? I do not know.
611. *Mr. Slattery.*] Something has been said about a letter from Mr. Maiden shown to you by Mr. Anderson? Yes.
612. Did you consider that was a public or a private letter? I think Mr. Anderson treated it as an official letter.
613. You were asked about Mr. Dunncliff being removed, and a Mr. Valder being appointed in his place;—do you not know that that was before I came into office? I believe it was; but I would not be certain.
614. Supposing the Minister had your application before him, and Mr. Maiden's application, and the applications of a dozen others, with testimonials showing their qualifications and personal recommendations, would it not be a matter of personal judgment as to which of these, in the opinion of the Minister was best qualified for the office? After due inquiries, I should imagine so.
615. Let me put a case of this kind: Suppose you yourself required some assistance in connection with your work on the *Town and Country Journal*, and you received, say, thirty-four applications, out of which you had to make four appointments, and you recommended by a blue pencil mark ten out of the thirty-four as having very fair qualifications,—would you not leave Mr. Bennett, the proprietor of the *Town and Country Journal*, to select the four out of the ten you recommended as being fairly qualified for the office? After an interview.
616. I am supposing that the ten are interviewed, and ten have recommendations, and then you mark the ten with blue-pencil; would you not say that Mr. Bennett would have the right to select the four out of the ten you said were all fairly qualified for the position? Certainly.
617. Do you see any difference between Mr. Bennett doing that in his own private capacity and a Minister doing it as head of the department responsible to his colleagues and to Parliament for his actions? No.
618. *Mr. McElhone.*] That means that you would give the Minister the same privilege that you would give Mr. Bennett? Decidedly.
619. *Mr. Anderson.*] Would you expect Mr. Bennett to pick out five after only four had been recommended? No.
620. Would you expect him to pick out some men who had been working under you for a considerable time, and who were not recommended by you without some subsequent reference to you? No; I do not think he would do such a thing.
621. *Mr. Slattery.*] And suppose one of the officers in the department had made an application in 1890, and that was kept back for the consideration of the Minister in 1891 and 1892, do you not think that man would have a right to have his application considered if he made it through the Under Secretary of the department? If he made it officially, I should imagine so.
622. Even if he did not make it through the Under Secretary of the department, do you not think that if he thought he was unfairly treated as an official he would have a right to place the matter before the Minister? Certainly.

Henry Charles Lennox Anderson further examined:—

- H. C. L. Anderson. 623. *Mr. Slattery.*] Do you remember receiving the following application from Mr. O'Kelly, addressed to you as Director of Agriculture:—
- 10 Sept., 1896. Sir, Glendearg, Double Bay, 17 December, 1891.

I have the honor to apply for the position of Inspector of Agriculture. In support of this application, I have the honor to state that I have been engaged during the last ten years in agricultural pursuits in Fiji, more especially the cultivation of sugar-cane, which I thoroughly understand. I have held the responsible positions of sub-manager and plantation manager on three large estates, having about 2,000 acres under cane, and 10-ton mills. The entire working of these plantations has been under my control, as well as a large staff of European employees, and several hundred coloured labour.

I have the honor to enclose what testimonials I have in my possession, and beg to refer you to His Honor Judge Forbes, whose son-in-law I am.

I have, &c.,

E. DE P. O'KELLY.

? Yes, I remember receiving that letter.

624. Is it not a fact that you submitted that letter to me on the 22nd December, 1891, without one word against Mr. O'Kelly? I did not know him—I could not say a word against him.

625. Did you do anything else except submit him as a qualified person? Certainly not as a qualified person.

626. What is the meaning of the word "submitted" in the margin? Sent on to the Minister for his information.

627. And for appointment? Certainly not. I submitted every paper that came before me as Director of Agriculture at once to you. In the margin of Mr. O'Kelly's application I wrote, "Submitted, H.C.L.A., 22/12/91." The application was then sent on by me to Mr. Wood, the Under Secretary, who submitted it to the Minister in these words: "Submitted in connection with other applications to this position.—H.W., 24/12/91.

628. Do you not see that I did not approve of Mr. O'Kelly's appointment until the following 19th of January? That was the date on which you appointed him.

629. Nearly a month afterwards? Yes.

630. *Chairman.*] In submitting a document of that kind to the Minister, if you were not aware that the man was qualified for the position, would you make some memorandum that he was not qualified? No.

I

I would not venture my opinion until I was asked for it. I never ventured an opinion on any question until I was asked for a report. This application was received two months after the advertisement for an inspector.

H. C. L.
Anderson.
10 Sept., 1896.

631. *Mr. Slattery.*] Do you remember receiving this minute by Mr. Harrie Wood, dated the 18th of January, 1892, approved of by me on 19th January, 1892 :—

Inspectors of Agriculture.—Referring to the Minute 91-6,491, which was approved of by the late Minister without passing through my hands, I will suggest that instead of dividing the Colony into four districts, and appointing an inspector for each district as therein proposed, each inspector should be appointed to deal with a special branch of agriculture, and should be to some extent, at least, a specialist in that branch. It appears to me scarcely possible to find a man competent to deal effectively with all the questions which will come under his notice affecting the various branches of agriculture carried on in each of the proposed districts, and if he is not qualified to do so he cannot perform the duties of inspector (one of which will be to deliver lectures) without the risk of exposing his want of knowledge, and thereby discrediting the department, whereas it might be possible to find a man capable of discharging the functions of inspector in one branch, say, in relation to—(1) Vine-culture and wine-making; (2) tropical and sub-tropical products, including sugar; (3) dairy produce and stock; (4) cereals and root crops; (5) orchards, including the best methods of utilising the fruit.

The main objection to this proposal will probably be the extra cost of travelling, seeing that two or more inspectors might have to pass over the same ground, but that is a small matter compared with the risk of employing inspectors who are not experts in every subject with which they will have to deal.

As provision is made on the Estimates for this year for only one inspector, and that position is filled, I presume the additional inspectors will have to be appointed temporarily, and paid out of the vote of £10,000, the salary fixed by the late Minister being £300 per annum.

You remember that minute coming to you? Yes; I saw that afterwards.

632. Do you see that Mr. Wood sent it on to you on the 20th January, 1892, with the following minute :—

Will the Director be good enough to submit a statement as to the subjects which each of the gentlemen appointed is fitted to deal with.

? Yes.

633. And do you see that you made a minute underneath as follows :—

Sub-tropical products; district, Hunter to Tweed—Mr. O'Kelly. English cereals, roots and hardy fruits; district, N. Tableland—Mr. Hooke. Wheat, dry-climate products; district, S. Tableland—Mr. de la Motte. Dairying, pigs, cattle; district, South-coast—Mr. Dunncliff. This is only a rough and *pro tempore* sketch of duties, which will doubtless in time settle themselves. I shall submit duties and instructions as early as possible. Meanwhile I shall send each on a tour of inspection with a special object in view.

That is signed by you and dated 3rd February, 1892? That is right.

634. That was after the appointments were made? Yes; and after you had settled my protests against three of the appointments.

635. What have you to say in regard to Mr. Dunncliff—is he not competent in the matter of “dairying, pigs, and cattle”? I should say certainly not.

636. Or anyone else, I suppose, in connection with being an inspector of agriculture—you say that against me? I do not think he had the record to make him acceptable to farmers and practical men, nor the scientific training.

637. Have you in your possession, among the papers in the department that ever came before Mr. Harrie Wood as Under Secretary or me as Minister, one protest in writing from anyone in the Colony against any of these inspectors on the ground of unfitness? I do not remember one, probably because no one had any right to make such a protest. I do not remember any official complaint in writing.

638. *Mr. H. Clarke.*] Did you ever protest verbally to Mr. Harrie Wood or to the Minister about these appointments? I protested in long minutes to the Minister against the unwisdom of appointing some with whom I was intimately acquainted.

639. These particular appointments to which Mr. Slattery has now alluded? Yes. I protested to him against the appointment of Mr. Dunncliff and Mr. de la Motte after they were made. I could not protest before—I did not know they were going to be appointed.

640. *Mr. Slattery.*] You read yesterday a minute of yours, dated 28th January, 1892, against Mr. de la Motte? Yes.

641. Do you not know that upon that minute of yours Mr. Harrie Wood wrote as follows :—

Submitted.—This information should have been supplied by the Director when submitting the application. These officers are appointed temporarily, and if not competent for the duty can be dispensed with at any time. The salary, £300, fixed by the late Minister is not too high for a competent man.

You know that that minute of the Under Secretary was written upon your minute of the previous day? Yes.

642. And do you not know that on the next day there is a minute by the Minister, as follows :—

I have read, with surprise, Mr. Anderson's minute paper No. 564, dated 28th January, relating to the appointment of Mr. de la Motte as an inspector of agriculture. Mr. Anderson waited until Mr. de la Motte was appointed, and now places before me his objections to him. It was Mr. Anderson's duty to give all information when the papers were forwarded to me for consideration. The objections now taken by the Director, in my opinion, apply against Mr. de la Motte more as a public school teacher than as an inspector of agriculture. I now direct Mr. Anderson's attention to Mr. de la Motte's application, No. 7,349, dated 27th October, 1891, addressed to the Minister, for an appointment as inspector or experimentalist, in which he says, “I beg to state that for a short period during last December it pleased the late Minister of Agriculture to appoint me as acting inspector (*pro tem.*) to inspect and report on certain experimental wheat-plots in the south-western district, and that after my work was finished I had the satisfaction to learn from the Director of Agriculture that my reports were admirably drawn up. I was further told by that gentleman in reply to one of my questions that I was qualified for one of the above-mentioned appointments.” That letter of Mr. de la Motte's was sent on to me by Mr. Anderson without comment, and I naturally assumed in consequence that Mr. de la Motte's statements were correct. I must believe so still, because even in his minute of the 28th instant Mr. Anderson is absolutely silent respecting same. If Mr. de la Motte's statements are correct, then I may ask what has caused Mr. Anderson now to say the very opposite? It seems to me that Mr. de la Motte is well qualified for the position to which he has been appointed, and I cannot therefore agree with the Director in his recommendation.—T.M.S., 30/92.

That was eleven days after Mr. de la Motte had been appointed. Did you not get my minute and that of the Under Secretary? Yes; I saw those minutes. I have to reply to them that the applications were addressed to Mr. Sydney Smith, who knew Mr. de la Motte very well indeed, and had had him under his control on probation for a period from the Department of Public Instruction. Therefore it was totally unnecessary for me to make any report on the matter to Mr. Sydney Smith.

643. I am talking about myself? The bunch of applications was afterwards resubmitted to you, and certainly never glanced at by me, and I never thought of going over them again and making a report on

H. C. L.
Anderson.
10 Sept., 1896.

each individual application; but it must be noted that I did not pick Mr. de la Motte out as one of the ten whom I considered to have even very fair qualifications, and the Minister might have easily noticed that.

644. Did you not, on the 11th November, 1891, send on to me, resubmitting all the thirty-four applications; and did you not say, "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed; the officers are very much needed"? Yes; that is correct.

645. In sending on those thirty-four applications, was it not your duty if you had anything to say against Mr. de la Motte, or anyone else, to put it on the papers so that I should have an opportunity of knowing what could only have been known verbally to my predecessor, Mr. Sydney Smith? If I had done that in the case of Mr. de la Motte I must have done that in the whole thirty-four cases, and that would have taken me a week.

646. Was it not your duty to have done it? Certainly not.

647. Did you not submit your minute of 15th September, 1891, recommending these appointments? Yes.

648. Was it not nearly two months afterwards, on the 11th November, 1891, when you sent all the applications to me? Yes.

649. Why did you not, between the 15th of September and the 11th November, do the work which you said would take you nearly a week, and submit your objections against all these persons? There was no necessity for it.

650. Then the Minister had to consider the thirty-four applications, you knowing something, or having some knowledge in your mind, which you do not communicate to the Minister, on the papers? At the desire of Mr. Smith I picked out a number of applicants whom I thought were fairly eligible. He intended to interview them afterwards, and pick out the men he intended to appoint, and he would only appoint one at a time. I had nothing further to do with the matter.

651. Did you not send on to me two minutes—one on the 15th September and another on 11th November, 1891—urging the appointment of these four inspectors of agriculture? Of four competent men, yes.

652. And do you not know that these men were not appointed as inspectors of agriculture until the 19th of January following? Yes.

653. And during the whole of that time, from September to January, did you ever communicate any objection against any of these men; and is it not a fact that you never communicated any objection until after they were appointed? No; I was never asked to give an opinion about the men.

654. *Mr. Cann.*] If you had recommended that four appointments should be made, and four appointments were made, would you consider that cramming the Service? No, I would not. There is not a word said about cramming the Service. The question is, "Were they thrust into the department against my will"? First of all, five were appointed when only four were necessary. Secondly, of those five two were known by us to be incompetent and unfit for the position.

655. It was all a matter as to who you desired should be appointed? No; I wanted to see thoroughly good men who would do good for the department.

656. If a man was appointed that you disagreed with, then you would reckon that as a bad appointment, and one that ought not to have been made? Yes; and I took exception to it at the earliest possible opportunity after my return from the country.

657. Then I understand that there was no real packing of the Service—that there were no more men put there than you had actually recommended? Yes; five were appointed on one day, when I had only seen that there was room for four.

658. Is it not a fact that there were four new appointments recommended by you? Yes.

659. And is it not a fact that these four appointments were filled? Yes.

660. You would not consider that a question of packing the Service; you would only consider it a question of the qualifications of the men who were appointed? Yes; and the method of appointing men to the Public Service. It was not the best possible method I considered.

661. But you would not consider that packing the Service, would you? Certainly not. If those four men had been good men, there was abundance of work for them; but as they were not competent men we never got a second application for the services of any of them to go to the same district again, and the result was that men were often in Sydney for weeks at a time unemployed, or employed only on work which I had to find for them; whereas the competent men were asked for frequently, and were kept very busy.

662. Then really, from your answer, now the charge of packing the Service falls to the ground? I never made a charge of packing the Service. There is not a word that can be so construed. The question that was asked me was, "Were men thrust into the department against my will"? The man who asked me that was the manager of a big public office, and I suppose he thought that in the Public Service I would be consulted before any man would be appointed. I cannot be responsible for the way that he put his question.

663. *Mr. Slattery.*] You were asked this question by a member of the Civil Service Commission: 7254. "What salaries did the inspectors receive?" To which you answered, "The five new ones £300 a year each. I had recommended to the Minister that they should have graduated salaries from £200 to £300." I asked you is not that absolutely untrue—that you had never recommended it to me as Minister until after they were appointed? Not to you personally. I have here a copy of the Estimates compiled by me in 1891 on the order of the then Minister, Mr. Sydney Smith:—Suggested Estimates for the year 1891, showing the total cost of all agencies suggested as worth starting during the next two years: Under the heading *Scientific Branch*, I placed the positions—inspector, £350; inspector, £300; inspector, £250; inspector, £200. Mr. Smith went over those with me very minutely and very carefully, and he struck out all the inspectors but one; and in the revised Estimates for 1892, there appears, "staff inspector, £350." The rest were struck out by Mr. Smith, as far as the Estimates of 1892 were concerned.

664. *Chairman.*] Are you aware whether that was ever submitted to Mr. Slattery? I am not aware; but it was, of course, amongst the documents in the department.

665. *Mr. Slattery.*] What you meant by that answer was, that you had recommended that to my predecessor, Mr. Sydney Smith? Yes; and I then repeated the recommendation very strongly after you had made the appointments, to show, as I thought, the expediency of having graduated salaries.

WEDNESDAY, 16 SEPTEMBER, 1896.

Present:—

MR. CANN,
MR. H. CLARKE,

MR. HOGUE,
MR. MOLESWORTH.

W. J. LYNE, ESQ., IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor in his own behalf.
Mr. H. C. L. Anderson appeared in his own behalf.

Henry Charles Lennox Anderson further examined:—

666. *Mr. Slattery.*] When Mr. Turner was examined before the Committee he gave this evidence:—

611. *Mr. Slattery.*] Something has been said about a letter from Mr. Maiden shown to you by Mr. Anderson? Yes.

612. Did you consider that was a public or a private letter? I think Mr. Anderson treated it as an official letter.

I told you the other day I would be glad if you would try to find out if that was an official or a private letter;—have you been able to find out? No; I have not. I have looked through all my own correspondence, and I have found a subsequent letter from Mr. Maiden which he marks, "Not private," and he says, "I ask you to show this to Mr. Turner." I believe that was on the first letter also, and that is what made me show it to Mr. Turner.

667. But do you not know that no such letter is recorded as a public document in the department? I believe it was not a public document. I believe it was a letter to me as director of agriculture, but marked "private," or "not official."

H. C. L.
Anderson.
16 Sept., 1896.

Alfred Atten Dunnicliff called in, sworn, and examined:—

668. *Chairman.*] What are you? I am in the Department of Agriculture.

669. In what capacity? Nominally as a clerk, but I am doing outside work.

670. Of what description? I have just returned from the south, where I have been giving advice to farmers and men on the labour settlement by request of the Department of Lands.

671. Advice upon what? Agriculture—the growing of crops.

672. *Mr. Slattery.*] Before you were appointed inspector of agriculture were you acquainted with me at all? No.

673. For how many years have you been engaged in agricultural work? More or less, forty years in this Colony—in Australia. I had some experience in England before I came here. For about two years I had the management of an arable estate.

674. What were you doing in this Colony during the past forty years in connection with agriculture? I have always been interested in the dairying industry from that time to the present.

675. And in any other branch of work? I have been doing general farming—mixed farming, especially the growing of seeds. I did that for twenty years on one farm.

676. Where was that? At Burrawang.

677. Have you any testimonials as to your capacity as inspector of agriculture? I have here a few complimentary letters, which were written on the occasion of my promotion. They are only a few out of many.

678. This is one of them:—

Dear Sir,

Warrigal Club, Sydney, 18 March, 1889.

As you intend applying for the situation of manager to the Bodalla Company, I have much pleasure in saying that I believe if you succeeded in obtaining the appointment you would be found to give the Company every satisfaction. My knowledge of your experience extends over several years, and from your former occupation in dairying and high cultivation, in both of which you have had large experience, I am fully persuaded that your knowledge would be of great value in the care, supervision, and management of a large property such as this. I should be glad to hear of your success, and feel certain that you would leave no stone unturned to secure the successful working of their property should the Company see fit to give you the appointment.

Yours, &c.,

JOHN LACKEY.

Is that from the Hon. John Lackey, President of the Legislative Council? Yes.

679. And you had that letter before you made application? I had that letter before the initiation of the Agricultural Department.

680. You also received the following letter from Mr. Thomas Jessep, who is now a Member of the Legislative Assembly:—

Dear Sir,

Sydney, 11 February, 1892.

I have pleasure in congratulating you upon your recent appointment as one of the inspectors under the Department of Agriculture. I am sure your combined intelligence and experience in the matters which it will be your duty to discharge will result in undoubted advantage to the department, also to the great fruit and agricultural industry of the Colony. Wishing you a successful career in your office,

I am, &c.,

THOMAS JESSEP, J.P.

You received that testimonial also? Yes.

681. Is this another letter addressed to you:—

Dear Sir,

Sydney, 11 February, 1892.

I am very pleased to see that you have been appointed one of the inspectors of agriculture, as I look upon you as one of the most capable men I know, not only from your long and very practical experience you have had, but from your education and general intellectual adaptability for such a position. The years you spent in experimental farming and the intelligent perseverance you devoted will not only be of service to you now but will much help the department.

That is from Mr. Henry Badgery, stock and station agent, and at one time a Member of the Legislative Assembly? Yes; he knew my work for many years.

682. Is this another testimonial:—

Dear Sir,

202, Pitt-street, Sydney, 8 February, 1892.

I congratulate you on your appointment as one of the inspectors of agriculture. I hardly know the duties you are expected to perform, but I can with pleasure testify to your ability as an agriculturist. I have frequently had the pleasure of visiting your farm at Burrawang, and consider that you cultivated it in a very creditable manner; the crops were

were

A. A. Dunicliff. were remarkably clean and well harvested. I can only add that should you succeed in inducing the agriculturists in the district over which you are to preside as an inspector to carry out operations on their farms as intelligently and well as you did on your own you will accomplish a very great work, and your labours will not be in vain. Wishing you every success in your new sphere.

16 Sept., 1896.

Yours, &c.,

P. L. C. SHEPHERD.

That is from the Hon. P. L. C. Shepherd? Yes.

683. Did you also receive this letter:—

My Dear Mr. Dunicliff,

Sydney, 8 February, 1892.

It affords me very much pleasure to congratulate you on your appointment to the position of Inspector in the Department of Agriculture.

As a journalist, and one who has at all times to sink friendship so that the public interest may float, I know that your labours will add to the Department's buoyancy. I knew you in 1874 when you were, as the owner of the Model Farm, Silver Spring, Burrawang, struggling hard to advance agriculture by the importation of the best seeds known, and the cultivation of all useful crops. I saw you frequently at shows, and entertained pleasing ideas concerning your steadiness and industrious habits.

That you are as good a man as you were then I feel confident. You can teach much which is good to our agriculturists, and I shall be much disappointed if your labour among the farms does not lead to a distinct advance in agriculture.

I would ask you specially to impress on our farmers that production is of little good if markets are neglected. All the science in the world will fail if not accompanied by sound commercial ideas.

Yours, &c.,

JAMES P. DOWLING.

Who is Mr. Dowling? He is the Agricultural Editor of the *Sydney Mail*.

684. You received the following letter from Messrs. Anderson & Co., seedsmen, of Sydney:—

Dear Sir,

16 September, 1896.

At your request we beg to state that many years ago we made large contracts with you to grow for us large quantities of seeds required in our business, and that you delivered excellent samples of these seeds which are entirely satisfactory to us. We also bear testimony to your practical knowledge of agriculture, and ability to impart that knowledge to others, which has been demonstrated to us on several occasions by the perusal of your writings.

Yours, &c.,

ANDERSON & CO.

That letter is dated 16th September, 1896? Yes, I asked them to give me something in place of a testimonial, or complimentary letter, written by them at the time of my promotion, and lost in the Department.

685. In addition to these testimonials have you some printed documents? The printed document I hold in my hand will testify to my experience in culture. It contains a list of over 200 lines of seeds I offered for sale in the year 1885. Every one of these was grown by me. I did not import them as a seedsman, but they were grown by me, and offered to the public.

686. Where were they grown? At Burrawang.

687. How long were you on the Burrawang farm? Twenty years.

688. Have you any medals? I cannot say how many medals I have received altogether, but I have brought a few with me. One is a silver medal awarded to me by the National Society of Queensland in 1878 for a collection of potatoes. These were grown by myself. There is another silver medal awarded by the same Society in 1878 for an exhibition of peas, tares, and perennial-rye grass. There is also a silver medal awarded to me by the same Society in 1879 as an extra prize for a collection of seed-potatoes. Here is a medal awarded by the Agricultural Society of New South Wales for a complete collection of agricultural produce. That was in the year 1879. Here is another medal from the Agricultural Society of New South Wales in the same year for grass seeds. There is also a silver medal from the Northern Agricultural Society. I went to Singleton to judge the agricultural section for the Society, and after the judging was done and the awards made, and the tickets placed on the exhibits, I put out a display of produce I had taken up myself, which was non-competitive, and the Society was so pleased that they awarded me a silver medal. I have a special medal given at the Singleton Show in 1878 for new variety of potatoes. Here is also a silver medal from the Agricultural Society of New South Wales as a special award for a general collection of farm produce in 1878. I have a lot more medals in my bag, and I merely produce these to show that I am an experienced man. In 1880 the Royal Agricultural Society of New South Wales was very poor. I won a large number of prizes at their exhibition, and I declined to take my money or whatever medals were awarded to me; but I said if they would give me one medal as a memento of the exhibition I would be quite content. I have, therefore, only one medal to show for prizes I won at that exhibition, and I won a large number.

689. And I suppose it is rather startling for you to hear from any quarter that you are not fit to be an inspector of agriculture? Yes, I was astonished.

690. Did you apply in the year 1890 for a position somewhat analogous to that of inspector of agriculture? As you have read the letter from the Honorable John Lackey, dated 1889, perhaps I may mention that I applied for the position of manager at Bodalla, and I was one of half a dozen selected for further consideration out of a large number. In interviewing Mr. Mort, I told him that previously to that, in 1888, Sir Henry Parkes stated that he was about to start a Department of Agriculture, and asked me particularly to hold myself in readiness to join it when it was initiated, which he said would be immediately. I saw Sir Henry Parkes again after the Christmas recess—I forget the date, but I think it was the 10th of January—when he said, "I will give you an appointment in connection with the new Department of Agriculture when the Session closes." I said, "Sir Henry, that may be a long time," and he said "No; it will be within another week or so." While he was saying that the messenger brought in a letter from Mr. Want telling him that he intended that evening to bring on the motion of censure respecting the Railway Commissioners. I had already told Mr. Mort that I had pledged myself to Sir Henry to hold myself in readiness, and therefore I was out of the Bodalla affair. I may say I have a very complimentary letter from the late Mr. Thomas Mort.

691. You made an application to Mr. Harrie Wood, the Under Secretary, before you were appointed inspector of agriculture, to which you attached copies of your testimonials? Yes.

692. What treatment did you receive at the hands of Mr. Anderson, who was then Director of Agriculture in that matter—before you were appointed? The circumstances that induced me to make that application were these: I had been in the department for about twenty months, and I was kept simply at clerical work. I was getting a starvation salary—50s. a week—and I found that appointments were being given away to men who were brought into the department, and I could not obtain the slightest advance. I

said

said to the first clerk that I wanted to see my papers to find if there was anything on them that would legitimately block me from any advance in the department. The first clerk begged of me not to press my request for the papers. He said, "What do you want—do you want an advance of salary?" I said, "No; I am not asking for an advance of salary; I want to see why I am kept in this position." And he said, "Well, will you make an application for an advance of salary?" and I said "No." He asked me if I would sign a paper that he would draw out, and he would guarantee that I should have an advance that afternoon, and I said, "No; I would have my papers." He begged of me not to push the matter, and I said I should take my own course.

A. A.
Dunnichiff.
16 Sept., 1896.

693. *Chairman.*] Who was it said this? Mr. Reynolds. The next day Mr. Anderson came over and called me out of the room into the corridor, and offered me the position mentioned in the evidence as having been given to Mr. Lewis Grey—that of Registrar at the College. Mr. Anderson came and expressed the great interest he felt in me, saying that there had never been an opportunity to put me forward into a suitable position until now; that this had cropped up, and he had come over to offer it to me. He said the duties would be, to take charge of the students at the College during the hours they were not in school until the time they retired to rest—Saturdays and Sundays included—and that I should have to take them to church on Sundays; that I should have the correspondence, to which I should have to reply without reference to Sydney; that I should have the weekly reports to make on the experimental crops, or anything that might be interesting for publication, and also the larger reports concerning the general work, and otherwise to assist Mr. Thompson in outdoor duties. I was offered that position at the College without any increase of salary, and without any provision for being able to see my family, except during the ordinary vacation. Of course, I declined it. I then went over to Mr. Harrie Wood, and asked him if he would look into my case, and see why I could not get into a suitable position, and he said to me, "Have you applied for one of these inspectorships?" I said, "No; that I had not applied recently, but that there had been an application of mine in the office for some time, which I did not suppose had been brought forward." He asked me if I would make an application, and I made an application. I understood him to say that the appointments were about to be made, and as the time was very limited, I merely copied my former application for employment.

694. *Chairman.*] What do you mean by your former application;—when was that put in? I had made a former application for employment at the time the department was first formed, in 1890.

695. What became of that? I do not know. I suppose it is among the records. I made an application somewhat similar to that, and I believe the application went forward. In the course of the day I understood I had been appointed as inspector, and I reported myself as ready for duty. I did not remain a long time without offering to take up the duties. I offered myself for duty at once, but I was told to go on with my clerical work for a time until arrangements had been made.

696. *Mr. Slattery.*] When did you enter the department first? On 9th or 10th March, 1890.

697. Was Mr. Sydney Smith Minister then? Yes.

698. What was the first work of importance you took up outside the clerical work? I was kept pretty well at clerical work the whole of the time. I made a collection of specimens of seed grain and other things to form the nucleus of a museum for the department.

699. Did you do anything in connection with the distribution of seeds to farmers? Yes; I had the distribution of seeds also; anything in connection with seeds I had to attend to.

700. How long did you do that kind of work? Until June, 1891.

701. Do you remember being sent away to report on various wheat-plots at Bathurst, Wellington, Molong, Mudgee, and other districts in connection with the rust in wheat? Yes.

702. Was that before I was Minister? Yes, a long time. That was in 1890.

703. Who sent you on that duty? I was merely told verbally. I was told by the first clerk that I was to go.

704. Mr. Anderson was Director of Agriculture at that time? Yes. Mr. Sydney Smith was the Minister, but I received my instructions from the chief clerk.

705. Did you report on the various plots of wheat in those districts? Yes.

706. And did you ever hear any dissatisfaction expressed in regard to the work? Never.

707. Were you also directed to look at the proposed site for a model farm at Wellington? Yes. I also reported on the sites that were worthy of attention. I saw a great many that were not worthy of consideration, but as I was confined to Government land I was limited in choice.

708. After you were appointed inspector of agriculture, what treatment did you receive at the hands of Mr. Anderson? The same treatment that I had always received. It was still continued. I was ignored in every possible way, and it seemed as if I was not allowed to do my proper work.

709. *Chairman.*] That was your impression? Yes.

710. There is an application made by you in August, 1890? Yes.

711. What was that application? It was an application for the position of inspector of agriculture.

712. Are you aware whether or not that application ever went past Mr. Anderson? I could not say personally. I found out when I asked Mr. Wood to look into my case, and when he said, "Have you put in an application for one of the inspectorships," I said, "I have not put a fresh one in, but there is one lying in the office, dated 19th August, 1890." Then he rang the bell, and asked the Assistant Under Secretary to look and see if that application was with the pile put forward to go to the Minister, and it was not found there, and then Mr. Wood told me to put in an application.

713. That is the reason you put in the second direct application? Yes.

714. *Mr. Slattery.*] Do you know Mr. De la Motte? I knew him when he was in the department.

715. Did you know him before he was in the department? No.

716. Can you say anything from your personal knowledge about his qualifications? No; I had no opportunity of testing his qualifications.

717. Do you remember Mr. de la Motte coming to the office on one occasion when you were present, and when it was said he was suffering from drink? I remember that occasion very well.

718. Will you say what he was suffering from? Mr. de la Motte came to the office at 9 o'clock. He occupied part of the same room as I did. I had just come from the country, and that morning I saw Mr. de la Motte at the office, and he seemed alright; but within half an hour he seemed to get quite excited, and the excitement seemed to increase until he had to get up and go about, and at 10 o'clock he had to go out. I understood he went over to see the Minister on some matter. However, he came back again,

A. A.
Dunnicliff.
16 Sept., 1896.

again, and he was even worse, and I am satisfied that at the time he had nothing to drink. I am sure of it, because he had not the opportunity. He continued getting worse until 12 o'clock. I had to go out on some other duty, and I left him at 12 o'clock, and he was getting really bad, as if he were drunk, but I am satisfied he was not drunk.

719. The man was a stranger to you? Quite a stranger to me, but I am sure he was not drunk. It was some physical ailment he was suffering from.

720. You said just now that others were brought in over you in the department, or some expression of that kind;—did I put in anyone over you? No.

721. So that anything of that kind was done before I took office? Yes. What I felt aggrieved about was that men were constantly brought in and put to work that I felt I ought to have been entrusted with, having been there from the beginning, waiting, as the Minister said, for an opportunity to do something for which I was qualified.

722. *Mr. Anderson.*] What is your present age? I am in my 59th year.

723. And you have been farming here for forty years, you say? Yes.

724. And two years at Home? Yes.

725. So you attach value to the experience you got as a farmer when you were 17 years of age? I do, and it has been of value to me ever since.

726. You had a farm, a very beautiful farm, with magnificent soil, in the district of Burrawang, had you not? Yes; I had a good farm at Burrawang.

727. Did you succeed in that? I did.

728. If you succeeded in farming, why was it necessary for you to enter the Department of Agriculture as a temporary clerk at 50s. a week? Because I was unfortunate in other matters, outside of my legitimate business, and I had to clear off everything. I had to pay trade matters that I was involved in outside my own legitimate business.

729. Were you in a state of the greatest financial distress when I was asked by Mr. Hawthorne to consider your application? I was; and you taunted me with it, too.

730. At the time? Not at the time, but afterwards; after my promotion.

731. When you applied for a position of that sort, and got such a humble position, was it not possible for a man of your value, according to your own opinion, to get a practical position somewhere, much better paid than that? I wanted to rise in the department.

732. And do you think that a practical farmer who had made a success of farming, and had had a splendid farm of his own, would want to go into a Government Department to commence as a temporary clerk at 50s. per week, with a chance of rising? I went in as a temporary clerk simply because, as you say, I was in poverty, and the Minister promised that as soon as a suitable position was available I should have it.

733. *Mr. Slattery.*] That was Mr. Sydney Smith? Yes. I had not the slightest idea of going into the Government service at 50s. a week, and remaining at that.

734. *Mr. Anderson.*] As a matter of fact, you remained at it for twenty-two months? Yes; I was obliged to.

735. And you could get nothing better? I did not seek it.

736. You could not get anything better in the Colony of New South Wales than a temporary clerical position in the Government service at 50s. a week after your wonderful experience as a farmer? I never sought it.

737. You did not seek anything better? No.

738. You did not want to improve yourself then? I did, but I thought I was entitled to something better in the Department of Agriculture.

739. I had you under my immediate control and supervision in the Department of Agriculture for twenty-two months? Yes; I was under you for twenty-two months.

740. Had I not abundant opportunities of finding out your value? Well, you did not take advantage of your opportunities if you did.

741. Had I abundant opportunities of finding out the value of you and every other officer in my department? You had as regards the work I was particularly placed at.

742. Did I entrust you with our seed distribution in the department? Yes.

743. You are aware that I considered that a very important work? Yes.

744. Did I take that away from you, and give it to a young man twenty years your junior? You did.

745. Did I do that on the report of your superior officer, Mr. Turner? I do not know that.

746. As a matter of fact, are you not aware that I found the work unsatisfactory, or I should not have removed it from your charge? No. You are the first man who has ever charged me in my life with unsatisfactory work.

747. I suppose you will admit that, to the best of my judgment, I got the best man I could to do each line of work in the department? No, I will not.

748. My judgment may have been faulty, but is it not natural to suppose that I, being responsible for that department, would get the best men I could to do the respective lines of work? It is natural you would, I suppose.

749. You say that Messrs. Anderson & Co., in their letter to you, referred to contracts they had with you for the supply of seed when you had a farm at Burrawang;—did you buy seed from farmers round about and clean it and sell it? Sometimes.

750. As a matter of fact, then, the seed you sold was not your own seed? If I sold seed to Anderson & Co. or anybody else as my seed, it was my seed. I never palmed anybody else's seed off as my own.

751. Would you tell the persons to whom you sold the seed who had grown it? Certainly not.

752. It must have been taken, then, as seed coming from you;—they would not know who grew the seed? If I sold seed as my own it was my own growing.

753. In selling the seed, how did you distinguish between the seed you bought from the surrounding farmers and the seed you were supposed to have grown yourself? If a man wrote to me for a particular kind of seed I would supply it, but I would not guarantee it as my own growth. If, however, I made a contract with anybody, and sold them seed representing that it was of my growth, then it was so.

754. In plain language, you were a seed merchant, and did a good deal of business in buying and selling seeds? Yes.

755. Of course you do not call that farming? I never alluded to what I bought. I said distinctly I had grown those seeds, and if I offered seed as my own growth it was my growth.

A. A.
Dunnicliff.
16 Sept., 1896.

756. You say that men were put over your head before Mr. Slattery came into office—that was by Mr. Sydney Smith? I do not know whether it was by Mr. Sydney Smith or by you. I presume the Minister had your recommendation.

757. Could I possibly appoint anyone to that department or promote anyone in it without the Minister's approval? I suppose not.

758. Who were the men who were put over your head? There was Mr. Prentice for one. He came in after I did, and was sent out on inspecting work and work that I went into the department to do.

759. What was Mr. Prentice's salary? Ten shillings a day.

760. And yours was how much? Eight shillings and fourpence a day.

761. Did I give you an opportunity of showing your ability by recommending the Minister to send you out to inspect sites for experimental farms and experimental wheat plots in the country? I cannot answer that. I do not know whether you did or not.

762. You know that you could not have been sent out without my recommendation? I could not say that. The Minister might have his own reasons for sending me out.

763. As a matter of fact, you were sent out? Yes.

764. You got a fair chance to show what you could do? I was not sent out for the purpose of showing what I could do. I was sent out hurriedly to report on some wheat plots.

765. In August, 1890, you wrote this application:—

As I understand that inspectors are about to be appointed for the different agricultural divisions, I do myself the honor to offer my services in that office for the South Coast District.

Feeling that I fairly understand the requirements of the department and have a thorough knowledge and sympathy with the needs and difficulties of the farmers, having been identified with the various industries for the past thirty years, I think I could be of service to the department and the Colony in that capacity.

I append testimonials of ability from the Hon. John Lackey, M.L.C.; Messrs. Anderson & Co., seedsman and plant merchants; Messrs. J. T. M'Innes & Co., pedigree stock agents, and can furnish others if required.

I have, &c.,

A. A. DUNNICLIFF.

? Yes.

766. On the first opportunity, at the end of that year, I recommended Mr. Sydney Smith, the Minister, to give you a trial, and send you out to report on the sites for experimental farms and experimental wheat plots? Yes.

767. Was I satisfied with the way you did your work? You did not express any dissatisfaction to me at any time.

768. Do you not think the most becoming course would be that I should express my dissatisfaction to my superior officer—to the Minister who had control of the department? No; I certainly do not—not without my having an opportunity of explaining and knowing what was being done.

769. As a matter of fact, you remember going to Mudgee, for example? Yes.

770. You were sent to Mudgee to inspect an experimental wheat plot? Yes.

771. Did you ask permission on the 24th December to stay and inspect the site for an experimental farm; was permission granted to you? I never asked for it; and had nothing to do with it. On the 24th December I received a wire from the office as I was getting into the train to come to Sydney, having completed my work—a wire directing me to stay and report on the site.

772. Did you inspect that site? You never sent me the papers connected with it. I waited there, but received no instructions from the department, and I had to fall back for information on the secretary and committee of the local society.

773. Were you well aware that they were suggesting the site? No; not until I found out from them. I did not get the papers from the office. I knew nothing about it from the office.

774. Did I send you a telegram about the 6th January, ordering you to return to head-quarters? I think you did.

775. Did you return to head-quarters at once? No; I did not.

776. Why not? Because I was ill.

777. Did you produce any evidence to me when you got back that you had been ill? No; you did not ask me.

778. I asked you for a medical certificate? No; you did not. You never spoke to me on the subject.

779. Did I not say to you that in your own protection you should produce a medical certificate to show me that you had been ill? No; I have no recollection of your speaking to me. I remember Mr. Price, the chief clerk, coming over and suggesting why did I not have a medical certificate to show that I was ill, and I said I could not afford to pay a guinea to a medical man. I said I was too poor, and kept too poor, and that people in my position had to do without doctors.

780. And did you stay there without sending me any word whatsoever? No; I did not.

781. Did you send me any report that you were ill? Yes; I did.

782. Are you quite sure? I feel sure. I replied at once to you. I am speaking from memory.

783. You say that you reported your illness to me? I know I replied to your communication. I cannot say what was the tenor of my reply.

784. You were at Mudgee in December, 1890;—at what date did you furnish the report on the wheat plot? Sometime afterwards.

785. Was it in May, 1891? I cannot say. I daresay it was.

786. Do you think that would be satisfactory to me as Director of Agriculture? Yes; I do.

787. To get a report in May on a plot you had inspected in harvest time, the previous December? You knew that I was ill. You knew that I brought in a certificate from Dr. Thomas Dixon to show that I had been affected by the sun, and was totally unfit for any mental work.

788. How long were you away ill? About three weeks.

789. You got three weeks' leave? Yes.

790. Did you get permission for your son to do your work for you while you were away sick? I did not get permission exactly. I suggested that, rather than that the work should stand all the time I was away, he should come in and assist.

791. When your leave expired did you stay away without permission? I should like to explain, as it is attempted to be shown that I stayed away a day without permission. I was going to the office that morning and I was taken ill on the road, and I went to Dr. Dixon's, and I stayed there until midday, waiting

A. A.
Dunnicliff.
16 Sept., 1896.

waiting for an opportunity to see him. It was suggested that the doctor was so busy that I might come again. I went into the park and sat down, and went back again in about an hour's time, and I stayed there until half-past 3 waiting for Dr. Dixon. He then gave me a certificate that I was unfit to do any mental work; that I was not sufficiently recovered for mental work—but I could do any small mechanical matter that required no great thought. After I left Dr. Dixon's I went to get a little refreshment, having had nothing all day. Having done that, I was going up to the office to report myself, and to show my letter from the doctor. As I got there I saw Mr. Anderson going down to the tram, and Mr. Anderson saw me, although he has not alluded to it from that day to this. That is the day I was away. I put in the medical certificate next day, and told Mr. Anderson I was ill. That accounts for my day's absence, and my day's pay was stopped for it.

792. *Chairman.*] You said just now that you could not get a doctor's certificate;—did that refer to a previous occasion? Yes; that referred to the occasion when I was ill at Mudjee. I said I could not afford to pay a guinea for medical attendance.

793. But you did this time? Well, I was close by.

794. *Mr. Anderson.*] As a matter of fact then, your mind was unhinged at this time, according to the medical testimony? No; he did not say my mind was unhinged.

795. Are you aware that I interviewed the doctor myself in regard to your mental condition? I am not aware.

796. Are you aware that I sent your son home that day to find why you were not at the office as your duty demanded? No.

797. Are you aware that your son reported you had gone away from home, and were down in Sussex-street on business? No, I am not aware. My son mistook where I was going to. I was going to the office.

798. Your son came to the office that day to do your work, did he not? I know he did. He did not understand that I was going to the office.

799. He brought me no message from you whatsoever? No. I was going to the office myself that morning. I started out with that intention.

800. Your son came to the office to do your work although your leave was expired, and brought me no message from you;—is that a fact? It is. He did not know I was going to the office I believe. As a matter of fact, I did not see him that morning.

801. Is it a fact that this was reported to the Minister, and he stopped your pay for that day? My pay was stopped. I cannot say what was reported to the Minister. You said that unless I did a day's work I should not be paid for it, and the day's pay was stopped from me, although I put in a certificate.

802. Then I presume that certificate was not satisfactory to the Minister? Well, it was Doctor Dixon's certificate.

803. Are you aware I interviewed the doctor to find out? No.

804. *Chairman.*] Was it customary for your son sometimes to go to the office without consulting you if he did not think you were in a position to attend? He had been going to the office during the time I had leave of absence. I do not know whether he thought I was ill on this occasion, or what influenced him, but he did go to the office that morning, and was away before I left.

805. *Mr. Anderson.*] You have said that the first clerk said to you that he would guarantee you would get an advance of salary that day if you applied for it—do you mean exactly that? Those were the words he used.

806. Do you think it possible that a first clerk, or any officer in the department, could guarantee you a rise of salary, which is a matter entirely in the hands of the Minister? When he said that, I could quite understand that he would recommend it to you, and he was sure you would recommend it to the Minister, in which case it would be granted. I know very well that, being a subordinate, he himself could not guarantee it.

807. What date was that? That would be about the middle of December, 1891.

808. What date was it that I offered you, according to your words, the position of Registrar at the College? The next day. Whether it was the 14th or 15th I cannot say, but it was about the middle of December.

809. Are you aware that it was absolutely impossible for me to offer you any position in the department, as that position must be filled up by the Minister, and the Minister only? I am aware that you offered it to me.

810. Are you aware that the Principal of the College stipulated that the man to be appointed must be a single man, who would live in the College? I do not know what passed between the Principal and you. I know that I was to stay there, and I said, "When shall I see my family in Sydney?" because you said I was to be there Saturday and Sunday, and I said I suppose I could have the usual vacation, and you said I should have the usual vacation.

811. Are you aware that the Principal stipulated that the officer to be appointed must know shorthand in order to help him? No; I have already said I do not know what the Principal stipulated.

812. Are you quite sure that any position that was talked about was not that of experimentalist? No; I am quite sure it was not.

813. Do you say that I went over to the department and called you out of your room to speak to you? I do—on the top of the stairs in the corridor.

814. Did you ever know me do such a thing to a subordinate officer as to go to him and call him out when I had the power to summon him in to my own office to discuss anything I wished? Yes, I did.

815. Do you not think it is a very extraordinary thing to? Yes; I did think it was.

816. Are you sure that the account you have given of the offer of some position to you did not arise from some conversation between you and Mr. Reynolds? No; I swear it most distinctly. It is as vivid in my mind as if it occurred only yesterday.

817. When Mr. Sydney Smith determined to appoint an inspector in August, 1891, do you remember that he advertised in the daily papers for applicants? Yes, I do.

818. Did you reply in response to that advertisement? No; I did not.

819. When you did apply; you applied on the 19th January, 1892, at the instigation of Mr. Wood, the Under Secretary? Yes; I put in an application then.

820. You were appointed on the same day, were you not? Yes; I believe so.

A. A.
Dunnicliff.
16 Sept., 1896.

821. And your application did not go through me as the Director of the Department? Not that application—you were away.
822. When you applied, in 1890, are you aware that no appointments were made by the Minister at the time? I know that no immediate appointments were made there.
823. And no appointments were intended to be made by him? I cannot say that.
824. The testimonials which you submitted in 1892 were testimonials that you obtained about three years before with regard to another position altogether, were they not? I do not remember exactly what testimonials were put in.
825. They were those of Mr. John Lackey, Messrs. Anderson & Co., and Mr. J. T. M'Innes, and they were dated March, 1889, referring to some other position which you were applying for? Yes.
826. After having been in the department for twenty-two months, could you not have got a testimonial from some of your superior officers there? I do not think I could.
827. *Chairman.*] Why;—what would be the value of them? I should not have known whom to ask for a testimonial of the slightest service to me.
828. *Mr. Anderson.*] Do you think the testimonials of your superior officers in the department ought to be of no value to you to get promotion? There was no one whom I could ask except yourself, and you were away.
829. Could you not have asked me for one in September, when the applications were invited and received by the Minister? I did not put in an application then.
830. You did not apply in response to the Minister's advertisement? No; I did not think I had the slightest chance of getting in. And another thing, I had other inducements held out to me at the time—a position in the department.
831. Are there many good farmers round about Burrawang, where you lived for so many years? They were good in their way, in the particular work they were doing.
832. Did any of those farmers give you a testimonial as to your qualifications? I never asked them.
833. You did not ask the men who lived close to you, who had abundant opportunities of seeing you every day, and of knowing the genuineness of your work—you did not ask those men for testimonials? No; certainly not.
834. You asked men who were far away, and who were not practical farmers—men like Mr. John Lackey, Anderson & Co., the seed merchants, and J. T. M'Innes, a stock agent? Yes; they were not working farmers.
835. Are you aware that when you were appointed inspector of agriculture, I wished to send you up to your old district to give a lecture, and the President of the Local Agricultural Society declined to have your services? No; I am not aware.
836. Are you aware that I wished to send you down to the Kiama district, and the President of the Agricultural Society there told me it would be an insult to send you to a district where they knew you so well? No, I am not. I had been there year after year judging their agricultural sections in the shows.
837. Therefore they knew you well, and had abundant opportunities of knowing your value? If it had been as you suggest, I should not have been going year after year to the coast societies.
838. With regard to Mr. de la Motte;—you are quite positive he was not drunk on the day he was reported to be drunk? I feel quite certain he was not drunk.
839. You saw him at 12 o'clock? Yes.
840. He was reported to me as being drunk at a quarter to 5 in the evening? Yes; I know he was getting worse and worse, and I have not the slightest doubt that about that time he would be really bad.
841. So you mean to say, from your knowledge of him at 12 o'clock, that he was not drunk at a quarter to 5 in the evening, without any knowledge of his movements in the meantime? I cannot say that; but to all appearances he was drunk at 12 o'clock, and I know he was not drunk—he was ill.
842. Are you aware that in his own explanation he admitted that he had taken brandy three times that day for heart disease? I believe he said that afterwards.
843. Are you aware that his wife sent in a certificate from the doctor that he was suffering from heart disease? I do not know of my own knowledge; I have heard so.
844. Are you aware that the doctor afterwards said that that certificate was untrue, and was not intended to be sent to the department? No; I cannot say that.
845. Are you aware that there were two witnesses in my office when he came into my office drunk? Yes, I heard so; and I heard that one of them pushed him into your room, so that you would have an opportunity of seeing him drunk. I only heard it.
846. Were these officers asked for their evidence so far as you know? I do not know.
847. Would they be better qualified to give an opinion, having seen him at a quarter to 5 o'clock, than you were? I very much doubt whether they would be.
848. You were appointed inspector on the 19th January, 1892, and you say you offered yourself for duty at once;—to whom did you offer yourself for duty? The Under Secretary.
849. Did he employ you at once? No; I was told to continue the work I was engaged upon until a scheme of work was drawn out.
850. Are you aware that a scheme of work was formulated and approved by the end of January or very early in February when you got your instructions? I cannot say the time, but I should think it was about that time.
851. In the meantime you continued at your clerical work? Yes.
852. Did you draw a salary at the rate of £300 a year from the 19th of January up to the time when you commenced actual work as an inspector of agriculture? Yes, I did—under instructions.
853. *Mr. Slattery.*] Is it not usual in the public departments for an officer to draw the salary from the time he is appointed? Yes, it is the rule; and there is a minute to that effect on my papers.
854. *Chairman.*] Do you wish to explain anything in connection with the evidence you have just given? Yes. Mr. Anderson asked me whether the duty of distributing seeds was not transferred from me to a younger man, and I said yes. No dissatisfaction had been expressed to me in any shape with regard to my work at the time this alteration was made, and the distribution of seeds given to some younger man. Mr. Anderson wrote a minute, dated 12th June, 1891—I can remember the date—saying that the growth of the department needed a rearrangement of the officers, and, therefore, that Mr. Fuller would do so-and-so, Mr. Valder would do so-and-so, and Mr. would do so-and-so, and in

A. A.
Dunnicliff,
16 Sept., 1896.

in my case the minute stated that I was to take entire charge of the publications of the department. There was no word expressed of dissatisfaction. I was placed under Mr. Grey as the sub-editor of the *Gazette*. When Mr. Grey came into the room to take up his position as sub-editor, and as my superior, I said that I objected to go to work in that position without a distinct understanding as to whether it was intended to be a removal from one position to an inferior one, or whether it was done in the necessities of the department. Mr. Grey left the room and, I presume—I understood at the time—went over to see Mr. Anderson, and he came back and said that I was not to take it as expressing dissatisfaction, or a degrading of me in the department, but simply that they wanted a responsible man to take charge of this work—the publishing work.

855. *Mr. Anderson.*] What was that work? Keeping the register of the persons to whom the *Agricultural Gazette* was sent out and despatching the copies, and the general publication—the pamphlets and other things.

856. Could not any intelligent boy do that work admirably? Yes; that is just why I made the objection.

857. Do you think that I, as the responsible head of the department, would have put you to inferior work like that if I had been satisfied with the work you were doing before? You did not express any dissatisfaction with my work. You had your own reasons for putting me to this work.

858. *Mr. Cann.*] Can you remember the date of Mr. Anderson's minute? The 12th June, 1891.

859. *Mr. Anderson.*] When I sent you away to the country to inspect these wheat-plots, do you remember that I lent you some money for your travelling expenses out of my own purse? I cannot say anything about out of your own purse, but I had an advance of £5 from the department.

860. Was it from the department or from me personally? I cannot say now. I know I had no money with which to go away, and I had an advance of £5.

861. Assuming that I lent you that out of my pocket, would it show that I was anxious to give you a fair chance to get away? I cannot say that. When an officer is ordered to go away, and has not the money for the purpose, it is usual for an advance to him to be made by the department.

862. As a matter of fact, do you know that we had not an advance account to the credit of the department? I do not know.

863. And that any money advanced was advanced from my private pocket? It was not advanced to me as a personal favour—it was advanced to an officer of the department to go and do certain duties.

864. *Mr. Slattery.*] Do you notice among the papers the following letter, dated 6th September, 1894, addressed to Henry Copeland, Esq., M.L.A., from the Directors of the Bombala Co-operative Dairying Company:—

By same post we are forwarding to the Minister for Mines and Agriculture a request that Mr. Dunnicliff, of the Department of Agriculture, be at once sent here to enable us to satisfactorily erect buildings and machinery for our Co-operative Dairying Company, and commence operations. Believing that you take a kindly interest in this district, and would do your best to assist us, we take the liberty of asking you to use your influence with the Minister to have our request granted. The matter is of the greatest moment to this end of Monaro, where we are almost entirely ignorant of the method of working co-operative butter factories, and consequently require the assistance of an experienced man. We shall, therefore, feel deeply grateful, if you would endeavour to have our request that Mr. Dunnicliff be immediately sent here complied with. We may mention that our company has been registered, and our future progress is blocked for want of skilled assistance.

Do you remember that letter coming from the Bombala Company on the 6th September, 1894? I know there have been many such letters. I cannot say as to one in particular.

865. There is another one from Mr. John R. Logan, dated 1st July, 1894, addressed to the Minister for Agriculture:—

Dear Sir,

As Mr. A. A. Dunnicliff, during his recent visit here, did such good work *re* dairying industry, may we ask if you would allow him to come to this district as soon as he is disengaged, as we are anxious to proceed with the co-operative company, and wish his advice *re* same. Hoping you will see your way clear to granting us this favour.

I have, &c.,
JOHN R. LOGAN.

That letter sent by Mr. Logan asked specially for you to be sent to Bombala in 1894? Yes.

866. Did you go there? Yes; I went in response to each of these letters.

867. Was this letter from the manager of the Commercial Banking Company of Bombala sent to the Under Secretary of the Department:—

Dear Sir,

23 July, 1894.

I have seen a letter from Mr. Preedy saying that Mr. Campbell is anxious for Mr. Dunnicliff to return as soon as possible. As, however, Mr. Dunnicliff is rendering you very valuable assistance in the preparation of Articles of Association, choosing sites for factory and several creameries, and giving information generally, we shall feel obliged if you will consent to his remaining another week or two with us, by which time we shall be well posted up. I may say that the company is practically floated. Over 2,000 shares are already promised, and the adjoining district of Delegate has decided to cast in their lot with us, and hope to strengthen the company by an addition of 2,000 shares. Altogether, we anticipate that the company will start with something like 5,000 £1 shares early in October.

I have, &c.,
EDWIN E. BOULTON.

That letter was sent by Mr. Boulton? Yes.

868. In the *Gloucester Examiner*, and in the different local newspapers, your work has been well spoken of in all the districts you have visited? Every district that I have visited since the reorganisation of the department has been well satisfied, and wherever I go I am welcomed by the farmers.

869. You see that there is a letter as recent as the 22nd of November, 1895, from Mr. John See, addressed to the Under Secretary, in which he says—

I write to say that Mr. Dunnicliff gave great satisfaction to the farmers of the Clarence during his recent trip in connection with the distribution of seed-potatoes, &c., &c. I enclose a newspaper paragraph in which it is suggested that he might be located on the Clarence for six or twelve months to advise the farmers in reference to the best kind of crops to grow. I thoroughly concur in the suggestion, and I strongly recommend that it be done.

? Yes.

870. I suppose Mr. John See understands questions of this kind quite as well as Mr. Anderson? A great deal better.

871. What do you say yourself with your experience of forty years; is Mr. Anderson competent to judge of your capacity for the office of Inspector of Agriculture? No; I unhesitatingly say he is not. He is not a practical man, and that is the source of all the trouble.

872. Here is another letter from Mr. John F. Coles, Secretary of the Forbes Co-operative Dairying Company, dated 29th April, 1896, addressed to the Minister for Mines :—

A. A.
Dunnicliff.

Sir,—I have the honor to advise you that on the 16th ultimo, under directions from the Directors of the Forbes Co-operative Dairying Company (Limited), I wrote thanking you for the visit of Mr. Dunnicliff, Government Dairy Expert to our district, and asking that he be again permitted to visit us to complete the good work so ably begun by him in stirring up the farming community to a practical sense of the great benefits to be derived from the establishment of such an industry in their midst. Up to the present I have received no reply, and fearing that my letter may have miscarried, I have dared to approach you again in the matter.

16 Sept., 1896.

That letter was received on the 29th April of this year? Yes.

873. Until to-day did you ever hear that Dr. Dixon had been interviewed by Mr. Anderson as to your mental condition? I have no recollection of hearing of such a thing until to-day.

874. And when for one day's absence from the office 8s. 4d. was deducted from your small salary, were you called upon to show cause why that deduction should not be made? No.

875. You were not heard at all? No. When I spoke of it, Mr. Anderson made the remark, "If you do not put your day's work in, I shall not certify to your pay."

876. Do you see that in his evidence before the Civil Service Commission, Question 2753, Mr. Anderson said, "Mr. Smith never appointed even an office boy without conferring with me"? Yes.

877. *Mr. Cann.*] You do not think he would be likely to deduct a day's pay from you without conferring also? No, certainly not; such a thing was never heard of.

878. *Mr. Slattery.*] The Minister would sign perhaps a thousand papers, marking them "approved" as a formal matter? Yes.

879. You had no opportunity, at all events, of being heard in your own defence either as to your mental condition, or in regard to the deduction of 8s. 4d.? No; I heard from the Mudgee people that inquiries were being made on behalf of the department, to know if they could not sheet home a charge of drunkenness against me. Such a thing has never been known in the whole course of my life.

880. And any suggestion with regard to your being under the influence of liquor has no foundation, in fact? No. I am too well known in this Colony for anyone to be able to say such a thing.

881. Mr. Anderson said he had abundant opportunities of finding out your value;—did Mr. Anderson ever give you a chance to find out your value? I never thought he did. That was why I went to Mr. Wood to ask him to look into my case, and why I was kept in that position.

882. In regard to your capacity for the position of inspector of agriculture, did you ever get a chance of making an explanation of all these things that have been said behind your back? No; and I never knew on what ground Mr. Anderson came forward and opposed my promotion to the appointment.

883. That was after your appointment? Yes. There was some charge trotted out against me that I never heard of or knew of, and I have only seen a paper this morning for the first time bearing on the subject, and I have not read it, and do not know what the charge is.

884. From the commencement of your joining the department, when Mr. Sydney Smith was Minister, up to the time Mr. Anderson retired from the department, except after you were appointed inspector of agriculture, did Mr. Anderson ever express any dissatisfaction with your work? No.

885. Or your character? No.

886. Something was suggested about Kiama;—you say you were a judge at the agricultural show there year after year? Yes—down the South Coast.

887. In this particular district? Yes. I may mention that it was Mr. Dymock, Mr. Anderson's friend, and President of the Kiama Agricultural Association, who made the remark quoted by Mr. Anderson. He and I have not been on speaking terms for a good many years, for reasons quite independent of the department.

888. Until to-day, did you ever get a chance to answer that statement? No.

889. Did you act as judge in other places besides the South Coast district? Repeatedly in other portions of the Colony.

890. Did you ever hear any dissatisfaction expressed as to your capacity as judge? No. I can show you any number of complimentary notices in the newspapers. I have a book full of them.

891. Do you not know that it is the universal practice in the Public Service that when an officer is promoted the increase of salary dates from the date of his appointment? Yes.

892. If you were Director of Agriculture, and you could get an intelligent boy at 10s. a week to do certain work, would you put on a public officer at £2 a week? No; and it was stated at the time that they wanted a responsible person to do it, and that that was why it was given to me.

893. Do you challenge Mr. Anderson or anyone else in the whole Colony to say anything against you or your suitability for the position of inspector of agriculture? Yes; I do most decidedly.

894. And you are in the department now? Yes; and I would ask that the present Under Secretary might be called as to my abilities.

895. *Mr. Anderson.*] You were appointed inspector of agriculture at a salary of £300 a year;—what was that reduced to when the department was reorganised by Mr. Harrie Wood? It was reduced to £200, but I was the only one who was retained.

896. What salary have the Public Service Board allotted to you, and how have they graded you? I have been graded as a clerk, at £200 a year; but I have appealed against that, with the request that my work should be examined. My work was never examined, but only my work in connection with the distribution of seed.

897. Is it correct that Mr. Wood says in his minute on your application, "Personally I know nothing of Mr. Dunnicliff's qualification for the position of inspector"? Whatever Mr. Wood wrote would be correct. I did not know Mr. Wood until I saw him then.

898. Then it is absolutely correct? I suppose it is.

899. And on that recommendation from him, as head of the department, you were appointed an inspector of agriculture? I cannot say that. I do not know what may have been beyond that.

900. *Mr. Slattery.*] Did you use any political influence, or any influence at all, outside the interview with Mr. Harrie Wood? No, not with a soul.

901. *Mr. Anderson.*] Did you ask Mr. P. L. C. Shepherd to interview the Minister on your behalf? No.

902. *Mr. Slattery.*] Did you use any political influence of any kind? No. One of the first things Mr. Anderson did when he took charge of the department was to issue a mandate on that subject.

THURSDAY,

THURSDAY, 24 SEPTEMBER, 1896.

Present:—

MR. CANN,		MR. HOGUE,
MR. H. CLARKE,		MR. RUSSELL JONES,
MR. McELHONE.		

W. J. LYNE, ESQ., IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor on his own behalf.
Mr. H. C. L. Anderson appeared on his own behalf.

Alfred Atten Dunnicliff further examined:—

A. A.
Dunnicliff.
24 Sept., 1896.

903. *Mr. Slattery.*] When you were first appointed to the Department of Agriculture by whom were you appointed? By the Minister, Mr. Sydney Smith.

904. After your appointment, did you see Mr. Anderson? Yes; I was called into Mr. Anderson's room a day or two afterwards, and he charged me with writing an article in the *Weekly News* commenting on the Rust Conference then being held in Melbourne, of which he was a member. I said that I had nothing whatever to do with the article, and had hardly seen it.

905. Was that true? Yes.

906. What did he say in reply to that? He threatened me with all sorts of pains and penalties if I contributed to the newspapers in any way. He said I came into the department without his approval; that I should do no good as long as I stayed there, and the wisest thing I could do was to look out for something else. That was repeated to me several times during my stay in the department.

907. When you were previously examined a question was asked by Mr. Anderson about the President of the Agricultural Society of Kiama expressing dissatisfaction in regard to you;—have you any letters from the secretary and others? I have a letter from Mr. Joseph Weston, who is an equally prominent man with the President of the Society, and equally respected. He is proprietor of the *Kiama Independent*, and has been in the district for over forty years. I may say that after the statements made before this Committee I wrote letters to three or four gentlemen pretty well in the same words without saying under what circumstances the statements were made, or by whom. Of the letters I received in reply, the following is from Mr. Weston, dated 18th September, 1896:—

Dear Sir,

Though you are silent as to the circumstances under which and the person by whom the ungenerous assertion is made, I should denounce it as a malignant falsehood. So far as I know, and none know better, you stand as high in public estimation in Kiama as ever; and if that were possible, higher, since your appointment. Trusting the voice of slander may ever be powerless to injure so spotless a reputation as your own. I have, &c.,

JOSEPH WESTON.

I have also a letter from the Hon. Secretary of the Berry Agricultural Association—these two Societies overlapping each other. It is dated 18th September, and is as follows:—

Referring to your letter of yesterday's date, I can assure you that no such feeling exists here as that of which you make mention. You never offered a lecture here, so far as my memory serves me; but if you had it would have been gladly accepted. Far from there being any doubts as to your capacity as an agricultural expert, your services were for many years prior to your present appointment requisitioned as judge of farm produce at our annual Show, and I think our people would gladly avail themselves of your knowledge again. Yours faithfully,

A. J. COLLEY.

He adds: "I have shown the above to our President who concurs." I have a letter also from the Rev. D. T. Smith, Church of England clergyman at Burrawong, who I may state has a farm of his own, and is a practical farmer. It is as follows:—

I should have had great pleasure in attending your lecture if circumstances had permitted me so to do, and I am sorry that the pleasure has been deferred. I remember your beautiful and extensive farm, at Silver Spring, the only one that made any attempt at high farming, and I was surprised at your scientific system in so new a settlement. I found that rotation of crops, artificial fertilizers, deep ploughing, and the use of pure and choice seeds, together with numerous experiments, were in strong contrast with the system, or rather the want of it, which prevailed on most of the other farms in the district. With regard to the public appreciation of farming lectures, I believe you will have to contend with some opposition from ignorance of practical men who rely altogether on a limited personal experience; from some of the better-read and more influential farmers who think that they themselves are the men who can and ought to lecture; from those who envy you your past success at Agricultural Shows in seeds and stock, and from the old reason that no prophet has honor in his own country. I am of opinion, from past experience and personal observation, that you are fully qualified and perfectly competent to lecture on agriculture."

I have also a letter from Moss Vale, which overlaps the other district. It is from Mr. Henry Taylor, a landowner and prominent man in the district, and is as follows:—

In reply to yours of the 19th instant, I beg to say, as one knowing intimately the feelings and opinions of the people of the Wingeecarribee, Mossvale, and Berrima district, that I have never heard anything expressed against your ability as a practical farmer, and I think it is recognised by the farmers and residents of the district that they are under obligations to you from the manner in which your widely-known experience in farming brought the district into prominence, and your presence amongst us will, I am sure, be always acceptable.

908. I believe you have two champion prizes which you did not mention the other day? In speaking of my experience and qualifications reference was made only to cultivation. I obtained two champion prizes for pedigree stock bred by myself.

909. Were you also appointed a judge for the national prizes at the Bega Show? Yes, by special request of the President on behalf of the Society.

910. *Mr. Anderson.*] In what year was that? In 1892.

911. Is there a letter in the department asking for your services? There is a telegram.

912. *Mr. Slattery.*] Did you judge at the Show? I did, and I furnished a report on the Show.

913. *Mr. McElhone.*] Are you the Mr. Dunnicliff whom I remember as a celebrated potato-grower about the Robertson or Bowral district some years ago? Yes, the same man.

914. You were noted as a successful producer of new species of potatoes? Yes.

915. And you were engaged in that business for some years? Yes.

916. And you would regard potato-growing as much a part of agriculture as pruning fruit-trees and testing manures? Certainly.

917.

A. A.
Dunncliff.

24 Sept., 1896.

917. *Mr. Slattery.*] You are now doing the work of an inspector of agriculture? Yes, although I am called a clerk.
918. There was some question of your not having communicated with Mr. Anderson when you were at Mudgee;—is it not a fact that since the last meeting, on going through the records you have found letters which you sent to Mr. Anderson from Mudgee, dated the 30th December, 1890, and the 3rd, 6th, and 7th of January, 1891? Yes; I found them this morning.
919. And you are in a position to say that you reported on those dates to Mr. Anderson? Yes.
920. *Mr. Anderson.*] You say you interviewed me after your appointment by Mr. Sydney Smith? Yes.
921. Will you swear that I did not send for you before you were appointed on the order of Mr. Smith, to inquire into your qualifications, and find out all about you? I was in Mr. Smith's room, and he rang for you to come, and I went into your room, and you spoke to me.
922. Before your appointment? Yes.
923. Did you not say just now you saw me after your appointment? No.
924. As a matter of fact, after your interview with me are you aware that I recommended Mr. Smith to appoint you, as he had previously asked my opinion about you? No; you gave me to understand that I went into the department against your will or without your sanction.
925. How could that possibly be, when I recommended Mr. Smith to appoint you? There is no such recommendation on the papers.
926. Are you aware that Mr. Smith sent for me before he appointed you, and asked my opinion as to whether you should be appointed—that he had been moved to the matter by Sir Henry Parkes, and Mr. Hawthorne at your request? No, I cannot answer for what transpired between you and the Minister.
927. Are you aware that Mr. Hawthorne, the member for the district, interviewed me on your behalf? I believe he did; I was not present.
928. Why should he interview me if it were not on my recommendation that you were to be appointed? I do not see the drift of that.
929. Did he interview me at your request? I can hardly answer that question from memory. Probably he did.
930. What paper was that to which you referred as containing some article commenting on the Rust Conference? It was the *Weekly News* published early in March, 1890. The paper is defunct, and I have not been able to get a copy. It was published in Sydney by Mr. Haynes. There was a letter headed, "Rust Conference," and it commented on the selection of the men.
931. Will you swear that I ever saw such an article or ever spoke to you about such an article? I will swear you spoke to me about it. You said that a copy had got down to Melbourne and was brought into the Conference, and shown to you there, and it was said, "Who was this Dunncliff that was mentioned?" and you said you recognised that it referred to myself.
932. I telegraphed to you in Mudgee on the 6th January to return at once to headquarters? Yes.
933. And you returned to headquarters on the 12th January? One of the letters I have mentioned explains the reason—that I had a sunstroke and was unfit.
934. My telegram was sent on the 6th January, and the letter to which you refer was dated 6th January. How therefore, could the letter be a reply to my telegram, ordering you to come back to headquarters? I received your telegram in the morning and answered by letter in the afternoon.
935. Is not this minute by Mr. Sydney Smith contained on a report by me in reference to your absence from the department without leave on the 12th February: "In view of the reports submitted I decline to sanction payment for the day in question. I trust Mr. Dunncliff will be more careful in future"? Yes; but the report was misleading, as it did not properly represent the case.
936. *Mr. Slattery.*] You were never called upon to reply? No.
937. *Mr. Anderson.*] In your letter asking for further leave from the 3rd of February, 1891, do you say: "Thanking you for your past consideration"? Yes, as a matter of compliment.
938. You show by that remark that you considered that up to that time I had treated you considerately? It does not follow. That was only a complimentary conclusion to the letter.
939. You thought it necessary in asking for leave, to put in a thing that was untrue? I do not say it was untrue. You had recommended that I should have leave in the first instance, and that was showing consideration.
940. In that letter did you thank me for my past consideration to you? I have said so.
941. Can you produce the letters written to the gentlemen whose letters you have read to the Committee to-day? Yes; I have copies of the letters, but have not brought them with me.
942. Are all these gentlemen practical farmers? All, with the exception of Mr. A. J. Colley, who is a banker.
943. And the Rev. Mr. Smith? He has been living on his farm.
944. Do you consider that the superior officers of the department during the twenty-two months that you were engaged there had abundant opportunities of judging of your qualifications and your character? Not as a practical man for outside work.
945. Did you not get opportunities of showing your practical knowledge by making reports and compiling articles for the *Gazette*? No.
946. Do you remember my entrusting you with the duties of compiling the reports on Viticulture, issued by the Department of Agriculture in Victoria, for publication here? No. You ordered me to go through all the evidence taken before the Vegetable Commission in Victoria, and to prepare a synopsis, which I did.
947. Was I able to utilise that? Yes.
948. Did I give it to Professor Pudney to go over, and found that he had to do the whole thing over again? I saw Professor Pudney drawing up an article for the *Gazette*, in which he utilised my work.
949. You said the other day that I offered you the position of Registrar at the College? I say it again.
950. Are you aware that Mr. Slattery approved of the position being filled up on the 14th January, 1892? No.
951. Do you still say, although Mr. Slattery only approved of the appointment of the Registrar on the 14th of January, that I offered you the position some time in the previous December? I do, most decidedly.
952. *Mr. McElhone.*] Before you entered the Government service were you connected with agriculture for any length of time? Yes; for the third of a century.

- A. A. Dunnycliff.
24 Sept., 1896.
953. What sort of agriculture? General agriculture.
954. Including dairying? Yes, dairying and cattle raising. I also raised pedigree-swine and pedigree-cattle, and did general farming and nursery work.
955. With regard to the Rust Conference to which reference has been made, as a result of the scientific inquiry that has taken place has a cure for rust in wheat yet been discovered? No, nor is it likely to be on the lines on which they travelled.
956. *Mr. Anderson.*] Did you advertise in your circular that you had a rust-proof wheat at the time when you were farming at Burrawang? I did not advertise the wheat as rust-proof wheat but as reputed rust-proof.
957. Do you actually believe any wheat could be rust-proof? Yes, I believe that some wheats are rust-proof, but they are of no value to the miller.
958. Has an absolutely rust-proof wheat yet been discovered? I could not answer that definitely. I do not know whether it has. I have given my opinion.
959. How many acres did you actually cultivate at Burrawang? I think about 100 acres were actually cultivated.
960. Actually cultivated with the plough? Yes.
961. *Mr. H. Clarke.*] Is it not a fact that wheat called Egyptian wheat is rust-proof? A slight rust affects the straw, but it does not affect the grain.
962. *Chairman.*] Are not some kinds of wheat less liable to rust than others? Certainly.

Walter Scott Campbell called in, sworn, and examined:—

- W. S. Campbell.
24 Sept., 1896.
963. *Mr. Slattery.*] What is your position at the present time? Chief clerk, Department of Agriculture and Forests.
964. As chief clerk, are you performing the duties formerly performed by Mr. Ednie Brown, Director-General of Forests, and Mr. Anderson, Director of Agriculture? Yes; and also the duties of Secretary of Forests, the position formerly occupied by Mr. Holdsworth.
965. Can you tell me the savings that have taken place in the department by the substitution of the new system for the old? I can tell you that the vote for the year previous to that when I took charge was £70,000, and it was reduced by the Ministry to £15,000, and I was told to work the department on that.
966. Have you been doing that since? Yes; there may have been a little increase, but nothing of any consequence.
967. What is your salary at the present time? £400. It was reduced lately by the Public Service Board from £600 to £400. Mr. Ednie Brown was receiving £740, Mr. Anderson £740, and Mr. Holdsworth about £600. Besides that I am supposed to be taking the position of Chief Clerk of Forests, formerly occupied by Mr. Piper, who was getting, I think, £350, and the Chief Clerk of Agriculture, Mr. Price, was receiving £380. I am taking the duties of all those officers.
968. Have you had great experience in regard to questions of agriculture? Yes; I have been at it all my life—I may say since childhood—practically and scientifically.
969. Have you been a judge at various shows? Yes; I have frequently been a judge for farm produce, fruits, vegetables, flowers, and so on.
970. From your long experience, can you say whether the work in the Department of Forests and Agriculture is going on now as well as it was under the old system? I think it is going on better. When I went there both branches were in a state of disorganisation.
971. *Mr. McElhone.*] Chronic disorganisation? They were quarrelling among themselves, and with other departments. It was a most miserable state of things.
972. *Mr. Slattery.*] When you were appointed under the name of chief clerk to be the head of forests and agriculture, is it not a fact that the office of chief draftsman which you previously occupied was amalgamated with that of chief mining surveyor? Yes.
973. And that was another saving of how much per annum? I think £600 a year. My salary was not reduced at the time the general reduction took place throughout the Service.
974. But it was a saving of £600 a year by the chief mining surveyor taking over your duties also? Exactly.
975. During the time that I was Minister for Mines and Agriculture had you frequent opportunities of noticing how as Minister I conducted the department? Yes, undoubtedly.
976. Did you ever hear one whisper against my honest administration of that department? No; it was just the other way.
977. *Mr. McElhone.*] How do you mean the other way? Mr. Slattery was looked upon as a model Minister.
978. Did you ever know me to attempt to thrust any man or boy into the department who was not required? Certainly not. Everyone whom the Under Secretary and myself had to advise should go was dispensed with immediately.
979. That is in consequence of the reorganisation of the department? Yes; a great many had to go—more than half, if I recollect aright.
980. Is there any line of work in the Department of Forests or Agriculture previously carried on that is not carried on now? No. I think there is a great deal more work now. I think the work must be about double.
981. Did you ever compare the work done at the Richmond College and on the experimental farms after your appointment with the work done before your appointment? The work has increased enormously. For instance, we have now ninety-seven or ninety-eight pupils at the college, and while previously there was no work of any consequence on the experimental farms, really good work is now being done.
982. Did you at any time know me to interfere in any way with the proper working of the Agricultural Department? Not in the slightest degree. You depended upon your officers; you told me at the time that you trusted your officers.
983. Is it not a fact that I was anxious at the time to carry out to the fullest extent the views of my predecessor, Mr. Sydney Smith? Undoubtedly.
984. He being the founder of the Agricultural Department? Yes; you were always very tender about interfering with anything he may have done.
985.

W. S.
Campbell.
24 Sept., 1896.

985. Before Mr. Anderson's appointment were you appointed to select sites for the experimental farms? Yes.
986. Did you select or report on the sites? Yes; I selected sites and reported, and extracts from my reports were published in 1888, and those reports were really the foundation of the Agricultural Department. The department was not formed for some time after.
987. Have you taken any medals or any prizes in connection with agriculture? For fruit, vegetables, and flowers I have taken medals and plenty prizes.
988. *Mr. McElhone.*] In this Colony? Yes; in Sydney.
989. Did you have any experience in the old country at farming? No.
990. Are you a native of the Colony? Yes; I was born in Maitland.
991. *Mr. Slattery.*] Have you passed any examinations of any kind? I went down to the Technical College when the best agricultural chemist who has ever been in these Colonies was there—that is Mr. M'Ivor—and I took first prize for agriculture there. I merely went for amusement, and I took the prize with very great ease. He wanted me to go through the University examination papers. He told me I would fly through those without any difficulty, but he was unable to get the papers.
992. Do I understand that agriculture and horticulture have been a hobby of yours from boyhood? Yes; from childhood. My father had a farm, and I learnt all the work there. I had to go through it practically. I can do any practical work on a farm, I do not care what it is.
993. *Mr. McElhone.*] Can you milk a cow and make butter? Yes. Before I came to Sydney I used to milk three cows every morning and evening and attend to my garden besides, and I had to be at the office at 9 o'clock.
994. *Mr. Slattery.*] Do you know Mr. Dunnicliff, who is in your department at the present time? Yes.
995. What do you say of his qualifications as an inspector of agriculture? I found him a very good, useful man. I think he is very well qualified for the position.
996. Did you know Mr. de la Motte in the department? No; not when connected with the department.
997. Did you know Mr. O'Kelly? I knew him, but I had very little to do with him.
998. Did you know Mr. Fitzgerald, Inspector of Agricultural Shows? Yes.
999. Do you know that he was appointed to fill a vacancy caused by the retirement of Mr. Prentice? Yes.
1000. What would you say as to the capacity and conduct of Mr. Fitzgerald? His conduct was very good indeed. He was amenable to discipline, and did everything he was told. I never had the slightest difficulty with him.
1001. And what about his capacity as an inspector of agricultural shows? He did a great deal of very good work.
1002. Were you well satisfied with him? Yes; he looked into the accounts of the Agricultural Societies, especially with respect to the subsidy, and effected a very great saving to the country.
1003. A very great saving to the country by his inspection? Yes; I found him a very useful man.
1004. I understand he is away from the Colony at present? Yes; he is in West Australia.
1005. If there was a vacancy to-morrow for the position of inspector of agricultural shows, would you have any hesitation in recommending Mr. Fitzgerald for the appointment? No.
1006. I understand the department has established a tobacco experimental farm somewhere near Tamworth? Yes; there are two blocks of land—one at Moombi, and the other at Nemingha.
1007. They have been brought into operation since you were appointed? Yes; within the last eighteen months or two years.
1008. Who is in charge of them at the present time? Mr. Lamb.
1009. What do you say in regard to Mr. Lamb's fitness for the position he now occupies? Mr. Lamb was appointed to travel about, and show farmers how to grow tobacco, and so on, and I thought it would be a very good thing to settle him down, and see whether he could grow tobacco, after preaching about it. He advised us that Moombi, on the poor granite soil there, was a remarkably good place at which to grow certain kinds of tobacco—Turkish tobacco, and light cigarette tobacco. He was settled down there, and the result is that he has turned out some excellent tobacco, and we got news yesterday, or the day before, that in consequence of what he had produced a very large company would be formed at Tamworth for the purpose of manufacturing this cigarette tobacco. There was no doubt about its quality, because one of the owners of Cameron's Tobacco Factory, Mr. Todman, told me it was splendid tobacco for cigarette-making. Mr. Noake, who came to see a lot of samples Mr. Lamb brought down about a month ago, also said it was excellent tobacco, and there were several other people who were very pleased with it. Mr. Lamb was offered 8d. a lb. for it in Sydney, but I think he can get 1s. a lb. for much of it, which is a very high price.
1010. From your experience of Mr. Lamb during the two years he has been at the head of the experimental tobacco farm, do you regard him as competent or otherwise as a tobacco expert? Yes, I think he is competent. Last year was a terrible year, and he produced his tobacco under very great difficulties. Everything was wilted, and even the corn was blasted by the heat up there, so that he has really not had a fair trial yet. I believe he will be able to turn out even better tobacco than that which he has produced.
1011. Did you know a Mr. Sutherland who was in the department? Yes.
1012. He occupied an inferior position in regard to salary to Mr. Lamb? Yes.
1013. Did you ever know Mr. Sutherland to take exception to Mr. Lamb's qualifications? Yes; he did.
1014. When? Whenever he had an opportunity.
1015. Would you say that his objection to Mr. Lamb were justified or otherwise? I do not think they were justified. I think his sore point was that Mr. Lamb was getting a very much higher salary.
1016. *Mr. McElhone.*] A matter of jealousy you think? I think so.
1017. *Mr. Slattery.*] As chief clerk of the department, would you have retained Mr. Lamb in preference to Mr. Sutherland? No; I do not think I would. I think Mr. Sutherland is an excellent man.
1018. You had nothing to say against either of them? No.
1019. And you say that Mr. Lamb is competent to perform the work he is doing? Yes.
1020. *Mr. Anderson.*] Were you an applicant for the position of head of the new Department of Agriculture when it was formed? Yes.
1021. How long were you in the Department of Mines under Mr. Harrie Wood? I was in that department from the time it was formed.
1022. How many years was that up to 1890? It was formed, I think, in 1874.

W. S.
Campbell.
24 Sept., 1896.

1023. Mr. Wood had an opportunity of knowing your value thoroughly? I think so.
1024. He knew the work you did in regard to the reports on the sites for experimental farms—the work which you say was preparatory to the forming of the department? Quite so.
1025. And yet he did not recommend you to the Minister as the head of the new department? I do not know what he did. I have never seen any of the papers.
1026. You were, therefore, a disappointed applicant for the position of head of the new department? Yes.
1027. Do you know anything whatsoever of the initial work we did in that department—for example, the enormous amount of work that was necessary in starting the College? No; I do not know of any enormous amount of work.
1028. Do you know anything about the work that was done by the staff of the department in inaugurating it? No, I do not.
1029. You say that you discharged the duties of Mr. Ednie Brown, Director-General of Forests, and myself, and four other men? Yes.
1030. Do you really believe that? I do believe it; and it is a positive fact.
1031. How can you possibly discharge the duties of six men, unless those six men had nothing to do? I do not know how it is possible to do it, but I do it; there is no doubt about that.
1032. For how many months during the year are you away from the department travelling on an average? About six weeks or two months.
1033. Is that the total aggregate time that you have been away during the last twelve months, say? About that, I should think. I am only now speaking from recollection.
1034. And you consider that you are able to do all the work that these six men did? Yes; the work is done.
1035. Can you give me the number of letters dealt with in the department, say last year? I think about 15,500.
1036. Do you know the number dealt with in the year 1892? No, I do not.
1037. Granting that it was 25,000, do you think the work connected with 15,000 letters entails as much labour as that connected with 25,000 letters? Yes, I do; because formerly a number of useless letters came in which were unnecessarily registered—forms of no consequence at all.
1038. Were they not collected in bundles and kept by themselves without being registered? I do not think so; I think they were all registered.
1039. You say that the vote for the department in 1892 was £70,000;—do you know how much of that was spent? No; I could not tell you.
1040. Is it not a fact, according to a Parliamentary paper, that the total amount spent was £31,000 odd? Yes, I daresay that would be so.
1041. As a matter of fact, the money was voted to build colleges and start experimental farms, and we had not time to get the work done;—are you aware of that? No.
1042. What age were you when you left school? About eighteen, I think.
1043. What school was that? The Grammar School.
1044. Did you go straight into the Government service? Yes.
1045. Have you been in the Government service ever since? Yes.
1046. In what position? In various positions.
1047. As draftsman up to chief draftsman? Exactly.
1048. Then where did you learn practical agriculture? I have been learning it all my life whenever I have had an opportunity.
1049. In the Government offices? No; in all my spare time.
1050. You say that when the Mines Department was reorganised in 1893 the chief mining surveyor undertook your duties as well as his own? Yes.
1051. Then you must have had very little to do before that? The chief mining surveyor had very little to do. In fact the chief mining surveyor took my duties. I was doing the chief mining surveyor's duties as well as those of chief draftsman.
1052. As a matter of fact, then your position was dispensed with in 1893—your position was abolished? I do not think so. The work was not abolished. That was done by the chief mining surveyor.
1053. You called Mr. Slattery a model Minister of Agriculture;—will you explain what you mean by that? Model Minister I said.
1054. What do you mean by model Minister? I think he was an excellent Minister to get along with— with the officers.
1055. Was he guided by your advice always? Yes.
1056. You think that is an excellent thing? I think so.
1057. *Mr. McElhone.*] Always? I would not swear to that.
1058. *Mr. Slattery.*] I suppose you know I would hold my own view against you or anyone else in the department if I thought I ought to do so? Certainly.
1059. That was pretty well understood in the department? Undoubtedly.
1060. *Mr. Anderson.*] As a public officer, you consider that a Minister who has no practical acquaintance with the subject would act wisely if he were guided by the advice of his responsible officers? Yes.
1061. If you had been in my position as Director of Agriculture, would you have expected the Minister to be guided by your advice? Yes.
1062. *Mr. McElhone.*] In every way? Oh, no.
1063. *Mr. Slattery.*] About the appointment of officials? Yes.
1064. *Mr. McElhone.*] Would you expect him to be guided by your advice in the appointment of officials? Certainly not in every appointment.
1065. *Mr. Anderson.*] Would you not expect the Minister to ask your advice before he promoted an officer who was a subordinate of yours? I think so. He need not necessarily follow it.
1066. *Mr. McElhone.*] If he did not follow your recommendation you would not be annoyed about it? Not at all.
1067. *Chairman.*] As a general rule, you consider that Mr. Slattery when Minister for Mines and Agriculture consulted his officers about the appointment of various individuals? Yes, I think so.
1068. *Mr. Anderson.*] Of course you are not speaking of the experience of the department before your time? Certainly not.

W. S.
Campbell.

24 Sept., 1896.

1069. You say you were recommended by Mr. McIvor to go up for a University examination? Yes.
1070. In what subject? Agriculture.
1071. In what year was that? In 1886 or 1887.
1072. Are you aware that there is no examination in agriculture at the University open to outsiders? He wanted to get the papers, I said, from the University, for me to go through them.
1073. Did you not say that he said you could pass easily? Yes; he said I could easily go through the examination papers and answer to questions.
1074. Do you know the examination is only open to men who have taken their B.A. degree? Yes; that is the reason he could not get the papers. He could not borrow the papers. I did not say he wanted me to go to the University, but simply that he wanted to get the examination papers so that I could go through them.
1075. Are you aware that the papers are published in the calendar every year? No; I do not know anything about the University calendar.
1076. You expressed satisfaction with Mr. Dunnicliff's qualifications;—I presume you will admit that he must have learnt a great deal during the six years that he has been in the department—that he must have improved and learnt a great deal? I do not think that necessarily follows.
1077. You think a man does not improve during six years of hard work in the Department of Agriculture? I am sure I could not say. I think he was a very good man before those years. I knew of Mr. Dunnicliff twenty years ago, and he was regarded as an admirable man at that time.
1078. Do you think that a man who has himself absolutely failed at farming is a good man to teach others to farm successfully? He may be.
1079. Would you pick out such a man yourself? It depends upon a great many circumstances.
1080. You have expressed your approval of Mr. Fitzgerald's usefulness in the department? Yes.
1081. That refers to a period sixteen months after his first appointment, does it not? I do not recollect when he was first appointed.
1082. He was appointed in January, 1892, and you first knew him in June, 1893, so that it refers to a period of eighteen months after his first appointment? Yes.
1083. Do you think he learnt a good deal about shows during that time? Yes; I think he must have done so.
1084. Do you know that, as a matter of fact, myself and other superior officers of the department took a deal of trouble to instruct him in his duties? No.
1085. You would imagine it likely, I presume, that we did our best to make him efficient in his duties? Yes; you should have done so undoubtedly.
1086. You say that he was a very well-disciplined man? Yes; I found him to be very amenable to discipline.
1087. Are you aware that during your absence from the department he threatened to assault the first clerk, as he had previously assaulted the chief clerk in my time? I never heard a word about it.
1088. How long has Mr. Lamb been working on the farm? A little over twelve months.
1089. What salary has he drawn during that time? £300 a year.
1090. How much is the tobacco worth that he has grown there during that time? I could not tell you.
1091. What weight is there in it? About a couple of tons, I think.
1092. What do you think it would be worth when it is sold? I think it would vary from 6d. to 1s. a lb.
1093. How many men has he had working with him during that time? I should think about four or five.
1094. What has been the total expenditure in wages? That I cannot tell you at the present moment. He did not grow the tobacco for profit, but for experiment, in the first place.
1095. Are you aware that Mr. Lamb came from the Department of Agriculture in Queensland? I believe he did.
1096. Are you aware that there are no testimonials from the Department of Queensland among his papers? No.
1097. Do you consider that two men were necessary to teach the farmers of New South Wales tobacco-growing? Yes.
1098. In the same month that they were appointed—January, 1893—are you aware that the positions of pathologist and chemist were abolished in the Department of Agriculture? Yes.
1099. Do you consider that when those very important positions were abolished it was necessary to appoint two men on the same day* to teach tobacco-growing? Yes.
1100. Do you think that the department could do without a pathologist and chemist, and could not do without two tobacco experts? Yes.
1101. You said that the Public Service Board had reduced your salary to £400 a year? Yes.
1102. Had they abundant opportunities of finding out your value, and the work you did in the department? I do not know what they did.
1103. As a matter of fact, you know nothing whatever about the proceedings of the department during the year 1892? No.
1104. You said in your evidence that, as far as you knew, Mr. Slattery was anxious to carry out the views of his predecessor, Mr. Sydney Smith? Yes.
1105. Do you think he showed that anxiety by retrenching the most valuable officers Mr. Smith had appointed? They had to be retrenched in order to bring the expenditure within the vote.
1106. *Mr. Slattery.*] There is a minute here, dated 3/1/93, by Mr. Harrie Wood, who was then Under Secretary for Mines and Agriculture. It is as follows:—

Following up my minute of 14/12/92 (92-12,519) I now submit Mr. Lamb's letter of 12th ultimo, also some rough memoranda, showing that a sum of £210,680 is sent out of the Colony for imported tobacco, cigars, and cigarettes. The greater part of such sum might be retained in the Colony, to say nothing of the money that might be brought into the Colony if an export trade were once established. I have had an interview with Mr. Lamb, and he is now willing to accept temporary employment at the rate of £300 per annum, with travelling allowance at the rate of 12s. per diem, plus fares. I have also seen Mr. Sutherland, who is willing to accept temporary employment at 10s. per diem, and 12s. per diem travelling allowance, plus fares. In the event of the Minister deciding to employ these gentlemen, I recommend that Mr. Lamb be regarded as the senior officer, that he and Mr. Sutherland confer together, and agree upon the lines to be followed in giving

* NOTE (on revision):—I should have explained that although the offices of chemist and pathologist were abolished, the services of those gentlemen were continued without break in the same capacities as temporary officers. The tobacco experts were also appointed as temporary officers.

W. S.
Campbell.
24 Sept., 1896.

giving instructions to tobacco-growers in the several districts in the growing, gathering, curing, and sorting of the crops; that they visit the sites of the several experimental farms, and select plots of each for experiments in tobacco-culture, and report what seeds should be tried on each farm, and how the experiments should be conducted; that they visit the several tobacco-growing districts, and give such instructions to the growers as may, in their opinion, be necessary to secure improvement in the produce; that, if possible, they select sites in localities where tobacco has not hitherto been grown, but where there is a probability that it might with advantage be cultivated, and make arrangements for conducting experiments thereon.

You see that I approved of that minute? Yes.

1107. You were asked where you learnt your agriculture after you left the Grammar School;—was not Mr. Anderson also at the Grammar School? Yes.

1108. And at the University? I believe so.

1109. And was he not afterwards a teacher at the Grammar School? Yes.

1110. And afterwards an examiner of teachers in the Public Instruction Department? Yes.

1111. Where, might I ask, did Mr. Anderson learn his agriculture? I do not know.

1112. In regard to your qualifications as an agriculturist, had you not as many, if not more, opportunities of learning agriculture than Mr. Anderson ever had? I believe so.

1113. You say your father had a farm, and you worked on it? Yes.

1114. *Mr. Anderson.*] Where was that farm? Near Ryde.

1115. How big was the farm? Seventy acres.

1116. *Mr. Slattery.*] Suppose there were thirty-four applicants for the position of inspector of agriculture, and the names of ten of them were marked by Mr. Anderson with a blue pencil as being fairly qualified for the position, would not the Minister, according to all precedent in the department, have a right to select any four out of the ten, or any four out of the thirty-four? Yes.

1117. That would be his responsibility? Yes.

1118. It would be Mr. Anderson's duty, I suppose, to report if an unqualified person had made application, and to say that he was not qualified? Yes.

1119. If Mr. Anderson knew that an unqualified person had applied, would it not have been his duty to have put it on the papers, and said, "This person, of my own knowledge, is not qualified for the position"? Yes.

1120. But, otherwise, prior to the appointment of the Public Service Board, the Minister had control of all appointments? Yes.

1121. From your experience of Mr. Anderson and Mr. Dunicliff, would you say that Mr. Anderson would be qualified to instruct Mr. Dunicliff in agriculture? I do not know what Mr. Anderson's qualifications are.

1122. You were asked some questions about the tobacco farm;—the Agricultural Department has cost an enormous sum of money to the country, has it not? Yes.

1123. And is it not a fact that the Agricultural Department was not intended for profit, but for the purpose of conducting experiments, and, with regard to the tobacco farm, was it ever intended that that should be carried on for profit? Most decidedly not for profit; it was intended for experiment.

1124. *Mr. McElhone.*] With regard to the agricultural shows that are held all over the Colony, does the country obtain any benefit from them;—do the people learn much in connection with these agricultural shows? Not so much as they should.

1125. Have they learnt any practical knowledge? They are learning it now, now that the department is exhibiting.

1126. Mr. Anderson asked you about the cost of producing the tobacco which Mr. Lamb has grown for the department;—can you tell us what the Hawkesbury College has cost up to the present time? I think about £100,000.

1127. What has been the profit derived from that expenditure? There has been no profits; the returns are very poor.

1128. What has been the cost of the Wagga Wagga Agricultural Farm, and what has been the profit? We have not yet had an opportunity of testing it in that respect.

1129. As a matter of fact you have spent £100,000 on the Hawkesbury College, for which you have nothing to show as regards profits or earnings? There is no profit, unless you consider education so.

1130. Has the Colony derived 3d. in the £ in cash return from the money spent on the College? I do not think so.

1131. *Mr. Hogue.*] Is it not a fact that the Agricultural College, the Government Agricultural Farms, and the tobacco-growing experiments were all established for educational and not for commercial purposes? Certainly.

1132. *Mr. Anderson.*] Did you ever make a report on the application of any man which came before you as to his being unqualified for the position? I do not recollect at this moment.

1133. Would you do such a thing without being asked by your superior officer to do it? Yes.

1134. You would offer information that a man was not qualified? Yes.

1135. If you had a batch of thirty-four applications, would you make a report on each one, showing each of the men whom you thought unqualified for the appointment? Yes; I think it would be only fair to the Minister that I should do so.

1136. Did you ever see such a thing done? I have not had anything like that to do.

1137. But you must have seen thousands of papers passing through your hands in the Mines Department;—did you ever see that done in the Mines Department? No; not with a number of men like that. I have not seen anything like that.

1138. *Mr. Slattery.*] After you became head of the Department of Forests and Agriculture all your communications went through the Under Secretary, Mr. Harrie Wood? Yes.

1139. You had no direct communication with the Minister? No; unless he specially required it.

Alfred Atten Dunicliff recalled and further examined:—

A. A.
Dunicliff.
24 Sept., 1896.

1140. *Mr. Slattery.*] You produced three or four letters this morning from gentlemen to whom you had written concerning a statement made before the Committee in reference to yourself? Yes; I produce copies of letter written to Joseph Weston, Esq., *Kiama Independent*, dated 17th September, 1896; to A. J. Colley, Esq., Berry, of the same date; to the Rev. D. T. Smith, Burrawang, of the 19th September; and

and to H. Taylor, Esq., J.P., Moss Vale. They are all written to the same effect, and the following is a copy of the letter to Mr. Weston :—

Dear Sir,

It was stated yesterday that shortly after my promotion to Inspector of Agriculture my services were offered to the Kiama District (I understand for a lecture, or something of that kind), and that it was replied that such would be considered an insult to your district, where the people knew me so well. Believing you to be thoroughly in touch with the people of your district, I beg of you to inform me if, in your opinion, such a feeling is entertained towards me, or the public have less confidence in me than when I exhibited and judged amongst them at their annual shows. An early reply would be esteemed a favour.

Yours, &c.,

A. A. DUNNICLIFF.

A. A.
Dunnicliff.
24 Sept., 1896

1141. *Mr. Anderson.*] In that letter, you say, "If such a feeling is entertained towards me"? Yes.
 1142. *Mr. McElhone.*] Had you been obtaining your living as a farmer before you went into the Public Service? Yes; I stated that I was twenty years on one farm.
 1143. Did you carry on mixed agriculture? Yes.
 1144. Did you grow wheat? Yes; very successfully. I carried on general farming, as well as cattle breeding.
 1145. *Mr. Anderson.*] In what year did you leave Burrawang? In 1889.
 1146. What were you doing in the interval between 1889, and when you entered the Government service? I did commission business, and other work.

WEDNESDAY, 30 SEPTEMBER, 1896.

Present:—

MR. CANN,	MR. HOGUE,
MR. H. CLARKE,	MR. S. SMITH.

W. J. LYNE, Esq., IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor on his own behalf.
 Mr. H. C. L. Anderson appeared in his own behalf.

Richard Teece called in, sworn, and examined:—

1147. *Mr. Slattery.*] You are General Manager and Actuary of the A.M.P. Society? Yes.
 1148. And you were one of the members of the Royal Commission that took evidence in 1895 respecting the state of the Civil Service of the Colony? Yes.
 1149. Will you look at the evidence taken on the 11th March, 1895, when Mr. Anderson, Principal Librarian of the Free Public Library, was examined before the Commission? Yes.
 1150. You see this question and answer, No. 7253:—

To Mr. Teece: When you were Director of Agriculture, did you ever have people thrust upon you against your will? Yes. Then the answer proceeds in an explanatory way.

1151. That conveyed to you that the Minister of the day, whoever he was, had crammed people into the Public Service who were not required? Yes; that was the impression on my mind.
 1152. And that was your object, was it, in putting the question—in consequence of having heard in various quarters that at times persons had been crammed into the Public Service by Ministers who were not required? Yes. You will notice that I put a similar question to most of the principal witnesses among the Civil Servants. As it was a matter of public rumour that the Government offices had been filled with unnecessary clerks, I was anxious to discover whether that practice prevailed, and, if so, to what extent.
 1153. Then this question and answer, No. 7257; "Then men were appointed to the Public Service who were not required? Certainly."—conveyed to you the same impression—that is, that persons were put into the Public Service by the Minister who were not required? Just so.
 1154. And question 7294:—

During the time you were in the Agricultural Department, were there many other cases of persons being put in your department against your will, or were the ones you mentioned the only cases that occurred? There were many other cases. conveyed to you exactly the same impression? Yes; that was in answer to Mr. Storey.

1155. It shows by the context that I was the Minister who had done this? Just so.
 1156. *Mr. Anderson.*] When I gave those answers, did I take pains to show clearly that the men were put there against my will, because I thought they were inefficient men—for example, in my answer to question 7253? Yes, I think you did.
 1157. I went on to explain that it was not because they were unnecessary as officers, but because I considered them bad appointments;—did you gather that from my answer to question 7253? With regard to some special cases—I think they were inspectors of agriculture, or some officers of that character—you did state that the men were required, but that inefficient men were sent to you for the purpose of employment. That was the impression I got with regard to those special cases.
 1158. And in reply to your question, 7256, I said, "No, because they were not agricultural experts; I could not find work for them." Did that make my answer quite clear and explicit? Yes, with regard to those.
 1159. You did not assume from that answer that I asserted that Mr. Slattery had put men into positions, the positions not being required? From the examination the impression left on my mind was that appointments had been made in the department which were not required.
 1160. For what reason did you gather that they were not required? From the answer to my question and the answer to Mr. Storey. It was asked in question 7294 whether there were other cases in addition to those mentioned by you, the ones mentioned by you being the agricultural experts, and the answer there was that there were many other cases.
 1161. What did I say—that the other cases were men put into the department against my will? Yes.
 1162. Did you take that to mean that it was against my recommendation or against my general knowledge? I gathered that it was against the opinion that you entertained that men were not required.

1163.

R. Teece.
30 Sept., 1896.

R. Teece. 1163. But did I not explicitly say in answer to question 7,257 :—

30 Sept., 1896.

If they had been good men they would have been very valuable, and would have done most necessary work. I could have done magnificent work for the Colony with highly-trained practical men, men trained in an agricultural college, with expert knowledge in their respective lines. But the five men were all appointed on the recommendation of political friends.

Do you gather from that that we needed the men if we had got good men? Yes, I was quite clear about that. So far as your evidence went in that direction with regard to the agricultural experts they were required in the department, but an attempt had been made to put in improper men, and you had resisted it. Apart from that the impression left in my mind was that other persons also who were not required were either introduced, or an attempt was made to introduce them.

1164. Did you not think that I took pains in my answers to explain clearly that the men would have been required if they had been good men? You did with regard to those agricultural experts undoubtedly. There can be no misapprehension about your evidence on that point, I think.

1165. As a matter of fact, I never broached the matter to you in any shape or form before that Commission or after it? No. All my questions were asked on my own initiative. Nobody ever approached me.

1166. *Chairman.*] It was simply from rumours that you had heard? Exactly.

1167. *Mr. Anderson.*] There were no questions asked me to explain my answer to question 7294? Not by me.

1168. And would you not take it that that answer was simply given in the same way as the other answers—to show that the appointment was made against my will and recommendation? Yes; it states so.

1169. *Mr. Hogue.*] In the answers which Mr. Anderson gave to your inquiries was there any material explanation made, or any material evidence given, that is not recorded in the report? No.

1170. Everything was given in the report? Yes, I think so; the evidence was simply submitted for verbal correction, and no witnesses were allowed to delete any important answer given. A number attempted to do that, but the Commission refused to allow it.

John Low Thompson called in, sworn, and examined :—

J. L. Thompson.

30 Sept., 1896.

1171. *Chairman.*] What are you? Principal of the Hawkesbury Agricultural College.

1172. *Mr. Anderson.*] When you were appointed Principal of the College, did I proceed to the Dookie Agricultural College, of which you were the Principal, by instructions from Mr. Sydney Smith, and examine very carefully into your character and qualifications? Yes; you visited Dookie.

1173. Did Mr. Sydney Smith then send to you to come to Sydney to interview him? Yes.

1174. After that you were appointed? Yes.

1175. Were all other appointments, as far as your knowledge goes, conducted in the same way during Mr. Smith's term of office? As far as I know. I know nothing to the contrary.

1176. Do you know of your own knowledge that I took special pains to find out the qualifications of every man before letting him interview the Minister? Yes.

1177. Were you at Bodalla in January, 1892, when I got a telegram announcing the appointment of five inspectors of agriculture, and one inspector of agricultural shows? Yes.

1178. What impression did you get from the way I received that news? You were rather upset, I think, by your manner.

1179. Did you gather the impression that the appointments were ones that I thought bad appointments? Yes, I think you said so.

1180. Did I at once return to Sydney, leaving my guests at Bodalla? Yes.

1181. You remember asking for a Registrar to be appointed at the College in December, 1891? Yes.

1182. Did I ever suggest to you that a clerical officer named Dunningcliff was fit for the position? No; I never knew of Mr. Dunningcliff being mentioned in connection with the position.

1183. Could you believe it possible that I would offer the position to Mr. Dunningcliff without first consulting you and also getting the approval of the Minister? I do not think it is likely that you would.

1184. Mr. Dunningcliff says that amongst the duties, I told him that he would have to take the lads to church on Sunday, prepare weekly reports on the experimental crops, and also a large report concerning the general work, and otherwise to assist Mr. Thompson in out-door duties—were those any part of the duties of the Registrar? There was no supervision in taking the boys to church; they go voluntarily.

1185. *Chairman.*] Is there no one in charge of them? No.

1186. *Mr. Anderson.*] What is the salary attached to the position of Registrar of the College? £150, with board and lodging.

1187. So that if Mr. Dunningcliff says: "Without any increase of salary," his salary being £130, that is not correct? The salary of the Registrar is £150 with board and lodging.

1188. Did you specially specify at the time that the Registrar must be a young man, to sleep at the place and have disciplinary power over the students, write short-hand, and do your correspondence and use the type-writer? Yes; those were the special qualification—an unmarried man, I think I said.

1189. Is it credible that I would offer such a position to a man 56 years of age with a large grown-up family who had none of those qualifications that you wanted? I hardly think it is likely.

1190. Did I work very heartily and cordially at the College with you when it was started? Yes.

1191. Do you know that I had very-onerous duties with regard to examinations and the general formation of the College? Yes.

1192. Have these duties been discharged by anyone else since that time? There was a very large amount of work in connection with the establishment of the College. That work, of course, is not necessary every year; but in initiating the College you gave me every support and assistance.

1193. It would not be correct for any man to say that now he discharges the duties I performed with the others? No; not that particular duty.

1194. *Chairman.*] Any of the duties? The general oversight of the institution has been carried on since by Mr. Harrie Wood and Mr. Campbell. But in starting a college there are a number of duties which after the institution is thoroughly established are not required again.

1195. *Mr. Anderson.*] What opinion did you form of my abilities as Director of the Department, and therefore able to control all its agencies? You were very enthusiastic, as far as I saw, and I must say gave me every assistance in carrying out the duties of Principal of the College.

1196.

1196. Do you remember the first appointment of Registrar of the College? Yes; Mr. Musson was the first Registrar, in connection with his other duties, while we had only twenty-five students.

1197. Do you remember the special appointment of Registrar—the first man who was appointed to the special position of Registrar? Yes.

1198. Who was that? Mr. Lush.

1199. Before Mr. Lush? There was a Mr. Guy, I think, mentioned, but he was not appointed.

1200. On your paper asking for an officer, does the Minister say, "Yes; Mr. Louis Guy, of Enmore, may be appointed to this position if he will accept it"? Yes.

1201. *Mr. Slattery.*] You notice also that he would not accept it? Yes; it is noted, "Mr. Guy declines to accept the position."

1202. *Mr. Anderson.*] Did you afterwards report that Mr. Guy had not the qualifications for the position? Yes; I had a conversation with him, I think, in your presence, and after pointing out the duties I came to the conclusion he was not qualified for the position. I think he was of the same opinion himself.

1203. On your minute I said:—

I recommend that applications be invited from persons having the necessary qualifications, a person in the Civil Service to have the preference, other things being equal. The Principal considers it indispensable that the Registrar should write shorthand, be a good book-keeper, and be able to exert disciplinary power over students.

You see that in the minute? Yes.

1204. Then on the minute the Minister wrote, "Mr. Lush may be appointed to the vacant position"? Yes.

1205. Do you consider Mr. Lush a good man for the position? His qualifications were good. There were certain things in connection with his career that were not so satisfactory amongst a lot of young men; but as far as the duties of the office were concerned he had good qualifications.

1206. Mr. Guy was appointed on the 14th January, 1892, and there is a minute by Mr. Slattery on the 27th January, 1892, "Mr. Guy declines to accept the appointment";—is that so? Yes.

1207. Did I explain to Mr. Guy the duties of the office when he was in my room, and when he was interviewed by you? Yes.

1208. Did he decline the position then? I did not hear him at that particular time decline the position.

1209. Did he express himself to the effect that he considered he could do the duties as well as anybody else, when I expressed the opinion that he did not seem to have the requisite qualifications? I think he might have said something of the kind.

1210. What remark did he make at the time? He spoke about what he had been doing, I think.

1211. Did he not say that uncle had promised him a billet? Yes; he said that, I think.

1212. And when I asked him who his uncle was what did he say? Mr. Slattery.

1213. *Mr. Slattery.*] I suppose that all the time I was in the department I never cast any doubt upon your ability and respectability, and your capacity to be at the head of the Agricultural College? No; you gave me every support.

1214. And is it not a fact, that as Minister I did everything I possibly could, as far as you know, to carry out all the views of my predecessor, Mr. Sydney Smith, who founded the department? Yes; as far as I know.

1215. Do you know of one single thing in which I tried to interfere with Mr. Smith's intention in founding the department? No; I do not.

1216. Is it not a fact that while I was Minister, and since my retirement from public life, I have given an annual medal to be competed for by the students of the College? Yes.

1217. In regard to the appointment of Registrar, you say that certain things in connection with Mr. Lush's career were unsatisfactory;—is it not a fact that that was discovered afterwards? Yes.

1218. It was something in connection with a divorce case? Yes.

1219. And that divorce case took place long after his appointment? Yes.

1220. *Chairman.*] Is that the case to which you referred? Yes.

1221. *Mr. Slattery.*] In a Parliamentary paper relating to the subject of this inquiry, ordered to be printed on the 23rd October, 1895, at page 6, do you see a minute by Mr. Anderson, dated 15th October, 1895, in reply to a letter of mine, in which he says:—

Another gentleman—Mr. O'Sullivan—was then submitted for the Principal's approval, whom he considered unsuitable. A third—Mr. Lush—was then submitted, and as he had a slight knowledge of shorthand, and was of mature age, the Principal accepted his appointment. I could find absolutely nothing of his past career, as he had recently been a Baptist minister, and had left the ministry under peculiar circumstances. To show the necessity of some rigid examination of such strangers' past history, I may mention that a few months ago Sir William Windeyer, on granting this man's wife a divorce from him, said it was a disgrace to have such a man in the Public Service of New South Wales, while so many of our young men were going idle.

? Yes.

1222. Is it not a fact, therefore, that it was three years after he was appointed that these divorce proceedings took place? Yes.

1223. And notwithstanding everything that has been stated by Mr. Anderson against Mr. Lush, is it not a fact that Mr. Lush has been graded recently by the Public Service Board as an officer in this very position? Not this position; but a permanent officer in the department.

1224. He is graded as a permanent officer in the department? Yes.

1225. *Chairman.*] Has his position been lowered or raised, or does he remain at the same status? About the same, I think, but a permanent officer.

1226. *Mr. Slattery.*] Do you know that the man was an absolute stranger to me? Yes; I know that of my own knowledge.

1227. In regard to the College itself, Mr. Campbell is now called chief clerk, and he has charge at the head office of the Department of Forests and Agriculture? Yes.

1228. With the assistance that he renders you as Principal at the College, are things going on there just as well now as they were previously? Yes; Mr. Harrie Wood always came up with Mr. Campbell.

1229. And when Mr. Harrie Wood was in office he also assisted? Yes.

1230. I suppose, if it were so directed, you could carry on the College and everything connected with it without the assistance of Mr. Anderson or Mr. Campbell, or anyone else? I will admit that I was indebted to Mr. Anderson, and also Mr. Campbell, and Mr. Harrie Wood.

1231. That is for all the assistance they gave you;—of course you are a scientific agriculturist? Yes; partly. I am more a practical man than anything else.

1232.

J. L.
Thompson.
30 Sept., 1896.

- J. L. Thompson.
30 Sept., 1896.
1232. I suppose from your knowledge of him you know that Mr. Campbell is a man who is well up in agricultural matters? Oh, yes; he knows about agriculture.
1233. There was a gentleman named O'Sullivan who was appointed to be Registrar at the College; do you not know that he was a shorthand-writer and typewriter, and a man of high character? Yes.
1234. *Mr. Anderson.*] Mr. Slattery has stated that Mr. Lush was a perfect stranger to him. He was a perfect stranger to us in the department, was he not? I knew him in South Australia as a Baptist Minister.
1235. Do you think it was a wise thing for Mr. Slattery to appoint a man who was a perfect stranger to him—was that a wise way of making appointments? He asked me if I would take him.
1236. On what ground did you take him then? I knew him in South Australia to be a very excellent man. He wrote a beautiful hand, and he told us he could write shorthand. When he came to the College he said he had forgotten it.
1237. In his application he said, "In shorthand and typewriting I am fairly well up," and you put a note on the margin, "No knowledge of shorthand";—is not that a fact? That is quite correct. I believe it is possible for people to forget shorthand.
1238. As a matter of fact, if we had examined him in shorthand he would not have been appointed? I suppose not.
1239. *Mr. Cann.*] Could you have examined him in shorthand? No; but I could have dictated matter to him to be taken down in shorthand, and reproduced in type.
1240. *Chairman.*] Did he perfect himself in shorthand afterwards? No. I asked him to take down something in shorthand and reproduce it, but he said he was out of practice. When he came to do the work at the College, and when he was asked to take down in shorthand answers to letters, so as to dispose of the correspondence more quickly, he said he was out of practice, and that he could take it down in longhand almost as quickly and more accurately.
1241. *Mr. Anderson.*] The heavy work in connection with the College was the initial work during the first two years, was it not? Yes.
1242. While I was Director of Agriculture? Yes.
1243. As a matter of fact, the work now is merely routine work that goes on in the ordinary course? Yes.
1244. And needs no special exertion or labour from anyone outside yourself? Yes; there is not so much initial work, certainly.
1245. *Mr. Slattery.*] I suppose there was no work done by Mr. Anderson that you could not have done yourself if you had had everything handed over to you—you were in charge of the Dookie-College, were you not? Yes.
1246. I suppose you could have done all that without the assistance of Mr. Anderson or anyone else? If it had been left entirely to me, I suppose I would have done my best.

Arthur Reynolds called in, sworn, and examined:—

- A. Reynolds.
30 Sept., 1896.
1247. *Mr. Anderson.*] You were first clerk in the Department of Agriculture during my directorship? Yes; I was transferred from the Government Survey Office to the Agricultural Department in March, 1890.
1248. After your application did I cause you to interview me, and did I inquire very fully into your qualifications? Yes; you examined me two or three times very carefully indeed as to whether my qualifications were especially suitable for the work of the Agricultural Department.
1249. You had an interview then with the Minister? Yes; the Minister also examined me as to my qualifications.
1250. You took your B.A. degree, having attended night lectures at the University prior to your entering the department? And while in the Survey Office I passed a professional examination and also entered the Public Service by competitive examination.
1251. Have you read the whole of my evidence given before the Civil Service Commission with regard to the Department of Agriculture? Yes.
1252. Is there anything there you know to be untrue or exaggerated? No; I do not think so.
1253. Did you ever see Judge Forbes in my office? Yes; I remember seeing Judge Forbes in your office with Mr. O'Kelly before Mr. O'Kelly was appointed.
1254. He was in company with Mr. O'Kelly? Yes; they were both there together.
1255. Therefore, if he had been there without Mr. O'Kelly, that must have been a second visit? Certainly.
1256. Are you aware that we received hundreds of letters in the department testifying to the value of the scientific work done in the department? We had evidence even during the year 1890 of the value of the work done by the department both by yourself and by the scientific staff and by means of the *Agricultural Gazette*. We had this evidence every year, but even in 1890, although the department was only started in March of that year.
1257. Did we ever get any letters thanking us for the services of the inspectors? Except in the case of Inspector Despeissis, who was appointed in 1890, I do not remember any such letters. In fact, it was the other way. Nobody seemed to want them again, and after a time the department did not know what to do with them, and had to find them other work at the head office.
1258. Did you have sole control of the scientific correspondence of the department? Yes.
1259. You saw all that went through you? I came into contact more with the purely agricultural part of the work than the administrative work.
1260. Do you recognise those functions of the Department of Agriculture [*paper produced*] drawn up by myself as head of the Department of Agriculture, and Mr. Bridges, head of the Technical College? Yes; I remember this document, and I remember the whole matter.
1261. Do you identify No. 9? Yes—on the subject of special interest in the different districts.
1262. How many regions or districts was the Colony then divided into? North Coast, South Coast, Tablelands, and I think the Western Plains.
1263. Is was distinctly understood in the department that in the course of time we should have an inspector for each of these regions or districts? Yes, that was the express intention.
1264. Did you know Mr. de La Motte, an inspector in the department? Yes.
1265. Did you see all his reports and journals? I must have seen the principal ones; very few would have missed me.

1266. What opinion did you form of their value? That he was not competent to be an inspector of agriculture, as an inspector of agriculture should be. For instance, I do not think that Mr. de La Motte had a thorough scientific knowledge of agriculture. I do not think he had more than a superficial knowledge of practical agriculture. I do not think he was competent to lecture to farmers, and I do not think he was competent to write articles on agriculture that were fit to be read by agriculturists.

A. Reynolds.
30 Sept., 1896.

1267. Did we ever use any of his writings or reports in the *Agricultural Gazette*? No. While we could use Mr. Despeissis' reports and publish them, and while we could publish Mr. Benson's, the fruit expert's report, we could never publish anything Mr. de La Motte wrote.

1268. Were we ever asked for his services again after he had visited any special district? No; in fact we had to find other work for him—ordinary work upstairs in separating the wheats, &c.

1269. Do you remember Mr. Fitzgerald's reports on agricultural shows? Yes. The work of an inspector of agricultural shows was to investigate whether different societies were justified in existing compared with other societies; to investigate their accounts; to see that the subsidy given by the Government was justly apportioned to their relative work, and was properly expended; to meet the farmers; to lecture if necessary; and to see that prizes were not given for exhibits which were not worthy of prizes.

1270. Were Mr. Fitzgerald's reports of any value to me as Director of Agriculture? Not on any one of these points. I do not think he fulfilled the duties of inspector of agricultural shows in a competent manner in any way. His reports were quite empty things, of no value to the department.

1271. As a matter of fact, do you remember the first report he made when he went down to the Wollongong Show? No, I cannot exactly distinguish that from others.

1272. Mr. Dunnicliff, in his evidence before the Committee, made the following statement:—

I said to the first clerk that I wanted to see my papers to find if there was anything on them that would legitimately block me from any advance in the department. The first clerk begged of me not to press my request for the papers. He said, "What do you want—do you want an advance of salary?" I said, "No; I am not asking for an advance of salary; I want to see why I am kept in this position." And he said, "Well, will you make an application for an advance of salary?" and I said, "No." He asked me if I would sign a paper that he would draw out, and he would guarantee that I should have an advance that afternoon, and I said, "No; I would have my papers." He begged of me not to push the matter, and I said I should take my own course.

Is that evidence correct? No; it is nonsense. No senior officer in the Service would talk such nonsense. In fact, I did not myself know of any papers in the department that were against Mr. Dunnicliff. They may have been in existence, but I was not aware of them.

1273. Mr. Dunnicliff goes on to say:—

The next day Mr. Anderson came over and called me out of the room into the corridor, and offered me the position mentioned in the evidence as having been given to Mr. Lewis Grey—that of Registrar at the College.

Mr. Dunnicliff was working in your room at the time, was he not—in December, 1891? He was working under me then.

1274. Did I ever call him out of the room to your knowledge? Not to my knowledge.

1275. Is it possible that I would call a man out of your room and speak to him when I could have summoned him to my own office to speak to him? No; I do not think so.

1276. Did you at the time know the duties of Registrar at the College? No; I did not know much about them.

1277. Mr. Dunnicliff said in his evidence that he was getting starvation wages, and could not obtain the slightest advance, and he said afterwards that I offered him a position that was worth £150 per year, with board and lodging;—was not that a distinct advance if such a thing happened? Yes; certainly.

1278. Did you ever see the slightest sign of animus on my part against Mr. Dunnicliff in the department? No. I remember very well the commencement of Mr. Dunnicliff's appointment. He was appointed at exactly the same time as Mr. Valder. I think before you went away to Melbourne attending the Rust Conference you gave him some very important work to summarise—some important evidence on viticulture given before the Royal Commission in Victoria on vegetable products, and I remember you had to take it from him and give it to Mr. Pudney, an agricultural expert then in the department. Then afterwards you gave him work to do at the head office in connection with purchasing wheat and manures for some rust in wheat experiments. You then placed him in charge of the seed distribution, but he was removed from there, I believe, on the verbal report of Mr. Turner.

1279. As a matter of fact, you are of opinion that I did everything I could to give him a chance to show his capabilities? Most decidedly I think so. I think he had some excellent opportunities of showing his fitness for the difficult position of inspector of agriculture. He seemed to miss them somehow. He was a good officer at clerical and other general head office work.

1280. It has been sworn in evidence here that a gentleman is now discharging the duties of yourself as first clerk, Mr. Price, as chief clerk, and of myself—is that possible? That is a physical impossibility, if the volume of the work of the department were equal to what it used to be.

1281. Evidence has been given to that effect by Mr. Campbell;—can you give the figures relating to the correspondence of the department for the four years of its existence to show the relative work? Yes; I can give you the figures for 1892, which was one of the years while you were in charge—we received 22,851 papers (exclusive of vouchers). In 1894, which was one of the years whilst Mr. Campbell was in charge, there were only 16,306 papers. Then again in 1892, 16,546 letters were sent out. In 1894, Mr. Campbell's year, 6,106 letters only were sent out. The rest of the ordinary work of the department would be in the same proportion. But you had the additional work of organising the department.

1282. Did you ever see any unfairness in my conduct towards any of the officers appointed by Mr. Slattery, or any of the other officers of the department? No; you promoted some officers who were appointed by Mr. Slattery, and you censured and had some officers removed who were appointed by the preceding Minister.

1283. Do you know, as a matter of fact, that I highly valued the services of some men appointed by Mr. Slattery, and any men I thought good men? Yes; for instance, there was a Mr. Gibson. He was appointed by Mr. Slattery. The same with another officer, Mr. Wainwright.

1284. You know that I recommended the discharge of a man appointed by Mr. Smith, just the same as I recommended the discharge of men appointed by Mr. Slattery? Yes; there was an officer, for instance, who was on probation for a while at the work at which Mr. Fitzgerald was afterwards engaged. He was found totally incompetent for that work, and you recommended his removal, and he was removed.

1285.

A. Reynolds. 1285. *Mr. Hogue.*] What was his name? Mr. Prentice. Mr. Anderson also gave Mr. de La Motte and Mr. Dunningcliff both a fair trial before Mr. Slattery came into the department, to test their merit as agricultural experts.

30 Sept., 1896.

1286. *Mr. Anderson.*] Do you think I was quite competent to be able to advise the Minister about the fitness of Mr. Dunningcliff or Mr. de La Motte? Yes, certainly; especially as you had already tested them.

1287. *Mr. Hogue.*] Was there anyone in the department better qualified to advise? No; it is a significant fact that all the agencies of the department were laid down by Mr. Anderson shortly after his appointment, and the department has practically not diverged from those lines since. Within one year from the inception of the department, the whole scientific staff was organised. Three important agricultural conferences were held; the *Agricultural Gazette* was being regularly issued; a competition with spraying apparatus was held; the Agricultural College was established, and most of its initial work fell on Mr. Anderson.

1288. *Mr. Slattery.*] You said something about appointments;—do you not know that instead of having the agreeable duty, perhaps, of making appointments, I had the disagreeable duty of removing a very large number in consequence of retrenchment? Yes.

1289. I suppose you will say, too, that all the time I was Minister I made very few appointments? No; you appointed all those inspectors, and you appointed, I do not know at this moment, how many clerks.

1290. Do you not know that there were very few appointments? The best idea I can give on that point is to state that the total expenditure for salaries and allowances of the officers at the head office in 1891 was £6,500 13s. 3d., and in 1892, which was all your year, it was £10,290 12s. 8d.

1291. You have worked this up for the occasion? I had all to do with the statistics and accounts of the department.

1292. I suppose you will admit that you do not go beyond the following year? I could not get the figures of the expenditure for 1893 and 1894. They are not to my knowledge published.

1293. You do not take the trouble to say how I had reduced the expenditure of the department by thousands and thousands per annum? That is true so far, but you were speaking about the appointments.

1294. You have not brought those other figures? The figures I have quoted I obtained from a report laid on the Table of the House, which only contained the figures for the years 1891 and 1892.

1295. I suppose Mr. Anderson and you had a chat over this as to what evidence you were to give here to-day? No; not as to what evidence I should give.

1296. So I understand you have come here to give all this evidence to-day without having been in consultation with Mr. Anderson;—have you given all this evidence to-day without any consultation with Mr. Anderson? No; Mr. Anderson asked me if I would look up the figures I had with regard to the department. I worked out these figures myself, from the report laid on the Table of the House, and from the reports of the department. I have them all here; they are my own.

1297. Beyond that, had you no conversation with Mr. Anderson as to what evidence you would give here to-day? He told me he would ask me, for instance, about the value of the inspectors.

1298. Is it not a fact that there are a number of questions down here in writing, and that you have answered them? Mr. Anderson told me that he would ask me about the figures of the department and the value of the inspectors.

1299. *Mr. Anderson.*] As attorney on my own behalf, did I not find out the evidence you could give? Yes; to the extent I have mentioned in my replies to Mr. Slattery.

1300. In order to make it as concise and prompt as possible? Yes; I presume so.

1301. *Mr. Cann.*] How long were you in the department? From March, 1890, until I was retrenched in June, 1893.

1302. Have you been retrenched? Yes; by Mr. Slattery.

1303. *Mr. Hogue.*] You are not in the department now? No.

1304. *Mr. Cann.*] During the time that you were in the department did you know of any unnecessary appointments having been made? I consider that the appointment of the inspectors was quite unnecessary, because they were not competent. If they had been competent their work would have been first class, and great value to the country.

1305. Then it is not a question of whether any men were necessary, but it is a question of the competency of the men? That is all.

1306. There would have been no cramming of the Service if they had been competent men? No. If they had been competent men their services could have been fully utilised, and they would have done valuable work.

1307. *Mr. Anderson.*] Did Mr. Slattery, as Minister, give an answer in the House on the 31st May, 1894, that the officer performing the combined duties of chief and first clerk received £254? I saw that. There must be some mistake.

1308. How many years were you in the Public Service altogether? I entered the Public Service in 1884, by competitive examination in the Survey Office.

1309. You had nine and a half years' service? Yes.

1310. When you were retrenched, what was your salary? £300.

1311. If you had been offered £254 to do these combined duties, would you have accepted it? I do not know that I would. I was so pained at the time at seeing so many fellow officers retrenched.

Arthur Price called in, sworn, and examined:—

A. Price. 1312. *Chairman.*] What are you? General agent.

30 Sept., 1896. 1313. You were in the Department of Agriculture? Yes.

1314. During what period? I joined the department on the 1st November, 1890, and remained until May, 1893, when I was retrenched.

1315. That was at the same time as Mr. Reynolds was retrenched—when the ordinary retrenchments took place? Yes.

1316. *Mr. Anderson.*] What was your previous record before going into the Department of Agriculture? I was engaged in the Railway Department for over thirteen years.

1317. In what position? My last position was that of the leading clerk on the clerical staff under the Secretary for Railways.

1318. You were summoned to see me when a chief clerk was needed for the Department of Agriculture? Yes.
1319. Did I examine very closely into your qualifications? Yes.
1320. Did you, after that, have an interview with Mr. Sydney Smith, the Minister? Yes.
1321. And after that you were appointed at no increase of salary beyond what you were receiving in the Railway Department? That is quite correct.
1322. As chief clerk, did all the correspondence of the department go through you before it came to me? Yes.
1323. And you would pass on to me only the important papers you thought I ought to see? Yes.
1324. You are now receiving a pension of how much? £105 19s.
1325. *Chairman.*] From what source? The Superannuation Fund in connection with the Civil Service.
1326. *Mr. Anderson.*] As a young man 34 years of age you were retrenched on a pension? Yes.
1327. *Chairman.*] Had you been paying into the Superannuation Fund? Yes.
1328. And you get that pension under the provisions of the Act? Yes.
1329. *Mr. Anderson.*] Do you remember my return from Bodalla in January, 1892? Yes.
1330. Did I prepare, at the earliest possible opportunity, some minutes to guide and warn the Minister about some appointments he had just made? Yes.
1331. As chief clerk you had infinite opportunities of forming an opinion of the qualifications of all the officers of the department? Yes.
1332. Have you read my opinion of Mr. O'Kelly in my evidence given before the Royal Commission? Yes.
1333. Did you form the opinion that Mr. O'Kelly was in no sense an expert able to teach the sugar-planters of the northern rivers? I did.
1334. *Chairman.*] What do you know about sugar-growing? I have no practical acquaintance with the subject of sugar-growing. In my capacity of chief clerk of the department, having large departmental experience, I formed the opinion that Mr. O'Kelly was not a suitable man for the position, from reading his reports as they were submitted.
1335. You do not know of your own special knowledge? No.
1336. In connection with sugar-cane and the growing of it? No.
1337. *Mr. Anderson.*] Do you not know that Mr. O'Kelly had to get all his information about disease in sugar-cane from the scientific staff at head-quarters? He certainly did get a lot of information about that.
1338. Do you know that he had often to get the commonest plants identified by the scientific staff of the department? Yes.
1339. Can you remember Mr. Fitzgerald as an officer of the department? Yes.
1340. Was he in any way competent for the duties that were given him? No; not in my opinion.
1341. Did you ever see worse reports in your life than those Mr. Fitzgerald made to me? No.
1342. As a matter of fact, were they totally useless, and had to be revised by a clerk before they were readable? Yes; his early reports were very badly drawn up.
1343. Did I instruct him to make a summary of all the agricultural societies of the country, showing the expenditure, and the methods of expenditure? In prizes, yes; from their prize schedules.
1344. How long did he take over that summary? Forty-seven days.
1345. Was it of any value at all when it was finished? None whatever.
1346. Did I remit it to him and order him to do it properly? Yes.
1347. And I wrote a long minute of instructions how it should be done? Yes.
1348. Did he ever finish it? Not to my knowledge.
1349. Were you intimately acquainted with the relations between the officers of the department and myself all through the time? Yes.
1350. Did I ever show the slightest animus against Mr. Dunnicliff, for example? Not to my knowledge.
1351. Do you think I did everything in my power to give him a chance of showing his capabilities? Yes.
1352. Did I recommend Mr. Sydney Smith, the Minister, to let him go out as inspector on probation? Yes.
1353. Were his reports satisfactory? They were not considered satisfactory.
1354. *Chairman.*] By whom? By Mr. Anderson.
1355. *Mr. Anderson.*] Did you make out a summary for the Minister's guidance, showing that these reports were supplied from a month to five months after they were due? Yes.
1356. Do you remember that Mr. Dunnicliff was absent without leave for a day? Yes.
1357. Did his son come to do his work that day? Yes.
1358. Was that reported to me officially? Yes.
1359. Did I take any steps in that matter, or in any other matter, without being first moved by some responsible officer? No; not to my knowledge.
1360. Did I report the matter fully to the Minister, Mr. Sydney Smith? Yes.
1361. And he took what action he thought fit? Yes.
1362. Was the third certificate from Dr. Dixon couched in such peculiar language that I requested you to ask him to explain it? Yes; that was the object of my visit to him.
1363. How did Dr. Dixon explain it? He explained to me that Mr. Dunnicliff was suffering from mental worry—no easily definable disease.
1364. *Chairman.*] Was that all the doctor said? He told me that Mr. Dunnicliff was suffering from mental worry, such as would be caused either by domestic affairs or financial affairs.
1365. *Mr. Anderson.*] Did he tell you that he was attending Mr. Dunnicliff professionally, or that Mr. Dunnicliff simply got the certificate on purpose to get leave? He did not express himself in that manner. He was not attending him professionally. Mr. Dunnicliff simply paid one visit to him for each certificate.
1366. How long would it have taken Mr. Dunnicliff to come from Dr. Dixon's residence to the department to see me? He could have taken a tram and got down in about ten minutes or a quarter of an hour easily.
1367. Had I a full knowledge of Mr. Dunnicliff's testimonials as presented to the department while he was there? Yes.
1368. *Chairman.*] Do you know whether Mr. Anderson saw Mr. Dunnicliff's testimonials of your own knowledge? Of my own knowledge, I could not say.
1369. *Mr. Anderson.*] Did I see those that were attached to his application? You were bound to see them. Being attached to his application, they would be submitted in the ordinary course.

- A. Price.
30 Sept., 1896.
1370. Did you understand that I was anxious to give Mr. Dunnicliff a special chance when I sent him away to Wellington and Mudgee at the end of 1890? Yes.
1371. Did I advance Mr. Dunnicliff £5 from my private funds to pay his travelling expenses? Yes.
1372. *Chairman.*] Are you aware of your own knowledge that it was advanced? Mr. Dunnicliff admitted that he had an advance from Mr. Anderson. I did not see the money actually change hands.
1373. Your answer to the question is that Mr. Dunnicliff admitted to you that Mr. Anderson did advance him money? Yes.
1374. Did he say out of his private account? No; I was the person who remitted the money to Mr. Dunnicliff. I got his acknowledgment for it.
1375. Then it was not private money? Yes; it was Mr. Anderson's private money. It was not the money of the department.
1376. *Mr. Anderson.*] The department had no advance account at the time? No.
1377. If I had refused to advance this money it would have prevented Mr. Dunnicliff from getting the chance of going to the country? He had no money of his own to take him.
1378. Do you know that I did everything in my power to help him, and any other officer of the department who was trying to do his duty? I believe you did the utmost.
1379. Did you ever see the slightest sign of animus on my part against any officer of the department? No; I did not.
1380. Did Mr. Dunnicliff explain when he came back that he had not had an opportunity of writing reports when he was away in the country? He wrote me a note.
1381. At the time Mr. Dunnicliff said he could not write reports through illness, he was writing private letters and correspondence? Not through illness. At the outset, when he went to examine certain wheat-plots, in a note which he addressed to me, he said he had not had time to write reports on account of the inconveniences he had to contend with in the country. This note was written at the Blayney railway station.
1382. If he was able to write that note he was just as able to write an interim report to me, was he not;—did the other inspectors write interim reports to me when they were travelling about? Yes.
1383. Are you aware from your own knowledge that I found great fault with Mr. Dunnicliff for the unsatisfactory way in which he performed those duties? Yes.
1384. *Chairman.*] Did you ever hear Mr. Anderson find fault with Mr. Dunnicliff? Yes; in my presence, in his own office.
1385. *Mr. Anderson.*] And you know, as chief clerk, that I had to remove him from duties because they were not satisfactorily performed? Of my own knowledge, I could not say with what satisfaction he performed his clerical duties. I know that his work was changed, but that was on the report of the botanist, I think.
1386. Did I ever take any step of that sort whatsoever without being moved thereto by some responsible officer? Certainly not, to my knowledge.
1387. Do you remember the appointment of Mr. Hughes, as assistant to the chemist? Yes.
1388. The chemist asked for the appointment of someone to assist him in his work? Yes.
1389. Being reported by the chemist as unsuitable for chemical work, was he transferred to the clerical branch? Yes.
1390. *Mr. Cann.*] On whose recommendation was he appointed as assistant chemist? He was appointed by Mr. Slattery. He applied for clerical work.
1391. *Mr. Anderson.*] Do you remember the appointment of Mr. Cull as assistant to the pathologist? Yes.
1392. Do you know that he was transferred from the pathologist's branch to the clerical staff? Yes.
1393. *Mr. Slattery.*] You say you are not a sugar expert? I am not.
1394. And consequently you are not an agricultural expert? No.
1395. And not being a sugar expert or an agricultural expert, you would venture an opinion about Mr. O'Kelly and Mr. Fitzgerald? I ventured to express an opinion as to their qualifications for their respective positions judging by the nature of the reports they submitted to the department.
1396. And you judge that without any experience in either sugar or agriculture? Mr. Fitzgerald was not an inspector of agriculture but of agricultural shows.
1397. Have you had anything to do with agricultural shows in your life? I have had an all-round experience.
1398. Where did you have any experience in an agricultural show? I have not actually been a committee-man, or anything of that kind, but I was reared and trained in the country.
1399. You have seen agricultural shows? Certainly.
1400. Just like all other members of the community, who go into an agricultural show as visitors and look at the exhibits? Yes; I have visited agricultural shows.
1401. But beyond that have you had any experience of agricultural shows;—are you a judge of cattle or horses? I have never acted in that capacity.
1402. Have you been a judge of dairy produce, or any other exhibits, at an agricultural show? No; I have never acted in that capacity. My opinion with regard to Mr. Fitzgerald's qualifications was formed from my large clerical experience in the different departments with which I have been associated, and his reports, as submitted, did not strike me as those of a man possessing any qualifications for the position.
1403. You admit that you had no experience at all except merely going as a visitor to an agricultural show and looking at the exhibits, the same as any member of the public? I have had an all round experience, obtained in the country, and as a clerk of fifteen years' experience, I consider that I was well qualified to give an opinion with regard to reports submitted to the department.
1404. Something has been said about £5 being given by Mr. Anderson to Mr. Dunnicliff, to enable him to pay his travelling expenses? Yes.
1405. If Mr. Anderson advanced £5 out of his own pocket it was to enable Mr. Dunnicliff to go away promptly? Yes.
1406. To go away on the work of the department promptly, instead of remaining in town until the money could be obtained from the Treasury? The object was to facilitate his movements.
1407. Is it not a fact that Mr. Anderson got the £5 back again when you got the advance from the Treasury? After considerable delay.

1408. Did he get it back? He got it back.

1409. You were asked something about Mr. Hughes;—do you see a minute on the papers dated 8/1/92, to this effect:—

Mr. Hughes is over 27 years of age, and, therefore, seems, according to the Civil Service Act of 1884, clause 21, ineligible for appointment as a probationer. If it be desirable to appoint Mr. Hughes he might be made a temporary clerk. He has no qualifications for assisting the chemist, and some young student at the University or Technical College should be sent to the laboratory work.—H.C.L.A.

? Yes.

1410. There is also a minute there by Mr. Anderson, dated 3rd February, 1892, as follows:—

I understand from Mr. Hughes that he has no special desire to do chemical work, and I would, therefore, if there be no objection, utilise him in general clerical work. Two applications—from Thompson and Whitford—have already been submitted; two others have since been received. I recommend that a probationer be appointed who has had some laboratory experience.

To that there is the minute:—

Submitted.—H.W., 4/2/92.

Then, on the following day, do you see this minute:—

As Mr. Hughes has been appointed, it would, I think, be unjust if he should not have some position in place of that for which Mr. Guthrie thinks him unfitted. He may, therefore, be appointed at general clerical work, as recommended by Mr. Anderson. One of the two gentlemen (Mr. Smith) recommended by Mr. Guthrie, was recommended to me yesterday for appointment, but he has not as yet passed the Civil Service examination. Mr. Thompson's application (if he made one) is not with the papers. Mr. E. H. Gurney, whose application is with the papers, appears to me well qualified for the position, and he may be appointed accordingly.—T.M.S.

And then you see that Mr. Gurney was appointed? Yes.

1411. Did you hear Mr. Anderson admit just now that Mr. Gurney, as assistant to the chemists, was a very good officer? Yes.

1412. And this appointment was only on probation at £50 a year? Yes.

1413. *Chairman.*] Do you recognise this minute on the papers?

I am not aware that any University or Technical College student has applied for the position. If such a person has applied his name should have been submitted. If Mr. Hughes is disqualified for the position of probationer I scarcely think it would be proper to employ him as a temporary clerk to assist the chemist.—H.W., 8/1/92.

And also this minute following:—

As Mr. Hughes has been disappointed in obtaining the position of probationer, and has been for years an applicant for the said position, he may now be employed as a temporary clerk to assist the chemist, at (say) 5s. per day.—T.M.S., 19/1/92.

Yes.

WEDNESDAY, 7 OCTOBER, 1896.

Present:—

MR. CANN,

MR. RUSSELL JONES,

MR. MOLESWORTH,

MR. WRIGHT.

W. J. LYNE, Esq., IN THE CHAIR.

Mr. T. M. Slattery appeared as solicitor in his own behalf.

Mr. H. C. L. Anderson appeared in his own behalf.

Thomas Michael Slattery sworn in and examined:—

1414. *Chairman.*] You were Minister for Mines and Agriculture from 1891 to 1894? Yes.

1415. Do you wish to make a statement in reference to the evidence given by Mr. Anderson before the Civil Service Commission? Yes. I wish to say in the first place that in asking for this Select Committee I was not actuated by a desire to do any injury whatever to Mr. Anderson. I was merely anxious to have my character cleared in regard to my administration of the Department of Mines and Agriculture. If I had any prejudice at all concerning Mr. Anderson when I entered the department as Minister it was certainly in his favour. Having said so much, I regret to have to say that Mr. Anderson's evidence before the Civil Service Commission is, as far as I am concerned, untrue in some respects, and where it is not untrue it is misleading. Until Mr. Anderson's explanation was made I was under the impression, as was also Mr. Teece, who put the questions, that I was charged with what Mr. Cann has termed "cramming men" into the department who were not required. I now swear that during the whole time I was a Minister I never put a man or boy into the department except to fill a vacancy or where assistance was required. I may say in regard to patronage that the question of being asked for various appointments in the Public Service was one among other reasons which induced me to leave public life. The number of applicants for public employment was so large that every petty appointment of a probationer (say) at £50 a year, made innumerable enemies for me, to my own certain knowledge, in the city of Sydney. The father of every applicant thought his son should be appointed to the exclusion of the boy who was appointed. Where there would be one vacancy for a boy at £50 a year as a probationer there would be, perhaps, under the old Civil Service Board, 1,000 recorded applications, and each applicant thought he was as much entitled to the appointment as the boy selected by the Minister. In regard to patronage in the Public Service, while I was Minister both in the Department of Mines and Agriculture and in the Department of Justice, instead of being a pleasure to me it was a perfect nuisance. I was almost worried out of my life by persons wanting billets for their relatives and friends, and I say again that during the whole time I was Minister I never put anyone into the department except to fill a vacancy or where the responsible officer stated that they required assistance. I never told an Under Secretary or anyone else in the department that he must find a position for anyone. I could mention the name of a gentleman very high in public life at the present time who was anxious that I should give an appointment to his brother-in-law. As I was on the most intimate terms with him personally, although divided from him politically, I was anxious to oblige him, and

T. M.
Slattery.

7 Oct., 1896.

T. M.
Slattery.
7 Oct., 1896.

I asked the Under Secretary, Mr. Wood, if there was any place to which this gentleman could be appointed. Mr. Wood told me there was nothing at all in the department to which he could appoint him, and with great regret I had to decline to give this gentleman an appointment, although if a vacancy had occurred, I should have been only too glad to oblige my personal friend, though he was a political opponent. I wish to say, also, with regard to my administration of the Department of Agriculture, that, having been on the most friendly terms personally with Mr. Sydney Smith from boyhood, I was most anxious as Minister to do everything in my power to carry out his intentions as founder of the Department of Agriculture, and I have no knowledge at this moment of having done a single act which was not for the purpose of carrying out his intentions. As my good name is called in question in this inquiry, I now challenge anyone in the whole world to say one word derogatory to me in regard to my administration, either of the Department of Mines and Agriculture or the Department of Justice, and I was a Minister on three separate occasions in administrations under Sir George Dibbs. During the whole time, a period of about fifteen years, that I was a Member of the Legislative Assembly, I never, for instance, held a mining share or a mining interest of any kind. In justice to my own character, I must say that Mr. Anderson's answer to Question 7253, before the Royal Commission, is untrue in some particulars, as I will prove by his own minutes, and where his answer is not untrue it is misleading. Until Mr. Anderson was examined here, I never heard such a construction put upon his evidence as he has placed upon it. Mr. Teece asked him, "When you were Director of Agriculture, did you ever have people thrust upon you against your will?" and Mr. Anderson answered, "Yes." Anyone would read that as meaning that I insisted upon people being appointed to the Public Service when they were not required. Mr. Anderson now states that they were thrust against his will. If, when I was Minister, Mr. Anderson had assumed that his will was to guide the department, and not that of the Minister, I should have had that matter very soon decided by the Cabinet. Before the Public Service Board came into existence, the Minister of every department was responsible to his colleagues, and to Parliament and the country, for all appointments. It is the first time I ever heard of anyone in the Public Service, Under Secretary or otherwise, assuming to himself that he had the right of nomination, and the Minister was a mere automaton to register his nominations.

1416. *Chairman.*] It would be well if you would state what first took place when you went into the office, so as to show what was the practice, both before and afterwards, as to communicating with the Minister? The power that Mr. Anderson said he had a right to assume when he was Director of Agriculture is a revelation to me. There is no public officer in the Colony of any experience who would think of assuming such a position. When a Minister takes office it is a usual thing for the Under Secretary of the department to introduce to him the principal officers—a mere formal introduction, meaning nothing but an act of courtesy between the permanent officials of the Crown and the Minister for the time being. A day or two after my acceptance of office, I received from Mr. Anderson a note, couched somewhat in these words: "When will it be convenient for the Minister to receive me and my officers?" As the Under Secretary of the department, Mr. Harrie Wood, was the gentleman to introduce the permanent officials, I asked him what this note meant, and then for the first time I discovered that Mr. Anderson, as Director of Agriculture, was in the habit of doing all his work direct with my predecessor, Mr. Sydney Smith, Mr. Harrie Wood not having anything at all to do with the greater portion of the agricultural business. But with regard to letters addressed to an Under Secretary, to the Agent-General, or to the Treasury, or to the Audit Office, all these communications had to go through Mr. Wood the Under Secretary. From my long official knowledge I was of opinion that that was a most irregular state of things, and I did not hesitate to put an end to it at once. Mr. Anderson waited upon me, and I told him that I could not have different channels of communication, that the proper channel of communication with the Minister from all quarters was the Under Secretary of the department. I pointed out to him that if he were allowed the right to communicate direct with the Minister, the same right could not, in justice, be refused to Mr. Bruce, who was the Chief Inspector of Stock; to Mr. Pitman, the Government Geologist; to Mr. Campbell, the Chief Mining Draftsman, and the other heads of branches. Mr. Anderson thought that it would be somewhat injurious to him in his position if any change should take place; but I pointed out to him that he had got into a position which was, officially speaking, incorrect. I told him that if the Cabinet would appoint him Under Secretary for Agriculture he would then be in a position to communicate direct, not only with the Minister but also with the other Under Secretaries, the Agent-General, the Auditor-General, the Treasury, and the other departments. I told Mr. Anderson that I would give him the liberty to see all the Ministers personally, and that if the Ministers would appoint him Under Secretary for Agriculture then he would be in a proper official position, and would be just like an Under Secretary of any other department. Mr. Anderson has admitted, in his evidence, that he spoke to two Ministers—Mr. Barton and Mr. R. E. O'Connor. If he did not speak to other Ministers he certainly wrote to them. I know he wrote to Mr. Kidd, if he did not speak to him. At all events, the matter was discussed in the Cabinet, and the Cabinet declined to increase the number of Under Secretaries. At that time there was not only Mr. Harrie Wood, the Under Secretary for Mines, but there was also an Assistant Under Secretary, Mr. Herring; so that Mr. Anderson, wishing to continue the system previously existing, really wished to continue in a position ignoring both Mr. Wood and Mr. Herring, and, unless he were appointed Under Secretary for Agriculture, I thought that was not a proper proceeding, and I put an end to it. In his statement to-day Mr. Anderson was in error in saying that I said I would treat him as the head of the department. That is not correct. Mr. Anderson, during my term of office, never was the head of the department—he was the head of a branch. During the time that I was Minister the official head of the Department of Agriculture was Mr. Harrie Wood. When, as Mr. Anderson states, I pointed out to him that the Inspector-General of Police had to communicate through the Principal Under Secretary, and that the Master in Equity, the Prothonotary, and the Comptroller-General of Prisons had to communicate through the Under Secretary for Justice, I was merely pointing out to him that these officers were at all events in a position equal to him, and had to communicate through their respective Under Secretaries. Mr. Anderson referred in his statement to-day to certain reports in newspapers against the department, and to questions asked in Parliament. I received an amount of unmerited annoyance and abuse from several quarters in regard to appointments of which I was perfectly innocent, and questions were put to me in Parliament in regard only to the Department of Agriculture—there were none in regard to the Department of Mines—which were only intended to give me personal annoyance. I had no doubt where these questions came from. I do not say that Mr. Anderson had these questions put in Parliament, but they certainly came from the Department

T. M.
Slattery.

7 Oct., 1896.

Department of Agriculture. No one could have framed the questions who did not have the papers before him. Mr. Anderson says that from the time I went into the department as Minister I never consulted him. My answer to that is that I never required to consult Mr. Anderson. No matter came before me in minutes of any importance whatever that I was not capable of dealing with without having a personal interview with Mr. Anderson. If in my judgment it had been necessary to do so, I certainly should have consulted Mr. Anderson in the same way as I would have consulted Mr. Bruce, Mr. Pittman, Mr. Campbell, or anyone else, if I required to do so. But I very rarely had personal interviews with any of these gentlemen. Mr. Anderson also stated that he was humiliated in the department. My answer to that is, if he felt that he was humiliated it was no fault of mine. It was his own imagination. He must have felt humiliated only because the Cabinet would not appoint him Under Secretary for Agriculture. With regard to Judge Forbes, that gentleman was never promised by me a position for his son-in-law, Mr. O'Kelly, as inspector of agriculture. I made personal inquiries from Mr. Mosely, and I was satisfied of Mr. O'Kelly's fitness for the appointment, and I am satisfied still, notwithstanding any opinions expressed to the contrary. In regard to the Estimates for 1891, which Mr. Anderson states he submitted to Mr. Sydney Smith, I swear positively that I never saw them, and I never knew anything about them until this inquiry. I never knew anything about the inspectors having been struck out of the Estimates by Mr. Sydney Smith. No such information was ever reported to me, either verbally or by minute. In regard to Mr. de la Motte having been reported three times, my answer is that the reports made against Mr. de la Motte were inquired into by Mr. Harrie Wood, the Under Secretary of the department, who reported to me that he was satisfied with Mr. de la Motte's explanations. Perhaps I had now better come to the evidence given by Mr. Anderson before the Royal Commission. I have said that the answer to Question 7253 is untrue in some respects and misleading. Mr. Anderson said:—

7253. *Mr. Teece.*] When you were Director of Agriculture did you ever have people thrust upon you against your will? Yes. I submitted a scheme to the Minister by which the Colony should be divided into four parts, and administered by a resident inspector in each division. The first division was the subtropical one, from the Tweed to the Clarence, to be in charge of an inspector, who should be an expert in the cultivation of sugar-cane and other tropical plants. Secondly, I proposed that there should be a farming district in New England, to be in charge of an expert in sheep-raising, turnip-growing, and English farming, with its head-quarters at Armidale. The third district was to be the Western Plains, where wheat and sheep are the specialities at present. The fourth division was to be the Coast District south of the Manning, which should have a dairy expert to teach the farmers. I laid this scheme before the Minister, who said it was an excellent idea, but that the country could not afford it. He was willing, however, to start with one inspector. We thereupon advertised for an inspector, and got twenty-six applications, only one of which was good enough to please the Minister, who therefore postponed the matter and made no appointment, nor did he make any provision on the Estimates then being framed.

All that took place, it would appear, during the time my predecessor held office. But Mr. Anderson goes on to say, "I never heard anything more about it. The Minister, Mr. Sydney Smith, went out of power in October, 1891, and Mr. Slattery came in." I will show that that is absolutely untrue. Instead of Mr. Anderson never having heard anything more about it, on the 11th November, 1891, I being Minister, Mr. Anderson resubmitted all the applications, and said in his minute, "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed. The officers are very much needed." Then on the 12th November, 1891, I being Minister, Mr. Anderson again wrote, "I would respectfully impress on the Minister the necessity of appointing some men with good practical and scientific training. The applications received in response to an advertisement have been submitted." That was in November, 1891. Then on the 19th January, 1892, I appointed the five inspectors, Mr. de la Motte, Mr. Macklin, Mr. Hooke, Mr. Dunicliff, and Mr. O'Kelly. Therefore, that portion of Mr. Anderson's evidence is absolutely untrue—untrue according to documents in the department, and must have been untrue to Mr. Anderson's knowledge when he gave it, unless his memory absolutely failed him. It would appear from that answer of Mr. Anderson's, "I never heard anything more about it," that I in some way or other appointed five persons without Mr. Anderson having sent on any papers. But there are his own minutes urging these appointments, and I delayed them from November until January, probably waiting for the new financial year to start with this increased expenditure. I have no doubt that was the reason why the matter was allowed to stand over for nearly two months. Before the Royal Commission Mr. Anderson was asked, Question 7254, "What salary did the inspectors receive?" and he said, "The five new ones, £300 a year each. I had recommended to the Minister that they should have graduated salaries from £200 to £300." Then he was asked, "They were all bracketed at £300 a year?" and he said "Yes." I swear positively that no such recommendation came before me. If Mr. Anderson recommended it, he recommended it to my predecessor. Until this inquiry I never heard of such a recommendation having been made. On the papers sent on with the thirty-four applications for the position of inspectors of agriculture, there was no such recommendation by Mr. Anderson. Then there is Question 7256, "And they were not required? No; because they were not agricultural experts. I could not find work for them." Two out of the number appointed, Mr. Hooke and Mr. Macklin, were marked by Mr. Anderson with a blue pencil, and in a minute he states: "The men whose names I have marked with a blue cross have one and all very fair qualifications for the position." In regard to Mr. Macklin, he was appointed with the others on the 19th January. On the night of the 27th January a statement was made to me by my colleague, the Minister of Public Instruction (Mr. Suttor), who showed me certain documents reflecting on Mr. Macklin. The House sat all that night, and before 9:30 next morning, according to my minute, I sent to the Under Secretary for the papers relating to the inspectors of agriculture, and before 10 o'clock that morning I had cancelled the appointment of Mr. Macklin, and he was one of the gentlemen recommended by Mr. Anderson as "having very fair qualifications for the position." Now I come to Mr. Hooke. Mr. Hooke is one of those whose name was also marked with a blue pencil. He was reported for being drunk while he was supposed to be attending to his duties in the country. As Mr. Hooke was only a temporary officer, and a man of good capacity and ability, but, unfortunately, as it turned out, addicted to drink, I suggested that instead of degrading him by dismissal for getting drunk, he should be allowed to resign. In regard to censuring Mr. Anderson for making a complaint against either Mr. Hooke, Mr. de la Motte, or anyone else, I never on any occasion censured Mr. Anderson in any way. I would only have censured Mr. Anderson in one of two ways—either personally or by letter. I did not do it personally, and there is no minute to show that I ever censured him in any way.

1417. *Mr. Anderson.*] You approved of a censure conveyed by Mr. Wood, the Under Secretary? I told Mr. Wood that I thought it was an improper thing for Mr. Anderson to go into the country without Ministerial

T. M.
Slattery.
7 Oct., 1896.

Ministerial authority, or without consulting the Under Secretary, and that that ought not to be done. Mr. Anderson wishes to imply that he had received my authority for going into the country. I state most positively that no such thing took place. If he had my authority he could not complain about what he is pleased to call a censure. I looked upon it as an error of judgment—that he was anxious to do his duty in regard to Mr. Hooke, or Mr. de la Motte, or anyone else, but that he had no right to ignore the Under Secretary and the Minister. As far as the inspectors of agriculture are concerned, when I appointed them, I believed from their testimonials and recommendations that they were agricultural experts. If Mr. Anderson “could not find work for them” he never reported that circumstance to me as Minister. The first time I discovered “he could not find work” for the inspectors of agriculture was when I read his evidence given before the Civil Service Commission. Mr. Anderson states, in reply to question 7257, “I had picked out the eight candidates with the best testimonials, and expected a rigid examination of these candidates and their records before even one should be appointed on probation.” Mr. Anderson never expressed, either verbally or by minute, that he expected a rigid examination of the candidates, or of their records, before even one should be appointed, even on probation. They were all virtually appointed on probation, because they were all temporary officers. If it had been reported to me that any one of these men was unfit to perform the duties for which he was paid by public money, I should have at once called upon him for his resignation. In reply to question 7259, Mr. Anderson complains about Mr. de la Motte. All I can say in reply to that is that the matter was inquired into by Mr. Harrie Wood, who, I am sure, was as competent to inquire into it as any man in the Public Service, and he was satisfied. 1418. *Chairman.*] What did Mr. Harrie Wood report to you? As Under Secretary of the department he reported that he was satisfied with the explanation given by Mr. de la Motte.

1419. And you acted upon it? I acted upon it in good faith, believing I was doing what was right.

1420. *Mr. Hogue.*] Did you see the explanation yourself? Yes. I should like to say in reply to Mr. Anderson's answer to question 7,293, as showing what feeling I entertained with regard to Mr. Anderson, that my colleague, Mr. Suttor, Minister for Public Instruction, told me he thought that Mr. Walker, Principal Librarian of the Free Public Library, would retire on a pension if matters could be arranged, so that he would come under the Constitution Act, and he then asked me about Mr. Anderson, and what I thought of him for the position. I told him I would be very much pleased if Mr. Anderson could get the position, because it had been arranged in Cabinet that retrenched officers should have a prior right to employment in the Public Service, and accordingly I was very pleased at having the opportunity of saying a word in favour of Mr. Anderson, in order that he might get the position which he now fills. I merely mention this to show that at the time, when all these minutes and papers, and private documents, and private letters were being kept by Mr. Anderson, I was not at all suspicious of him. What I did, I did in good faith, in the administration of the department, not wishing to do an act of injustice to anyone. I never in my life went through such a time as I did when it became necessary to retrench so many members of the Civil Service. If I had been there alone as a Minister I would have retired from office rather than have done it. But the other Ministers had to retrench in their departments, and I had to remain loyal to my colleagues, and to do what might really amount to actual injustice to deserving men. If I had an opportunity placed before me I should be only too happy to repair any injustice that might have occurred through my official acts in that respect. I would not go through a similar time again for anyone. As to the appointments I made, I would say, first, in regard to the five inspectors of agriculture, that they were all absolute strangers to me—I did not know one of them. I did not know the gentleman who was appointed inspector of Agricultural Shows. I did not know the gentlemen who were appointed as tobacco experts. The only three applicants for appointment as inspectors of agriculture whom I knew personally I refused to appoint. There was one who was introduced to me by Mr. Garvan, formerly a colleague of mine. I told this gentleman in the presence of Mr. Garvan that I knew he was not fit to be appointed an inspector of agriculture. I gave him great offence, but I did not appoint him. In appointing four of the five inspectors I was carrying out the recommendations of Mr. Anderson; and, with regard to the fifth—Mr. O'Kelly—he was appointed because Mr. Anderson, in his minute of 12th November, 1891, said, “At present there is a serious disease menacing the sugar-cane in the north. . . . I would respectfully impress upon the Minister the necessity of appointing some men with good practical and scientific training to examine into these diseases, &c.” I was satisfied, after my interview with Mr. Mosely, and after an interview also with Mr. O'Kelly, that this gentleman was well qualified for the position in regard to sugar-cane, and, consequently, I appointed him. I have already spoken about Mr. Macklin and Mr. Hooke.

1421. *Mr. Cann.*] Did Mr. Levien's interview or recommendation have any influence with you in Mr. Hooke's appointment? Members of Parliament always recommend people. The recommendation of one of my colleagues would not have had any effect on me, if I did not think the man was competent, and I am sure that every colleague of mine would say that that was the kind of Minister I was.

1422. Was he appointed alone on Mr. Levien's recommendation? His name was marked in blue pencil by Mr. Anderson, who in his minute says, “The men whose names I have marked with a blue cross, have one and all very fair qualifications for the position.” Mr. Hooke was recommended by Messrs. Cohen and Levy, of Tamworth, Canon Piddington, of Tamworth, N. Cohen, J.P., Tamworth, J. Patterson, Tamworth, Rev. P. D. Ryan, Tamworth, and D. Regan, Tamworth. I suppose the other applications would be accompanied by recommendations from Members of Parliament, because I received hundreds of recommendations from Members of Parliament, but I do not think that any Members of Parliament, who have known me in public life for fifteen years, would ever charge me with allowing the public funds to be wasted, and break my oath of office merely to oblige them, whether they were on my side or not.

1423. Mr. Chanter is mentioned as recommending Mr. de la Motte, and the Hon. John Lackey as recommending Mr. Dunnieliff. I suppose the recommendation of Mr. O. O. Dangar would not influence you? It there was one man in public life, perhaps, whom I would have obliged, it was an old friend and colleague, and great supporter of the Ministry like Mr. Garvan. The gentlemen whom he introduced to me, I knew myself, could not be fit, and I told him at once that I would not consider his application. Mr. de la Motte was recommended by Mr. J. Gormly, M.P. I am certain that Mr. Gormly never spoke to me about him. He was also recommended by the Rev. H. W. Taylor, of Bulli, by F. Woodward, M.P., and J. M. Chanter, M.P. Mr. Chanter spoke to me. Mr. Chanter had been an old colleague of mine, having been Minister for Mines in the Administration of which I was Minister of Justice, and I would certainly take Mr. Chanter's recommendation as soon as I would that of anyone.

T. M.
Slattery.
7 Oct., 1896.

1424. Is there any special reason to show the qualifications of these men to fill the office? I will show that Mr. Anderson sent on the papers without comment. I had before me Mr. de la Motte's application, sent on by Mr. Anderson. It was one of the thirty-four applications sent on. In his application, dated 27th October, 1891, Mr. de la Motte says:—

I beg to state that for a short period during last December it pleased the late Minister for Agriculture to appoint me as acting inspector (*pro tem.*) to inspect and report upon certain experimental wheat plots in the south-western district, and that after my work was finished I had the satisfaction to learn from the Director of Agriculture that "my reports were admirably drawn up."

I was further told by that gentleman, in reply to one of my questions, that I was qualified for one of the above-mentioned appointments.

Mr. Anderson sent on the application containing those extracts I have read, and he never said one word about their being incorrect. I assumed that Mr. de la Motte's statements were correct, they having passed through Mr. Anderson's hands, and Mr. Anderson not having contradicted them. With regard to the ten men whose names were marked with blue pencil, if I were Minister again to-morrow under the old system I should not feel myself bound by the recommendation or the blue pencil mark of any official. I should satisfy myself in my own mind that the recommendation was correct. I know from a very long official experience that some of the ablest men in the Public Service were from time to time reported as not being fit for their positions. This was owing to jealousy, and to a desire to get them out of the department. I could mention two cases of my own knowledge in which gentlemen who reached the very highest positions in the Public Service were reported as not being competent for the performance of their duties. So that after my long official experience, the recommendation of an official is to me just like the recommendation of any ordinary individual, and I should pay just about the same attention to the one as I would to the other, if I were satisfied in my own mind that the man whom I was appointing to a public position was qualified by character and by fitness to draw public money.

1425. *Mr. Cann.*] Mr. Dunicliff was recommended by the Hon. John Lackey;—his name was not among those marked with a blue pencil? No. Mr. Dunicliff was in the department. Mr. Wood brought his name under my notice. Not a soul ever spoke to me about Mr. Dunicliff but Mr. Harrie Wood, the Under Secretary. Mr. Wood, if I remember rightly, produced testimonials from Sir John Lackey and other gentlemen, and I was satisfied from these testimonials that Mr. Dunicliff was a fit man to be appointed a temporary inspector of agriculture; and I say now to-day, that if I had cast upon me the duty of appointing an inspector of agriculture, from what I know of Mr. Dunicliff, I would appoint him before any man of the whole thirty-four applicants, except for the sugar district. The man was a stranger to me then, and he is a stranger to me now. I did not know him the other day when he came in to see me.

1426. *Mr. Anderson.*] The application of Mr. de la Motte is addressed to you as Minister for Mines and Agriculture;—is there a single word on it to show that it was passed by me to you? Here is the list sent on to me by Mr. Anderson.

1427. What is the date of it? It was sent on to me by minute on the 11th November, 1891, and among the names is that of Mr. de la Motte. That paper is headed "Applications for the position of Inspector of Agriculture." It is dated 15th September, 1891. The list has three headings, "Name," "Address," "References." I swear positively the application of Mr. de la Motte was sent on by Mr. Anderson, under the name C. de la Motte; address, Bulli Mountain; references, J. Gormly, M.P., Rev. H. W. Taylor, Bulli, F. Woodward, M.P., J. M. Chanter, M.P. And then Mr. Anderson, on the 28th January, nine days after Mr. de la Motte was appointed, objected to his appointment at £300 a year, and recommended that his salary be at the rate of £150 a year, with travelling expenses at 10s. per day. I had made the appointment of this temporary officer at the salary mentioned, and, if he were not worth that, I declined to be a party to the reduction of his salary nine days afterwards. To show that this paper was sent on, I will read the minutes in reference to Mr. de la Motte:—

The Director of Agriculture to the Under Secretary for Mines and Agriculture,—

Department of Agriculture, Sydney, 28 January, 1892.

I wish to draw the Minister's attention to the previous connection with the department of Mr. de la Motte, who has been approved by the Minister as a suitable candidate for the position of inspector of agriculture.

Mr. de la Motte is a Dane by birth, who speaks fair English, and writes tolerably correctly for a foreigner.

He is at present a teacher in the service of the Public Instruction Department, and, as I had occasion to examine him several times, I can testify that his literary and scholastic attainments are of a very poor order. He never succeeded in getting a classification.

Immediately upon assuming my present position I received lengthy communications from Mr. de la Motte, which caused me to inquire into his qualifications as an agriculturist, as I was very much impressed with the learned and scientific nature of his articles. I found that Mr. de la Motte was fond of borrowing from books and pamphlets, and using quotations which he could not explain. He quoted chemical terms and scientific language which were absolutely Greek to him. As, however, he was strongly recommended by gentlemen who had a high opinion of him, the late Minister, on my recommendation, appointed him, with the permission of the Public Instruction Department, to inspect during his holidays some of our experimental wheat plots, and report thereon to the department.

His reports were always very neatly written, very carefully drawn up, and very punctually returned; but they showed no signs of the scientific education, combined with practice, that would be so desirable in an inspector of this department. The Minister, therefore, did not see his way to continue his services beyond the month of probation.

From my experience of Mr. de la Motte, and the opinion of him formed by the practical men whose farms he visited, I am led to conclude that he has much to learn, and still more to unlearn, before he can be worth anything like £300 a year to this department, and win the confidence and respect of our farming community. I therefore recommend—

1. That he be appointed only on three months' probation, so that he may have a chance of getting leave of absence for that period from his present department, and then return if found unsuitable for our work.
2. That his salary be at the rate of £150 a year, with travelling expenses—10s. a day.

I may mention that at present his salary is £96, with a residence.

Then Mr. Wood wrote this minute:—

Submitted. This information should have been supplied by the Director when submitting the applications. These officers are appointed temporarily, and if not competent for the duty can be dispensed with at any time. The salary (£300) fixed by the late Minister is not too high for a competent man.—H.W., 21/9/92.

Then follows my minute:—

I have read, with surprise, Mr. Anderson's minute paper No. 564, dated 28th January, relating to the appointment of Mr. de la Motte as an inspector of agriculture. Mr. Anderson waited until Mr. de la Motte was appointed, and now places before me his objections to him. It was Mr. Anderson's duty to give all information when the papers were forwarded to me for consideration. The objections now taken by the Director, in my opinion, apply against Mr. de la Motte more as a public school teacher than as an inspector of agriculture. I now direct Mr. Anderson's attention to Mr. de la Motte's application, No. 7,349, dated 27th October, 1891, addressed to the Minister, for an appointment as an inspector or experimentalist,

T. M.
Slattery.
7 Oct., 1896.

experimentalist, in which he says, "I beg to state that for a short period during last December it pleased the late Minister of Agriculture to appoint me as acting inspector (*pro tem.*) to inspect and report on certain experimental wheat-plots in the south-western district, and that after my work was finished I had to satisfaction to learn from the Director of Agriculture that my reports were admirably drawn up. I was further told by that gentleman, in reply to one of my questions, that I was qualified for one of the above-mentioned appointments." That letter of Mr. de la Motte's was sent on to me by Mr. Anderson without comment, and I naturally assumed in consequence that Mr. de la Motte's statements were correct. I must believe so still, because even in his minute of the 28th instant Mr. Anderson is absolutely silent respecting same. If Mr. de la Motte's statements are correct, then I may ask what has caused Mr. Anderson now to say the very opposite? It seems to me that Mr. de la Motte is well qualified for the position to which he has been appointed, and I cannot therefore agree with the Director in his recommendation.—T.M.S., 30/1/92.

That is sent back to the Director on the 1st February, 1892, and Mr. Anderson never attempted from that time to the present to send me on a minute to say that those statements were untrue.

Thomas Michael Slattery further examined:—

T. M.
Slattery.
7 Oct., 1896.

1428. *Chairman.*] Do you confirm the evidence given by you on a former occasion, a typewritten copy of which has been supplied to you, and which you now produce? Yes.

1429. Will you continue your evidence from the point where you left off on the last occasion? I think I referred to all the inspectors except Mr. Fitzgerald. He was appointed Inspector of Agricultural Shows, and he was appointed to fill a vacancy. He was very highly recommended. I remember distinctly my then colleague, the Secretary for Lands, Mr. Copeland, recommending him very highly as a competent man. He had been in the service of the South Australian Government, and had lost his appointment through necessary retrenchment. He held very high testimonials in regard to character, and to fitness for the position. If I had to make the same appointment to-morrow morning I would reappoint Mr. Fitzgerald, after all I have known of him. Some objection was taken by Mr. Anderson to the appointment of a registrar for the Agricultural College. A registrar for the College was recommended both by Anderson and Mr. Thompson, the Principal of the College. In the first instance, I appointed a Mr. Louis Guy. It was reported to me, either by Mr. Anderson or Mr. Thompson, that Mr. Guy was not suitable for the appointment, and at the same time Mr. Guy himself declined to take it. I said in a minute, "Mr. Louis Guy, of Enmore, may be appointed to this position, if he will accept it." Mr. Guy did not care about going to live at the College, and he declined the position, although it is only fair to Mr. Anderson and Mr. Thompson to say that they did not think he had the necessary qualification in respect to shorthand writing. He was qualified in every other way as to character, education, and former experience. He had been for many years head clerk and accountant to a firm of produce merchants in the city, who retired from business. I was anxious that the gentleman who was to be registrar of the College should, as far as possible, have the approval of the Principal. Indeed, Mr. Thompson asked in a minute that he might concur in the appointment of the person selected for the position of registrar, and I thought such a request was not unfair, considering the close relationship which would exist between these two gentlemen, both residing in the College building. Then I appointed a gentleman named Mr. O'Sullivan, who was a shorthand-writer, and who was recommended to me as having considerable literary attainments, and as being a man of very high personal character. He was objected to, I think, on the ground that he was too old for the position. I know that Mr. O'Sullivan felt very much hurt at the way in which he was treated, but I had nothing at all to do with any ill-treatment of which he complained. I appointed him, believing him to be perfectly fit for the position, and it was suggested that some younger man should be appointed.

1430. *Mr. Wright.*] Suggested by whom? I think by Mr. Thompson. Then I appointed Mr. G. P. Lush. I cannot call to mind why a minute of this kind is on the papers written by me dated 9th February, 1893: "I think it best to permit Mr. Thompson to choose between Mr. Lush and Mr. MacDonnell." Then Mr. Thompson writes under that, "I will accept the services of Mr. Lush.—J. L. THOMPSON, 15/2/93." That shows that I appointed Mr. Lush, and that he was selected by Mr. Thompson. Mr. Lush was appointed first of all, and it appears that after he had occupied the position for about a year he came to the head office, and a Mr. Baker was appointed to succeed him as registrar. After Mr. Lush had been at the head office for some time, Mr. Baker, in the position of registrar, became a defaulter, and cleared out. Mr. Baker, I think, had been an old official in the Mines Department for many years, and I never saw him in my life. After he went away it became necessary to appoint a fresh registrar, and I was still Minister. I gave Mr. Thompson the same privilege that I had given him in the first instance—the privilege of selecting his own registrar from a number of applicants. Most of the applicants were married men, and for that reason were not considered eligible for the appointment. Eventually the choice of the candidates was reduced to two, Mr. Lush and Mr. MacDonnell, and I left it to Mr. Thompson to select which of the two he would have, and he said he would accept the services of Mr. Lush. Mr. Anderson has quite recently attacked Mr. Lush on the ground of some divorce proceedings. That took place probably two years after I had appointed him. There was an objection raised to the appointment of Mr. Cull. I showed in the cross-examination of Dr. Cobb that a foreign gentleman, with only foreign testimonials, was recommended for an appointment at £100 a year, and I put in a boy, who was recommended by my colleague, the Postmaster-General, who had passed two examinations at the Sydney University, and who had been applicant for six years. I appointed him to this position at £50 a year, and that young man, I understand, has been graded into the Public Instruction Department. In regard to any objection on the part of Dr. Cobb, no objection whatever, either verbally or in writing, as Dr. Cobb himself has sworn, ever came before me in regard to any of the officials against whom he gave evidence the other day. Some of the official papers were missing from the department. It appears that the greater portion of them have since been found. I wish to say that I knew nothing about these papers. I left all the public papers in their proper place. Some exception was also taken to the appointment of Mr. F. W. Hughes. The chemist of the department, Mr. Guthrie, made an application for an assistant or probationer at a salary of £50 per annum. Mr. Hughes had been, so he informed me, an applicant to the Civil Service Board for six or seven years. I knew him personally as a young man of very high character, and I appointed him to this position at £50 a year. Just after he was appointed Mr. Anderson called my attention to the fact that Mr. Hughes was above the statutory age provided by the Civil Service Act, and was not, therefore, eligible for appointment as a probationer. I immediately appointed another person, who was eligible. Years before, Mr. Hughes had passed the examinations necessary to entitle him to obtain an appointment in the Public Service, and

T. M.
Slattery.
7 Oct., 1896.

and because for six years he was an unsuccessful applicant he was excluded on the ground that he was above the age provided by the Act. Mr. Hughes was retired from that position, and at the suggestion of Mr. Anderson was taken on as a temporary clerk. Then I appointed a young man who had passed his examinations at the University, I think his name was Gurney. He was a stranger to me, but he had the necessary qualifications, and I believe he is in the department now. I believe that Mr. Hughes is now in the Public Service. To show that Mr. Hughes was not an incompetent man, I may mention that Mr. Anderson, in a minute of the 13th September, 1892, in reply to Mr. Hughes's application for an increase of salary, said:—

Mr. Hughes was appointed for general clerical work in February. He seems to be very deficient in energy, and has not developed such zeal and intelligence in his work, as I should like to see. He has not endeavoured to make himself proficient in shorthand and typewriting, as I had advised him; but I am inclined to believe that he will make greater efforts to improve his usefulness to the department in the future. He is over 27 years of age, and should therefore be earning more than 5s. a day. If it be considered advisable to give him a slight rise, he might get £2 a week from 1st October, and after three months a further report on his usefulness and progress might be furnished.

In justice to Mr. Hughes, I may state that I know from conversations with him that although he may not have given his attention to learning shorthand and typewriting, he was learning French, and I believe he now speaks the French language very fluently. He was a man of artistic tastes, and of very high personal character, and I believe he is in the Public Service at the present time. In reference to some evidence given by Mr. Price, in which he gave a comparative statement of the expenditure of the department for two years, I may say I never expended a shilling either in the Department of Mines or Agriculture unless it was recommended as necessary by one of the officers in authority. In my administration of the Department of Agriculture, I saved thousands of pounds which, in my judgment, would have been unnecessarily expended in the building of the Agricultural College on the lines recommended before I came into office. Mr. Anderson seemed to throw some doubt on the *bona-fides* of Mr. Harrie Wood as Under Secretary of the Department of Agriculture. Mr. Harrie Wood, as far as I know, did everything that an honorable man could do for the purpose of carrying out the intentions of the founder of the Department of Agriculture, Mr. Sydney Smith. I say this in justice to Mr. Wood, as he is no longer a member of the Civil Service. I never came across a more able and conscientious man, and I do not think there was a Minister or Member of Parliament who would dare to take a liberty with him in connection with the performance of his public duties.

1431. *Mr. Anderson.*] You mentioned that Mr. Fitzgerald, for example, had excellent testimonials for the position, meaning the position of Inspector of Agricultural Shows; were not the testimonials for some other position altogether? In my judgment, Mr. Fitzgerald was recommended for a much higher position than that to which I appointed him. I look upon the appointment of inspector of agricultural shows as one that any man with an ordinary knowledge of sheep and cattle and various agricultural products would be quite capable to fill. I believe Mr. Fitzgerald made an application for the appointment of inspector of stock, and if I had had an opportunity of appointing him as inspector of stock I should have had no hesitation in appointing him. That was a higher and more important position than that of inspector of agricultural shows, and carried nearly double the salary. I appointed Mr. Fitzgerald on excellent recommendations, and I have no reason whatever to regret having made the appointment.

1432. You are aware that for the position of inspector of stock there is a very rigid examination before a Stock Board? Yes; but I know this from my experience, that there are many men in all positions who might pass splendid examinations, and yet be perfectly useless when they came to do practical work. I know men in my own profession who would pass splendid theoretical examinations, but who would not be worth anything at all in practice. I suppose the same thing applies to medical examinations and scientific examinations generally. You might get a man who would pass a magnificent scientific examination (say) for the position of a mining manager, and he might not be worth £1 a week when he came to the practical experience. I do not attach so much importance to examinations as some people do. The very ablest men in the Public Service of this country—men who are known to everyone connected with public life—never passed an examination of any kind whatever. If I had to select a number of clerks for my own private business to-morrow morning I should rather take clerks who had great experience, but who had passed no examinations, than clerks who had passed numerous examinations and had no experience.

1433. You remember that you objected—or you now object—to the appointment of Mr. Hansel because he was a foreigner? I did not object to the appointment of Mr. Hansel as a foreigner. I thought that, as a rule—and my minute shows that—our own young men who had passed examinations at the Sydney University should have the preference. Under the old Civil Service Act it was intended that they should have the preference. This Mr. Hansel I had never seen; he was recommended by Dr. Cobb, who stated that he had no testimonials except foreign testimonials. Dr. Cobb recommended that the appointment should be filled at £100, and I appointed a young man who had passed examinations at the Sydney University, at a salary of £50 a year.

1434. Are you not aware that Mr. Hansel's testimonials show that he has an excellent scientific training in Germany, and could speak English, German, and French well? All I know about him is this: if he was such a wonderful man as his testimonials would show, I think he was throwing his life away trying to get an appointment of £100 a year anywhere. I did not think anything of him or of his recommendations. They were all foreign recommendations; and for a man with all the splendid attainments he said he possessed, I think Europe would be scarcely large enough.

1435. If Dr. Cobb was satisfied that he could do valuable work to help him, he would surely be the best judge, would he not? Dr. Cobb never objected to the young man who was sent to him, as far as I know; he said so the other day; so that if there was any objection it was unknown to me as Minister. I certainly could have no object in sending a youth who was unfit for the work to assist either the pathologist or the chemist, or anyone else; I wished, of course, to send fit persons. In this case I gave the preference to the young Australian as against the Bohemian.

1436. Assuming that you always desired to give the preference to young Australians, why did you wish to appoint Mr. O'Sullivan, who was over 50 years of age, and who had only six weeks before come from California? When I appointed a young man as Registrar of the College I understood someone of more mature age was wanted, and when I appointed a man of more mature age, then one was wanted who was not quite so old, and in this particular instance I allowed Mr. Thompson to select his own man, and he selected Mr. Lush.

T. M.
Slattery.
7 Oct., 1896.

1437. Did I recommend in my minute that we should get a man from inside the Service, if possible, and if not possible, that we should advertise for some suitable young man? If you will show me the minute I shall be able to tell you about it. Whatever recommendation was made I, as Minister, had the patronage of the department, if it was worth anything, and I exercised it, and I am not going to apologise to Mr. Anderson, or anyone else, for having exercised the patronage which the practice of the department conferred upon me. I may say with regard to Mr. O'Sullivan that he was shortly afterwards appointed shorthand and typewriter to Mr. Lingen, the equity barrister, and I believe he does the same work for Mr. A. H. Simpson, the equity barrister, and Mr. Cecil Stephen. That will give an idea of Mr. O'Sullivan's character and ability. The minute I refer to is this:—

I recommend that applications be invited from persons having the necessary qualifications, a person in the Civil Service to have the preference, other things being equal. The Principal considers it indispensable that the Registrar should write shorthand, be a good bookkeeper, and be able to exercise disciplinary power over students.

I can say that all the time I was there I never authorised applications to be called for positions of that description. As I said on the previous day, I was worried quite enough from time to time without calling for applications. It would be an absurdity, in my view, to advertise for applications for a position of this kind at a salary of £150 a year. I suppose I should have had thousands of applications, and we know how, under the old system, a Minister would be importuned on all sides in respect to such an appointment. The only positions I authorised applications for, as far as I remember, were scientific positions. My other minute to which I referred was this:—

As it is difficult to find a suitable man for such a position—one competent to do clerical duties, and also help with the disciplinary work of the college—I recommend that applications be invited, and submitted for Principal's report. Salary to be £150 a year with quarters.

? I look upon such a recommendation as an absurdity. I suppose you would get a thousand men in the city of Sydney, without calling for applications at all, who would be competent to fulfil the duties of Registrar of the College.

1438. Referring to Mr. Wood as Under Secretary for the department, do you not consider that he should have consulted with me before making recommendations about matters vitally affecting the department? I cannot say what took place between Mr. Wood and yourself.

1439. Do you think he should have done so? What I expected from Mr. Wood was that, when it was necessary, he would consult you, in the same way that he would consult any other head of a branch. As far as I know, no papers came before me during the whole time I was Minister which required me to seek a personal interview with Mr. Anderson. I was able to deal with the papers as public documents without personal interviews.

1440. You are aware that you very frequently, in fact always, decided questions about the department against my opinion, and in favour of Mr. Wood? Whenever I decided against your opinion I believed that you were wrong. If I thought you were right I certainly would not decide against you. I was there to do the best I could, and if I decided erroneously, at all events I decided honestly.

1441. However, you never sent for me to find out details or consult me about matters that might seem a little dubious? I may say at once that you appeared to me, in your position of Director of Agriculture, to have a mania for writing minutes—unnecessary minutes. I had an official experience of about thirty years before I became Minister of Mines and Agriculture, and I never saw so many papers sent before a Minister, or a head of a department, over such trumpery matters, as I did during the time you were Director of Agriculture. I was able to deal with all these papers without any personal interview.

1442. *Mr. Wright.*] It was a fact, I suppose, understood by yourself, that considerable friction existed amongst the officers of your department? Yes; it appeared to me that there was some unpleasant feeling between the officers of the department.

1443. Between the heads of the branches and the Under Secretary? Of the Department of Agriculture only.

1444. Did it not affect any other branch? No; as far as I can remember there was not the slightest friction in the Department of Mines.

1445. Was there any friction between the Water Conservation Branch and the Under Secretary? I cannot call that to mind. As far as I know, the Water Conservation Branch was under Mr. Boulton, and I know that Mr. Boulton and Mr. Harrie Wood were always on the most friendly terms.

1446. As a matter of fact there was some little feeling in the office consequent upon a reorganisation which placed Mr. Wood in direct communication with the Minister, and excluded all the other heads of branches? There was; but in that reorganisation I wish to say there was no injustice done to Mr. Anderson.

1447. And, in consequence of that dissatisfaction, it is possible that Mr. Anderson might have felt, from his altered position that he was being slighted? He has stated so.

1448. *Mr. Anderson.*] Talking about friction, are you not aware that Mr. Wood recommended the retirement of Mr. Campbell on a pension? No, I am not; I do not know anything about that. This is the first time I have ever heard of Mr. Campbell having been recommended for removal.

1449. And that he reported him as being unfit to manage his own branch? I never heard of that. Unless I saw papers to that effect I would not believe it. Mr. Campbell is an exceptionally able man. Instead of recommending the retirement of Mr. Campbell, Mr. Wood recommended that he should take the position of head of the Forest Department, and head of the Agricultural Department, under the designation of chief clerk. Mr. Campbell was at that time chief draftsman, drawing, I think, £600 a year, and the duties of chief draftsman were transferred to the chief mining surveyor. That effected a saving in round numbers of £600 a year. Then Mr. Wood recommended that Mr. Campbell should take charge of the Department of Forests and Agriculture under the designation of chief clerk at a salary of £600 a year.

1450. Do you remember a long report I wrote to you about Mr. Campbell—a report on the experimental farm at the Richmond River—in which I gave you a full account of his previous career in the department, and of his attitude towards Mr. Wood? I have no recollection of that paper. I only knew Mr. Campbell officially. Before I became Minister I was not on intimate terms with him; but from my knowledge of Mr. Campbell gained after I went into the department, I have no hesitation in saying that Mr. Campbell is a man whom you could appoint to-morrow to be Curator of the Botanical Gardens, or to any position requiring a knowledge of agriculture or horticulture.

Henry

Henry Charles Lennox Anderson further examined :—

1451. *Chairman.*] Do you wish to make a statement in connection with this case? I should like to make a short summary of the evidence. I may say at once that in giving my evidence before the Royal Commission it never occurred to me for one instant that it would be interpreted as some people have interpreted it. When the question was asked me by Mr. Teece about people being "thrust upon me against my will," I said yes, in the belief that appointments had been made which I would have objected to, and did object to in minutes most strongly; and, therefore, they were against my will, and against, in my opinion, the best interests of the department. Then I went on to explain more minutely. I stated why I thought they were thrust against my will. It will be seen that I gave a very long explanation to show my meaning. With regard to that explanation, I now say on oath that there have been some mistakes made. Judge Forbes paid me two visits. I mention that to show he was very much in earnest in trying to get my good opinion and recommendation. He came on the first occasion, being a perfect stranger to me, presented his card, and said "I know your worthy father." I listened to all he had to say, and I was not impressed. He said, "I have just come from Mr. Slattery, and he says that if you recommend Mr. O'Kelly he will appoint him at once." "Well," I said "of course I must see Mr. O'Kelly; kindly tell him so." He said, "He is down stairs in the Stock Branch, and I will tell him to see you." Sometime afterwards, I think about two weeks, he came in with Mr. O'Kelly, as Mr. Reynolds has testified. Mr. Reynolds remembered him and knew him well. He then introduced Mr. O'Kelly, and I saw at once that though a gentleman in the usual sense of the term he was not one that would suit our requirements. When he went out of the room, I said "Judge Forbes I am very sorry, but he is not the stamp of man who would get on well with our rough, common, farmers; they do not like stand-up collars and tanned boots." I said "He has not had the practical experience, and he has not had the scientific training to make him an expert. We want an expert." He argued a little, then he got very much annoyed, and flounced out of the room, saying, "Oh, I see you are not friendly, I shall have to manage it some other way or without your help,"—something to that effect. I felt a good deal put out at the time, for I had never had such an experience in my official career. When a short while afterwards I was informed that this gentleman had been appointed I can assure you I was struck dumb. I felt it very keenly indeed, because I had never been consulted, never asked as to my opinion about this gentleman, and that was the first time such a thing had occurred in my official career. I have produced evidence, I think sufficient to show, and if necessary it can be endorsed, that Mr. Sydney Smith, as Minister, took an enormous amount of trouble about the appointment of the first officers, and justly so. He made me write to America to get Dr. Cobb's character. This gentleman's degrees showed that he was an excellent man. He was acting Professor of Biology at the University, which was of course a sufficient testimonial. But Mr. Smith made me write to some people in America whom he had mentioned, to see if he had a good record in character, because we could not quite understand why he was in Sydney on scientific work. Mr. Smith did that in the case of each of the scientific staff. I was sent personally to interview people to find out all the details about their personal character. The Minister said to me frequently, "Mr. Anderson, we must have a first-class little staff, that will do splendid work," and I can honestly say now that we had a first-class staff, that did magnificent work in their respective lines. I show you, Mr. Chairman, the functions of the Department of Agriculture, which were drawn up by me the first day I was appointed, and on which I based my system. It has never been departed from since. They have never got outside of it yet, and it will take years to get outside those functions. To show that I was earnest and sincere in my intentions, I will read No. 9 of those functions, showing that Mr. Sydney Smith approved of district inspectors and other experts being appointed. Afterwards, in the course of our work, we divided the Colony into four agricultural districts, which were recognised in the department. The 9th function to which I have just referred is as follows :—

The district inspectors and other experts under this department shall be expected to meet the farmers in conference as much as possible, and give lectures in connection with the Technical Branch of the Public Instruction Department whenever practicable on the subjects of special interest in the different districts.

That shows clearly that one of the functions of the department was to have district inspectors, and in my minute to the Minister, asking for the appointment of some men when the time was ripe, as I thought, I specified what sort of men I thought ought to be appointed. This was addressed on the 13th August, 1891, to Mr. Smith, as Minister :—

There is a very large demand at present for lectures in all parts of the Colony, and especially for advice on matters of practical importance for individuals. Mr. Despeissis's lectures are evidently appreciated, since the districts which have already had him are asking for repeated visits from him.

At the present time we have made arrangements for the Clarence River (three centres), Macleay River (two centres), Manning River (two centres), Port Macquarie (two centres), Albury, Molong, Cowra, Parkes, Wollongong, and many other places which are just as anxious to get the services of a competent lecturer.

Besides lecturing, an intelligent and competent man can do the department an immense service by making notes of the agricultural capabilities of each district he visits, by bringing the farming community into touch with the department, by compiling statistics for an agricultural map, reporting for the Minister's information on the state of agriculture in different parts of the Colony, and by taking notes for the scientific staff as to diseases, progress of crops, and many other points of interest. It will be a difficult matter to get the exact man we want, and probably it will be found necessary to get well-educated men from the best agricultural colleges at Home. I recommend that applications be invited from persons competent to fulfil the duties of inspector of agriculture.

Upon this minute Mr. Smith wrote :—

Applications may be invited for the position of inspector of agriculture, at a salary of £300 per annum.

In pursuance of that policy, in 1891, I submitted the estimates to Mr. Sydney Smith, showing the total cost of all agencies suggested as worth starting during the next two years." In that you see, under the head of Scientific Staff, "Inspector, at £350; Inspector, £300; Inspector, £250; Inspector, £200." Following out the policy, I divided the Colony into four districts, having one inspector for each district.

1452. *Mr. Cann.*] Did you intend that the four inspectors, whose appointment you recommended, should be in addition to those already in the department? I had only one in the department at that time, Mr. Despeissis. Afterwards the title of inspector was taken from him, and he was called viticulturist, because he was particularly an expert in viticulture.

1453. Did you intend that the four whom you recommended should be additional appointments? Yes, additional to Mr. Despeissis. Mr. Sydney Smith in that year went over these estimates with me very carefully, and said, "We cannot appoint more than one at present, but we will get them by degrees." He

was

H. C. L.
Anderson.

H. C. L.
Anderson.
7 Oct., 1896.

was exceedingly cautious in his ways, and I can see now in the light of subsequent events very justly so. At the time, I thought he was rather too cautious. He therefore said, "We shall appoint one." We invited applications, and he did not think that any one of the applicants was quite good enough. The one he picked out was one who was not included in the ten I thought "very fair." He was a man whom Mr. Smith knew personally, as a practical farmer, but whom I had never seen, as he had not come to Sydney to present his testimonials. In the following Estimates, then approved by the Minister for presentation to the Cabinet, the inspectors were all struck out, and, therefore, the matter did not give me any more immediate concern. In my answers to questions 7256 and 7257, in the evidence given before the Civil Service Commission, I went out of my way to make things very clear. Mr. Tecce asked, "And they were not required." I said, "No; because they were not agricultural experts." They were required if they had been trained scientific men. Then I went on to say, "I could not find work for them." You have heard evidence given here that some of the men were so incompetent, and unacceptable to the farmers that we had to use them the best way we could at head-quarters. I may be asked why did I not get rid of them. I reported one of those men on three occasions for most serious offences.

1454. *Mr. Slattery.*] Who was that? Mr. de la Motte. Then the next question I was asked was, "Then men were appointed in the Public Service who were not required." To which I replied, "Certainly." If they had been good men they would have been very valuable, and would have done most necessary work. I went on to say, "I could have done magnificent work for the Colony with highly-trained practical men, men trained in an Agricultural College, with expert knowledge in their respective lines. But the five men were all appointed on the recommendation of political friends—always irresponsible, and often incompetent to judge of the candidate's qualifications." I purposely gave this explanation to show that I did not wish to hint that the men had been "crammed" into the Service. The word "crammed" I never heard used in connection with the matter until it was used in this Committee. I would take the word "crammed" to mean that men were put into the department, for whom work could not be found, and who would be unnecessary in the Service. I said in my evidence that they were necessary, and they would have been very valuable had they been thoroughly good men. I have given evidence here about the conduct of one officer who was reported to me for being drunk. I give the facts again. I wanted Mr. Price to be examined on this point yesterday, but the Chairman told me that the statement would be just as good coming from myself. Mr. Price was the officer who reported the man to me. He came to me and reported that Mr. de la Motte was upstairs in his room lying across the table incapable from drink. I was going to Albury by the quarter past 5 train, and it was then a quarter to 5. I said, "You had better ask him to see me." He summoned him to see me, and I saw at once that the man was speechless, and after smelling his breath, and trying to get him to answer a few questions, I could see that to all appearances he was drunk. At the same time Mr. Despeissis came into the room, and I thereupon directed that the matter should be reported. I went away to Albury, and when I came back Mr. de la Motte was called upon for an explanation. He went away to Bulli, where his family resided, and he did not come near the department for eighteen days—from the 28th October to the 15th November. Mrs. de la Motte sent a certificate on the 30th October, from Dr. Kane, of Bulli, that her husband was "suffering from fatty degeneration of the heart, which at any moment might prove fatal," and I was asked by her "not to bring the contents of this immediately under the notice of her husband." Mr. de la Motte replied to my charge on the 7th November, pleading that he had taken fifteen drops of a drug in brandy three times on the day in question, "as he was suffering from heart disease." You notice this explanation. I say at once that I know Mr. Slattery could not have read over all this evidence, or he, as a lawyer, could not have approved of the Under Secretary's minute passing over such conduct. I relieve him of all responsibility on that head. It was done by someone else who could not have looked at the matter logically and without prejudice. This man's explanation was deemed satisfactory by the Under Secretary, and approved by Mr. Slattery; and nothing further was done. Then I wrote to Dr. Kane on the 14th November, and again, on the 4th January, asking how far this disease would unfit Mr. de la Motte for his duties. He replied on the 18th January, 1893, "that Mr. de la Motte had had a very severe attack of gastric catarrh. "The certificate fatty degeneration was not intended for your department, and was sent to you in error. In my opinion he is in no way suffering from anything likely to render him unfit for the performance of his duties." I then had Mr. de la Motte sent to the Board of Health for examination, and Dr. Paton certified, "He has no physical signs of heart disease." My witnesses were never asked for their evidence, but they could have shown that a cab was standing outside the door waiting till 10 o'clock that night, five hours, and that the cabman came next day and demanded to be paid for the five hours. They could have shown the condition in which Mr. de la Motte was. All these papers referred to were sent on to the Under Secretary, but no further action was taken on them. No evidence was asked from my witnesses, but the explanation of Mr. de la Motte was taken, and of course a most severe snub to me as Director of Agriculture was the result. I only mention this to show that it was practically impossible for me to shift a man when he had been appointed, although his appointment was only temporary. Mr. de la Motte was also charged by responsible officers, who reported it to me, with taking travelling expenses twice illegally. The facts are clearly shown in the papers. I sent for him, and cross-examined him most severely. He affirmed stoutly that his diary was correct. Each officer had to keep a diary showing where he went to every day of the week, what duty he was on. I made him produce his diary, and he asserted strongly that it was correct. His diary showed in one case that he had left Sydney on the 24th August, and was in Albury on the 25th and 26th, but the evidence showed that he was seen in Sydney on the 25th August, and did not go away until that evening. I therefore reported this, and he was reprimanded, but not compelled to refund the money. Another case of charging travelling expenses was also reported against him a few weeks after the first offence, the facts of which are given very fully in the evidence. He was simply advised to be more careful, and the remark offered by the Under Secretary was that he could not believe that Mr. de la Motte intended to be dishonest. This was after my full inquiry into the matter, when I had cross-examined Mr. de la Motte to see if he could explain the matter in any way; but he stuck to his story, and swore to me that he had gone away, as his diary indicated, and was charging travelling expenses accordingly. We had to send to the Railway Department to prove that he did not use his sleeping-berth ticket on the night when he said he went away. This had a most serious effect on the discipline of the department, and I now say most solemnly that my influence was so undermined that I could not at last keep discipline in the department. I found that men went behind my back to the Under Secretary, and I had no effective control

H. C. L.
Anderson.
7 Oct., 1896.

control over the department. This was shown by a man actually assaulting the chief clerk at the time, because the chief clerk said to him, "Your diary contains a lie." Well, the diary did contain a lie, as was proved clearly. The man said in his diary that he was at the office on a certain day, when it was proved he was not at the office, and because the chief clerk found fault with him, and spoke in that way, he assaulted the chief clerk, the officer next to myself in the administrative work.

1455. *Chairman.*] Whom do you blame, or wish to blame, for ignoring you? The Under Secretary. I have said over and over again, and I now put it on public record, that Mr. Slattery treated me with the greatest courtesy and kindness. But unfortunately he did not think fit to hold the scales up between us two and decide who was wrong; he always took the part of the Under Secretary. I was humiliated and insulted, until at last it was absolutely painful for me to go to my office to do my work—I did not know what humiliation was coming on me next. I have produced evidence here that I never in the history of the department reported a man or took any action except at the instigation of a responsible officer who had brought the matter under my notice. We all know how painful it is for the head of a department to have these things to do. With regard to the evidence about Mr. O'Kelly, I tried to be as fair as I possibly could, and I think I summed up his character very fairly and honorably. From newspaper cuttings I had seen, and from letters I had received from competent practical men, I found my own first opinion corroborated—that he was in no sense an expert. We, therefore, had to send our pathologist up to the Clarence River to investigate on the ground—a thing that ought to have been done by Mr. O'Kelly if he had been competent. But he improved. He worked hard, and improved in usefulness, and I believe would have made a very good officer. My comments referred merely to the method of his appointment. Mr. Hooke's case is the one I referred to in my evidence in chief. Mr. Hooke went away to Cootamundra. He was there drunk for about five weeks, and he was allowed to resign, and on my report I was censured for taking on myself the suspension of a drunken man. It was not, as Mr. Wood said, for going away without leave, for I am positive that I reported to the Minister my intention of going to Cootamundra on this investigation, as being a most urgent matter. I think I ought to explain my attitude with regard to Mr. Dunicliff. I saw his farm, with the view of purchasing it, in the year 1885, so that I know far more about his farm than anyone of those who have testified regarding it. I found that there were not 10 acres under cultivation by the plough; that the scrub had been cut down; that grass seeds had been sown, and there was good pasture there, and beautiful fertile soil. Shortly after that he left the farm, and it was offered for sale. I found the price was far too high, and I did not buy it. But I visited it again several times afterwards, and I now swear on oath that there was never an area of 10 acres on that farm free from stumps and trees which could be cultivated in one block with the plough for any crop.

1456. You say "free from stumps and trees"? I mean properly cleared for cultivation by the plough.

1457. Is it not customary very often throughout the country to cultivate land without taking out the stumps or dead trees? True; but you never see a model farm managed that way. It was said that this was a model farm, and that Mr. Dunicliff cultivated seed wheats. If you have stumps you have weeds, and if you have weeds you cannot get pure, clean seeds. The other part of the farm was pasture in amongst living and dead timber—anything but a model or thriving farm. There was not more than 10 acres under cultivation, and they were little plots of cultivation that were merely experimental. After hearing the evidence of Mr. Dunicliff before this Committee, I wrote to the men who had given me their opinions, as Director of Agriculture, about his value. I wrote to Mr. D. L. Dymock, a large dairy farmer in the Jamberoo district. He is chairman of the South Coast and West Camden Dairy Company, he is Examiner in Dairying at the Agricultural College, and he is the man who introduced the separator into New South Wales, so that he is regarded as the father of the dairying industry on the South Coast. On the 29th September, 1896, he wrote to me as follows:—

My dear Mr. Anderson,

Your letter came duly, and I was away from home or would have answered it at once. *Re* Mr. Dunicliff's appointment as inspector under the Agricultural Department, I considered the same as one which was in the interests of our most valuable branch of the country's prosperity, viz., agriculture, a most unfortunate one. I have known Mr. Dunicliff's farm at Burrawang for years, and he had only a small portion cleared. He was for years experimenting with potatoes in patches only, and they were of no practical utility. As to being a practical dairyman, I never heard of him in all his surroundings but as a visionary man, and his own want of bringing things to a successful issue was looked upon more as owing to a want of practical knowledge than anything else. He may have had the usual difficulties of a new place to face, but certainly his own experience did not justify his appointment to such an important position. Such was the general opinion of those who were able to judge. Mr. Hayter, of Burrawang, Mr. Seery, and Mr. Hindmarsh, know as much as anyone as to his qualifications.

1458. Was there not some evidence given about a quarrel between Mr. Dymock and Mr. Dunicliff? There was and Mr. Dymock informed me, which may be taken as a probable reason that he had most unfortunate monetary transactions with Mr. Dunicliff. I wrote next to Mr. Throsby, President of the Moss Vale Agricultural Society, who had come to my office in company with Mr. Seery, President of the Burrawang Agricultural Association, when both of these gentlemen assured me in company that it would be useless to send Mr. Dunicliff to districts where he was known, as the farmers had no faith in him as a practical man, and would certainly not go to hear him lecture, and Mr. Throsby said, "I myself would certainly decline to preside at any such meeting." This was in response to a letter I had sent to Mr. Throsby, suggesting that Mr. Dunicliff should be sent to his district to lecture, in reply to an application from him for the services of a lecturer on dairying. In his letter, dated 29th September, 1896, Mr. Throsby says:—

Dear Mr. Anderson,

In response to your request, I give you my opinion for what it is worth:—(1.) Mr. D., when residing at Burrawang was not, so far as I know, recognised as an expert in dairy farming; nor do I think that the farmers of this district considered him at that time (whatever he may be now) more qualified than themselves to farm practically and successfully. (2.) When asked by you, as Director of Agriculture, whether, in my opinion, it would be expedient to send Mr. D. to this district to lecture, and to instruct the farmers, I certainly gave my opinion emphatically in the negative. As to holding the model farm and being most successful, facts are weightier than assertions. Neither Mr. D., nor any other farmer in the Burrawang district, cultivated 120 acres in one year of wheat, potatoes, &c., although the " &c." might include grass sown after fire in felled brush; but this can hardly be classed as farmed land."

That is from a gentleman who lives within a few miles of the place; I do not go to hotel-keepers and clergymen for testimonials as to farming. In 1891, when Mr. Dunicliff was in the department, Mr. Sydney Smith advertised for a dairy expert to go out in charge of the travelling dairy, with a salary of

H. C. L. Anderson. £5 a week. Mr. Dunnicliff, who now poses as a dairy expert, did not apply for the position, though he was in the department, receiving only 50s. a week. Mr. M'Caffrey was appointed. I may say that Mr. M'Caffrey is inspecting a property of Sir Patrick Jennings, with the view of starting dairy operations on the Darling Downs, in Queensland. He offered to come and give evidence, at his own expense, from Queensland, but I would not allow it, because I did not think it was worth while. As a matter of fact, Mr. M'Caffrey was the dairy expert of the department. He was born on a dairy farm in Jamberoo, and lived there all his life. He was manager of a butter factory when he was appointed by Mr. Smith to the position just referred to. In answer to a letter of mine, he writes on the 17th September, 1896, as follows:—

7 Oct., 1896.

Although I had every opportunity of being acquainted with Mr. Dunnicliff's reputation as a farmer, I never once heard his name mentioned as being associated with any branch of the dairying industry prior to his entering the Department of Agriculture, and it was not for some time after he had been in the Service that I was surprised to learn that he assumed to know a little about the science of dairy-farming.

Therefore, from evidence which I got from competent dairy-farmers in the country districts, from opinions voluntarily given by these people, from my own knowledge of his farm, which I had visited three times, and from my experience of Mr. Dunnicliff, who was twenty-two months in my department, under my immediate control, I formed the opinion that he was not competent to instruct our dairy-farmers, or other farmers, how to farm successfully, and I certainly protested, as a man, the instant I could against his appointment. I recommended that he should be taken on probation for three months at £200 a year, and it is rather significant that, in the reorganisation of the department by Mr. Wood himself, he was classed as a clerk, and lost the title of inspector of agriculture, and he got £200 a year, the salary which I had recommended more than a year before. In the reorganisation by the Public Service Board he is still classed as a clerk, and gets the same salary.

1459. He is classed as a clerk, but still he is an inspector? No; he goes out and distributes free seed, I believe. In my evidence before the Royal Commission, I was asked, Question 7294:—

During the time you were in the Agricultural Department were there many other cases of persons being put in your department against your will, or were the ones you mention the only cases that occurred? There were many other cases.

I intended that to mean, if it had been amplified, that there were many other cases similar to the ones I had already adduced. In those I most clearly showed what I meant by persons being placed in the department against my will. I have never hinted that these men were crammed into the Service unnecessarily. My own language is quite explicit—that they were necessary, but the wrong men were appointed. That is a matter of opinion. I think now that Mr. Slattery would have been wiser if he had consulted myself, Dr. Cobb, Mr. Guthrie, Mr. Turner, Mr. Thompson, or any of the experts and scientific men in the department before making appointments.

1460. Do you not think that if the Minister consults the Under Secretary, it is the duty of the Under Secretary to consult those other officers, and boil down the whole of the case in a report to his Minister? Perhaps that would have been more official, but the Under Secretary never consulted me about any appointments, or any matter vitally affecting the welfare of the department. When I had the honor of waiting on Mr. Slattery shortly after his taking office, he told me that my position in the department was officially incorrect—those were his exact words. I argued with him respectfully from my own point of view, pointing out his dual office of Minister for Mines and Agriculture, and, therefore, arguing the necessity of two departmental heads. He said, "I cannot help it, everything must go through the one official channel." But I said, "Who will be head of the department, Mr. Slattery?—that is the point that concerns me." He said, "You, of course." He said, "Who is head of the Stock Department but Mr. Bruce? Who is head of the Police Department but Mr. Fosbery?" He said, "Of course, you are the head of the department," and he said, "Old fellow, I promise you I will never do anything of importance in that department without consulting you." He was so kindly and friendly in every way that I said, "Well, Mr. Slattery, if I am practically the head I do not care a farthing who is called Under Secretary; but I certainly want to control the fortunes of the department with which my good name is concerned, and which I joined, I hope, for my whole official life." Mr. Slattery never sent for me once during the whole time he was Minister and I was Director to consult with him. I felt frequently that grave mistakes were being made. I protested in a manly way when I thought that protest was demanded. I could see that Mr. Slattery was annoyed, and I stopped altogether that policy of protesting. But I can say now conscientiously that the course then pursued caused the department to be very severely criticised in Parliament and in the press, whereas before the year 1892 I cannot find an instance of a severe criticism in the House or in the press of the country. I think I need say nothing more. I never dreamt that my evidence could be construed as meaning that the Service was packed or crammed. The word was not used, nor was the meaning implied so far as I can understand English. But I meant to imply that appointments were made politically—that is, by influence outside the department. I was strongly opposed to that. I believed it would ruin my own young department, and I gave evidence hoping that there might be devised some scheme in the wisdom of Parliament that would obviate that kind of patronage and that kind of appointments, and that the Public Service as a whole would reap the benefit. I disclaim the remotest idea of impugning Mr. Slattery's honor as a Minister, or of insinuating that he appointed men to positions which were not necessary. I have said before, and I say again, that he made bad appointments, and I think on the advice of men who were not competent to express an opinion. When a gentleman recommends a lad for a purely clerical position, it seems to me bad policy to appoint that young fellow to be an assistant to the pathologist or assistant to the chemist, as Mr. Slattery did. He should have been appointed clerk in a straightforward proper way.

1461. Can you point to any particular case showing that appointments were made through "political friends"—you used that expression once or twice? Yes, a great number. For example, there is Cull's appointment. You will find that he was appointed on the recommendation of Mr. Kidd, Postmaster-General, who recommended his application as a clerk.

1461½. *Mr. Hogue.*] Was he not brought in for the purpose of being trained by the pathologist? The pathologist had not time to train a boy to wash bottles; he wanted a young man who could use a microscope.

1462. *Chairman.*] Was he not brought in as a cadet? As a probationer. I would just like to say one word

word in regard to this. It has been inferred that I should have sent on Mr. Dunnicliff's application, made in 1890, to the Minister. We have here applications from this young man Cull for positions in the Mines Department, made in 1892, 1893, and 1894, which were never sent on to the Minister by the Under Secretary, to whom they are addressed, because there was no vacancy. It is marked in red ink by some clerk on the margin of the application "No vacancy." It would have been absurd for me to worry the Minister with an application from Mr. Dunnicliff in 1890 when I knew there was no vacancy. I was following, you see, the precedent of the Under Secretary in this matter.

H. C. L.
Anderson.
7 Oct., 1896.

1463. Did you not communicate with the Under Secretary? I did not communicate with the Under Secretary at that time at all; I communicated with the Minister. Mr. Slattery thinks that I should have sent on Mr. Dunnicliff's application to the Minister. I am now showing that Mr. Wood did not send on to the Minister three or four applications from this young man. They were never seen by the Minister until there was a vacancy, and even then the Minister had to send for the previous applications. 1464. *Mr. Hogue.*] In your answer to Question 7257, before the Royal Commission, you said, "But the five men were all appointed on the recommendation of political friends";—who were the five, and who were the political friends, who recommended them? I might here say that I understand by political influence, influence outside the departmental influence. The names of the five men alluded to are Mr. O'Kelly, Mr. Macklin, Mr. de La Motte, Mr. Dunnicliff, and Mr. Hooke.

1465. Who recommended Mr. O'Kelly? He had no recommendation attached to his papers except one from Mr. Mosely, which, as it was of a prior date (April, 1891), must have had reference to some other appointment.

1466. Who recommended Mr. Macklin? He was recommended by Mr. O. O. Dangar, M.P.

1467. *Mr. Slattery.*] And his name was marked by you in blue pencil as indicating that he was fairly qualified? Yes; marked by a blue pencil as having "very fair qualifications."

1468. *Mr. Hogue.*] Who recommended Mr. de La Motte? He was recommended by Mr. Chanter, M.P., in four letters.

1469. *Mr. Cann.*] Had he any other recommendations? I think he was recommended by the Rev. Mr. Taylor, of Bulli.

1470. *Mr. Hogue.*] Who recommended Mr. Dunnicliff? I believe the Hon. John Lackey, and some seedsmen—Anderson & Co. His testimonials are with the papers.

1471. Now we come to Mr. Hooke? He was recommended by Mr. Harry Levien, M.P.

1472. *Chairman.*] Anyone else? I do not remember others; it was Mr. Levien who interviewed me and interviewed the Minister about him, and afterwards came about his drunkenness and likelihood of being dismissed.

1473. *Mr. Slattery.*] Mr. Macklin and Mr. Hooke were among the ten whom you marked with blue pencil as being fairly well qualified for the position of inspector of agriculture? I thought them to have very fair qualifications.

Henry Charles Lennox Anderson further examined:—

1474. *Chairman.*] Do you confirm the evidence given by you on a former occasion, a type-written copy of which has been supplied to you, and which you now produce? Yes.

1475. I understand you wish to make some additions to your previous evidence? Yes; in reference to the early part of my evidence given at the last meeting, in which I referred to Mr. O'Kelly, I desire to add this:—To show the roundabout way in which things were managed, I quote a letter from Mr. O'Kelly to the Minister, February 15th, 1892:—

H. C. L.
Anderson.
7 Oct., 1896.

You told me that Mr. O'Kelly had been appointed from the 19th of last month, as inspector of agriculture under that department. Will he be able to draw last month's pay this month, or will it be added to this month's pay on the 1st of next month? An answer will oblige.

Previous to this the Under Secretary had approved of Mr. O'Kelly being paid as inspector from the date on which he entered on duty, February 1st, but after that the question was reopened and Mr. O'Kelly was paid from January 19th. To show that the positions of inspectors were approved by the Minister, as I said in my evidence, I quote the exact words of Mr. Sydney Smith's own minute on the objects of the department, with his own corrections in his own writing:—

Experimental Farm.

It has been found necessary in France to appoint experts as inspectors of agriculture, whose duties shall be to visit all regions of agricultural activity and report on all matters of interest in their special domain, *e.g.*, an expert in Viticulture would inspect all vineyards in the Colony, report on defective methods of cultivation, signs of disease, and any defects that might concern the general welfare, and advise accordingly. Such an officer would have special facilities for compiling all statistics of vinegrowing and wine-making, and would be advisor to the Minister and to the viticulturists of the Colony. Each of the other district inspectors would be an expert in the branch or branches of agriculture special to his district, and would become invaluable as lecturer and demonstrator to the College at his own district or regional experimental farm.

1476. This was really a recommendation made by you to Mr. S. Smith? And approved by him and presented to the Cabinet as the basis of operations. There is a reference in Mr. Slattery's evidence to a remark I made before the C.S. Com.—"I never heard anything more about it." I used these words meaning, as the words surely indicate, that I was not consulted any further about the matter of appointments, after Mr. Smith had said that the matter should stand over till the Estimates were framed. The Estimates for 1892, as drawn up by me, and approved after alterations by Mr. Smith, were not submitted to Parliament, as the Government went out in October, 1891, and the new Estimates, passed early in 1892 by the new Government, were never seen by me, having been framed by the Under Secretary. My minute of November 12th, 1891, reporting the sugar-cane disease in the north, was submitted to Mr. Slattery in the course of my duty, and in it I naturally recited what previous steps had been taken to secure experts, and submitted all previous papers, most certainly without again reading them or examining them. With regard to the application of Mr. de La Motte, which Mr. Slattery quoted, I here point out that this letter, in which he asserted that I assured him he was "qualified for one of the positions," is one dated October 27th, 1891, addressed to the Minister himself, forwarded by the member for the district, and certainly never passed through me, nor minuted by me in any way. It is not his original application received before September 15th which was the only one that could possibly have been read by me. Probably, I never even read that one, as Mr. de La Motte was well known to the Minister (Mr.

H. C. L.
Anderson.

7 Oct., 1896.

(Mr. Smith) and myself, and was certainly deemed ineligible for that special position. I wrote to Rev. Mr. Taylor, who had recommended him, in February, 1891:—

I recognise his good qualities, but have certainly not been able to find in him the capacity that is wanted for any position now vacant. I believe he would be a useful man, but certainly he would have to start in a much humbler sphere than any he is now seeking.

I asked Mr. Taylor to inform Mr. de la Motte of my opinion. I wish to read a short extract from my report on the department for the year 1892. I wish to show that in my first annual report, after the inspectors were appointed, I gave my opinion of their value, so that it is not a thing I am saying now for the first time. This is what I wrote on the 8th May, 1893:—

In January last year, the Minister appointed five temporary inspectors of agriculture, and one inspector of agricultural shows. The appointment of one of the former was cancelled within ten days, for sufficient reasons. The other four inspectors, Messrs. E. de P. O'Kelly, G. E. Hooke, A. A. Dunicliff, and C. de la Motte, were entrusted with the duty of educating the farmers of this Colony in the different subjects allotted to each. Mr. Hooke was allowed to resign in May, and his place was filled by the appointment of Mr. A. Bruce Suttor.

I regret to report that, in this particular line of work our department has not been successful. I have devoted considerable attention to the duty of sending these inspectors to every part of the Colony where their services could be found useful, but there has never been one application in the department for the services of any of these gentlemen, and only in one case has a second visit been requested. Whatever the reason may be, the idea has not found favour with the practical farmers of New South Wales, and the experience of the past year convinces me that no officer of the department should be sent to instruct our farming population unless he is in the proper sense of the word an expert in one or other of the branches of agriculture. The farmers will listen with respect to a man who is able to teach them in any line, whether it be in the practical work of the farm, the chemistry of agriculture, the diseases of plants, insect life, or the treatment of the soil; but he will not listen to any man whom he rightly or wrongly imagines to be a theorist, or a man who cannot practice what he preaches.

I am of opinion that the services of some of the inspectors might be profitably utilised in conducting experiments on experimental stations, where they would have an opportunity of showing their qualifications, of practically educating our farmers and of convincing them that they are capable of acting as agricultural instructors.

As I addressed the Minister immediately after their temporary appointment regarding two of these officers with whose qualifications and previous history in the Public Service I had sufficient acquaintance to enable me to form a judgment as to their probable value in this department, I shall after a year's experience of their work content myself with expressing the opinion that they might with advantage to the reputation and usefulness of this department, and with a saving to the public funds, be relegated to their former offices with less than half the salaries now received.

1477. *Chairman.*] You are aware that officers were retrenched for certain reasons of economy after that report was written? Yes; some of them were.

1478. You do not know whether it was on account of that report of yours or not? No. Then with regard to the inspector of shows my report was as follows:—

Mr. J. J. Fitzgerald has visited about thirty of the shows held during 1892, and has furnished reports on the same, which have been generally too meagre and superficial to be of much use either to the Societies or to the department.

I should be glad to see this important work entrusted to an officer of high intelligence and with special knowledge of the duties required. He should have practical acquaintance with the interior working of Agricultural Societies; should be able to examine their books and analyse their balance-sheets, and should be strong enough to advise the Minister, and to inspire the Societies with respect.

With judicious rules for the Committee's guidance, and an able, zealous, and fearless officer to co-operate with the Committees, to see that the rules are carried out, and to represent the department at shows, the whole of the surviving Societies might be made as useful and as educational as the best of them now are.

1479. This was a report written a considerable time after the appointments were made? That was the first annual report. It was never published by the Under Secretary, nor made a Parliamentary paper.

1480. *Mr. Wright.*] Do you know, of your own knowledge, whether that document ever came before the Minister? No; I cannot possibly say that.

1481. *Mr. Slattery.*] Do you not know that Mr. Sydney Smith has asserted over and over again that he never agreed to appoint more than one inspector of agriculture? No; I never heard of such a thing.

1482. If you hear it now it is quite news to you? Yes. I have produced plenty of evidence to show that Mr. Smith approved of the basis of the department, which provided for a district inspector for each of the four districts of the Colony.

1483. *Chairman.*] Further than that, has it not been given in evidence that Mr. Smith only agreed at that time to appoint one? I have given that evidence myself.

1484. *Mr. Slattery.*] When you were before the Royal Commission, and when you were trying to explain the words, "I never heard anything more about it," did you in the minute you sent on on the 11th of November, 1891, recommending this appointment, say one word before the Commission that you had recommended the appointment of these men;—did you tell the Commission that you had resubmitted the applications to me, and that you said, "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed; the officers are very much needed";—did you tell the Commission that? No. That could not possibly be implied by my words, "that I had never heard anything more about it."

1485. That is your statement to-day, after full consideration? That is my interpretation of the English words I used.

1486. But I put quite a different interpretation on the remark? Yes.

1487. And, critically analysed, would it not bear my interpretation? Certainly not.

1488. That you never heard anything more about it? No; I take that to mean that I had not heard—not that I had not written a minute.

1489. In your evidence you said, "We thereupon advertised for an inspector, and got twenty-six applications, only one of which was good enough to please the Minister, who therefore postponed the matter and made no appointment, nor did he make any provision on the Estimates then being framed." And then you said, "I never heard anything more about it"—that was in October, 1891;—don't you see that that was untrue—that you did hear more about it, because you sent on a minute on the 11th November, 1890, stating that four inspectors were required, that Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed;—did you tell the Commission a word about that? I heard absolutely nothing about my minute.

1490. Speaking about October, 1891, when you said "I never heard anything more about it," did you tell the Commission that you had sent on a minute on the 11th November, 1891, stating that "Mr. Smith approved of four being appointed, but deferred the selection until the Estimates were framed. The officers are very much needed." Did you do that? No, I did not. I had not the records of the department in front of me for reference, and I was speaking only from memory, and on a subject on which

which I had not been warned that I would be examined, and on which I had no conception that I would be examined. H. C. L. Anderson.

1491. If that is the case, why did you not ask for permission to have the departmental papers, and to be examined on another day? I did so. 7 Oct., 1896.

1492. There and then? No; immediately afterwards. I offered supplementary evidence to explain anything I thought needed explanation, but the Commission decided that they would have no more evidence.

1493. Did you tell the Commission that on the 12th January, 1891, you sent on another minute to me, in which you said:

I would respectfully impress upon the Minister the necessity of appointing some men of good practical and scientific training. Applications received in response to an advertisement have been submitted.

Did you tell the Commission that? No; such a thing was probably completely out of my memory. I was only speaking from recollection.

1494. Did you tell the Commission that there were thirty-four applications for the appointment of inspector of agriculture, and that you had marked with blue pencil ten of the names and said, "The men whose names I have marked with a blue cross have one and all very fair qualifications for the position";—did you do that? No; I did not. To show that my memory was imperfect, I made mistakes about the numbers. I thought from my recollection that only twenty-six applications had been received. That indicates that I was speaking only from memory, and, of course, my memory was not perfectly accurate. It does not affect the question at issue.

Edward Arthur Clifton Wainwright called in, sworn, and examined:—

1495. *Mr. Slattery.*] I believe you are a record clerk in the Department of Agriculture? Yes. E. A. C. Wainwright.

1496. In reference to some evidence given yesterday by Mr. Reynolds, regarding the number of papers that pass through the Department of Agriculture, did you prepare particulars of the papers registered in the Department of Agriculture since its inception? Yes. 7 Oct., 1896.

1497. Does that paper show that in the year 1890 there were registered 4,982 papers; in 1891, 8,171; 1892, 12,726; in 1893, 16,025; in 1894, 14,017; in 1895, 15,441? Those are the correct numbers registered for each of the years named.

1498. The paper giving these figures is signed by yourself as record clerk, and countersigned by W. H. Tunks, clerk in charge of records? That is correct.

1499. *Mr. Anderson.*] Are all the papers received in the department now registered? No; there are thousands that are not now registered.

1500. What kind of papers are not registered? Formerly we used to register the vouchers, but we do not do so now, and that accounts for a great number. Then, again, applications for seed wheat are not now registered. Of these, I suppose we had 5,000 or 6,000.

1501. Can you tell the number of unregistered papers that were received in the department during the last two years? It would be impossible to give that information.

1502. Do you know the number of unregistered papers received during the previous three years? There is no record of unregistered papers. It would only be a guess.

1503. There is a Parliamentary paper dated 31st May, 1894, in which information is given as to the number of registered and unregistered communications in the department—will you read the particulars there given? It is here stated, "The number of registered letters during 1891, 8,171; unregistered, 8,000. During 1892, 12,724 were registered; 10,127 unregistered. During 1893, 16,025 registered; unregistered papers, nil."

Edward Arthur Clifton Wainwright further examined:—

1504. *Chairman.*] The evidence you produce in type-written copy you confirm as the evidence you gave the other day? Yes. E. A. C. Wainwright.

7 Oct., 1896.

WEDNESDAY, 21 OCTOBER, 1896.

Present:—

MR. CANN, | MR. LYNE,
MR. HOGUE, | MR. MOLESWORTH.

W. J. LYNE, Esq., IN THE CHAIR.

Nathan Augustus Cobb called in, sworn, and examined:—

1505. *Chairman.*] What are you? Pathologist to the Department of Agriculture.

1506. *Mr. Anderson.*] In my evidence before the Royal Commission in the Civil Service I gave this evidence (Q. 7261) about one of the inspectors of agriculture, Mr. O'Kelly: N. A. Cobb.

21 Oct., 1896.

He was not a trained expert in agriculture, but he was a gentleman. I had no trouble with him at all. He did his routine work very satisfactorily, and improved very much in usefulness.

Would you, as the pathologist to the department, endorse that opinion? He was certainly a gentleman; and while he was in the Service seemed to me to do his best to perform all the duties assigned to him, and those parts of the statement I fully endorse. With regard to his being an expert in agriculture, I should not be able to give a full opinion, because my experience would not enable me to speak from direct knowledge—

N. A. Cobb. knowledge—it would be hearsay. When it comes, however, to his knowledge of the diseases in sugar-cane I should say that I do not think it was deep or complete.

21 Oct., 1896.

1507. Were you sent up to the Clarence River to investigate diseases in sugar-cane? Yes, one disease.

1508. *Chairman.*] Will you state what is the result of your knowledge regarding Mr. O'Kelly? As a matter of fact I never met Mr. O'Kelly on a farm or in the field. I only met him in the office, and then in connection with specimens that he brought me, which were naturally of diseased cane; and, of course, in talking with him in that way I gained some idea of what his knowledge was of diseases in cane, and, as I have said, I should not think it was either deep or complete.

1509. From any complaint, or in any other way, did you come to the conclusion that he was not considered an expert in the district which he visited? As for complaints I cannot say that I heard loud complaints. I heard jocular remarks which might convey, perhaps, an impression of complaint—not against Mr. O'Kelly, because everybody liked Mr. O'Kelly. He was a most likable fellow, and popular with nearly everyone he met, and any criticism regarding him was sure to come in a jocular way. I did gather this impression, that the farmers were amused at Mr. O'Kelly's style with them. But I also gained the impression that, while he was there, he saw the point clearly, and began to alter his manner of meeting the farmers. Of course, that was a matter well-known in the department. As I say, I gained the impression that he did everything he could to improve himself and be of use to the farmers; at the same time there is no denying that there was a good deal of jocularly with regard to his relations with the farmers on the Clarence.

1510. Do you think I did him full justice when I said in my evidence, "He improved very much in usefulness, and did his routine work very satisfactorily"? Yes.

1511. Do you remember the appointment of Mr. Cull to assist you as pathologist? Yes.

1512. Do you remember that you recommended the appointment of a young man named Hansel as assistant? Yes.

1513. And that on that recommendation a young man named Cull was appointed;—did you find him suitable for your work? Mr. Cull was appointed during my absence from Sydney, and for some reason—whether it was at my suggestion or not I cannot say, but I believe it was—Mr. Guthrie, the chemist, took him in charge at first, because I was away; and before I returned to Sydney I received some word, either verbally or written—I believe verbally, probably from some assistant who was coming up to me while I was away—that Mr. Cull was not pleasing Mr. Guthrie. I do not mean that he was in any way insubordinate or anything of that sort, but he was not meeting the purposes of an assistant to the chemist. I knew Mr. Guthrie very well, and found him always careful and fair-minded; and I presumed, even before seeing Mr. Cull, that the same would be the case with me. When I returned to Sydney he was transferred to my office, and I asked him some questions, and, from his answers to those questions, I became satisfied that it would not be worth while to attempt to make an assistant of him. Although, like any young man, something could be made of him, of course; yet it would take time for me to teach him so that he would be valuable, and I thought the time would not be well spent in doing it. In consequence of that I gave him mostly clerical work during the short time he was with me. I think I might have given him some laboratory work of some sort or another; but it would be something I thought he could be entrusted with, and ultimately he was transferred to the clerical staff. I have no clear recollection of whether that was at my instigation or not, but at any rate it would meet with my approval. I thought his time in the Government service would be better spent on the clerical staff than in doing work for me, and probably, if I were asked, I would have given that opinion; but whether I was asked or not I do not recollect. I think those are all the particulars with regard to Mr. Cull that I recollect. He was a nice young fellow as far as that goes, behaved himself well, and did the best he could; but I did not think it was worth while endeavouring to make an assistant of him.

1514. Without in any way depreciating his value as a clerk, which may be admitted, you found that he was not the stamp of young fellow whom you could train to be an assistant to yourself as pathologist? Not satisfactorily.

1515. Did you, in conjunction with the whole of the scientific staff, present me with this illuminated address (*address shown*) when I left the department, and did it, in your opinion, faithfully represent the honest opinions of the whole staff? Yes.

1516. Would you kindly read the address? It is as follows:—

[Copy of Address (illuminated).]

To H. C. L. Anderson, Esq., M.A.,—

A record of our appreciation of the invaluable services rendered by you as Director of Agriculture, of your enthusiastic devotion to your duties, the thoroughly practical nature of the work under your direction, and the hearty co-operation that has always existed between us. Also of our confident assurance that your future career will be one of unimpaired success and usefulness.

From the Scientific Staff,
Department of Agriculture, N.S.W.

	N. A. COBB (Pathologist).	F. B. GUTHRIE (Chemist).
	A. SIDNEY OLLIFF (Entomologist).	FRED TURNER (Botanist).
May, 1893.	E. M. GROSSE (Artist).	J. A. DESPEISSIS (Viticulturist and Wine Expert).

1517. Do you think that if there had been a system of examination of candidates for employment in the department it would have obviated the appointment of Mr. Cull to a position for which he was not specially suited? Yes; I should think it would. If I had had an opportunity of examining Mr. Cull beforehand in all probability I should not have recommended him for the position I wanted filled at that time.

1518. *Mr. Slattery.*] On the 18th November, 1892, did you send this letter to Mr. Harrie Wood, Under Secretary for Mines and Agriculture:—

Sir,

I have no assistant, but from time to time have tried various young men with a view to their appointment if they were found suitable.

I am very sorry that none of them have turned out suitable for the work, although they were all worthy young fellows. When the present collector, Mr. A. M. Lea, was appointed, the choice among the applicants was between Mr. Lea and Mr. Hansel, another applicant. Mr. Hansel was thus brought under my notice. I had never seen or heard of him before, but liked his appearance. His testimonials were good, but foreign. Since then I have from time to time privately employed him in doing scientific work and drawing, and he has improved in my opinion constantly. Everything he has done has been done very faithfully and very well. He was trained well in a Bohemian Gymnasium, speaks English and

and German, and understands French fairly well. He is most interested in natural science, the elements of which he understands well. He has had experience on a Queensland station, and has been book-keeper for over a year at E. R. Falkner's, 225, Clarence-street, Sydney, where he is spoken of by the manager in very high terms.

I recommend that he be employed temporarily in this branch at a salary of £100 per annum with a view to promotion if he proves himself worthy.

? Yes.

1519. Do you see that my minute on that is as follows:—

I think that, for positions in the Public Service of this Colony, applicants who have passed the examinations at the Sydney University should, as a rule, be appointed. My honorable colleague the Postmaster-General has brought under my notice the case of John Cull, who passed the Civil Service Examination in 1885 and the Junior Public Examination in 1886. He applied for appointment as probationer more than six years since, and has since occasionally renewed his application. He may be appointed as probationer, and employed as assistant to Dr. Cobb at a salary of £50 per annum.

You see that that minute is dated 14th December, 1892? Yes.

1520. You notice from the papers that this young man had passed two examinations already at the Sydney University? Yes.

1521. And you know that according to the then Civil Service Act that fact entitled him to a probationership in any department, if the Minister thought fit to appoint him? Yes.

1522. Did you ever report to the Minister in any way that this young man Cull was unfit to be in your department? No; I do not recollect having done so.

1523. In regard to Mr. O'Kelly, did you at any time send a report of any kind to the Minister, through the Under Secretary or through Mr. Anderson, as to any unfitness on Mr. O'Kelly's part? No.

1524. And as far as you know, is it not a fact that this is the first time I have known what is your opinion about Mr. O'Kelly? Yes, as far as I know.

1525. If you had had the appointment of inspectors of agriculture, I suppose you would have been guided in the selection of the inspectors from the candidates by their testimonials and recommendations as to what they had been doing in former years? To a certain extent.

1526. You would have to see them at their work before you could form a proper opinion of the value of their services? It is hard to answer that by yes or no.

1527. Whoever was appointed it would have to be an experiment. If you appointed the best man possible it might be an experiment. For instance, you might get the greatest scientist, and he might turn out to be a man who drank, or something of that sort? Yes; my opinion in that respect is that all appointments are to some extent experiments, and, for that reason, I am always in favour of temporary appointments at first, to be converted afterwards into permanent appointments, if the officers prove capable.

1528. Was there ever a system of examination recommended by you for any of the officials—recommended to me as Minister? No.

1529. Then, I suppose, you will admit that this is the first time I ever heard of your views with regard to a further system of examination outside the University examinations? Yes, so far as I know.

1530. *Mr. Anderson.*] You were appointed yourself on three months' probation? Yes.

1531. And you are aware that diligent inquiry was made about your character and capabilities during that term? I have been told so recently.

1532. *Mr. Hogue.*] In any of the appointments made in connection with the department, was there anything, as far as you are aware, irregular? I cannot speak from personal knowledge as to that. One hears a great deal, as you know, but I am not personally aware of anything that could be called irregular.

1533. Was there anything out of the ordinary way in the appointments made by the Minister, as far as you are aware? My experience in that matter is very limited, and I do not think my opinion would be worth much.

1534. *Mr. Slattery.*] Do you know of any irregularity or impropriety on my part as Minister in making appointments? No; I should not single you out as a shining example of anything of that sort. I have a general opinion that appointments should be made after examination—a very strong opinion—although the examination is not all that should be done to get the final appointment.

1535. *Mr. Cann.*] I suppose you were not brought closely into contact with the ordinary working of the department? No; my relations were more particularly with the officers of the scientific staff. I gave very little attention to what might be called the political machinery or the administrative part of the department.

1536. From the slight observation you gave, was it your impression that the Service was in any way overmanned? I sometimes thought that there were more inspectors than were necessary.

1537. In any particular branch? If I were to single out any one case I should say that the appointment of two men connected with the tobacco industry was, if not more than was necessary, at least out of proportion to other branches. For instance, in the case of our temperate products, such as fruit and grain, probably there would only be one inspector, while two were appointed to deal with a crop which was of far less importance.

1538. Still you would not say of your own knowledge that these men were thrust upon the department? No.

1539. Were the inspectors whom you say were out of proportion as compared with the other branches of the department qualified to do the inspecting work they were expected to do? I can only speak very definitely in one case, and in that case my opinion is that the officer was of very little use. There were only two or three of these inspectors with whom I came into contact sufficiently to enable me to form an opinion of their abilities, and in one of the cases I should say that the man was of very little use to the department.

1540. *Chairman.*] To whom do you refer? Mr. de la Motte.

1541. *Mr. Slattery.*] I suppose you know that on the 12th November, 1891, Mr. Anderson sent a minute of this kind:—

At present there is a serious disease menacing the sugar-cane in the north. . . . I would respectfully impress upon the Minister the necessity of appointing some men with good practical and scientific training to examine into these diseases, &c.

I suppose you would say that when a serious disease had broken out in the Northern District, and it was reported to the Minister, it was the duty of the Minister to appoint someone whom he believed to be competent, to inquire into that disease? I should think it would be a proper thing to send an officer to investigate.

1542.

N. A. Cobb.
21 Oct., 1896.

- N. A. Cobb. 1542. You say that you think more inspectors were appointed than were necessary;—do you not know that Mr. Anderson recommended the appointment of four inspectors? No, I do not.
- 21 Oct., 1896. 1543. *Mr. Anderson.*] If the inspectors had been thoroughly qualified men, with practical and scientific training, do you think there would have been too many of them;—do you think the department could have usefully employed them? No, I cannot say that, because I have a very high opinion of the value of a proper Department of Agriculture. But I remember thinking this, and I have never changed my opinion, that these inspectors came on with too much of a rush. If we had had them put on in the course of a year or eighteen months or two years, we could have utilised them to very much greater advantage. As to there being too many inspectors, I would not say that if they were the right sort.

Nathan Augustus Cobb recalled:—

- N. A. Cobb. 1544. *Chairman.*] Have you read the type-written copy of your evidence given before this Committee [produced]? Yes.
- 21 Oct., 1896. 1545. Do you confirm it? Yes, with a few verbal alterations.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION
BY MR. H. C. L. ANDERSON.

(PETITION FROM THOMAS MICHAEL SLATTERY, OF SYDNEY, PRAYING TO BE REPRESENTED BY COUNSEL, OR ATTORNEY, OR IN PERSON, BEFORE SELECT COMMITTEE ON.)

Received by the Legislative Assembly, 25 August, 1896.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The Petition of Thomas Michael Slattery, of Sydney, in the Colony of New South Wales,—

HUMBLY SHOWETH:—

That, on the 28th day of July last past, your Honorable House appointed a Select Committee to inquire into and report upon the truth or otherwise of the evidence given on the 11th of March, 1895, before the Civil Service Commission, by Mr. H. C. L. Anderson, the Principal Librarian and Secretary of the Free Public Library.

2. That as the said evidence grossly reflects on your Petitioner's administration of the Department of Mines and Agriculture, your Petitioner humbly prays that he may be represented by counsel, or attorney, or in person, before the Select Committee appointed to inquire into and report upon the said matter, with the right to call witnesses and adduce evidence, and to examine and cross-examine such witnesses as may give evidence before the said Committee.

And your Petitioner, as in duty bound, will ever pray.

Sydney, 25th August, 1896.

T. M. SLATTERY.

1896.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

EVIDENCE BEFORE THE CIVIL SERVICE COMMISSION
BY MR. H. C. L. ANDERSON.

(PETITION FROM HENRY CHARLES LENNOX ANDERSON, PRAYING TO BE REPRESENTED BY
COUNSEL, ATTORNEY, OR IN PERSON, BEFORE SELECT COMMITTEE ON.)

Received by the Legislative Assembly, 3 September, 1896.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The Petition of Henry Charles Lennox Anderson, of Sydney, in the Colony of New South Wales,—

HUMBLY SHOWETH :—

That on the 28th day of July last past your Honorable House appointed a Select Committee to inquire into and report upon the truth or otherwise of the evidence given on the 11th March, 1895, before the Civil Service Commission by Mr. H. C. L. Anderson, the Principal Librarian and Secretary of the Free Public Library.

2. That your Petitioner humbly prays that he may be represented by counsel or attorney, or in person, before the Select Committee appointed to inquire into and report upon the said matter, with the right to call witnesses and adduce evidence, and to examine and cross-examine such witnesses as may give evidence before the said Committee.

And your Petitioner, as in duty bound, will ever pray.

HENRY C. L. ANDERSON.

Sydney, 3 September, 1896.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CASE OF THOMAS BUCKLEY, PUBLIC WORKS
DEPARTMENT.

(PETITION FROM THOMAS BUCKLEY, OF SYDNEY, PRAYING TO BE REPRESENTED BY COUNSEL, OR ATTORNEY, OR IN PERSON, BEFORE SELECT COMMITTEE ON.)

Received by the Legislative Assembly, 27 October, 1896.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of Thomas Buckley, of Sydney, in the Colony of New South Wales,—

HUMBLY SHOWETH :—

1. That on the twentieth day of October, in the year of our Lord one thousand eight hundred and ninety-six, your honorable House appointed a Select Committee to inquire into and report upon the dismissal of Thomas Buckley from the Public Works Department.

2. That your Petitioner humbly prays that he may be represented by counsel, or attorney, or in person, before the Select Committee appointed to inquire into and report upon the said matter, with the right to call witnesses and adduce evidence, and to examine and cross-examine such witnesses as may give evidence before the Select Committee.

And your Petitioner, as in duty bound, will ever pray.

THOMAS BUCKLEY.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REGISTRAR-GENERAL'S DEPARTMENT.

(RETURNS UNDER THE SEVERAL ACTS OF PARLIAMENT ADMINISTERED BY THE REGISTRAR-GENERAL FOR THE YEAR 1895.)

Printed under No. 1 Report from Printing Committee, 21 May, 1896.

I.—DEEDS BRANCH.

No. 1.—CONVEYANCES, Assignments, Leases and Miscellaneous Deeds; Registered under "Deeds Registration Act" (7 Vic. No. 16) during the year 1895.

Conveyances (absolute).		Assignment (absolute)—Leasehold Estates.		Lease—Period exceeding three years.		Miscellaneous Deeds.
Number.	Amount.	Number.	Amount.	Number.	Annual Rental.	Number.
5,314	£ s. d. 1,812,199 9 9	181	£ s. d. 139,459 7 5	241	£ s. d. 28,684 17 8	1,951

* Miscellaneous Deeds embrace all documents where valuable consideration is not stated, such as Deeds of Gift, Assignments for benefit of Creditors, Settlements, Powers of Attorney, Notifications of Resumptions, Conditional Purchases with nominal consideration, Writs of Execution, &c., &c.

No. 2.— MORTGAGES on Land Registered under "Deeds Registration Act" (7 Vic. No. 16).

Lent on Town Lands.		Lent on Suburban Lands.		Lent on Town and Country and Town and Suburban Lands.		Lent on Country Lands.		Total.	
No. of Mortgages.	Amount.	No. of Mortgages.	Amount.	No. of Mortgages.	Amount.	No. of Mortgages.	Amount.	No. of Mortgages.	Amount.
854	£ s. d. 887,928 14 9	807	£ s. d. 435,384 19 6	505	£ s. d. 485,640 8 8	6,301	£ s. d. 5,374,774 17 6	8,467	£ s. d. 7,183,729 0 5

NOTE.—In many instances the amounts lent upon mortgage by the Banks are not stated, but simply the words "valuable consideration" or "cash credit" inserted in the deed. As this occurs frequently when the properties mortgaged are evidently of great value, the absence of the amounts must materially affect the returns.

No. 3.—DISCHARGES, Conveyances under Mortgage, and Transfers of Mortgages on Land under "Deeds Registration Act" (7 Vic. No. 16).

Discharges of Mortgages on Land.		Conveyances under Mortgage.		Transfers of Mortgages on Land.	
Number.	Amount.	Number.	Amount.	Number.	Amount.
3,769	£ s. d. 2,505,730 8 2	320	£ s. d. 159,608 5 6	600	£ s. d. 768,367 14 5

NOTE.—In many instances the amounts under the above headings are not stated, consequently the returns are, so far, necessarily incomplete.

DEEDS BRANCH—*continued.*

No. 4.— PREFERABLE Liens on Wool and Mortgages on Live Stock, registered under 11 Vic. No. 4.

Preferable Liens on Wool.			Mortgages on Live Stock.				
No. of Liens.	No. of Sheep.	Amount of Liens.	No. of Mortgages.	No. of Sheep.	No. of Horned Cattle.	No. of Horses.	Amount Lent.
2,509	14,689,647	£ 2,101,048 3 3 s. d.	1,901	4,983,071	148,629	18,292	£ 2,254,289 13 7 s. d.

In addition to above there were 47 discharges of wool liens registered, representing £20,320 8s. 10d.
 N.B.—When any sum has been secured, both by a lien on the wool and by a mortgage of the sheep, the amount is included under the head of mortgages only. Thus in 1895 the gross amount lent on liens was £2,247,377 4s. 3d.; but from this has to be deducted the sum of £146,329 1s., secured both by lien on the wool and mortgage on the sheep, and included in the figure in the last column, so that the net amount lent on lien was £2,101,048 3s. 3d.

No. 5.— DISCHARGES of Mortgages on Live Stock, registered under 11 Vic. No. 4.

Number.	Transfer of Mortgages.	Further Charges.	Further Assurances.	Amount of Discharges of Mortgage.
372	22	3	14	£ 1,053,863 2 5 s. d.

No. 6.— LIENS on Growing Crops, registered under 26 Vic. No. 10.

V.—SUMMARY.

I.—*Deeds Branch.*

THE returns of the Deeds Registration Office for the year 1895 present the following results:—There were registered a total of 20,843 Deeds affecting land, representing 5,314 Conveyances, with a value of £1,812,199; 181 Assignments of leases, of the value of £139,459; 241 Leases, of the value of £28,684; together with 8,232 Transfers of Conditional purchases; and 1,951 miscellaneous Deeds, where no consideration was stated. There were 8,467 Mortgages over town, suburban, and country lands, representing a value of £7,183,729, registered during 1895, whilst 3,769 Discharges of mortgages were registered releasing £2,505,730; 320 Conveyances under mortgage, representing £159,608, and 600 Transfers of mortgage in consideration of £768,367. There were 2,509 preferable Liens on wool registered over 14,689,647 sheep, in consideration of £2,101,048, in addition to 47 Discharges of Liens. Of Mortgages on Cattle registered there were 1,901 over 4,983,071 sheep, 148,629 cattle, 18,292 horses, representing £2,254,289; whilst there were 372 Discharges deposited, releasing £1,053,863, and 39 other dealings therewith. The Liens on growing crops lodged for registration numbered 2,621 for £219,392. Search fees paid numbered 6,216, at 2s. 6d. (Real Estate), 10, 246 at 1s. (live stock, crops, &c.) 1,246 certified copies of Deeds and grants were issued with 5,217 extra folios. Wills deposited numbered 35. Total fees, Deeds, &c., £11,122 11s.

Under the Limited Liability Companies Act 77 new companies were registered, and 1,015 returns, &c., were furnished during 1895 by those already in existence. The Limited Companies registered as having been wound up or declared to be defunct during the year numbered 176. The No-Liability Mining Act had 37 new companies added to the list of those already registered. Searches Public Companies numbered 621. Certified copies, 57. Total fees (Public Companies), £1,035 17s.

There were 516 Trade Marks applied for, 403 were registered, 51 refused, and 10 withdrawn; in addition to which there were 52 trade marks transferred. Searches, 485. Certified copies issued, 14. Total fees (Trade Marks), £1,449 18s. 6d.

In addition to the above, numerous miscellaneous documents were registered in connection with the Titles to Land Act of 1858, Bank Act, the Old Public Companies Act, and several other Acts of Parliament wholly or partially administered in this Office.

The fees of office received by the Registration of Deeds Branch in 1895 totalled £10,362 14s. 6d. in addition to the sum of £3,245 12s. credited by the Treasury to this office for the Registration of Conditional Purchases. Grand total of fees, Deeds Branch, £13,608 6s. 6d.

II.—*Land Titles Branch.*

The returns under the Real Property Act, 26 Vic. No. 9 (Torrens' Act), furnish the following information:—During the year 311 Applications to bring 363 properties under the Real Property Act were lodged. They represented 359 acres 2 roods 15 $\frac{1}{2}$ perches of town and suburban lands and 21,871 acres 1 rood 13 perches of country lands, of the total value of £755,114, the fees of office paid thereon amounting to £2,567 13s. 11d. There were 2,761 Grants recorded during 1895, comprising 2,565 acres 0 roods 0 $\frac{1}{2}$ perches town and suburban and 286,591 acres 3 roods 23 $\frac{1}{2}$ perches country lands, the purchase moneys totalling £261,261 14s. 3d. with payments on account of Assurance Fund, amounting to £550 11s. 9d. The aggregate area of land under these provisions of this Act on 31st December last was 18,115,500 acres 3 roods 19 $\frac{1}{2}$ perches of the total declared value (at the date of application and grant respectively) of £38,989,266 4s. 3d. Of the 16,507 Memorials registered there were 7,388 transfers for a total consideration of £1,862,638; 3,886 Mortgages securing the sum of £4,741,877; and 2,525 Discharges of mortgages releasing £2,715,443. There were in addition to these, 4,785 New Certificates issued and 18,544 extra endorsements (after the first) entered, whilst the total fees of office collected under this head (memorials, &c.) amounted to £16,612 0s. 6d.

4,705 Searches against titles were made by the public in this Branch during 1895, viz.:—4,042 single and 663 general searches.

There were also 127 certified copies issued, with 1,116 extra folios thereon. Deposited plans of sub-divisions numbered 115.

Grand total fees for Land Titles Branch, £24,198 13s. 10d.

III.—*Births, Deaths, and Marriages Branch.*

The registrations in this Branch during the year 1895 were:—Births, 38,715—20,059 males and 18,656 females; deaths, 15,014—8,773 males and 6,241 females; marriages, 8,036. These were distributed as to locality as follows:—Births—City of Sydney, 3,000; suburbs, 9,982; country districts, 25,733. Deaths—City of Sydney, 1,665; suburbs, 3,913; country districts, 9,436. Marriages—City of Sydney, 2,172; suburbs, 1,424; country districts, 4,440.

3,165 certified copies were issued and 855 searches made. Total fees for this Branch, £520 5s.

NEW SOUTH WALES.

DREDGE SERVICE.

(RETURN RESPECTING MANAGEMENT OF).

*Printed under No. 15 Report from Printing Committee, 27 August, 1896.***Report by the Under Secretary for Public Works and Commissioner for Roads.**

It has been the custom, in accordance with the Dredge Regulations, for the crews of most of the tugs to be on duty more than forty-eight hours per week, and for the last eleven years no objection has been raised by them.

The crews of tugs working in Newcastle and on some rivers, owing to the short tow, have hitherto been more fortunate in respect to meal hours than those on the following vessels, where, as with private tugs, meals have been taken when towing.

Tugs whose crews have been on duty longer hours than dredge crews:—"Ajax," "Galatia," "Dawn," "Little Nell," "Achilles," "Rhea," "Cyclops," "Castor," "Ganymede," "Dayspring," "Scylla," "Mikado," "Octopus."

The general hours prior to 1st August, 1896, were as follows:—Monday to Friday, 6 a.m. to 4 p.m.; Saturdays, 6 a.m. to 12 noon.

The dredges working day shifts ceased work for eight hours per week while the crews had their meals, so that the men only worked forty-eight hours out of the fifty-six they were on board. Circumstances, however, often rendered it necessary for the tugs' crew to take meals while under weigh.

The hours recently introduced are:—Monday, 7 a.m. to 6 p.m.; Tuesday, Wednesday, Thursday, 6 a.m. to 6 p.m.; Friday, 6 a.m. to 5 p.m. Two hours per day are allowed for meals, during which time the dredges are kept at work by mechanics, &c., therefore no dredge hand works more than forty-eight per week.

The following is the usage in the principal privately owned tugs:—

P.J.S.S. Co.—Seven days work per week and about 17 hours each day; no overtime; no holidays; officers receive 1 per cent. on earnings.

J. & A. Brown, J. Dalton—Work all hours; no overtime.

In addition to the foregoing, which has been prepared by Mr. A. B. Portus, I might state that the pay of the firemen in the Newcastle privately-owned tugs is £9 per month, and in Sydney £9 to £10 per month, as compared with £132 per annum which is paid to those in the Dredge Service. Also that seamen engaged in a similar capacity in Sydney receive £7 per month, and in Newcastle £8 per month, as against £9 10s. per month paid to the seamen in the Dredge Service.

I would also point out that when the boats are towing there are two deck hands practically idle, and they are supposed to assist the firemen. The watchmen of the boats also get up steam for the firemen, so there is no occasion for them to be there before the other men.

ROBT. HICKSON,

Under Secretary for Public Works and Commissioner for Roads:

Report by the Superintending Engineer of Dredges.*Reorganisation of the Dredge Service.*

1st August, 1896.

HEREWITH is forwarded a list of the changes consequent on the reorganisation of the Dredge Service. The reduced rates are to take effect from to-day.

The cessation of extra shifts and laying up several dredges should take place at once, and the services of the men not required dispensed with, while those retained in the service will proceed to the places indicated on the list. All other hands will remain in their present places until relieved by their successors, or until further directed from head office.

Dredge masters will please keep me advised from day to day of the changes effected, so that inconvenience and confusion may be avoided. Men should be provided with passes and instructions to their new places, as attending the head office for this purpose may mean unnecessary detention in Sydney. A pass to Sydney may be allowed to retrenched men who so desire.

As

As soon as practicable the following hours are to be observed :—Monday, 7 a.m. to 6 p.m. ; Friday, 6 a.m. to 5 p.m. ; Tuesday, Wednesday, and Thursday, 6 a.m. to 6 p.m.

Two hours a day will be allowed for meals. The dredge, however, is to work continuously, the mechanics, &c., taking the places of the working crew during meal hours. *Except as provided in the last clause of regulation 5, no man is expected to work more than 48 hours a week, but the meal hours are to be so arranged by the master to suit the convenience of the work.*

Until the mechanics are conversant with the duties of the engine-driver and mate, the master will have to so arrange his meal time that he may personally supervise the engine-driving and deck work.

Dredge masters are to observe the same hours as the crew.

Tugs should be in attendance the whole of the hours already mentioned. Any time occupied steaming to and from work must be done in the men's own time.

The deduction in case of absence from duty on Monday or Friday will be $1\frac{1}{2}$ day's pay, and on Tuesday, Wednesday, and Thursday, $1\frac{1}{3}$ day's pay.

A. B. PORTUS,
Superintending Engineer of Dredges.

* * * * *

Regulation 5.—From the 1st May to the 1st September the working hours shall be from 6:30 a.m. to 5:30 p.m., and during the remaining months of the year from 6 a.m. to 6 p.m. Three-quarters of an hour will be allowed for breakfast, and 1 hour for dinner. Owing to the shortened breakfast hour work will terminate on Saturdays at 1 p.m. When circumstances render it necessary for the tugs to work continuously from 6 to 6 the meal hours must be taken while the steamers are towing.*

* * * * *

* Since the original Regulations were passed *the summer working hours have, by direction of Mr. Secretary Lackey, been reduced from ten to nine hours per day ; and a temporary increase of 10 per cent. on wages, after having been on two occasions voted by Parliament, was submitted during the last Session and passed as a permanent rate. On 10th October, 1885, Mr. Secretary Wright directed that the working hours be forty-eight per week.*

PUBLIC ACCOUNTS.

(RETURN PREPARED BY THE AUDITOR-GENERAL SHOWING THE CASH SURPLUS ON THE FIRST YEAR OF THE NEW SYSTEM OF KEEPING THE.)

Printed under No. 15 Report from Printing Committee, 27 August, 1896.

Return prepared by the Auditor-General showing the Cash Surplus on the first year of the new system of keeping the Public Accounts.

Sir,

Department of Audit, Sydney, 19 August, 1896.

In compliance with the desire expressed in your minute of the 15th instant, I have now the honor to enclose the three returns specified therein. As I have not yet had your Annual Statement for 1895-6, it must be understood that the figures given for that year are to be taken as subject to complete and final audit.

I have little doubt, however, that, except in probable variations of details, there will be no substantial alteration in the totals.

I have, &c.,

E. A. RENNIE,

Auditor-General.

The Honorable the Colonial Treasurer and Premier, Sydney.

A RETURN for the First Year of keeping the Accounts on a Cash Basis, in respect to both the Revenue and Appropriations for the Year—namely, from 1st July, 1895, to 30th June, 1896.

	£	s.	d.
Total Revenue and Receipts credited to the Revenue Account from 1st July, 1895, to 30th June, 1896, as per statement in <i>Government Gazette</i> of 9th July, 1896	9,251,845	2	10
Accrued Interest on Loan raised in October, 1895	14,989	13	0
	9,266,834	15	10
Less Refunds (as described in No. 1)	178,313	18	3
(a) Total Receipts for the year	£9,088,520	17	7
Total Payments on account of the Appropriations for the year 1895-6	8,730,700	4	7
Payments from the Treasurer's Advance Account for Services 1895-6, as per Supplementary Estimates	26,457	18	11
(b) Total Expenditure on account of the Appropriations for the year	£8,757,158	3	6
(c) Total Surplus on the year	£331,362	14	1

The above figures are considered to be substantially correct. The final audit to the Treasurer's Annual Account cannot be made until it is furnished to me under the Audit Act for that purpose—and it is not yet due; but it will not probably result in any material alteration of the totals as given above.

E. A. RENNIE,
Auditor-General.

Department of Audit,
19th August, 1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC ACCOUNTS.

(RETURN PREPARED BY THE AUDITOR-GENERAL SHOWING THE STATE OF THE, FOR THE SIX MONTHS ENDED 30TH JUNE, 1895.)

Printed under No. 15 Report from Printing Committee, 27 August, 1896.

RETURN prepared by the Auditor-General showing the state of the Public Accounts for the six months from 1st January to 30th June, 1895.

A RETURN showing the total amount of Revenue and Receipts for the six months ended 30th June, 1895, and the total amount the Auditor-General has allowed credit for for payments legally chargeable to the Votes and Statutory Appropriations for the same period up to the 12th instant, and showing the deficiency of the Receipts for the six months, after allowing credit for payments as above.

	£	s.	d.		£	s.	d.
Total amount of revenue and receipts for the six months ended 30th June, 1895, as per Auditor-General's Report upon the Treasurer's accounts for that period	4,943,847	8	10	Total amounts allowed credit for by the Auditor-General for payments legally chargeable to the Votes and Statutory Appropriations paid within the half-year January and June, 1895..	3,979,779	10	4
Out of that amount there were refunded excesses of receipts under the heads stated at page 36 of that report, in reduction of amount available for expenditure under Statutes	79,755	12	2	Amounts paid out of same Votes and Statutory Appropriations from 1st July, 1895, to 30th June, 1896.....	658,068	12	10
	£ 4,864,091	16	8	Similar payments from 1st July to 12th August inclusive	554	6	2
This net total includes the following sums brought to account within the half-year January to June, 1895, which are of the nature of surcharges, and go to reduce the debit balance of the Revenue Account at 31st December, 1894, viz. :—				Amounts of payments from Treasurer's Advance Account in Supplementary Estimates	253	3	7
Accrued Interest, Premiums and Interest on deferred payments of instalments of Loans improperly credited to the General Loan Account.....	370,981	7	5				
Also, Repayments to credit of Votes for Railway Working Expenses, 1894.....	39,578	6	4				
And Recredits for other charges on account of 1894 and previous years	1,172	14	7				
	£ 411,732	8	4				
This Balance may be considered as actual Revenue proper collected for the half-year January to June, 1895	4,452,359	8	4				
Deficiency on Receipts for six months, January to June, 1895	*186,296	4	7				
	£ 4,638,655	12	11		£ 4,638,655	12	11

Department of Audit,
19th August, 1896.

E. A. RENNIE,
Auditor-General.

* The Treasury has savings to be written off from this total which will reduce the deficiency to about £150,000.—G.H.R., 20/8/96.

THIRTEENTH REPORT

ON

THE CREATION, INSCRIPTION, AND ISSUE OF STOCK,

UNDER THE PROVISIONS OF THE

“INSCRIBED STOCK ACT OF 1883” (46 VIC. No. 12).

To the Honorable George Houstoun Reid, Esq., M.P., Colonial Treasurer,—

Sir,

The Treasury, New South Wales,
Sydney, 23rd September, 1896.

I have the honor to submit the Thirteenth Annual Report under the provisions of the “Inscribed Stock Act of 1883.”

My last Report was dated 4th November, 1895. There has been no further issue of Stock in the interval.

A copy of the Prospectus, Deed-poll, and Declaration required by the Colonial Stock Act, and the Agent-General’s letter to the Bank of England, dated 25th October, 1895, in connection with the Redemption Loan of £4,000,000, referred to in my last Report, will be found in Appendix C.

A statement of the Stock created and inscribed under the provisions of the Act is given in Appendices A and B.

I have, &c.,
F. KIRKPATRICK,
Under Secretary for Finance and Trade.

APPENDIX.

APPENDIX.

APPENDIX A.

FIRST INSCRIBED LOAN.

Created for the conversion of outstanding Debentures, on which a Loan had been raised on the 8th June, 1882, under authority of the Acts 41 Vic. No. 7 and 43 Vic. No. 11, with an obligation on the part of the Government to convert same into Inscribed Stock:—

Capital amount of such Stock	*£1,186,800.
Rate of interest thereon	4 per cent. per annum, payable half-yearly.
Currency	Fifty years.
Condition of redemption	Payment on maturity, at par.

SECOND INSCRIBED LOAN.

Created for the purpose of raising a Loan under authority of the Acts 41 Vic. No. 7 and 43 Vic. No. 11:—

Capital amount of such Stock	£3,000,000.
Rate of interest thereon	4 per cent. per annum, payable half-yearly.
Currency	Fifty years.
Condition of redemption	Payment on maturity, at par.

THIRD INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Acts 43 Vic. No. 11, 44 Vic. No. 12, and 44 Vic. No. 28:—

Capital amount of such Stock	£3,000,000.
Rate of interest thereon	4 per cent. per annum, payable half-yearly.
Currency	Fifty years.
Condition of redemption	Payment on maturity, at par.

FOURTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Acts 44 Vic. No. 28 and 46 Vic. No. 12:—

Capital amount of such Stock	£5,500,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Forty years.
Condition of redemption	Payment on maturity, at par.

FIFTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Acts 44 Vic. No. 28, 45 Vic. No. 22, 46 Vic. No. 23, and 48 Vic. No. 26:—

Capital amount of such Stock	£5,500,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Forty years.
Condition of redemption	Payment on maturity, at par.

SIXTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Act 48 Vic. No. 26:—

Capital amount of such Stock	£5,500,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Thirty-eight years.
Condition of redemption	Payment on maturity, at par.

SEVENTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Act 48 Vic. No. 26:—

Capital amount of such Stock	£3,500,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Thirty years.
Condition of redemption	Payment on maturity, at par.

EIGHTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Acts 48 Vic. No. 26 and 52 Vic. No. 16:—

Capital amount of such Stock	£3,500,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Twenty-nine years.
Condition of redemption	Payment on maturity, at par.

NINTH

* The balance of this Loan (£813,700) is outstanding in Debentures.

NINTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Act 54 Vic. No. 33 :—

Capital amount of such Stock	£4,500,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Twenty-seven years.
Condition of redemption	Payment on maturity, at par.

TENTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Acts 54 Vic. No. 33 and 55 Vic. No. 35 :—

Capital amount of such Stock	£2,500,000.
Rate of interest thereon	4 per cent. per annum, payable half-yearly.
Currency	Thirty-nine years.
Condition of redemption	Payment on maturity, at par.

ELEVENTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Act 57 Vic. No. 17 :—

Capital amount of such Stock	£832,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Twenty-four years.
Condition of redemption	Payment on maturity, at par.

TWELFTH INSCRIBED LOAN.

Created for the purpose of raising a Loan under the authority of the Acts 50 Vic. No. 28, 52 Vic. No. 17, 53 Vic. No. 23, 55 Vic. No. 7, and 59 Vic. No. 5.

Capital amount of such Stock	£4,000,000.
Rate of interest thereon	3 per cent. per annum, payable half-yearly.
Currency	Forty years.
Condition of redemption	Payment on maturity, at par.

APPENDIX B.

CONVERSION LOAN.

Created under the provisions of the "Inscribed Stock Act of 1883," for the conversion and redemption of New South Wales Government Debentures outstanding in respect of Loans raised under the provisions of the Acts 19 Vic. Nos. 38 and 40, 22 Vic. Nos. 5, 22, and 26, and 24 Vic. Nos. 24 and 26, which matured on 1st July, 1891, and also in respect of Loans raised under the provisions of the Act 25 Vic. No. 19, which matured on 1st January, 1892 :—

Capital amount of such Stock	*£2,000,000.
Rate of interest thereon	3½ per cent. per annum, payable half-yearly.
Currency	Twenty-seven years.
Condition of redemption	Payment on maturity, at par.

APPENDIX C.

NEW SOUTH WALES GOVERNMENT £3 PER CENT. INSCRIBED STOCK.—1935.

First Issue, £4,000,000.

Repayable at par, 1st October, 1935.

The Loan is issued under Acts authorised by the Parliament of New South Wales, viz., 50 Vic. No. 28; 52 Vic. No. 17; 53 Vic. No. 23; and 59 Vic. No. 5; and under the authority of 55 Vic. No. 7. The proceeds will be applied in redemption of Debentures falling due in 1896, bearing 5 per cent. interest, and of Treasury Bills, also maturing in 1896; thus effecting a saving to the Government in the annual charge for interest.

First dividend, being six months' interest, payable 1st April, 1896. Minimum Price of issue, £94 per cent. THE Governor and Company of the Bank of England give notice that they are authorised to receive on Thursday, 10th October, 1895, tenders for £4,000,000 New South Wales £3 per cent. Inscribed Stock, repayable at par 1st October, 1935.

The first dividend on this issue will be due 1st April, 1896, and will be for six months' interest from 1st October, 1895, on the nominal amount of stock.

The books of the stock will be kept at the Bank of England, where all assignments and transfers will be made; and holders of the stock will be able, on payment of the usual fees, to take out stock certificates to bearer, with coupons attached, which certificates may be reinscribed into stock at the will of the holder.

All transfers and stock certificates will be free of stamp duty.

Dividend warrants will be transmitted by post if desired.

By

* Of the capital amount of £2,000,000 created, a sum of £494,200 only has been inscribed; the balance has lapsed. The amount of £494,200 is made up as follows, namely :—

Debentures due 1st July, 1891, exchanged for 3½ per cent. Stock	15,000
Debentures due 1st January, 1892, exchanged for 3½ per cent. Stock	279,200
Stock handed to the London Chartered Bank as security for an advance, under which Debentures due 1st July, 1891, to the extent of £185,500 were redeemed. This Stock was, upon the repayment of the advance, transferred back to the Government, and is now available for sale as opportunity offers	200,000†
	£494,200

† NOTE.—14th November, 1894. This has since been sold.

By the Act 40 and 41 Vict., ch. 59, the revenues of the Colony of New South Wales alone will be liable in respect of this stock and the dividends thereon, and the Consolidated Fund of the United Kingdom and the Commissioners of Her Majesty's Treasury will not be directly or indirectly liable or responsible for the payment of the stock or of the dividends thereon, or for any matter relating thereto.

Tenders may be for the whole or any part of the stock, and must state what amount of money will be given for every £100 of stock. Tenders for other than even hundreds of stock, or at a price including fractions of a shilling other than sixpence, will not be accepted. Tenders must be delivered at the Chief Cashier's Office, Bank of England, before two o'clock on Thursday, 10th October, 1895. Tenders at different prices must be on separate forms. The amount of stock applied for must be written on the outside of the tender.

The minimum price, below which no tender will be accepted, has been fixed at £94 for every £100 of stock.

A deposit of £5 per cent. on the amount of stock tendered for must be paid at the same office at the time of the delivery of the tender, and the deposit must not be enclosed in the tender. Where no allotment is made, the deposit will be returned; and in case of partial allotment, the balance of the deposit will be applied towards the first instalment.

In the event of the receipt of tenders for a larger amount of stock than that proposed to be issued at or above the minimum price, the tenders at the lowest price accepted will be subject to a *pro rata* diminution.

The dates at which the further payments on account of the Loan will be required are as follows:—

On Thursday, the 17th October, 1895,	} so much as, when added to the deposit, will leave seventy-five pounds (sterling) to be paid for each hundred pounds of stock.
On Thursday, the 14th November, 1895, £25 per cent.;	
On Thursday, the 12th December, 1895, £25 per cent.;	
On Thursday, the 9th January, 1896, £25 per cent.	

The instalments may be paid in full on or after the 17th October, 1895, under discount at the rate of £1 per cent. per annum. In case of default in the payment of any instalment at its proper date, the deposit and instalments previously paid will be liable to forfeiture.

Scrip certificates to bearer will be issued in exchange for the provisional receipts.

The stock will be inscribed in the bank books on or after the 9th January, 1896, but scrip paid up in full may be forthwith inscribed.

No tender will be received unless upon the printed form, which can be obtained at the Chief Cashier's Office, Bank of England; of Messrs. Mullens, Marshall, & Co., Stock Brokers, 4, Lombard-street, London, E.C.; and of the Agent-General for the Government of New South Wales, Westminster Chambers, 9, Victoria-street, S.W.

Bank of England, London, 5th October, 1895.

NEW SOUTH WALES STOCK, £3 PER CENT.—1935.—Issue of £4,000,000.

DEED-POLL declaring the creation of £4,000,000 New South Wales Stock, £3 per cent., 1935, and the terms and conditions on which the same shall be issued and redeemed.

To all to whom these presents shall come:

The Honorable Sir Saul Samuel, Knight Commander of the Most Distinguished Order of St. Michael and St. George, Companion of the Most Honorable Order of the Bath, Agent-General resident in London of the Colony of New South Wales, Sir Daniel Cooper, Baronet, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Donald Larnach, Esquire, Frederick Holkham Dangar, Esquire, William Richmond Mewburn, Esquire, and Nathaniel Cork, Esquire, *send greeting:*

WHEREAS by an Act passed by the Legislature of the Colony of New South Wales, entitled the "Inscribed Stock Act of 1883," it was among other things enacted that whenever by any Act then or thereafter in force power should be given to the Governor (in the said Act defined to mean the Governor with the advice of the Executive Council) to raise any sum or sums of money by way of loan for the public service of the Colony, it should be lawful for the Governor to raise the whole or any portion of such sum or sums in the form of inscribed stock, hereinafter termed "stock," and that all such stock should be styled "New South Wales Stock," and, subject to the provisions of the now reciting Act, should be issued in such amounts, in such manner, at such times, bearing interest at such rate not exceeding 4 per centum per annum, and should be redeemable at such times and upon such conditions, and should be subject to such

* The deposit must accompany this application, but should not be enclosed therein. Cheques should be drawn in favour of "The Bank of England." Where several applications are made, one cheque only, for the total deposit, is necessary.

† Tenders, which should be sealed, must be for even hundreds of stock, and the prices must be multiples of sixpence. No tender will be received after two o'clock on Thursday, 10th October, 1895.

such terms and conditions as the Governor before exercising the aforesaid power should from time to time determine and appoint. And it was further enacted that the Governor should have and might exercise the following powers and authorities or any of them, that was to say:—He might from time to time declare all or any of the debentures issued under the authority of any Act of Parliament to be convertible into stock, redeemable at such times, and subject to such terms and conditions as he might before the creation thereof determine and appoint. He might authorise the issue of an equivalent amount of such stock in exchange for debentures, and he might on such conditions as he might determine authorise the creation and issue of any stock, for the purpose of converting any outstanding debentures into stock, and to pay any expenses in connection with such conversions, or in carrying out the provisions of the Act. And it was further enacted that any such conversion of debentures into stock might be effected either by arrangement with the holders of such debentures or by purchase thereof out of moneys raised by the sale of new stock or partly in one way and partly in the other. And it was further enacted that the Governor might appoint two or more agents in London for the purposes of the Act, of whom one should be the Agent-General of the said Colony for the time being, and might empower such agents, or any one or more of them, to exercise the powers of the Act exercisable by the Governor, or as the Governor might authorise and direct.

And whereas the Right Honorable Sir Augustus William Frederick Spencer Loftus (commonly called Lord Augustus Loftus), Knight Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, the Governor and Commander-in-Chief for the time being of the said Colony and its Dependencies, with the advice of the Executive Council, by Letters Patent under the Great Seal of the said Colony, and bearing date the 14th day of April, 1883, in virtue of the powers conferred by the "Inscribed Stock Act of 1883," did appoint the said Sir Saul Samuel, Sir Daniel Cooper, Donald Larnach, Frederick Holkham Dangar, and Edward Knox, a Member of the Legislative Council of the said Colony, Agents in London, for the purposes of the same Act, and did thereby empower them or any one or more of them to exercise such powers as are by the Governor exercisable under the same Act.

And whereas the said Sir Augustus William Frederick Spencer Loftus, as such Governor as aforesaid, with such advice as aforesaid, did, on or about the 24th day of September, 1885, revoke the said appointment of the said Edward Knox, and by Letters Patent under the Great Seal of the Colony, bearing date on or about the same 24th day of September, 1885, in virtue of the powers conferred by the "Inscribed Stock Act of 1883," did appoint the said William Richmond Mewburn and the said Nathaniel Cork additional agents in London for the purposes of the same Act, and did thereby empower the said Sir Saul Samuel, Sir Daniel Cooper, Donald Larnach, and Frederick Holkham Dangar and the said William Richmond Mewburn and Nathaniel Cork, hereinafter called the said agents, or any one or more of them to exercise such powers as are by the Governor exercisable under the same Act.

And whereas by an Act of the said Legislature, entitled the "Public Works Loan Act of 1886," it was enacted that it should be lawful for the Governor, with the advice of the Executive Council, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £3,115,393, as might be required for the purposes in the same Act mentioned.

And whereas by an Act of the said Legislature, entitled the "Public Works Loan Act of 1888," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money not exceeding in the whole the sum of £3,641,305, as might be required for the purposes in the same Act mentioned.

And whereas by another Act of the said Legislature, entitled the "Loan Act of 1889," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £5,089,896, as might be required for the purposes in the same Act mentioned.

And whereas by another Act of the said Legislature, entitled the "Treasury Bills Act of 1891," after reciting that for the purpose of carrying out certain public works it was expedient to authorise the raising of a sum not exceeding four millions sterling by the issue in the manner in the said Act mentioned of Treasury Bills, it was enacted amongst other things that the Governor, with the advice of the Executive Council, might cause Treasury Bills for any amounts of money, not exceeding in the whole the sum of four millions sterling, to be made out and issued by the Colonial Treasurer, in the manner and subject to the provisions of the said Act, and that all principal moneys for which any such Treasury Bills might be made out should be chargeable upon and paid out of the proceeds of any loan or loans raised or to be raised under any Act or Acts already passed, providing funds for the execution of public works.

And whereas by another Act of the said Legislature, entitled the "Repayment of Loans Act 1895," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £977,000, as might be required for the purpose of repaying debentures to the value of £977,000 as in the same Act mentioned.

And whereas the Governor, with such advice as aforesaid, being about to borrow and raise in Great Britain, under the authority of the said "Public Works Loan Act of 1886," "Public Works Loan Act of 1888," "Loan Act of 1889," and "Repayment of Loans Act 1895," a sum of money by the issue of £3 per centum inscribed stock, the said agents have determined to create and issue for that purpose an amount of not exceeding £4,000,000 sterling of "New South Wales Stock," "Three per Cent.," and have determined and appointed the time at which the same shall be redeemable, and the terms and conditions on which the same shall be issued.

And whereas it is intended that the moneys so to be borrowed and raised as aforesaid shall be applied, so far as may be necessary or possible, to the redemption of Treasury Bills to the value of £2,750,000, which were raised under the provisions of the "Treasury Bills Act of 1891," and the repayment of the debentures in the said "Repayment of Loans Act 1895" mentioned.

And

And whereas it is expedient that the determination and appointment of the said agents shall be declared and manifested under the hands and seals of two or more of the said agents.

Now, therefore, these presents witness that they, the said agents, in exercise of the powers conferred upon them by the said Letters Patent respectively, and by virtue of the "Inscribed Stock Act of 1883," do by these presents declare that they have created an amount of £4,000,000 sterling of capital stock, to be called "New South Wales Stock," "Three per Cent.," and have determined that such capital stock shall be issued at the rate of £100 of stock for every nominal amount of £100 which shall be represented by the scrip certificates or letters of allotment respectively to be issued to subscribers for any part of such capital stock, when the instalments payable thereon shall have been fully paid, and that the interest or dividend to be paid on the said amount of £4,000,000 sterling of stock so created by them as aforesaid, or any lesser amount which shall be issued, shall be at the rate of £3 per centum per annum, and that a half year's interest or dividend shall be payable on the 1st day of April, 1896, at the Bank of England, and that thereafter the said interest or dividend shall be payable at the same place half-yearly on the 1st day of October and the 1st day of April, in each year, until and including the 1st day of October, 1935. And further, that on the said 1st day of October, 1935, the capital shall be repaid at par at the same place.

And they do further declare that the revenues of the Colony of New South Wales alone are liable in respect of the stock hereinbefore described, and the dividends thereon, and that the Consolidated Fund of the United Kingdom, and the Commissioners of Her Majesty's Treasury are not directly or indirectly liable or responsible for the payment of the stock, or of the dividends thereon, or for any matter relating thereto.

In witness whereof, two of them, the said agents, have hereunto set their hands and seals this 10th day of October, 1895.

Signed, sealed, and delivered, by the above-named Sir Saul } (L.S.) SAUL SAMUEL.
Samuel and Nathaniel Cork, in the presence of,— } (L.S.) NATHANIEL CORK.
GEORGE M. LIGHT, Solicitor, 32, Victoria-street, Westminster.

NEW SOUTH WALES STOCK, £3 PER CENT.—1935.—Issue of £4,000,000.

Declaration for Inland Revenue Commissioners.

Dated 22nd October, 1895.

It is hereby declared that by an Act of the Legislature of the Colony of New South Wales, being Act 46 Vic. No. 12, to be cited as the "Inscribed Stock Act of 1883," provision is made in the terms following, that is to say:—

Section 2.—Whenever by any Act now or hereafter in force, power is given to the Governor to raise any sum or sums of money by way of loan for the Public Service of the Colony, it shall be lawful for the Governor to raise the whole or any portion of such sum or sums in the form of inscribed stock (hereinafter termed "stock").

Section 3.—All such stock shall be styled "New South Wales Stock," and subject to the provisions of this Act, shall be issued in such amounts, in such manner, at such times, bear interest at such rate (not exceeding 4 per centum per annum), and shall be redeemable at such times, and on such conditions, and shall be subject to such terms and conditions as the Governor, before exercising the aforesaid power, shall from time to time determine and appoint.

Section 4.—The Governor shall have and may exercise the following powers and authorities, or any of them:—

- (i) He may from time to time declare all or any of the debentures issued under the authority of any Act of Parliament to be converted into stock, redeemable at such times and subject to such terms and conditions as he may, before the creation thereof, determine and appoint.
- (ii) He may authorise the issue of an equivalent amount of such stock in exchange for such debentures.
- (iii) He may, on such conditions as he may determine, authorise the creation and issue of any stock for the purpose of converting any outstanding debentures into stock, and of paying any expenses in connection with such conversion or in carrying out the provisions of this Act.

Section 5.—Any such conversion of debentures into stock may be effected either by arrangement with the holders of such debentures or by purchase thereof out of moneys raised by the sale of new stock, or partly in one way and partly in the other.

Section 7.—The Governor may from time to time enter into such agreement with any bank carrying on business in London as to him seems fit to provide for all or any of the following matters (*inter alia*):—

- (i) For the inscription and issue of stock.
- (ii) For effecting the conversion of debentures into stock, and regulating transfers of stock.
- (iv) For securing stock certificates, and as often as occasion shall require reinscribing or reissuing such certificates.
- (viii) For conducting generally all business connected with stock or loans.

Section 8.—Every agreement made with any such bank shall be as valid and effectual as if the terms thereof had been enacted by this Act.

Section 9.—The Governor may appoint two or more persons in London as agents for the purposes of this Act, of whom one shall be the Agent-General of the Colony for the time being, and may empower such agents, or any one or more of them, to exercise such powers by this Act exercisable by the Governor as the said Governor may authorise or direct.

Section 14.—The word "Governor" in this Act means "Governor, with the advice of the Executive Council."

And it is hereby further declared that the Right Honorable Sir Augustus William Frederick Spencer Loftus (commonly called Lord Augustus Loftus), Knight Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor and Commander-in-Chief for

for the time being of the said Colony and its Dependencies, with the advice of the Executive Council, by Letters Patent under the Great Seal of the said Colony, and bearing date the 14th day of April, 1883, in virtue of the powers conferred by the "Inscribed Stock Act of 1883," did appoint Sir Saul Samuel, Knight Commander of the Most Distinguished Order of St. Michael and St. George, Agent-General, resident in London, of the said Colony; Sir Daniel Cooper, Baronet, Knight Commander of the Most Distinguished Order of St. Michael and St. George; Donald Larnach, Esquire, Frederick Holkham Dangar, Esquire, and Edward Knox, a Member of the Legislative Council of the said Colony of New South Wales, agents in London, for the purposes of the same Act, and did thereby empower them or any one or more of them, to exercise such powers as are by the Governor exercisable under the same Act.

And it is hereby further declared that the said Sir Augustus William Frederick Spencer Loftus, as such Governor as aforesaid, with such advice as aforesaid, did, on or about the 24th day of September, 1885, revoke the said appointment of the said Edward Knox, and by Letters Patent under the Great Seal of the Colony, bearing date on or about the same 24th day of September, 1885, in virtue of the powers conferred by the "Inscribed Stock Act of 1883," did appoint William Richmond Mewburn, Esquire, and Nathaniel Cork, Esquire, additional agents in London for the purposes of the same Act, and did thereby empower the said Sir Saul Samuel, Sir Daniel Cooper, Donald Larnach, and Frederick Holkham Dangar, and the said William Richmond Mewburn and Nathaniel Cork, hereinafter called the said agents, or any one or more of them, to exercise such powers as are by the Governor exercisable under the same Act.

And it is hereby further declared that by another Act of the said Legislature, entitled the "Public Works Loan Act of 1886," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £3,115,393, as might be required for the purposes in the same Act mentioned.

And it is hereby further declared that by another Act of the said Legislature, entitled the "Public Works Loan Act of 1888," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £3,641,305, as might be required for the purposes in the same Act mentioned.

And it is hereby further declared that by another Act of the said Legislature, entitled the "Loan Act of 1889," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £5,089,896, as might be required for the purposes in the same Act mentioned.

And it is hereby further declared that by another Act of the said Legislature, entitled the "Treasury Bills Act of 1891," after reciting that for the purpose of carrying out certain Public Works it was expedient to authorise the raising of a sum not exceeding £4,000,000 sterling by the issue in the manner in the said Act mentioned of Treasury Bills, it was enacted amongst other things that the Governor, with the advice of the Executive Council, might cause Treasury Bills for any amounts of money, not exceeding in the whole the sum of £4,000,000 sterling, to be made out and issued by the Colonial Treasurer in the manner and subject to the provisions of the said Act, and that all principal moneys for which any such Treasury Bills might be made out should be chargeable upon and paid out of the proceeds of any loan or loans raised or to be raised under any Act or Acts already passed providing funds for the execution of Public Works.

And it is hereby further declared that by another Act of the said Legislature, entitled the "Repayment of Loans Act, 1895," it was enacted that it should be lawful for the Governor, with such advice as aforesaid, to raise by the sale of debentures or the issue of inscribed stock, secured upon the Consolidated Revenue Fund of the Colony, and bearing interest at a rate not exceeding 4 per centum per annum, such several sums of money, not exceeding in the whole the sum of £977,000, as might be required for the purposes of repaying debentures to the value of £977,000 in the same Act mentioned.

And it is hereby further declared that by a deed-poll under the hands and seals of the said Sir Saul Samuel and Nathaniel Cork, dated the 10th day of October, 1895, after reciting that the Governor, with such advice as aforesaid, being about to borrow and raise in Great Britain, under the authority of the said "Public Works Loan Act of 1886," "Public Works Loan Act of 1888," "Loan Act of 1889," and "Repayment of Loans Act, 1895," a sum of money by the issue of £3 per centum inscribed stock, they had determined to create and issue stock to the amount and upon the terms therein mentioned, and after reciting that it was intended that the moneys so to be borrowed and raised as aforesaid should be applied, so far as might be necessary or possible, to the redemption of Treasury Bills to the value of £2,750,000, which were raised under the provisions of the said "Treasury Bills Act of 1891," and the repayment of the debentures in the said "Repayment of Loans Act, 1895," mentioned, the said agents did declare that in exercise of the powers conferred upon them by the said Letters Patent respectively, and by virtue of the "Inscribed Stock Act of 1883," they had created an amount of £4,000,000 sterling of capital stock, to be called "New South Wales Stock," "Three per Cent.," and had determined that the same should be issued at the rate and on the terms therein mentioned, and that the interest or dividend to be paid thereon should be at the rate of £3 per centum per annum, and that a half-year's interest or dividend should be payable on the 1st day of April, 1896, at the Bank of England, and that thereafter the said interest or dividend should be payable at the same place half-yearly, on the 1st day of October and the 1st day of April in each year, until and including the 1st day of October, 1935, and further that on the said 1st day of October, 1935, the capital should be repaid at par at the same place.

And it is hereby further declared that in further pursuance of the said "Inscribed Stock Act of 1883," and by virtue of the said Letters Patent, the said agents have entered into an agreement with the Governor and Company of the Bank of England, providing among other things for the inscription in a Register kept in England by the said bank of the said stock mentioned in the said last-mentioned deed-poll, to have been created for the transfer of such stock.

And it is hereby further declared that the stock to be inscribed and transferred in conformity with such provision is "New South Wales Stock," "Three per Cent.," mentioned in the said last-mentioned deed-poll.

And it is hereby further declared that the revenues of the Colony of New South Wales alone are liable in respect of the stock hereinbefore described, and the dividends thereon, and that the Consolidated Fund of the United Kingdom, and the Commissioners of Her Majesty's Treasury are not directly or indirectly liable or responsible for the payment of the stock, or of the dividends thereon, or for any matter relating thereto.

And it is hereby further declared that his Excellency the said Sir Augustus William Frederick Spencer Loftus, as the Governor and Commander-in-Chief of the said Colony and its Dependencies, by Letters Patent under the Great Seal of the Colony, and dated the 11th day of August, 1880, appointed the said Sir Saul Samuel, then Saul Samuel, Esquire, to be Agent-General for the said Colony, resident in London, to act under such instructions as he should from time to time receive from the Government of the said Colony, to transact such business of the Government as might be specially entrusted to him, or such as might necessarily arise in the absence of such instructions, and in all things whatsoever to serve the Colony to the best of his judgment and ability.

In witness whereof the said Sir Saul Samuel, in exercise of the powers conferred upon him by the said Letters Patent of the 11th day of August, 1880, under the Great Seal of the said Colony, hath hereunto set his hand this 22nd day of October, 1895.

SAUL SAMUEL.

Witness—

GEORGE M. LIGHT, Solicitor, 32, Victoria-street, Westminster.

New South Wales Stock, £3 per Cent., 1935.—Issue of £4,000,000.

Gentlemen,

9, Victoria-street, Westminster, S.W., 25 October, 1895.

Referring to my previous communication with you and to my written instructions to you of the 2nd October last, to place upon the market a loan of £4,000,000, and referring to your letter of the 11th April, 1895, to the Agent-General of New South Wales, I have now formally to request that you will be good enough to undertake the inscription of the loan of £4,000,000 which has so been raised by the New South Wales Government through you. For this purpose, I and Mr. Nathaniel Cork, in exercise of the powers conferred upon us by certain Letters Patent, with which you are acquainted, have executed a deed-poll declaring the creation of a further amount of stock called "New South Wales Stock," bearing interest at £3 per cent., and have determined that the amount of such stock shall be issued at the rate of £100 of stock for every nominal amount of £100, which shall be represented by the scrip certificates or letters of allotment respectively, to be issued to subscribers for any part of the said loan, and in proof thereof I enclose a duplicate deed-poll under date 10th October, 1895, which has been duly enrolled.

To enable you to carry out the inscription and management of this further amount of stock under the Colonial Stock Act, I have duly made and lodged with the Inland Revenue Commissioners the necessary declaration to bring the stock under the provisions of that Act, and I send you herewith a print of that declaration, dated 22nd October, 1895.

In further exercise of the powers conferred on me as aforesaid, I beg to adopt and confirm with reference to this new issue of New South Wales Stock the terms and conditions for the inscription and management of the same by you, as set out in your letter above referred to of the 11th April, 1895.

In accordance with the usual practice, you will please pay to the Commissioners for Inland Revenue the composition for stamp duty, so as to enable the stock that shall be inscribed in your books to be transferred, free of duty, and the Commissioners will no doubt receive the duty from you under a similar arrangement to that made with reference to the previous issues of New South Wales Stock.

On behalf of the New South Wales Government, I have to request that you will be good enough to carry out this arrangement, and to pay to the Commissioners the amount of composition payable for stamp duty in respect of the stock as inscribed in your books.

On behalf of the New South Wales Government, I further authorise you, on the terms of your letter of the 11th April, 1895, above referred to, to issue to the holders of inscribed stock, who may desire the same, from time to time stock certificates to bearer, in pursuance of the provisions of the Colonial Stock Act, 1877; and I further authorise you to transmit the dividend warrants by post in the same manner and on the same conditions as the warrants for dividends on Government funds are sent.

I have, &c.,
SAUL SAMUEL.

The Governor and Company of the Bank of England.

The Treasury, New South Wales,
28th October, 1896.

G. H. REID,
Treasurer.

ESTIMATE
OF THE
EXPENDITURE OF THE GOVERNMENT
OF
NEW SOUTH WALES,
ON ACCOUNT OF
PUBLIC WORKS AND OTHER SERVICES,
FOR THE YEAR 1896-7,
PROPOSED TO BE
PROVIDED FOR BY LOAN.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
29th October, 1896.

SYDNEY : CHARLES POTTER, GOVERNMENT PRINTER.
1896.

HAMPDEN,
Governor.

Message No. 77.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the accompanying Estimates of the Expenditure of the Government of New South Wales, on account of Public Works and other Services, for the year 1896-7, proposed to be provided for by Loan.

Government House,
Sydney, 28th October, 1896.

The Chairmen of the Local Land Boards at Bourke, Cooma, Grafton, Hay, and Moree receive £150 each per annum, to cover cost of conveyance of self and Deposition Clerk.

Each District Surveyor receives £2 2s. per diem when travelling on active field duty, with equipment, total amount not to exceed £150 per annum.

Each salaried surveyor receives £150 per annum (exclusive of cost of forage, but including travelling allowance), for the use of instruments, horses, harness, tents, and camp gear, which are the property of the surveyor.

Trigonometrical Surveyors receive similar allowance to that for salaried surveyors.

* Amount not yet determined.

SCHEDULE TO THE ESTIMATES FOR 1896-7.

CONSOLIDATED REVENUE FUND.

(REPORT OF THE EXAMINER OF THE TREASURY DEPARTMENT RESPECTING PAYMENTS MADE DURING THE MONTH OF JUNE, 1896.)

Printed under No. 12 Report from Printing Committee, 6 August, 1896.

Examiner's Report.

Report of the Examiner of the Treasury Department as to Payments during the month of June, 1896.

THE number of vouchers examined and passed for payment during the month of June, 1896, totalled (approximately) 6,890, which is 500 in excess of the number examined and passed for payment during the preceding month (May, 1896), and 2,700 in excess of accounts similarly dealt with during the last month of the Financial Year ended 31st December, 1894.

No vouchers were held over which could have been paid by the 30th June, 1896, and to my knowledge all persons, with one exception, who applied for payment of their accounts were informed the money would be available by that date, the exception being a case in which application for payment was made on the afternoon of 30th June. This claim amounted to about £240, and as it was necessary to pay the money into a Bank and not to an individual, in accordance with standing order from the claimants, it was not paid until the following day, for the reason time would not permit of the lodgment of the deposit before the closing hour of the Bank.

I might add there was an exceptional rush of claimants who were desirous of receiving payment of their claims before the 30th June, 1896, the impression in many instances being that unless the amount was collected by that date payment would be delayed for an indefinite period, owing to the change in the Financial Year, by which the Votes of 1895-6 were to close on 30th June, and the Estimates for 1896-7 not having been passed by Parliament (the public, of course, were not aware of the provisions of the Audit Act Amendment Act); added to this, several Departments issued notices to contractors and others requesting them to call at the Treasury and collect the amount of their claims before the end of the month (June, 1896), a procedure not adopted hitherto, as also the fact that some Departments arranged so that accounts for gas, water, and other quarterly services, which are always paid at least a fortnight after the termination of a quarter, were made up to the middle of June, and rendered, to ensure payment of same at Treasury before the close of the month, from which it may be concluded that officers of the Government Departments used every endeavour to settle all current claims prior to the close of the Financial Year 1895-6, as well as working with a view to discharging liabilities which, in the ordinary course of business, would have been received at the Treasury and paid during July, 1896.

A. P. PEARSON,
Examiner of Accounts.

The Treasury, Sydney, 20th July, 1896.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONSOLIDATED REVENUE FUND.

(REPORT OF THE PAYMASTER OF THE TREASURY DEPARTMENT RESPECTING PAYMENTS MADE DURING THE MONTH OF JUNE, 1896.)

Printed under No. 12 Report from Printing Committee, 6 August, 1896.

Report of the Paymaster of the Treasury on the subject of Payments during the month of June, 1896.

THE payments during June, 1896, were exceptionally numerous, the number of vouchers actually paid being 7,695. This was considerably in excess of the monthly average, which is about 6,400.

This large number of payments was due to two causes:—

1. The anxiety of the public to obtain payment of their accounts before the termination of the Financial Year, on the supposition that if they were not so paid payment would be delayed indefinitely.
2. Our special efforts to pay every voucher that could possibly be paid before the end of the month, so as to utilise the 1895-6 Votes to the fullest extent, and also to avoid the confusion which would occur between our Department and the Departments issuing the vouchers by our charging on to the 1896-7 Votes claims which they had debited to the 1895-6 Votes.

In this connection I might mention that the whole of my staff remained at the office till late on the night of the 29th of June, dealing with vouchers, &c., in order that every account I had chargeable to the 1895-6 Votes might be ready for payment on the following day.

As showing that special endeavours were made by the Treasury to expedite the payment of accounts during June, 1896, I would point out that 864 vouchers were paid on 30th June, 2,633 vouchers were paid during the last seven days of June, and 7,695 vouchers were paid during the whole month of June; while in December, 1894, the end of the previous Financial Year, the following numbers were paid:—427 on 31st December, as against 864 on 30th June last; 1,434 during the last seven days of the month of December, as against 2,633 during last seven days of June; 4,752 during the whole month of December, as against 7,695 in last June.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONSOLIDATION OF AUSTRALASIAN LOANS.
(RETURN RESPECTING.)

Printed under No. 26 Report from Printing Committee, 11 November, 1896.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 4th November, 1896, That there be laid upon the Table of this House,—

“A copy of the Despatch of Sir P. O. Fysh upon the Consolidation of “Australasian Loans.”

(*Mr. W. H. B. Piddington.*)

Memorandum by The Treasurer, Sir P. O. Fysh, to The Hon. the Premier.

Treasury, Hobart, 5 June, 1896.

My mind has long been exercised upon the necessity for innovations and reform of our system of finance in London.

In February, 1895, you will remember the Federal Council of Australasia carried, at my instance, the following resolution:—“That this Council desires to represent to the Governments of Australasia that more economical finance may be secured by jointly, or by some federal authority, inviting subscriptions to and undertaking the management of future Loans.” I have not followed up the purpose therein expressed, because hoping for an early development of federal government for these Colonies. The time, however, seems now opportune for some movement, and waiting the unification of the debts of all the Colonies as Australasian Federal Consols, which may be more remote than we hope for, may lose the advantages for conversion of our Tasmanian debt which the plethora of capital now offer.

Herewith will be found tables, prepared by the Government Statistician, from which it appears that conversion to 3 per cent. can be effected upon the market quotations of 27th May, 1896, of Tasmanian Stock at a capital cost of £887,884, and effecting an annual saving of interest between the average face rate of interest now paid of 3·824 per cent. and a conversion rate of 3 per cent., which gives £36,851, and, further, that by providing a sinking fund of £8,062 the increased nominal debt of £887,884 would, at 3 per cent. in fifty years, be wiped off, and the transaction give a net immediate annual saving of interest of £28,789.

A table also supplies, as the result of valuations of the capital sums invested at market prices, 27th May, 1896, that 2½ per cent. Imperial Consols at £112 5s. give a net effective rate of interest to investors of £2 5s. per cent., and that for the seven Australasian Colonies, now paying on faced rates of 3, 3½, and 4 per cent. the valuation, at shortest optional redemption periods, gives a net effective rate of 2·957. The equivalent immediate saving on Australasian debt of £210,538,117 would amount to £1,015,000.

I have also prepared a statement of charges paid in connection with flotations of Loans, and London management of Australasian finances, which exposes practices and agreements which could not be more extravagant, and which, if continued, and on the assumption that piecemeal the whole debt of £200,000,000 will be handled during the next thirty years, will be at a loss to the Colonies of £298,830 per annum, the share of Tasmania being, roughly, about £12,000 per annum.

Although the tables were made up on a 3 per cent. conversion, it may be advisable to assimilate the rates with 2½ Imperial Consols. Present conversion may be under less advantageous circumstances prior to than after the formation of an Australasian Commonwealth, under which the entire lands of the Colonies would be associated with the joint and several guarantees of each and all of the Colonies, and the creation of an interminable stock be of more easy accomplishment; but upon such points very valuable advice can be obtained through Sir Robert Herbert's agency. There

525—A

[605 copies—Approximate Cost of Printing (labour and material), £8 14s. 2d.]

There is grave cause for alarm in the present condition of colonial indebtedness, for, notwithstanding the Australasian volume of trade has reached £144,000,000 in a year, and may be quoted at £120,000,000 now, or a considerable excess upon the volume of trade of Great Britain when Her Most Gracious Majesty ascended the throne, and further, that the accumulation of private wealth in Australasia gives £309 per head of population against £246 for Great Britain, and that agricultural, manufacturing, and mining pursuits are but in their infancy in Australasia, these Colonies may be paralysed for a time should European developments cause a crisis contemporaneously with a need by the Colonies to renew even a tenth portion, or £20,000,000, of their Loans.

British financiers will also possibly advise that for investment an interminable stock may be preferred, and, possibly, with the option to Colonies of redemption in fifty years.

The table of costs attending our present methods of finance in London may serve as a basis upon which to found advice for remedies.

I shall very much prefer that all Australasian finance be concentrated in one office in London, the agency of the Australasian Commonwealth, or waiting for that, the Australasian Finance Agency; but this anticipates federal action by the probable agreement of the Australasian Colonies to associate for the purposes herein set forth, as to which agreement no progress has yet been made, but as to which I address you separately for communication with the Honorables the Premiers of other Australasian Colonies.

There is, I trust, ample in this memorandum to enable the fullest inquiry by Sir Robert Herbert, and, as I hope to move in the matter during the coming Session of Parliament, I shall be glad of his prompt reply.

Possibly all the Agents-General may be induced by Sir Robert to meet, and, after discussion, make joint representations to their Governments upon the subject.

If the Colonies be brought into line on such an important item of finance as the debt, it will be a long step towards complete federation.

It will be observed that all calculations are made on the assumption that the stocks can be exchanged at the market value of 27th May, and therefore the cost is placed at a maximum; but, although the figures include a quarter per cent. as a bonus to induce the public to come in, there does not appear on our part any necessity to follow Mr. Goschen's lead in this respect, for, with the premium prices now quoted, serious fluctuations of an important nature, if not imminent, must be expected, as such values cannot be regarded as permanently established, and should induce holders to accept converted stock at less than the capital value of existing prices at 3 per cent.

I cannot hope that our bankers will afford to you any assistance, or even valuable advice; they cannot look with any favour upon these proposals, and we must be prepared for their frowns, or, what may be as bad, their indifference coldly expressed. That position has, of course, its value, and Tasmania, if alone, may find it obstructive, although not permanently successful; but, Australasia, if unitedly taking up the purpose, will establish investment stocks second in popularity only to Imperial Consols, and can breast all opposition.

The time must come, and I think is present, for the management by our own officers of all financial matters in London, and dealing directly with the public instead of through syndicates and bankers; and the exigencies of holders of stock, and the further cause which may arise for future borrowings, should keep the doors of the Inscribed Stock Office open to the public in perpetuity, and Australasian Consols be dealt in as freely and as frequently as are Imperial Consols.

Obviously, then, the matters for reference are:—

1. The establishment of an Australasian Federal Finance Agency, in which the Australasian Agents-General shall *ex officio* be the "Managers."
2. The conversion and consolidation of Australasian Loans at a reduced uniform rate.
3. To report upon the purpose which is submitted, that the said Australasian Finance Agency shall undertake the flotation, inscription, and management of Loans, and all finance connected therewith.
4. To advise upon the probable capital sum at which investors should be invited to convert their holdings.
5. To advise upon the preference for interminable stocks, and whether option to redeem in fifty years should be had by the Colonies.
- Or, 6. Failing any concerted action by the other Colonies, to advise separately upon the matters having regard to Tasmanian interests only.

P. O. FYSH,
Treasurer.

CHARGES IN CONNECTION WITH THE FLOTATION OF AUSTRALASIAN LOANS.

£200,000,000, AVERAGE CURRENCY 30 YEARS, AND LONDON MANAGEMENT OF COLONIAL FINANCE IN LONDON.	per annum.
To Bankers' charges, at from £100 to £600 per million, averaged at £400	£80,000
To margin for brokers and syndicates between minimum price fixed and their selling price on closing of tenders, £2 per cent.	133,333
To Bankers' demand of £10,000, floating balance for Tasmania—probably much larger for other Colonies—valued at lowest face rate of Colonial Stocks, 3 per cent., say	1,000
To Interest lost, say on total of all liabilities discharged by banks by reason of their demand to be placed in funds seven days in anticipation of the due date of £8,000,000, the annual disbursement for interest alone at 1s. 4d. per cent.	5,333
To bank of issue on nominal amount of each loan floated, £200,000,000 at 5s. per cent. = £500,000 in 30 years	16,666
To Brokers, on tenders, at 5s. per cent.	16,666
To Bankers, on repayment, at 1s. 3d. per cent.	4,166
To British Government—Commutations of stamp duty, 12s. 6d. per cent.	41,666
	£298,830

Immediate Saving to Revenue, £37,500; equivalent per cent.—To Interest, 12·60 per cent.; to original Debt, 0·482.

NOTE.—An equivalent saving in Australasian Debt of £210,538,117 would amount to £1,015,000 at first.
* Redeemable at option, 1920—1940.

PROPOSED SCHEMES FOR THE CONVERSION AND CONSOLIDATION OF THE EXISTING PUBLIC DEBT OF THE SEVEN COLONIES OF AUSTRALASIA.

SCHEME B.

For existing Stock—(A) issue equivalent value to holders in 3 per cent. Stock par value; (B) adding ¼ per cent. bonus, to induce holders to transfer; (C) establish Sinking Fund, and wipe off the extra nominal debt in fifty years:—

Existing interest	£ 8,152,319
Existing nominal debt.....	210,541,142
Present equivalent in 3 per cent. par Stock	236,227,476
Add ¼ per cent to induce transfer.....	590,569
	<u>236,818,045</u>
Interest	7,104,541
Immediate saving.....	1,047,778
Deduct yearly contribution to sinking fund for fifty years.....	233,000
Immediate saving to revenue.....	<u>814,778</u>

SCHEME C.

Same as Scheme B, but no provision to wipe off extra nominal debt.

Immediate yearly saving to revenue 1,047,778

R. M. JOHNSTON, 5/6/96.

CONVERSION AND CONSOLIDATION OF EXISTING PUBLIC DEBT OF THE SEVEN COLONIES OF AUSTRALASIA.

ESTIMATED equivalent in 3 per cent. par Stock of the existing nominal public debt of the seven Colonies of Australasia ; also showing approximately the immediate saving to revenue in yearly burden of interest if a transfer or conversion could be effected forthwith.

Variable.	(A) Proportion of debt actually computed, with due regard to nominal rate and years of redemption.			(B) Estimated equivalent in respect of total debt based upon calculated results. (See A.)					Immediate saving to revenue per year.		Sinking Fund contribution per year for fifty years to wipe off extra nominal debt.	
	Existing funded debt (proportion).		Present capital value.	Total existing debt and interest.		Present capital value above 3 per cent. par.	Equivalent present capital value of total debt in 3 per cent. par Stock.		Amount.	Per cent. to total debt.		
	Amount.	Yearly interest.	Above 3 per cent. par.	Amount.	(B) Yearly interest (present). †	(B)	(B) Amount.	(B) Yearly interest.	(B)	(B)	(B) Amount.	Net saving per year immediately.

* Premium present capital value computed on years to run of Stocks falling due and redeemable in various years from year 1896 onwards.

† Computed on the mean rate of interest for year 1896.

‡ Computed on the mean of results ascertained in respect of the six Colonies of Australia and Tasmania. This probably gives too favourable a result for New Zealand, as a very large proportion of her debt in 4 per cent. Stock has a long period to run before redemption.

§ Approximately on year 1896.

Proposed Scheme for Conversion and Consolidation of Existing Funded Debt of Tasmania.

(31st December, 1896.)

DEBT, £7,782,170. Interest Current Year, £297,600, or 3.824 per cent.; redeemable from Years 1897 to 1926. Present Capital Value, or Equivalent in Three per cent. par Stock, £8,669,554. Excess of Present Capital Value above existing Nominal Debt, £887,784.

CONVERSION SCHEMES B AND C.

(The figures as to final effects differ slightly from accompanying Table, as they are modified by the extra 1/4 per cent. here proposed.)

SCHEME B.

IMMEDIATE SAVING OF £28,789 TO REVENUE YEARLY.

(a) Negotiate with existing Stockholders an exchange of an equivalent value in Three per cent. par Stock, to be issued redeemable in — to 50 years, adding (b) 1/4 per cent. as a bonus to induce exchange within a time to be fixed; (c) also establish a Sinking Fund to wipe off extra Nominal Debt in 50 years; thus—

Equivalent of £7,782,170 in Three per cent. par Stock, to be issued redeemable in — to 50 years	£8,669,954
Add 1/4 per cent. to induce transfer	21,675
Total	£8,691,629
Interest at Three per cent.	£260,749
Add Annual Contribution to Sinking Fund to wipe off extra Nominal Debt in 50 years	8,062
	£268,811
SAVING AS ABOVE PER YEAR IMMEDIATELY	£28,789

SCHEME C.

IMMEDIATE SAVING OF £36,851 TO REVENUE YEARLY.

Same as B, but making no provision to reduce Nominal Debt to original volume—

Interest on £8,691,629	£260,749
IMMEDIATE ANNUAL SAVING TO REVENUE	£36,851*

*Equivalent in effect to a contraction of existing Nominal Debt to £8,820,000, or by £962,170; or representing 0.471 per cent. of original Capital Debt. †

†A corresponding saving of 0.471 per cent. on £210,538,117 Debt of Seven Colonies would represent a sum of £991,600.

R. M. JOHNSTON.
31/5/96.

Equivalent Present Capital Value of Tasmania unfunded Debt of £7,782,170 falling due or redeemable between years 1897-1926 assuming that stocks can be renewed at 3% par - £8663954 3% par stock fig. £887,784.

Mean of seven Colonies					{ At shortest R. P.		2·957
					{ Gross		3·011

From reference to the mean effective rate of interest, it will be seen that the shortest optional period when Stock may be redeemed (viz., 2·957), it appears that Tasmania's 3½ per cent. stock, = 2·862 (at shortest optional period of redemption), stands amongst the best of all Australasian Stocks, being 0·095 below the average of all.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TREASURY BALANCES.
(APPLICATION OF, FROM ONE HEAD OF SERVICE TO ANOTHER.)

Printed under No. 3 Report from Printing Committee, 4 June, 1896.

The Auditor-General to The Honorable the Speaker of the Legislative Assembly
of New South Wales.

Sir,

Department of Audit, Sydney, 1 June, 1896.

Under the directions contained in the 18th section of the "Audit Act of 1870," I do myself the honor to submit to you, for presentation to the Legislative Assembly, copy of a minute of His Excellency the Governor and Executive Council, dated 19th May, 1896, authorising the transfer of an amount from one head of service to supplement a vote for another service.

I have, &c.,
E. A. RENNIE,
Auditor-General.

Minute Paper for the Executive Council.

Subject :—Transfer of a sum of £300 from item 158 of 1895-6 to supplement item 208 of the same year.

The Treasury, New South Wales, Sydney, 19 May, 1896.

THE Colonial Treasurer recommends, for the approval of His Excellency the Governor and the Executive Council, under the provisions of section 18 of the "Audit Act of 1870," that a sum of £300 be transferred from item 158 of 1895-6 (upon which there will be at least an equal credit balance on 30th June, 1896), to supplement item 208 of the same year, the balance upon which latter is found to be inadequate to meet claims properly chargeable to it.

His Excellency the Governor and the Executive Council.

G. H. REID.

The Executive Council approve of the transfer of the amount herein specified, as proposed.—ALEX. C. BUDGE, Clerk of the Council. Minute 96-26, 19/5/96. Confirmed, 26/5/96. Approved.—HAMPDEN, 19/5/96.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TREASURY BALANCES.

(APPLICATION OF, FROM ONE HEAD OF SERVICE TO ANOTHER.)

Printed under No. 3 Report from Printing Committee, 4 June, 1896.

The Auditor-General to The Honorable the Speaker of the Legislative Assembly of
New South Wales.

Sir,

Department of Audit, Sydney, 2 June, 1896.

Under the directions contained in the 18th section of the "Audit Act of 1870," I do myself the honor to submit to you, for presentation to the Legislative Assembly, copy each of Minutes of His Excellency the Governor and Executive Council, Nos. 25 and 35, dated 12th May, 1896, authorising the transfer of an amount from one head of service to supplement a Vote for another service.

I have, &c.,

E. A. RENNIE,
Auditor-General.

Minute for Executive Council.

Recommending the transfer of £1,500 from the Contingent Vote, Agriculture and Forestry, for 1895-6, item No. 336 to item No. 335, for the same year (Public Watering-places and Artesian-boring).

Department of Mines and Agriculture, Sydney, 12 May, 1896.

It is recommended to His Excellency the Governor and the Executive Council that a transfer of the sum of one thousand five hundred pounds (£1,500) be made, in terms of the 18th clause of the Audit Act, from the Contingent Vote, Agriculture and Forestry, for 1895-6, item No. 336 to item No. 335 (Public Watering-places and Artesian-boring), for the same year, it being insufficient to meet its requirements, and in view of the sufficiency of Vote No. 336 to admit of such charges being defrayed from it.

S. SMITH.

The Executive Council approve of the transfer of the said amount from the Vote to the Vote referred to, in terms of the said Act.—A. C. BUDGE, Clerk of the Council. Minute 96-25, 12/5/96. Approved.—HAMPDEN, 12/5/96. Confirmed, 19/5/96. His Excellency the Governor and the Executive Council.

Minute for Executive Council.

Recommending the transfer of £700 from the Contingent Vote of the Department of Mines for 1895-6, item No. 330 to item No. 335, for the same year (Public Watering-places and Artesian-boring).

Department of Mines and Agriculture, Sydney, 12 May, 1896.

It is recommended to His Excellency the Governor and the Executive Council that a transfer of the sum of seven hundred pounds (£700) be made, in terms of the 18th clause of the Audit Act, from the Contingent Vote of the Department of Mines for 1895-6, item No. 330 to item No. 335 (Public Watering-places and Artesian-boring) for the same year, it being insufficient to meet its requirements, and in view of the sufficiency of Vote No. 330 to admit of such charges being defrayed from it.

S. SMITH.

The Executive Council approve of the transfer of the said amount from the Vote to the Vote specified, in terms of the said Act.—A. C. BUDGE, Clerk of the Council. Minute 96-35, 12/5/96. Approved.—HAMPDEN, 12/5/96. Confirmed, 19/5/96. His Excellency the Governor and the Executive Council.

1896.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TREASURY BALANCES.

(APPLICATION OF, FROM ONE HEAD OF SERVICE TO ANOTHER.)

Printed under No. 5 Report from Printing Committee, 18 June, 1896.

The Auditor-General to The Honorable the Speaker of the Legislative Assembly
of New South Wales.

Sir,

Department of Audit, Sydney, 16 June, 1896.

Under the directions contained in the 18th section of the "Audit Act of 1870," I do myself the honor to submit to you, for presentation to the Legislative Assembly, copy of a minute of His Excellency the Governor and Executive Council, dated 2nd June, 1896, authorising the transfer of an amount from one head of Service to supplement a vote for another Service.

I have, &c.,
E. A. RENNIE,
Auditor-General.

Minute Paper for the Executive Council.

Subject:—Transfer of a further sum of £100 from Item 158 of 1895-6 to supplement Item 208 of the same year.

(No. 84.)

The Treasury, New South Wales, Sydney, 30 May, 1896.

WITH reference to his minute dated 19th instant, No. 78, the Colonial Treasurer recommends, for the approval of His Excellency the Governor and the Executive Council, that, under the provisions of section 18 of the "Audit Act of 1870," a further sum of £100 be transferred from the Vote for Treasury (Item 158 of 1895-6), the credit balance upon which will permit of such transfer, to supplement the Vote to meet unforeseen expenses to be hereafter accounted for (Item 208) of the same year, the balance upon which latter is found to be still inadequate to meet claims properly chargeable to it.

His Excellency the Governor and the Executive Council.

G. H. REID.

The Executive Council approve of the transfer of the amount referred to from the Vote to the Vote referred to as proposed.—ALEX. C. BUDGE, Clerk of the Council. Minute 96-29, 2/6/96, confirmed, 9/6/96. Approved.—HAMPDEN, 2/6/96.

NEW SOUTH WALES.

TREASURY BALANCES.

(TRANSFER OF, FROM ONE ITEM TO ANOTHER ITEM OF EXPENDITURE IN CONNECTION WITH THE
TREASURY DEPARTMENT.)

Printed under No. 8 Report from the Printing Committee, 9 July, 1896.

The Auditor-General to The Honorable the Speaker of the Legislative Assembly
of New South Wales.

Sir, Department of Audit, Sydney, 8 July, 1896.
Under the directions contained in the 18th section of the "Audit Act of 1870," I do myself the honor to submit to you, for presentation to the Legislative Assembly, copy of a minute of His Excellency the Governor and Executive Council, dated 23rd June, 1896, authorising the transfer of an amount from one head of Service to supplement a vote for another Service.

I have, &c.,
E. A. RENNIE,
Auditor-General.

Minute Paper for the Executive Council.

Subject:—Transfer of a sum of £300 from Item 160 of 1895-6 (Customs Contingencies) to supplement Item 208 of the same year (to meet unforeseen expenses to be hereafter accounted for).

(No. 101.) The Treasury, New South Wales, Sydney, 20 June, 1896.
THE Colonial Treasurer recommends, for the approval of His Excellency the Governor and the Executive Council, under the provisions of section 18 of the "Audit Act of 1870," that a sum of three hundred pounds (£300) be transferred from the Vote "Customs" (Item 160 of 1895-6), the credit balance upon which will permit of such transfer, to supplement the Vote "To meet unforeseen expenses to be hereafter accounted for" (Item 208 of the same year), the balance upon which is found to be inadequate to meet claims properly chargeable to it.

His Excellency the Governor and the Executive Council.

G. H. REID.

The Executive Council approve of the transfer of the sum referred to, from the Vote to the Vote specified, as herein recommended.—ALEX. C. BUDGE, Clerk of the Council. Minute 96-33, 23/6/96, confirmed, 30/6/96. Approved.—HAMPDEN, 23/6/96.

NEW SOUTH WALES.

LAND TAX VALUATIONS AND ASSESSMENTS.

(PETITION FROM THE COUNCIL OF THE BOROUGH OF PETERSHAM IN FAVOUR OF THE HEARING OF APPEALS PRIOR TO THE PAYMENT OF THE TAX.)

Received by the Legislative Assembly, 12 November, 1896.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the Council of the Borough of Petersham,—

HUMBLY SHOWETH :—

1. That the values placed upon lands within this borough by the Taxation Commissioners are in very many cases excessive, and will require readjustment if the Act under which the taxes are being levied is to be equitably administered.

2. That your Petitioners are of opinion that it is very unjust to compel payment of the taxes imposed by the Commissioners prior to the hearing of appeals.

3. That your Petitioners would earnestly urge that every facility be given for the hearing of appeals in the various centres of population, as many of those desirous of appealing could not attend at the Sydney Court or the offices of the Taxation Commissioners without great personal inconvenience and expense.

Your Petitioners, therefore, humbly pray that your Honorable House will take such steps as in your wisdom may be deemed necessary to give effect to the requests herein.

And your Petitioners, as in duty bound, will ever pray.

Dated this 12th day of November, 1896.

ALFD. ROFE,
Mayor.
F. A. MORGAN,
Council Clerk.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE FINANCIAL STATEMENT.

(CORRESPONDENCE BETWEEN THE COLONIAL TREASURER AND MANAGERS OF BANKS IN REFERENCE TO.)

Printed under No. 15 Report from Printing Committee, 27 August, 1896.

The Hon. G. H. Reid, Premier and Colonial Treasurer, to The General Managers, Bank of New South Wales, the Commercial Banking Company of Sydney, and the City Bank.

Gentlemen,

The Treasury, New South Wales, 15 August, 1896.

In view of the very injurious criticisms made in certain quarters with reference to my exposition of the financial position of the Colony, and the fact that the payments made in 1895-6 on account of 1895 (six months) and previous years were not charged against the revenue for 1895-6, I beg to request that you will be good enough to examine the public documents sent herewith as per accompanying list, and to inform me whether, in your opinion, any person, having a competent knowledge of my financial proposals as submitted to Parliament, in connection with the recent change in the mode of keeping the Public Accounts, as explained in my budget speeches, Ways and Means Accounts, and the debates on the same, also the debates on the Bills to give effect to those changes, could fairly plead ignorance of the following facts:—

1. That I intended to carry on the accounts to 30th June, 1895, and in respect of appropriations open for expenditure since that date, for the periods before and up to 30th June, 1895, upon the old system.
2. That I intended to add any deficiency arising on the operations of those six months to the deficiency debt, and therefore to be provided for by Treasury Bills.
3. That I intended to present the accounts for the year—from 1st July, 1895, to 30th June, 1896—to Parliament free from any of the expenditure chargeable under the old system to previous periods.
4. I would also be glad if you would consent to look at the cash balances on 30th June, 1896, and state whether there was or was not a surplus of revenue in 1895-6 over expenditure, chargeable by law to the year 1895-6; and, if so, how much?

Your faithful servant,
G. H. REID.

The General Managers, Bank of New South Wales, the Commercial Banking Company of Sydney, and the City Bank, to The Hon. G. H. Reid, Premier and Colonial Treasurer.

Dear Sir,

Sydney, 19 August, 1896.

We beg to acknowledge the receipt of your letter of 15th instant, together with copies of *Hansard*, the Treasury Bills Deficiency Bill, the Audit Amendment Act, and other documents.

These have had our most careful attention, and judging by the speeches and debates in *Hansard*, and by the legislation relative to audit and appropriations founded thereon, we are of opinion that it was your intention (to use your own words)—

- “1. To carry on the Public Accounts to 30th June, 1895, and in respect of appropriations open “ for expenditure since that date, for the periods before and up to 30th June, 1895, on the “ old system;
- “ 2. To add any deficiency arising on the operations of those six months to the deficiency debt, “ to be provided for by Treasury Bills; and
- “ 3. To present the accounts for the year—July, 1895, to 30th June, 1896—to Parliament free “ from any of the expenditure chargeable under the old system to previous periods.”

With regard to the concluding paragraph of your letter, asking us “ to look at the cash balances on the 30th June, 1896, and state whether there was or was not a surplus of revenue in 1895-6 over expenditure, chargeable by law to the year 1895-6; and, if so, how much?” we feel we are unable, with the information at our command, to give an answer.*

We are, dear Sir,
Yours faithfully,
J. RUSSELL FRENCH.
T. A. DIBBS.
C. STANTON.

* Return obtained from the Auditor-General on this point, and laid on the Table this day, showing cash surplus of £331,362 14s. 1d.—G.H.R., 20/8/96.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CITY MUTUAL LIFE ASSURANCE SOCIETY'S (LIMITED)
 ACT ENABLING BILL.

THURSDAY, 28 MAY, 1896.

Present:—

MR. GRIFFITH, MR. MAHONY,		MR. McLEAN, MR. W. H. B. PIDDINGTON.
FRANK FARNELL, Esq., IN THE CHAIR.		

G. E. H. Sanders, Esq., appeared as Solicitor for the City Mutual Life Assurance Company.

Edward Priestman, Esq., sworn and examined:—

1. *Chairman.*] What position do you hold in connection with the City Mutual Life Assurance Company? E. Priestman,
Esq.
2. Are you aware of the object of the directors in asking for the passage of the Bill under consideration? 28 May, 1896.
The main object is to keep outsiders from looking over the books, and getting our policy-holders names. It would be very damaging if agents of rival companies, by paying a fee, could look over our books and try to get our policy-holders from us.
3. At present they are able to do that on payment of a fee? Yes.
4. Is such a practice allowed in connection with other life assurance societies? No.
5. I understand that this company is registered under the Companies Act? Yes.
6. Are the other assurance societies established by special Act of Parliament, or under the Companies Act? Under the Chartered Companies Act I think. Two are registered.
7. You are desirous then of placing your company on the same footing as the other companies? Yes.
8. Has the practice of people examining your register been availed of to any extent? A good deal last year.
9. Then all you ask is that the books of all the other companies should be open to the public in the same way as yours, or that you should be placed on the same footing as the other companies? Yes, that we should be placed on the same footing as the others.
10. *Mr. McLean.*] You say the object of getting the Bill through is to prevent outside people from inspecting the books of the company and getting to know your policy-holders, but you propose in the Bill to deprive your own members of the same privilege? It is inadvisable for any one outside the office to look over the books. If they want to send out ballot-papers, however, we can do it for them.
11. A person who is seeking a position on the Board of a company has at present the right to inspect the list of members? Yes.
12. And the Bill would practically prevent him making that inspection or having an opportunity of sending out circulars? Yes; but we send the circulars for them.
13. *Mr. Willis.*] Is there any guarantee that you would do it;—can they compel you to do it? No.
14. *Mr. McLean.*] Then if the Bill passes in its present form there will practically be no guarantee that a candidate for the position of director will have a list of members furnished to him? No; we would not supply a list to anybody.
15. Practically the directors and officers of the company will be the only people who will have a list of members at their command? Yes.
16. In connection with the companies working under charter;—do you know whether any of their members have the privilege of inspecting the list of members? No; they cannot inspect the register.
17. Do you know what custom is in vogue for reaching the shareholders? They send the ballot-papers to the head office, and they are sent out for them—just the same as we do. The only thing is that last year we had a good many people coming and inspecting our list of policy-holders, and we thought it was very inadvisable, because it left the books open for the inspection of canvassers for rival companies who might try to get our business from us.
- 18.

- E. Priestman, Esq.
28 May, 1896.
18. Do you know of any cases where canvassers of rival companies actually inspected your books? I cannot say we actually know of any canvassers, but a good many people whom we did not know came in and wanted to inspect the books.
 19. Could you furnish any information as to the number of persons who paid the fee prescribed in the Companies Act for the purpose of inspecting the list of members? Several wanted to do so, but we refused to allow them.
 20. *Mr. Willis.*] Although you had not the power? Yes, and they took the refusal as sufficient.
 21. *Mr. Mahony.*] They wanted to pay and inspect? Yes.
 22. *Mr. Willis.*] How does the A.M.P. Society do when there is an election;—how does the candidate reach the shareholders? He has his circulars printed and sent to the head office, and they forward them for him.
 23. Do they do that as a matter of favour, or are they compelled to do it? I do not know whether there is any compulsion about it, but we have never refused to forward anything of the sort.
 24. *Mr. Mahony.*] What is the objection to members of the society inspecting the register? A person might join a fortnight or a month before the end of the year. He might do that in order to go through the books and obtain a list of the names. He might get money paid to him by a rival company to enable him to become a member of our company, and then he might turn round on us by trying to get the list of members from us.
 25. How long have you been a registered company? Since 1879.
 26. During that period your lists have been open to inspection;—what proportion of the members of the society would examine the register per annum? I do not think a single member examined the register last year. Two members sent a party to take out the names to enable them to send our circulars on their own account.
 27. How long have you been in the office of the company? Eleven years.
 28. If there had been any bother during that time about inspecting the register you would have heard of it? Yes.
 29. Has there been any case in which members have made any bother about seeing the register? It has never been asked for by members until last year.
 30. When was the first occasion on which your attention was drawn to the fact that the outside public were taking an interest in your register? Last year.
 31. How many people wanted to pay their shilling and you declined it? About half a dozen.
 32. When did that occur? Towards the end of last year.
 33. Were there any elections for directorships? Yes; there were two vacancies.
 34. And it was then that strangers came and offered to pay the fee? Yes.
 35. Can you say how many there were? Not more than half a dozen.
 36. Did they all come in one day or week? I saw two of them in the office together in one day, and I have seen separate ones in within a fortnight.
 37. That was the first time in seventeen years that this occurred in connection with the outside public? Yes; the election of directors up to within two or three years ago has been by proxy. Now the election takes place by means of open ballot-papers. We had our Acts altered to provide for it.
 38. You mean the Articles of Association under which you are registered? Yes.
 39. Would that account for the outsiders coming in? A good deal.
 40. Why would it account for their coming in? At the elections by proxy it was simply a matter of holding up your hand at a meeting of the directors.
 41. The elections were by means of a show of hands unless a poll was demanded? Yes; when the proxy papers were sent out we had no trouble at all. It is only since the ballot system was introduced that this has occurred.
 42. How do you connect the introduction of the ballot system with these people coming to the place? It is very hard to say. Possibly this competition might have occurred on account of the society growing so much last year. It may not have anything to do with the alteration of voting by proxy to voting by ballot.
 43. Then until last year none of the public came, and your mind suggested that they came in consequence of changing from proxy voting to voting by ballot-papers? Simply because we had none of it under the proxy system.
 44. But you cannot assign, even in your own mind, any specific reason beyond that? No.
 45. It is really a surmise? Yes.
 46. Did you know any of the half dozen who came during the fortnight? No.
 47. I presume you know most of the recognised insurance people in Sydney? Yes.
 48. None of these people came? No.
 49. Have you any reason for supposing they were sent by any of them? Yes; I know in one instance that one of them was.
 50. Tell us about it? One party came on a Saturday morning and spent the morning copying the names out of the policy register for two members who were going up for directorship.
 51. He came on behalf of members? Yes; of members who were not on the Board at the time.
 52. But that does not indicate that they were copying the register for the purpose of interfering with your business? No; that was the only instance which I saw. With regard to the five other cases, we did not know who the people were. They might have been people trying to obtain information from our register in order to use it on behalf of some other company.
 53. You think that might have been possible? Yes.
 54. Did the people look at the register or copy it? They wanted to see the register and offered their fees, and we refused them.
 55. Do you think any harm could result from your register being open to your *bonâ fide* members? Yes; I think a good deal of harm could be done by a free perusal of the books.
 56. What is the law in connection with the Colonial Mutual Society whose head office is in Melbourne? They are under the Friendly Societies Act, I think.
 57. Do you know whether an inspection of registers is refused in Victoria? I do not know, but I think it is refused.
 58. *Mr. Piddington.*] Is the object of the Bill merely to bring the practice relating to the inspection of registers on all fours with that which obtains in other insurance societies? Exactly.

THURSDAY,

THURSDAY, 4 JUNE, 1896.

Present:—

MR. McLEAN,		MR. MAHONY,
MR. GRIFFITH,		MR. W. H. B. PIDDINGTON.
FRANK FARNELL, Esq., IN THE CHAIR.		

George Edward Holyoake Sanders, Esq., Solicitor, appeared as Solicitor for the Bill.

G. E. H. Sanders, Esq., sworn and examined:—

- 59. *Chairman.*] You are solicitor to the City Mutual Life Assurance Society in connection with this Bill? Yes.
- 60. *Mr. McLean.*] Are you aware of the practice of the other life insurance companies which are registered in New South Wales, in regard to the exhibition of a list of shareholders? The Australian Mutual Provident Society, and the Mutual Life of Australasia have a charter of their own, and frame their own regulations under it.
- 61. Is there any provision in their Act of Incorporation parallel with the section of the Companies Act which compels the exhibition of a list of members? No.
- 62. Do you know what practice they adopt in regard to the issuing of circulars to their members on behalf of those who are candidates for the position of director? As far as the Australian Mutual Provident and the Mutual Life are concerned, they do not issue circulars to anybody, and they do not produce their policy registers even to the directors. If anyone is a candidate for the position of director he advertises it in the usual way and trusts to his own popularity to obtain votes.
- 63. Is there anything in your Articles of Association or by-laws which would compel you to issue any circulars which might be sent to you by any shareholder who is seeking a position on the Board? No; the Articles are being revised now, but there is no such provision in them at present.
- 64. *Mr. Mahony.*] You have mentioned the Australian Mutual Provident, and one or two other societies which have charters of their own in the Colony;—are there any companies here carrying on the same sort of business as you are, which are registered under the Companies Act here? No; except the Citizens Life, which is not registered the same as we are. It is a registered company by shares. Their policy register is private to themselves.
- 65. I suppose you are aware that there are companies in Melbourne registered under the Companies Act with provisions precisely similar to your own? Yes.
- 66. And some of these have branch offices in New South Wales? Yes.
- 67. Then, in Victoria they are in precisely a similar condition to yourselves? Yes.
- 68. They have not made any attempt to alter that condition? Not to my knowledge.
- 69. Do you not think the difficulty could be got over in some other way;—could you not alter the constitution of your company? The only way to do that would be by getting a charter the same as the A.M.P., or Mutual Life have. You could get rid of the Companies Act and do that.
- 70. Do you not think it would be better to manage it in that way? There is no doubt that we could do it in that way, but the expense would be something enormous. I may state that the companies who have head offices in Melbourne, and branches here, are the National Mutual, the Colonial Mutual, and the Widows' Fund. They absolutely refuse to show a copy of their register to anyone. I have interviewed the managers on the subject, and they have never yet been asked to show it, and if they were asked they would refuse.
- 71. That remark would apply equally to any branch office you have in Victoria? Yes.
- 72. *Mr. Piddington.*] Do you know whether they have refused to give information in Victoria? They have not been asked for it. It has been an understood thing amongst companies in Victoria, that they would not show the policy register. It is a private book kept in the office, and is shown to nobody.
- 73. *Mr. Griffith.*] As a matter of law, if you instructed an agent of yours in Melbourne to demand a list of the policy-holders in any of the Victorian companies, they would be legally bound to give it to you on payment of 6d.? Yes; but I presume in Melbourne they only keep a list of Victorian policy-holders which would be of no good to us.
- 74. According to the Victorian Act they must keep a list of the whole of their members, which would, of course, include the Sydney members? Yes.
- 75. *Mr. Mahony.*] How many companies are there carrying on business in Sydney with head offices in Melbourne—I mean companies of the kind to which you have been referring? Three—the National Mutual, the Colonial Mutual, and the Widows' Fund.
- 76. Then, in New South Wales, with your company, you are in no worse position than you are in Melbourne with your company? No.

G. E. H. Sanders, Esq.
4 June, 1896.

George Crowley, Esq., Manager of the City Mutual Life Assurance Society (Limited), sworn and examined:—

- 77. *Chairman.*] Will you briefly explain the object of the introduction of the Bill? It is because we are placed at a disadvantage compared with the chartered companies. We are bound by law to show our list of members to any rival agent. We have had more than one application for it. Of course we took counsel's opinion on the matter, and were advised that we must show it. Agents have been getting lists of our members, and going round to them and canvassing and twisting them. Not only that, but some of our members' private business has been divulged. One policy-holder came to me and said that he did not wish people to know what the amount of his insurance was. Of course they are not ashamed of being assured, but they say they can go to the A.M.P. or Mutual Life Societies, and have their business kept private. We pay a big price to get our business, and if agents come and endeavour to twist it we cannot retaliate. We have no means of getting at their share registers, and that places us at a distinct disadvantage. It may have been an omission on the part of Parliament not to have included the A.M.P. and the Mutual Life Association charters. There is a company here called the Citizens' Company, which has shareholders. If you go for a list of their members they will give you a list of their shareholders. They will

G. Crowley, Esq.
4 June, 1896.

- G. Crowley, Esq.
4 June, 1896.
- will not give you a list of their customers. Their argument is that you might just as well go to a business firm and ask for a list of their customers. Of course there is a distinction between being a nominal shareholder and an actual customer.
78. *Mr. Griffith.*] In the case of the Mutual Life, are not the nominal proprietors the actual proprietors? They are actually.
79. *Mr. McLean.*] There are no other proprietors? No.
80. Then the members are nominally the owners? Really they are—they have no liability.
81. Who has the liability? In the Mutual Life there is no liability attaching to them at all.
82. The Board of management has no liability? No. To say that a man is a shareholder, without having any liability, is a straining of the word shareholder.
83. *Mr. Griffith.*] Then who owns the company? The policy-holders actually own it.
84. *Mr. McLean.*] You have said that you are at a disadvantage compared with the chartered companies. But what is to prevent you becoming a chartered company? Only this, that we can make a shorter cut at it. It would cost a lot of money to get a charter of our own, and the only point in the Companies Act with which we disagree is the necessity to show our list of members. It is far better for us to take up the time of Parliament with a short Bill, than with a long charter Bill which would cost us ten times the amount. We are satisfied with the Companies Act except in regard to that provision.
85. But you are registered under that Act which enables you to limit the liability of your members. If you are not registered under that Act, there would be no end to the liability of individual members—it would be a co-partnership affair unless you got a special Act of Incorporation. The question is as to what is to prevent you getting that special Act of Incorporation, or what was to prevent you originally from registering under the Friendly Societies' Act? Nothing, except but the difficulty of the list of members evidently was not foreseen.
86. *Mr. Griffith.*] We will suppose there is a life assurance company, the directors of whom form themselves into a clique; the manager of this company is a creature of this clique; the policy-holders are desirous when the directors' term of office closes to elect some one else; the clique of directors have access to the list of policy-holders; they would, therefore, be in a position to issue circulars and to canvass, whereas the ordinary policy-holder would not have that advantage;—how will that be obviated if we do away with this clause? Only by the by-laws of the society.
87. But Parliament cannot regulate your by-laws? The same thing prevails in every office, and it is unfair to put us under a disadvantage.
88. *Mr. McLean.*] You put yourselves under the disadvantage by registering under an Act in which that provision exists? But if it is a desirable provision it should apply to the A.M.P., and every one else.
89. *Mr. Mahony.*] How is Church's Company registered? Under the Companies Act.
90. What register have they got? They have a register of their shareholders. If you ask for a list of their members they will give you a list of shareholders. They would never dream of allowing you a list of their customers to enable you to undercut their rates.
91. But you should have foreseen that, and so made your registration so that that provision would not apply? If we could go back for fifteen years, there is no doubt we should adopt another means of registering.
92. You are registered under the Companies Act;—do you not see what a dangerous precedent it would be to specially except you; it means that the Companies Act would make fish of one and flesh of the other? Of course there is a big difference between a life assurance and fire insurance companies. Supposing I am doing business with a fire insurance company, and a liability arises of 14s. or 15s. in the £. I should, of course, want to know something about the list of members, so as to see what my liability was. In the case, however, of a mutual life company, it is different. It is called "mutual," because there is no liability.
93. *Mr. Piddington.*] How many applications have you had to exhibit your lists? We are getting them almost every day now. An agent occasionally pops in and pays a shilling in order to see our list of members.
94. How long has it been going on? Ever since publicity has been given to it by the recent annual election about two months ago.
95. *Mr. Mahony.*] Who is liable in your company? The funds of the society alone are liable, and if the funds represent nothing the policy-holders have to put up with it. It only emphasises the fact that domestic legislation here, so far as life insurance business is concerned, is a long way behind.
96. Every policy-holder then would be liable to the extent of £1 in the event of your funds failing? I think that is so.
97. Supposing any of the public wished to see who were liable for that £1 they could find out by paying a fee of 1s.? Yes.
98. But if you get yourself excepted from that provision of the Companies Act, even if the person calling on you were a member, he could not see the list? I presume not.
99. Then if I were a member, and wanted to see who was liable, I could not, under those circumstances, find out? No.
100. Do you not think it would be better to obtain the end in view in another way, by applying for a charter? I think that that is a very unmanly way to do it, although I have been recommended by Mr. Remington to do it.
101. Your customers are also your proprietors, really, and you are asking to change the Companies Act which applies to every one and everything? I am satisfied it was never intended to apply to life insurance offices and such companies as those to which it does apply.
102. *Mr. McLean.*] You recognise that you occupy a peculiar position as being the only life insurance company registered under the Companies Act in the Colony? Yes.
103. You have said that the policy-holders had objections because of divulging their private business. There is nothing in the Act which compels you to place opposite the names of members the amounts for which they are insured? That is so.
104. The register simply shows the names of members? Yes, but we do not keep a register of members for the purpose of complying with the Act, but for our own convenience.
105. You have not prepared a separate list for inspection? No.

MORUYA MUNICIPAL COUNCIL ENABLING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 1st July, 1896, the "*Moruya Municipal Council Enabling Bill*,"—beg to report to your Honorable House:—

That they have examined the witness named in the margin (whose ^{George Thos. Royle.} evidence will be found appended hereto), and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was not deemed necessary to make any amendment.

Your Committee now beg to lay before your Honorable House the Bill without amendment.

W. MILLARD,
Chairman.

No. 1 Committee Room,
Legislative Assembly,
14th July, 1896.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 9 JULY, 1896.

MEMBERS PRESENT :—

Mr. Millard, | Mr. Thomas.

In the absence of a Quorum, the meeting called for this day lapsed.

TUESDAY, 14 JULY, 1896.

MEMBERS PRESENT :—

Mr. Hawthorne, | Mr. Millard,
Mr. Pyers, | Mr. Thomas.

Mr. Millard called to the Chair.

Entry from Votes and Proceedings appointing the Committee, read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same before the Committee.

George Thomas Royle (*Council Clerk of the Municipality of Moruya*) called in, sworn, and examined.

Room cleared.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Clauses 1 to 3 read and agreed to.

Title read and agreed to.

Chairman to report the Bill, without amendment, to the House.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

MORUYA MUNICIPAL COUNCIL ENABLING BILL.

TUESDAY, 14 JULY, 1896.

Present:—

MR. HAWTHORNE,		MR. PYERS,
MR. MILLARD,		MR. THOMAS.
W. MILLARD, ESQ., IN THE CHAIR.		

George Thomas Royle called in, sworn, and examined:—

1. *Chairman.*] What are you? Council Clerk of the Municipality of Moruya.
2. You were deputed by the council to give evidence before this Committee on the Moruya Municipal Council Enabling Bill? Yes.
3. Will you state to the Committee the object of the Bill and the reasons for its introduction? The object of the Bill is to enable the council to recover the outstanding rates for the year 1895-96, and also to retain the rates which have been already paid for that year. The necessity for this arises from the council having failed to comply with section 164 of the Municipalities Act, which provides that an estimate shall be made, and also that a rate shall be struck. These things were not done owing to the upsetting of the election at the beginning of the year. Arnold Hoeboer was ousted by Robert Henry Harvison by reason of his not being naturalised. This threw the elections, and also the election of mayor, back from February to April—a matter of two months. At that time the then council clerk received his dismissal. The old mayor, whose term of office ceased on the first Tuesday in February, was only returning officer for that period of two months. Consequently the council was unable to transact any business legally during that time, except the election of mayor. The council omitted to elect the mayor until the two elections took place, and then the seat of Hoeboer was again filled. The new mayor was elected in April, and there were three new aldermen and a new council clerk. They came in at the same time that the valuation was taken and were all new to office, and the two provisions in section 164 of the Act were not complied with. That section says: "The council of each municipality shall within three months after the election of the mayor thereof make or cause to be made an estimate of the probable amount which will be required for the then current year." That they entirely omitted to do. The section says further down, "and shall raise the amount so estimated by an assessment and rate upon all ratable property within such municipality." The Act says that the council "shall within twelve months after the election of mayor strike a rate." The council imagined that the rate that was struck the year before would do for the following year, and any subsequent year, provided they did not wish to alter the rate. They thought it was only necessary in case they wanted to alter the rate. This was a point of ignorance on the part of the mayor and council clerk, to whom nearly all such matters are generally left. I was not well enough up in the Municipalities Act at that time to know, and I failed to rightly interpret the section. In fact we were three months going backwards and forwards to our local lawyers, and they failed to interpret it. Then we had to appeal to the Municipal Association, and they put us right, and told us we could not possibly recover the rates under the circumstances.
4. *Mr. Hawthorne.*] So that it was really the Municipal Association that gave you instructions to prepare the Bill? No; it was at my suggestion that was done.
- 5.

G. T. Royle.
14 July, 1896.

- G. T. Royle. 5. But what was the object of the council in appealing to the Municipal Association for their opinion as to the course of action in the future? One of the aldermen declined to pay his rates and when he was asked at the table for what reason, he asked whether the rate was struck, and we told him "No." This was some three or four months after the time when the rate should have been struck. When we told him "No," he refused to pay his rates.
- 14 July, 1896.
6. How many aldermen are there? Nine.
7. Was it altogether owing to the retirement of one of your aldermen that the neglect in respect of the rates took place? Three aldermen retired, and there were, besides, two vacancies—extraordinary vacancies—that left only four seats filled. When the vacancies were declared and fresh nominations were called for the ratepayers failed to nominate, and, consequently, we had to appeal to the Governor to make appointments.
8. The difficulty has arisen, I understand, rather through ignorance in the interpretation of the law than from any carelessness on the part of the council? Yes; I may say it was owing to my own ignorance. I have only been in the Colony a matter of three years, and I have been Council Clerk of Moruya about twelve months.
9. And it was just about the time of your appointment that the assessment was made? Yes. I was appointed on the 3rd June. The old council clerk was actually dismissed between the 11th and the 16th April, but owing to his books not being up to date the council granted him a fortnight longer, and a fortnight longer, until it went on to the 3rd June, and then he actually went out; so that we were really all upside down with our books and everything.
10. Then if this Bill is not passed it will be impossible for you to collect the rates for last year, and consequently the borough will not be able to carry on its ordinary duties? We should be greatly out of pocket.
11. What do you estimate is the amount of the outstanding rates? For that year about £190—say £200—actual money within the town, and then there is the Government subsidy on that.
12. So that by the passing of this Bill you will be able to obtain about £400? About £300. It will mean a great deal for us. Our yearly income is from £296 to £300. I may say that the rate-paper was served in the same form as that adopted every year. It was not until after the appeals were heard and everything was done that we found out the mistake.
13. You had all your notices prepared and everything done? Yes; we did all the business, and then we discovered that we were entirely wrong on those two points.
14. Did you publish the return for that year that you are required to do by law? Yes; the half-yearly statement was published in the *Government Gazette* and in the local papers.
15. The mistake really arose from the council clerk and about half the council being changed, and a new mayor being elected? Yes.

NARANDERA ROMAN CATHOLIC CHURCH TRUSTEES ENABLING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 2nd July, 1896,—the “*Narandera Roman Catholic Church Trustees Enabling Bill*,”—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose evidence See List, p. will be found appended hereto); and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was deemed necessary to make an amendment.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

JAMES GORMLY,
Chairman.

No. 3 Committee Room,
Legislative Assembly,
16th July, 1896.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 16 JULY, 1896.

MEMBERS PRESENT:—

Mr. Thomas Fitzpatrick,		Mr. Gormly,
Mr. Greene,		Mr. Travers Jones,
Mr. Rose,		Dr. Ross.

Mr. Gormly called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, *read* by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same, before the Committee.

Present:—Cecil Way, Esq., Solicitor, on behalf of John Fleming Willans, Esq. (*Solicitor for the Bill*).

Cecil Way sworn and examined.

Witness *produced* three grants, dated 23rd April, 1883, of allotments 3, 4, and 5, section 39, county of Cooper, made to the Right Reverend William Lanigan, the Very Reverend Patrick Dunne, James M'Intyre, William M'Mahon, and Michael Quinn; *Government Gazette* containing the appointment of Reverend Thomas Carroll, Peter Sullivan, and George Jerrom; statutory declaration, by a trustee called James M'Intyre in the grants, to the effect that his name is John Patrick M'Intyre; and documentary evidence of the resignation of the Very Reverend Patrick Dunne, and the deaths of Wm. M'Mahon and Michael Quinn.

Reverend Thomas Joseph Carroll called in, sworn, and examined.

Witness withdrew.

John Patrick M'Intyre called in, sworn, and examined.

Witness withdrew.

George Herbert Gibson Manning called in, sworn, and examined.

Witness withdrew.

James Ashton, Esq., a Member of the Legislative Assembly, called in, sworn, and examined.

Witness withdrew.

Reverend Thomas Grey called in, sworn, and examined.

Room cleared.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Clauses 1 and 2 read and *agreed* to.

New clause, to stand as clause 3, read and *agreed* to.

Schedules read and *agreed* to.

Title read and *agreed* to.

Chairman to report the Bill, with an amendment, to the House.

SCHEDULE OF AMENDMENT.

Page 3. *Insert* the following new clause to stand as clause 3:—

3. This Act may be cited as the “Narandera Roman Catholic Church Trustees Enabling Act of 1896.”

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

NARANDERA ROMAN CATHOLIC TRUSTEES
ENABLING BILL.

THURSDAY, 16 JULY, 1896.

Present:—

MR. THOMAS FITZPATRICK,		MR. GREENE,
MR. TRAVERS JONES,		MR. ROSE,
	DR. ROSS.	

JAMES GORMLY, Esq., IN THE CHAIR.

Mr. Cecil Way appeared as Solicitor for the Bill.

Cecil Way sworn and examined:—

1. *Chairman.*] Have you a grant of the lands affected by this Bill? Yes; I produce three grants, dated 23rd April, 1893, allotments 3, 4, and 5, sec. 39, of the county of Cooper, parish of Narandera, and town of Narandera. These grants were made to the Right Rev. William Lanigan, the Very Rev. Patrick Dunne, James M'Intyre, William M'Mahon, and Michael Quinn. These are the original trustees. The Very Rev. Patrick Dunne has since resigned. William M'Mahon and Michael Quinn are both deceased. Three trustees have taken their places. I produce a *Government Gazette* containing the appointments of the Rev. Thomas Carroll, Mr. Peter Sullivan, and Mr. George Jerrom. I produce that *Gazette* in compliance with the 106th section of the Crown Lands Act, 1884, to show that they were appointed trustees. With regard to the trustee called James M'Intyre, I have a declaration by him that his name is John Patrick M'Intyre, and that he was the original trustee mentioned in the grants. The name was incorrectly put as James. I also produce documentary evidence of the resignation of the Very Rev. Patrick Dunne, and of the deaths of the other two trustees. Cecil Way.
16 July, 1896.

The Rev. Thos. Joseph Carroll called in, sworn, and examined:—

2. *Mr. Way.*] Were you appointed one of the new trustees of the land mentioned in this Bill? Yes; in November, 1892, I accepted the appointment. Rev.
T. J. Carroll.
16 July, 1896.
3. Was your name in that appointment put down wrongly as Thomas Carroll? Yes; it should have been Thomas Joseph Carroll, and I am the same person.
4. *Chairman.*] At the time when you were appointed were you the resident clergyman at Narandera? Yes.
5. Did you accept the appointment and act as trustee accordingly? Yes.
6. *Mr. Way.*] Are you aware of the object of this Bill? Yes.
7. Do you know why this land is unsuitable for church purposes at present? It is in the most public place in the town, immediately opposite the largest hotel. On two sides of it there are blacksmiths' shops. The town band plays on the square in front, so that divine service is impossible during week days. It is considered to be about the most unsuitable place in the town for a church. The bishop first moved in the matter, and selected a more suitable site.
8. *Chairman.*] Do you mean the Bishop of Goulburn, who is one of the trustees of the site? Yes.
9. *Mr. Way.*] Do you think it would be an advantage to the church to sell that land? Most decidedly.
10. Have there been any negotiations for the sale of it? No. 11.

- Rev. T. J. Carroll.
16 July, 1896.
11. In the event of the land being sold would the proceeds be applied to the purposes mentioned in the grants? Yes.
 12. *Chairman.*] Has the congregation provided another site for church purposes? Yes.
 13. If the land were sold could the proceeds be beneficially expended on the site which has been obtained? Certainly; a church and presbytery are to be built on the new site secured.
 14. Is the new site suitable for the purpose? Yes.
 15. *Dr. Ross.*] What is the area of the present site? One acre and a-half and one perch.
 16. *Mr. Way.*] Do you know James Patrick M'Intyre? Yes; he is an original trustee.
 17. In the grants his name appears as Thomas M'Intyre? Yes; that is a similar mistake to the one made with regard to my own name.
 18. It should really be John Patrick M'Intyre? Yes.
 19. As the resident clergyman, did you recognise John Patrick M'Intyre as one of the trustees? Yes.
 20. Did he take any part as trustee? Yes, he always acted as trustee.
 21. Was there any objection ever raised as to his being a trustee? As far as I know no one ever doubted he was the trustee.
 22. Are there any buildings on the land referred to in the Bill? Yes, there is a church.
 23. Has a clergyman's residence ever been built there? No.
 24. Is the greater part of the land unused? Yes; half an acre is enclosed on which the church is built the remainder is unenclosed at present, and has not been utilised. Another reason why this site is unsuitable is that there is a very unsavoury drain running at the back of it. The land would be valuable as a business site.
 25. *Mr. T. Fitzpatrick.*] Is the church used as a schoolroom during the day? Yes, it is so used at present, because the congregation have always understood that the land would be sold. A separate site has been secured for a school; the present site is very unsuitable for a school. If this Bill is passed the money obtained by the sale will be used exclusively in building a church on a more suitable site.
 26. *Chairman.*] Is the church now erected an inferior building of not much value? Yes.
 27. Is it suitable for its present purposes? No, it is too small.
 28. When it was first built was the material inferior? Yes, it was pulled down and built up again.
 29. Was there a dispute with the contractor about using inferior material? Yes; an architect from Wagga condemned the building and another was put up.
 30. Was it ever considered to be anything but a makeshift? No.
 31. Is it likely to be suitable for future requirements? No.
 32. If the present site were retained, would the church have to be pulled down? Yes; it is on a corner allotment, and it could not be added to or improved.
 33. Does the main road to the railway station from the districts down the river pass by the church? Yes.
 34. Does the main road from Wagga and Murrumbidgee pass the church from another direction? Yes.
 35. *Mr. Rose.*] Will the whole of the proceeds of the sale be devoted to the purchase of a new site? No, it will be devoted to the purchase of a new site and the erection of a new building.
 36. Will the whole of the proceeds be spent on a new building and the purchase of a new site? Yes.
 37. No matter how much it brings, do you pledge yourself to spend the whole of the money for that specific purpose? Yes.
 38. *Mr. Greene.*] Do you say that a new site has been already acquired? Yes; the bishop seeing that this was very unsuitable, insisted on a new site being purchased.
 39. Has that purchase been already effected? Yes.
 40. *Chairman.*] Has the whole of the purchase money been paid? I do not think so.
 41. Would the proceeds of this sale go to complete the purchase? Yes; the new site has yet to be paid for out of the sale of this land.
 42. Does the main road from the railway station to other portions of the town pass by that corner? Yes.
 43. Is that the principal street of the town? Yes; all the traffic passes by there.
 44. *Dr. Ross.*] Are the congregation of the church in favour of selling the old site? Yes, so far as I individually know them.

Mr. John Patrick M'Intyre called in, sworn, and examined:—

- Mr. J. P. M'Intyre.
16 July, 1896.
45. *Chairman.*] Are you one of the original trustees of the site described in these deeds of grant? Yes.
 46. Have you been recognised as such by the clergyman and people of Narandera? Yes.
 47. Have you acted as trustee? Yes.
 48. *Mr. Way.*] In these grants your name is put down as James M'Intyre? Yes, that is a mistake.
 49. Have you made a statutory declaration that your name is John Patrick M'Intyre, and that you are the same person as has been recognised as trustee? Yes.
 50. Do you know the land which is mentioned in those grants? Yes.
 51. Is it unsuitable for church purposes? Yes.
 52. *Chairman.*] Are you of opinion that if this Bill passes and the land is sold, the proceeds can be beneficially expended for the purpose of acquiring and improving a new site for the church? Yes, undoubtedly.
 53. Are you of opinion that owing to the traffic past this corner lot it is not a suitable site? Yes.
 54. Could it be more advantageously used for some other purpose for the benefit of the town? Yes, it would make a good business site.
 55. Is there a bank on the opposite corner? Yes.
 56. Is there a large hotel on the other corner? Yes.
 57. Is there a large store on a third corner? Yes, and the church forms the fourth corner.
 58. Does the main road coming down the Murrumbidgee pass that corner? Yes.

George Herbert Gibson Manning called in, sworn, and examined:—

- G. H. G. Manning.
16 July, 1896.
59. *Chairman.*] What is your occupation? Stock and station agent and auctioneer.
 60. How long have you resided in Narandera? Since 1880.
 61. Are you well acquainted with the church referred to in this Bill? Yes.
 62. What position does it hold in the business part of the town? It occupies the site at the corner of East and Twynam Streets. Twynam-street runs east and west, and East-street runs north and south.
The

The intersection of the two streets is at the corner where the church stands. On the opposite corner is the "Royal Mail Hotel," the leading or second leading hotel in Narandera. On the opposite corner is the Commercial Bank; on the third corner stands the leading store of the town. The site on which the church stands is bounded on the north by an allotment occupied by a blacksmith's shop. Upon the south side in Twynam-street there is another blacksmith's shop. The site is surrounded by business places, and is about the best business site in the town of Narandera. At the same time, it is about the most unsuitable site for a church that could be found. At night the Salvation band plays in front of the church, and the main traffic of the town passes by Twynam-street to the railway station, and the country traffic up and down the river also comes by Twynam-street. The new site secured by the church is the most suitable in the town for church purposes. It is convenient, close to the centre of the town, not more than 300 or 400 yards away from the centre of the population, and at the same time it is away from the traffic. It is in a good elevated position.

G. H. G.
Manning.
16 July, 1896.

63. Was that site secured some few years ago at an advantageous time? Yes.
64. Do you consider that the present church building is suitable for the town of Narandera? No.
65. Would you call the present church a permanent one? No; it is decidedly a makeshift. When the church was first put up there were several disputes with the contractor, and I believe the material was not of good quality. I consider that the church itself is too small for the requirements.
66. Are you aware that it has been intended to change the site for some time? Yes.
67. Was that one of the causes why a new church has not been built? Yes.
68. If it had been a permanent site, is Narandera capable of erecting a better church? Yes; I am sure that is the case. I have heard it freely stated that in anticipation of procuring a more advantageous site the congregation will do nothing towards erecting a new church.
69. Do you think there is any probability, under any circumstances, of a suitable church being built on the present site? No.
70. Do you think the present site would be more suitable for other purposes? Yes; and I know from conversations with many members of the church that they will never do anything with the present building while there is a chance of getting a better site.
71. From your knowledge of the general community outside this congregation, do you think that they would view favourably the proposal contained in this Bill? Yes; from my experiences as an auctioneer I know that the feeling of the public is strongly in favour of this proposal.
72. Would any considerable portion of the community oppose the Bill? No; I am sure 99 per cent. of the community would be in favour of it.

James Ashton, Esq., M.P., called in, sworn, and examined:—

73. *Chairman.*] Do you know the purposes for which this Committee has been appointed? Yes.
74. Will you give us your opinion as to the suitability of this site mentioned in the Bill for church purposes? I think that, compared with the suitability of the site for business purposes, it is most unsuitable for church purposes. It is probably the very best business site in the town. If offered for sale to-morrow it would bring a higher price per foot than any other land there.
75. Were you a journalist in Narandera for a number of years, and did you take an active part in the interests of the town and district? Yes.
76. Can you give the Committee any opinion as to how the purposes of this Bill would be viewed by the general public of the town and district? It would be viewed favourably by everybody.
77. Do you think anyone would take objection to the purposes of the Bill? Not the slightest; it would tend to the general commercial advantage of the town by setting free the best business site. For instance, a few years ago a question was raised as to the erection of a new post-office at Narandera, the present post-office accommodation being very inadequate. I know very covetous eyes were cast on the site of the Roman Catholic church. If that were free, and the post-office project were proceeded with to-morrow, I have no doubt there would be a strong recommendation from the Postal Inspector who visited the place that this site should be procured.
78. Does the hotel on the opposite corner do a very large country business? Yes.
79. Seeing that there is also a bank on another corner and a large store on another corner, constitute this a valuable business site? Yes.
80. Is it too valuable for church purposes? Yes; in the interests of the town it would be better that such a site should be used for business purposes.
81. Have you any knowledge of the site purchased for a new church? Yes, I think it was in the vicinity of the present parsonage.
82. Is it a suitable site? Yes, it is in a good elevated position.
83. Is it close to the centre of the town? Yes.
84. If this Bill were passed, do you think the proceeds could be beneficially spent in building on that site? I am sure of it.

J. Ashton,
Esq., M.P.
16 July, 1896.

The Rev. Thomas Grey called in, sworn, and examined:—

85. *Chairman.*] Can you supplement the evidence that you have heard given here to-day? I cannot supplement it, but I can endorse all the evidence given.
86. Have you an intimate knowledge of the new site secured for church purposes? Yes.
87. Is there a reasonable area of land? Yes; within a perch it is as large as the site now used.
88. Is it a more suitable site? Yes.

Rev. T. Grey.

ORANGE SHOW GROUND BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred on 13th August, 1896, the "*Orange Show Ground Bill*,"— beg to report to your Honorable House :—

That they have examined the witnesses named in the List* (whose * See List, p. 4. evidence will be found appended hereto); and the Preamble, as amended,† having † See Schedule of Amendments. been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill, as amended by them, with an amended Title and Preamble.

H. W. NEWMAN,
Chairman.

*No. 1 Committee Room,
Legislative Assembly,
19th August, 1896.*

PROCEEDINGS OF THE COMMITTEE.

MEMBERS PRESENT :—

Mr. E. M. Clark, Mr. Edden, Mr. Haynes,		Mr. Cotton, Mr. Hawthorne, Mr. Newman.
Mr. Wilks.		

Mr. Newman called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, *read* by the Clerk.

Printed copies of the Bill *referred*, together with original Petition to introduce same, before the Committee.

Present :—P. B. Colquhoun, Esq. (*Messrs. Lee, Colquhoun, and Bassett, Solicitors for the Bill*).

Percy Brereton Colquhoun sworn and examined.

Witness *produced* deed of grant of land as a site for Show Ground for the Orange Pastoral and Agricultural Society.

Hon. Andrew Taylor Kerr, M.L.C. (*President of the Orange Pastoral and Agricultural Association, and a Trustee of the Show Ground*), called in, sworn, and examined.

Witness withdrew.

William Tanner, junior (*Secretary of the Orange Pastoral and Agricultural Association*), called in, sworn, and examined.

Room cleared.

Preamble considered and amended.*

Question,—“That this Preamble, as amended, stand part of the Bill,”—put and passed.

Solicitor called in and informed.

Clauses 1, 2, and 3 read and *agreed to*.

Clause 4 read, amended,* and *agreed to*.

Clauses 5 and 6 read and *agreed to*.

Title read, amended,* and *agreed to*.

Chairman to report the Bill with amendments to the House, including an amended Title and Preamble.

* See Schedule of amendments

SCHEDULE OF AMENDMENTS.

1896.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

ORANGE SHOW GROUND BILL.

WEDNESDAY, 19 AUGUST, 1896.

Present:—

MR. CLARK,
MR. COTTON,
MR. EDDEN,

MR. WILKS.

MR. HAWTHORNE,
MR. HAYNES,
MR. NEWMAN,

H. W. NEWMAN, ESQ., IN THE CHAIR.

P. B. Colquhoun, Esq. (Messrs. Lee, Colquhoun, and Bassett), appeared as Solicitor for the Bill.

Percy Brereton Colquhoun sworn and examined:—

1. *Chairman.*] You are the solicitor engaged on behalf of the promoters of this Bill? Yes.
2. Do you produce the original Crown grant of the land in question as the site for a show ground? Yes.
3. *Mr. Haynes.*] Are the present trustees who are concerned in this Bill acting under authority and been properly appointed? The trustees originally appointed under the deed were Andrew Taylor Kerr, Thomas Dalton, Frederick Treweeke, Henry William Larance, and John William Smith. John William Smith died on the 15th October, 1895, and John Kenna was appointed trustee on the 11th day of April, 1896, in the place of John William Smith. On the 20th day of July, 1896, Frederick Treweeke died, and since then there has been no appointment.
4. But the trust is intact now? Yes.

P. B.
Colquhoun.
19 Aug., 1896.

Honorable Andrew Taylor Kerr, M.L.C., sworn and examined:—

5. *Chairman.*] Will you be kind enough to state your position in connection with the Orange Pastoral and Agricultural Association? I am President of the Association, and also one of the trustees of the show ground.
6. Will you explain to the Committee the reasons for the necessity for this Bill? A certain number of gentlemen became guarantors to the Bank for £1,500 for improvements. Those improvements have been effected, and we have reduced the liability to the Bank to £1,040 2s. 1d. on the 15th August last. The guarantors in the first instance, I think, numbered twelve. They have been reduced by death to six or seven. These guarantors wished to be relieved from the liability which they have to the Bank; they therefore desired to have this Bill passed, so as to enable them to mortgage and give security over the property. Since we decided upon that we have held a show, and we found that the show ground was too small. The shows have increased so much the last year or so that we were cramped for room. We then decided to insert in the Bill a clause giving us power to sell this ground and to buy other ground, with the consent of the Minister for Lands.
7. *Mr. Haynes.*] What do you estimate the value of the present show ground? I have had it valued by two persons, and their valuations come very close to each other. The show ground consists altogether of 12 acres 3 roods and 35 perches. Mr. Lamrock's valuation is £5,416. He values the land at £3,366, and the improvements at £2,050.

Hon. A. T.
Kerr, M.L.C.
19 Aug., 1896.

- Hon. A. T. Kerr, M.L.C.
19 Aug., 1896.
8. What would be the value of those improvements if they were removed—would they be of material value for the show? They are all used for the show.
9. *Mr. Cotton.*] In that case would you remove the improvements? That would all depend on what we could do with them. One is a very fine shed, and it would be very useful.
10. *Mr. Haynes.*] It could be put to another purpose—such as sports? It is used for sports now.
11. But only, I presume, because the persons who use it for sports can get it pretty cheap? Yes.
12. Persons likely to buy it would not invest money in it merely for the purpose of using it for sports? No.
13. Is this land valuable for building purposes? Yes, it is a very valuable piece of land. It is in the town and right opposite the goods-shed.
14. Have you any idea of another site? We have an idea. There is a property which an old lady has a life interest in.
15. What is the area of that? Six hundred acres. We were thinking that if this property came into the market there is a very nice piece there which we might perhaps buy.
16. I suppose you would want about 30 acres? Twenty-five acres at anyrate. We want double what we have.
17. *Chairman.*] What is the other valuation? It is a valuation by Mr. J. S. Leeds, who values the property at £5,500, including improvements.
18. Mr. Lamrock divides the items in this way: The brick portion of the improvements he estimates at £1,000; the brick cottage with slate roof at £300; the large sheep-shed at £300; the poultry-shed at £100; the booth at £50; outside ring, fencing, cattle-yards, horse-boxes, &c., at £300—making altogether £2,050? Yes.
19. *Mr. Haynes.*] There is a permanent structure there? Yes; a brick caretaker's cottage and a place for accommodation of ladies. The caretaker's cottage might be sold for a private residence. It is a very nice cottage.
20. *Mr. Wilks.*] You spoke about twelve guarantors, and said there were only six or seven remaining now? Yes.
21. Of these six or seven, how many are trustees? There are Mr. Larance and myself. Those are the only two who are alive of the trustees who are mentioned in the bond.
22. *Mr. Edden.*] If this Bill is for the purpose of giving you power to pay for improvements that have been erected, and to sell the ground because it is inadequate to meet the requirements of the show, what is the meaning of these words in the preamble of the Bill, "and to effect further improvements thereon"? These buildings have been up some time, and we want to have them painted.
23. *Mr. Haynes.*] I presume that this preamble was framed before you determined, as you said you determined later, to get a new site? But we cannot purchase the land now which we wish to buy—it is not for sale yet.
24. But do you not think that it is foolish to erect further improvements if it is your intention to sell? Well, we do not like to let the things get shabby-looking, and to fall to pieces. Some of the buildings are made of wood, and they require painting to keep them in proper order.
25. But is it not usual not to apply money borrowed on the security of the land, or money raised by way of sale, to improvements;—are not these improvements usually paid for out of the returns obtained at the shows? We had no money when we got the land; we had to borrow money straight away from the Bank to put up these improvements. They were all paid for with borrowed money and the subsidy which we got from the Government.
26. *Mr. Clark.*] The fact is, that you want to make provision for the next show, which will take place before you are able to complete your arrangements in regard to the other land? Certainly; our next show will be held on this ground.
27. *Mr. Haynes.*] But if you are going to sell the property, is it advisable to apply any mortgage money to improvements of that description? We must keep the buildings and other things in proper order.
28. Have you not membership or other subscriptions for that purpose? They are nearly all used in paying for prizes and other things.
29. *Mr. Hawthorne.*] I suppose you have an overdraft at the Bank? The Bank will allow us an overdraft, but we are trying to pay that off.
30. Then you are not free from debt at the present time? No; we owe the Bank £1,040.
31. And the object of this Bill is to enable you to mortgage the present show ground, so as to pay off that indebtedness? Yes. We cannot mortgage the show ground without this Bill. We want to mortgage it and to pay off the liability to the Bank and clear the guarantors.
32. *Mr. Haynes.*] Is it not possible for you to assure the Committee that money obtained on mortgage at the present time will not be applied to any such purpose as improvements and buildings? Well, there are certain things that we would have to do. There is always a lot to be done before a show.
33. *Chairman.*] But how has it been paid for hitherto? We had an overdraft at the Bank, but so many guarantors have died that we have stopped it.
34. *Mr. Clark.*] It is a serious matter for the remaining guarantors? Yes, it is.
35. *Mr. Edden.*] I suppose the trouble is that there is so much and only two trustees to face it? Two trustees and four other guarantors.
36. *Mr. Haynes.*] But is it not a fact that the Government have always declined to allow money raised on mortgage in such cases to be applied to improvements? I do not know that of my own knowledge.
37. If it were not so you could go on until a time when you could not mortgage any further, and when you would be in a hole, and there would be a total collapse;—are there any means by which local subscriptions could be obtained for the purpose of defraying the cost of painting and repairs? There is no doubt we could do that out of the proceeds of the show, without using any mortgage money.
38. Will you undertake to assure the Committee that no money realised by mortgage under this Bill shall be applied to the purpose of improvements on this show ground? I am willing that none of the mortgage money shall be used for the purpose of effecting ordinary repairs.

William Tanner, junior, sworn and examined :—

39. *Chairman.*] You are the Secretary of the Orange Pastoral and Agricultural Association? Yes.
40. Did you hear the evidence given by Mr. Kerr? Yes.
41. Do you agree with Mr. Kerr's statement in regard to the necessity for this Bill? Certainly, more especially as to the size of the present show ground. It is altogether too small.
42. *Mr. Haynes.*] What is your average attendance? On one occasion we had 8,000 people present. We want 25 or 30 acres. We cannot do with less than 25 acres, to make the show the greatest possible success.
43. *Chairman.*] In the event of your buying another show ground, could not the whole of the things erected on the present show ground be used on the new one? All except the main building.
44. Why not the main building? Well, that is made of brick, but the sheep and the poultry sheds could be removed.
45. What is the large shed composed of—principally iron, is it not? Brick and iron.
46. You say that that could not be used on the new ground? I do not think so. That is the pavilion. It would not pay to pull that down and re-erect it. The caretaker's cottage could be sold as a dwelling, because it is on the boundary of the street, and is a nice building. It is worth 10s. a week.
47. *Mr. Haynes.*] How did you come to be behindhand with your liabilities with regard to the buildings; that is not usual with such Associations? We are not behind in reality, because we have reduced our overdraft. It was all borrowed money, and we have reduced it from £1,500 to £1,000.
48. *Mr. Wilks.*] Have you received any information from the Bank in regard to a settlement? Every time that there is the death of a guarantor we receive notice that the account must go into liquidation, and a fresh bond has to be signed. I may say that last year, although the show was held on a wet day, we had to put all the people inside the small ring and let the horses run outside where the people should have been, and when we wanted to show stock in the small ring we had to remove the people again. We had to have policemen and volunteers to shift the people backwards and forwards.
49. I suppose there is a general feeling in Orange that you should have a larger show ground? Yes, more especially amongst the exhibitors.
50. A growing feeling? Yes.
51. *Mr. Hawthorne.*] There is no opposition locally to the selling of the present show ground and the buying of a new one? No.
52. *Mr. Haynes.*] Is there a prospect of your being able to sell the present show ground at about the estimated sum? I do not think there would be any trouble in selling the land. It is in a splendid position, within the municipal boundary, and opposite the goods-shed and near the cattle sale-yards. It is only separated by a street from the railway station. There is a street running parallel with the show ground, and on the other side there is another street running parallel with the sale-yards, and there is a hotel on the opposite corner. So that the show ground is right in the centre of population.
53. *Mr. Edden.*] Is there any Government land in close proximity to it? There is Government land within 1 mile of it.
54. Would the Government land be suitable for a show ground? Yes.
55. You would be willing to exchange with the Government, I suppose? If they gave us 30 acres of land. We must have some other land.
56. *Mr. Wilks.*] How long has the overdraft been standing? At least twelve years.
57. During the last two or three years you have greatly reduced it? Yes.
58. *Mr. Haynes.*] Seeing the cramped condition of affairs at the show ground, do you think there is any necessity whatever for the expenditure of any of this money upon any improvements of a permanent character at the present show ground? I am not a guarantor; and some of the guarantors think that I, as Secretary, am very liberal in using their money. I should not be in favour of putting any permanent improvements on the present show ground. Of course, the painting and renovating that is required, I think, we could pay for out of our profits. It amounts to this: if we spend money in renovating and painting we cannot pass anything to the credit of the overdraft account.
59. Besides it would be really misapplying the funds so far as the consent of Parliament was concerned? Yes; but if we cannot get other land we shall have to make further improvements on the present show ground, as regards our pavilion, because the accommodation at the present time is altogether too small for the number of people that attend there.
60. You are very anxious to change your ground? Yes.
61. It is essential that you should have a larger ground? There is no getting away from that fact. If we can possibly get it, we must have a larger ground.
62. It is impossible for you to obtain ground adjoining or adjacent to the present show ground? Yes, it is impossible, because there are streets there.

W. Tanner,
junior.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 57. THURSDAY, 17 SEPTEMBER, 1896.

6. BOROUGH OF CUDGEGONG CATTLE SALE-YARDS BILL (*Formal Motion*):—Mr. Robert Jones moved, pursuant to Notice,—
- (1.) That the Borough of Cudgegong Cattle Sale-yards Bill be referred to a Select Committee for consideration and report.
- (2.) That such Committee consist of Mr. Haynes, Mr. E. M. Clark, Mr. Wilks, Mr. J. C. L. Fitzpatrick, Mr. Hurley, Mr. Watson, Mr. Travers Jones, Mr. Wood, Mr. Edden, and the Mover. Question put and passed.
-

VOTES No. 60. THURSDAY, 24 SEPTEMBER, 1896.

2. BOROUGH OF CUDGEGONG CATTLE SALE-YARDS BILL:—Mr. Robert Jones, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 17th September, 1896; together with a copy of the Bill as agreed to by the Committee.
- Ordered to be printed.

BOROUGH OF CUDGEGONG CATTLE SALE-YARDS BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report, was referred on 17th September, 1896, the "*Borough of Cudgegong Cattle Sale-yards Bill*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose * See List, p 4 evidence will be found appended hereto), and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was not deemed necessary to make any amendment.

Your Committee now beg to lay before your Honorable House the Bill without amendment.

ROBERT JONES,
Chairman.

*No. 1 Committee Room,
Legislative Assembly,
23rd September, 1896.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 23 SEPTEMBER, 1896.

MEMBERS PRESENT :—

Mr. Edden,		Mr. J. C. L. Fitzpatrick,
Mr. Hurley,		Mr. Robert Jones,
Mr. Travers Jones,		Mr. Wood.

Mr. Robert Jones called to the Chair.

Entry from Votes and Proceedings appointing the Committee, *read* by the Clerk.

Printed copies of the Bill *referred*, together with original Petition to introduce same, before the Committee.

Peter Joseph Rheinberger (*an Alderman of the Borough of Cudgegong*) called in, sworn, and examined.

Witness withdrew.

Alfred Stephen Tuckerman called in, sworn, and examined.

Room cleared.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Clauses 1 to 9 read and *agreed* to.

Title read and *agreed* to.

Chairman to report the Bill without amendment to the House.

LIST OF WITNESSES.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

BOROUGH OF CUDGEGONG CATTLE SALE-YARDS BILL.

WEDNESDAY, 23 SEPTEMBER, 1896.

Present:—

MR. EDDEN,		MR. ROBERT JONES,
MR. HURLEY,		MR. TRAVERS JONES,
MR. J. C. L. FITZPATRICK,		MR. WILKS,
	MR. WOOD.	

ROBERT JONES, ESQ., IN THE CHAIR.

Peter Joseph Rheinberger sworn and examined:—

1. *Chairman.*] You are an alderman and ex-mayor of the Borough of Cudgegong? Yes.
2. The borough council have applied to Parliament to pass a Bill authorising them to erect corporation cattle sale-yards within the borough? Yes.
3. They are, I understand, unanimously in favour of having these sale-yards erected? Yes.
4. You have chosen the site for the sale-yards? Yes.
5. That site you believe to be the best and most suitable you could get for the sale-yards? Yes.
6. You have virtually effected a purchase of the site? Yes; I have paid a deposit on behalf of the council.
7. There are no sale-yards within the borough? No.
8. The sale-yards at Mudgee are private sale-yards? Yes.
9. And both your borough and the Borough of Mudgee believe that the sale-yards in Mudgee are now out of date, and should be removed from that town? Yes; I think I can safely say that both boroughs are in favour of the new sale-yards.
10. These new sale-yards will be for the accommodation of both boroughs? Yes.
11. *Mr. Travers Jones.*] Will the erection of these sale-yards interfere with any existing rights? I do not think so. All auctioneers will have the same rights.
12. None of the existing auctioneers oppose this proposal of yours? No.
13. *Mr. Hurley.*] What is the population of Cudgegong? About 5,000.
14. *Chairman.*] The Borough of Cudgegong is about a mile square? Yes.
15. And your borough extends 10 miles in every direction outside the Borough of Mudgee? Yes; it goes right round the Borough of Mudgee.
16. *Mr. Hurley.*] What distance from the present population is the site on which you intend to build the new sale-yards? About a mile.
17. Possibly it will be many years before the population get out that far? Yes; I think I may safely say that all the people about Mudgee and Cudgegong are in favour of this site for the sale-yards. It is right away from the main thoroughfares, and there will be no danger to people from the driving of cattle.
18. *Chairman.*] The site which you have selected is not on the main road? No, it is on a by-road. It is about a quarter of a mile or a little more from the main thoroughfare. A cattle road leads to it, but there is no thoroughfare there used by vehicles.
19. *Mr. Wood.*] Did I correctly understand you to say there was no population round the proposed site? Not at present.

P. J.
Rheinberger.
23 Sept., 1896.

- P. J. Rheinberger.
23 Sept., 1896.
20. But it is within the population area of the municipality, of course? Yes.
 21. There are no buildings around it? No.
 22. *Mr. Hurley.*] Although there is no population near it, have any township allotments been surveyed anywhere near the proposed site—that is, within a few yards of it? No.
 23. *Mr. Wood.*] What is the land immediately surrounding it? It is all private land.
 24. It has never been cut up into town allotments? No.
 25. *Chairman.*] This site is on a portion of the special sub-division of 960 acres of A. B. Cox, west of the town of Mudjee? Yes.
 26. *Mr. Wood.*] Is it lying vacant now or is it occupied at all? There are cattle on it.
 27. It consists of grazing paddocks? Yes.
 28. *Chairman.*] This site is immediately on what is now used as a travelling stock road? Yes.
 29. And it would also be close to, and almost on, the surveyed line of railway extending west from Mudjee? Yes, very close to it. I could not tell you the exact distance it is away from it, but I think it is within a quarter of a mile or so of it.
 30. *Mr. Hurley.*] I suppose you do not intend to fence across any existing roads? No.
 31. And, as far as you know, there is no one in the Borough of Mudjee who is opposed to this proposal? No. I have not heard of any opposition to the establishment of these sale-yards.
 32. *Chairman.*] The usual notices have been inserted in the *Gazette* and other newspapers? Yes.
 33. And there have been no complaints or objections lodged? No.
 34. *Mr. Travers Jones.*] The erection of sale-yards on this site would in no way interfere with future settlement within the boundaries of the municipality? I do not think so.
 35. *Mr. Wilks.*] Can you give the Committee any idea as to the present indebtedness of the Borough of Cudgegong? We are in no way indebted except on account of the hall we have.
 36. I desire a little explanation in regard to these words in the preamble, “and for such purpose to borrow money by debentures or otherwise secured by mortgage upon the said land or any other property of the said council or borough, or upon the rates, fees, and tolls to be levied thereat”;—do I understand that this will be a preferential claim on the borough? Yes.
 37. And it will be a claim on the general rates? Yes.
 38. That is, the debenture-holders will have double security—security not only on the land, but also on the general rates? Yes.
 39. Has the matter come before the council in that light? Yes.
 40. They thoroughly understand that? Yes.
 41. And the borough is practically free from debt? Yes; except on the hall itself.
 42. And of course that debt is secured on the building? Yes.
 43. You have not overlapped the claims of present debenture-holders? No; we have not.
 44. Will these cattle sale-yards enter into competition with any existing sale-yards? There is only one sale-yard, and that is within the Borough of Mudjee.
 45. And this Bill will not hand over any practical monopoly to the Borough of Cudgegong? I think not.
 46. Will you kindly explain section 8—“returns of cattle sold or offered for sale”—why is an embargo placed so that auctioneers outside shall be compelled to render statements made and fees charged in their own sale-yards;—what is the object of that section, which says, “Every auctioneer or person selling or offering for sale cattle at any sale-yard other than the yards to be established under this Act, and within the aforesaid limits, shall hand to the clerk of the said council between the 1st and 7th day of every month a return in writing of all cattle sold or offered for sale by him or them during the previous month, together with the amount of fees chargeable thereon, in accordance with the provisions of this Act and the by-laws to be made thereunder”? That is a safeguard for the purpose of ensuring that the borough shall not be deprived of revenue that it should get from these sale-yards.
 47. *Mr. Fitzpatrick.*] You know, as a matter of fact, that that course is pursued in the large towns that have corporation sale-yards, such as Bathurst and Goulburn? Yes; Orange, Muswellbrook, and other towns.
 48. *Mr. Hurley.*] Is A. B. Cox aware of the fact that this Bill is being introduced? We bought the land from the trustees of A. B. Cox.
 49. The trustees are aware of the purpose for which the land has been purchased? Yes.
 50. *Chairman.*] You are also aware that the Borough of Mudjee are also anxious to get the present sale-yards, which are situated within their borough, done away with? Yes.
 51. *Mr. Wilks.*] The Borough of Mudjee are working in concert with the Borough of Cudgegong in this matter? Yes; in fact, they are more anxious than we are that these sale-yards should be erected, as they will prevent the cattle from having to go into their town.
 52. *Chairman.*] As soon as these yards are completed the sale of cattle at the present sale-yards at Mudjee will virtually be stopped? Yes.
 53. That is the intention of the Borough of Mudjee? Yes; I can safely say that the Borough of Mudjee are as much in favour of this scheme as we are.
 54. That is only natural, because the area of the Borough of Mudjee is so limited? Yes.
 55. *Mr. Wood.*] As far as you know, there is no opposition on the part of the Borough of Mudjee to the erection of these sale-yards? None whatever.
 56. They favour it rather than oppose it? Yes, they are in favour of it.
 57. *Chairman.*] Your borough are applying for this Bill with the knowledge and approbation of the Borough of Mudjee? Yes.
 58. *Mr. Wilks.*] After certain things are provided for, you intend to appropriate a certain amount regularly for the repayment of the principal—you intend to establish a sinking fund? Yes.
 59. And that fund will be kept separate from all your other council accounts, both in book-keeping and at the bank? Yes, I think so. The matter has not been discussed, but I think this matter should be kept separate. I think I can answer for the council that they will keep this fund separate.
 60. *Chairman.*] This Bill has been before the council and has been approved of by them? Yes. A few months ago it was read carefully and approved of by the council. I believe that nearly all the members were present at the time.
 61. *Mr. Hurley.*] How long has Cudgegong been a municipality? About thirty-three years.

Alfred Stephen Tuckerman sworn and examined :—

A. S.
Tuckerman.
23 Sept., 1896.

62. *Chairman.*] You are an alderman of the Borough of Cudgegong? I am.
63. You are aware that this Bill, authorising the erection of cattle sale-yards within the borough, has been before the council? Yes.
64. And approved of by them? Yes.
65. Are you aware also that the Borough of Mudjee also approve of the erection of these sale-yards? Yes; totally in accord with it.
66. Have any objections been lodged with your borough by any person living in either borough against it? No.
67. There are no objections that you are aware of? None whatever.
68. These sale-yards will supply a want that has been felt in the district for a long time? Yes; the yards that have been used so far as sale-yards are owned by one firm, and are in a very dilapidated state, and the owner is not disposed to improve them, although he has been asked to do so for several years past. Another objection to them is that they are right in the town of Mudjee, and children attending school, and going from the west end of the town to school, have to pass those yards, and on sale days they are sometimes in danger of being run over by cattle or horses.
69. *Mr. Wood.*] I understand that there was some difference of opinion in your council as to the proposed site for these sale-yards—was there? Our council held a special meeting on the proposed site. Almost all the aldermen attended that meeting—all but one, Alderman Wilton. I cannot say whether he was at the meeting when the matter was decided, but after it had been decided by the council he was the only man who objected to it.
70. Do you know what the grounds of his dissent were? I do not know why he did dissent.
71. Did he state any grounds of dissent? He did not. I asked him one day privately why he had any objection to this site, and he said, "personal interest." I said, "Who could have any personal interest in having the sale-yards where it is proposed to have them?" He would not give me any answer whatever.
72. You believe it was not because he supposed that the proposed site was unsuitable? No; he is a very cantankerous old man, and his reason was that he proposed another site on George Crossing's land, about 2 miles away, and because he did not get his point carried he opposed any other site. He is a man of that kind. When beaten, he does not like it.
73. *Mr. Wilks.*] The general public of Mudjee are in accord with you in removing the sales from the present centrally situated sale-yards, on account of the difficulties you have pointed out? Yes; even Mr. Crossing, the main auctioneer in the town, and who has had a monopoly of sales all along, told me, "If you had the sale-yards anywhere on that side road, I would be perfectly satisfied, but if you are going to put them up in the other place"—which is only a stone's throw from the present sale-yards—"I would build my own yards." I have not heard any objections other than Mr. Wilton's.
74. *Mr. Wood.*] You believe that the public of Cudgegong recognise this as being the most suitable site for the sale-yards? I do. It is a well-drained site. When Mr. Wilton could not find any other objection to the site he said it was too steep. It is on a gentle slope, and he wanted the sale-yards to be on a flat. I consider that this site is a very suitable one.
75. *Mr. Fitzpatrick.*] It is on the travelling stock road? Yes.
76. *Mr. Wood.*] There would be no danger of its interfering with the sanitary condition of the township around, owing to drainage? No; it empties below the town altogether. It is on the lower side of the town, and consequently any water from it would flow in a direction away from the town.
77. *Chairman.*] Your council intend, under the provisions of this Bill, to borrow money, to be repaid by debentures, to carry out the erection of these yards? Yes.
78. Is it your intention to keep this fund separate from your other accounts? Yes. I asked that question in the council.
79. The Bill provides that it should be kept separate? Yes. When the Bill was laid before our council, as drawn up by our solicitor, I asked if it was the intention of the council to keep a separate account, not only as a matter of book-keeping, but also at the bank, and the answer given was in the affirmative.
80. *Mr. Wilks.*] The debenture-holders will have a charge on the general rates as well as the land forming the site? Yes.
81. *Mr. Hurley.*] Is there any estimate of the cost of building these sale-yards? It is proposed to borrow £1,000. The estimated cost is about £800; but there might be some little expense we do not foresee at present, and we thought we would be well within the mark if we asked for £1,000.
82. I suppose that you have a specification drawn up? We have not at present. If this Bill be passed by Parliament, and we are authorised to borrow the money, we intend to ask for plans from different boroughs and select one which we think will be the most suitable for our site, and call for tenders on that plan.
83. *Chairman.*] You have been in communication with some boroughs already? We have. Privately, I have the plans of the Bathurst sale-yards, but the council will get plans from the different municipal sale-yards.
84. How many acres of land have you secured? Six acres.
85. *Mr. Fitzpatrick.*] What is the area of the old sale-yards in use at the present time? About $2\frac{1}{2}$ acres.
86. Are those sale-yards sufficient to meet the requirements of the place? No, they do not.
87. You think that the 6 acres that you have in view will be sufficient? Yes. If not, we have the option of buying 4 acres more. There is no doubt that if we wanted 10 acres more we could get them. There is plenty of land there.
88. *Chairman.*] But you believe that 6 acres will be equal to the requirements of the district for a long time to come? I do.
89. *Mr. Wilks.*] The maintenance of buildings, after the sale-yards have been first established, will, I suppose, be provided for out of the receipts from the sale-yards? Yes, out of the receipts from the sale-yards. I opposed any of the general rates being spent on this matter at all.
90. *Mr. Hurley.*] The buildings, I suppose, will be chiefly for a caretaker? Yes, and sheds for sheep.
91. Is it your intention to have a turning-out paddock in connection with the yards? No.
92. There will be no such thing as travelling cattle from the yards to a watering-place and back again? No. The site is not far from the river. There is an opening to the river, within about half a mile, where stock could be watered.

A. S.
Tuckerman.
23 Sept., 1896.

93. *Chairman.*] It is usual for the auctioneers to provide their own paddock accommodation? Yes; almost all the auctioneers have their own paddocks near the town.
94. And these yards would be in a very good position as regards the present auctioneers' paddocks? Yes. Mr. Crossing has a 1,000-acre paddock within a quarter of a mile, and McEwan and Cox also have a paddock adjoining it.
95. *Mr. Hurley.*] The Mudgee district being a gold-mining district, is it likely that there will be any application for this particular ground for mining purposes? Not in the least. I have done a little bit of mining myself in my time, and this is about the most unlikely-looking place to find anything in.
96. *Mr. Wood.*] The drainage from these sale-yards would not in any way go into a river or stream now being used for water for domestic purposes? No; the site drains into the paddock belonging to Mr. Gunnell, a butcher.
97. Where does the drainage eventually go to? That is a flat paddock, and the drainage generally soaks away there; but in times of flood it would go into the river miles below the town.
98. *Chairman.*] This site is about a mile from the river where the drainage in flood-times might reach it? Yes.
99. And the place where it would be emptied into the river is fully 2 miles below the boundary of the town? More than 2 miles.
100. *Mr. Hurley.*] What is the closest building to this site? Gunnell's slaughter-house. There is only one man living there—a slaughterman.
101. I meant a homestead? I suppose 400 yards.
102. Is that place protected by a fence from this proposed site? Yes.
103. And the driving of cattle to and from the sale-yards would not interfere with the people living in that house? No. The road where these sale-yards would be has always been used as a stock road; for ordinary traffic people use roads on the other side of the town.
104. *Mr. Wood.*] It is not a main road, but a by-road? It is more a road to take cattle from the back of the town to the trucking yards.
105. Was the road originally surveyed there as a road of access to that part of the town or to some place beyond? I cannot tell you.
106. There is no settlement beyond to which the road leads? None whatever; it joins the main road further on.
107. Then it is a by-road between two main roads? Yes.
108. *Chairman.*] Would I be right in saying that this road is a mile long? Yes.
109. And there is only Gunnell's slaughtering premises on the whole road? Yes.
