Key assumptions made in the policy	
Does the policy relate to a previous announcement? If yes, which announcement?	No.
What assumptions have been made in deriving the financial impacts in your estimated costing? <i>(See checklist)</i>	Allocate a fixed amount of \$250,000 in each of 2015-16 and 2016-17 to support the mapping of koala populations by experts. The scope of the mapping will be scalable to funds available. The koala summit will bring together experts and stakeholders from across the state.
Is there a range for the costing or any sensitivity analysis that you have undertaken?	No.
Are there associated savings, offsets or expenses? If yes, please provide details.	Funds to support the koala population monitoring should be reallocated from the existing budget of the Policy and Science Service Group of the Office of Environment and Heritage. Costs associated with the koala summit are not expected to be significant and will be scalable to resources that can be practicably reprioritised from the existing budget of the Office of Environment and Heritage.
