Key assumptions made in the policy	
Does the policy relate to a previous announcement? If yes, which announcement?	No
What assumptions have been made in deriving the financial impacts in your estimated costing? <i>(See checklist)</i>	<p>This costing assumes that additional funding for the BGAS was budgeted at HYR with an additional \$100M to be provided as part of this election commitment, taking the total commitment to \$335M in additional support.</p> <p>\$30M of this funding which is in 18/19 will be carried forward into 19/20 in the usual course of budgetary carry forwards policy.</p> <p>This costing assumes that additional support via grants will increase over time to accommodate; this will allow the non-government sector to plan for the additional funding available.</p> <p>Any additional administration associated with this program is assumed to be done within the existing budgets.</p>
Is there a range for the costing or any sensitivity analysis that you have undertaken?	
Are there associated savings, offsets or, in the case of a revenue proposal, offsetting expenses? If yes, please provide details.	No
Are there significant costs or savings outside the forward estimates period which should be considered in costing this policy? ³	No

⁵ Expenditure is operating expenses, e.g. salaries, interest cost and grants. Expenditures are fully included in the impact on operating balance.

⁶ Capital costs differ from expenditure in that only depreciation will be included in the impact on operating balance.

⁷ There is a range of possible delivery models, e.g. built, owned and operated by a NSW government agency; built and transferred to a private operator; privately built for public operation; privately built and operated with government assuming risk or providing a guarantee in relation to future income (often applicable to public/private partnership arrangements), and so on. The policy should provide assumptions about the proposed delivery model.

Checklist for key assumptions (please be comprehensive and include all relevant assumptions).

Assumptions could include, but are not limited to, questions such as:

- What is the expected community impact?
- How many people will be affected by the policy?
- What is the likely take up or other behavioural response you expect?
- Is there a cap on total spending proposed, a funding formula, resource agreement or other mechanism of this nature associated with the policy?
- Will third parties have a role in funding or delivering the policy (e.g. Commonwealth Government)?
- Will funding/program cost require indexation?
 - If yes, do you have any assumptions about the index that should be applied?
- What assumptions have you made about costs of administering the policy?
- Will additional staff be needed in the agency responsible for the policy?
 - How many and at what approximate levels?
- Are there other resources required?
- Are you assuming administrative costs will be absorbed within the agency?

Please note that:
