ACKNOWLEDGMENTS

I would like to thank my colleagues in the NSW Parliamentary Library for their assistance. In particular, David Clune and Richard Baker both made useful comments during the preparation of this publication.

Kerry O'Brien of PITS did a magnificent job in setting up 'Excel' to process data. Antony Green provided the magic formula which greatly assisted the production of the ranking tables. David Irish of Integrated Business Pty Ltd wrote a trouble-shooting formula.

This publication is based, with permission, on a similar publication by the Statistics Research Group of the Department of the Parliamentary Library, Parliament of the Commonwealth of Australia. Andrew Koprass provided invaluable advice and assistance.

All data is from the ABS 1991 Census of Population and Housing.

FOREWORD

This paper provides an analysis of selected socio-economic data from the 1991 Census of Population and Housing for State Electoral Districts.

Data for each characteristic is presented in two tables. The first table ranks each Electoral District, in descending order, on the relative value of the data item. The second table lists each Electoral District alphabetically and shows the value of the data item. The political party holding each Division after the 1991 NSW State election is also shown on each table. At the time of publication, the members for Blue Mountains and Georges River (both ex-Liberal Party) have become Independents.

Please note: All tables should be read in conjunctions with the preceding definitions.

Comments from Members concerning this publication would be appreciated. Please direct comments to David Clune, Manager, Research, or Jan Newby, Senior Researcher, Statistics.
