## FOREWORD

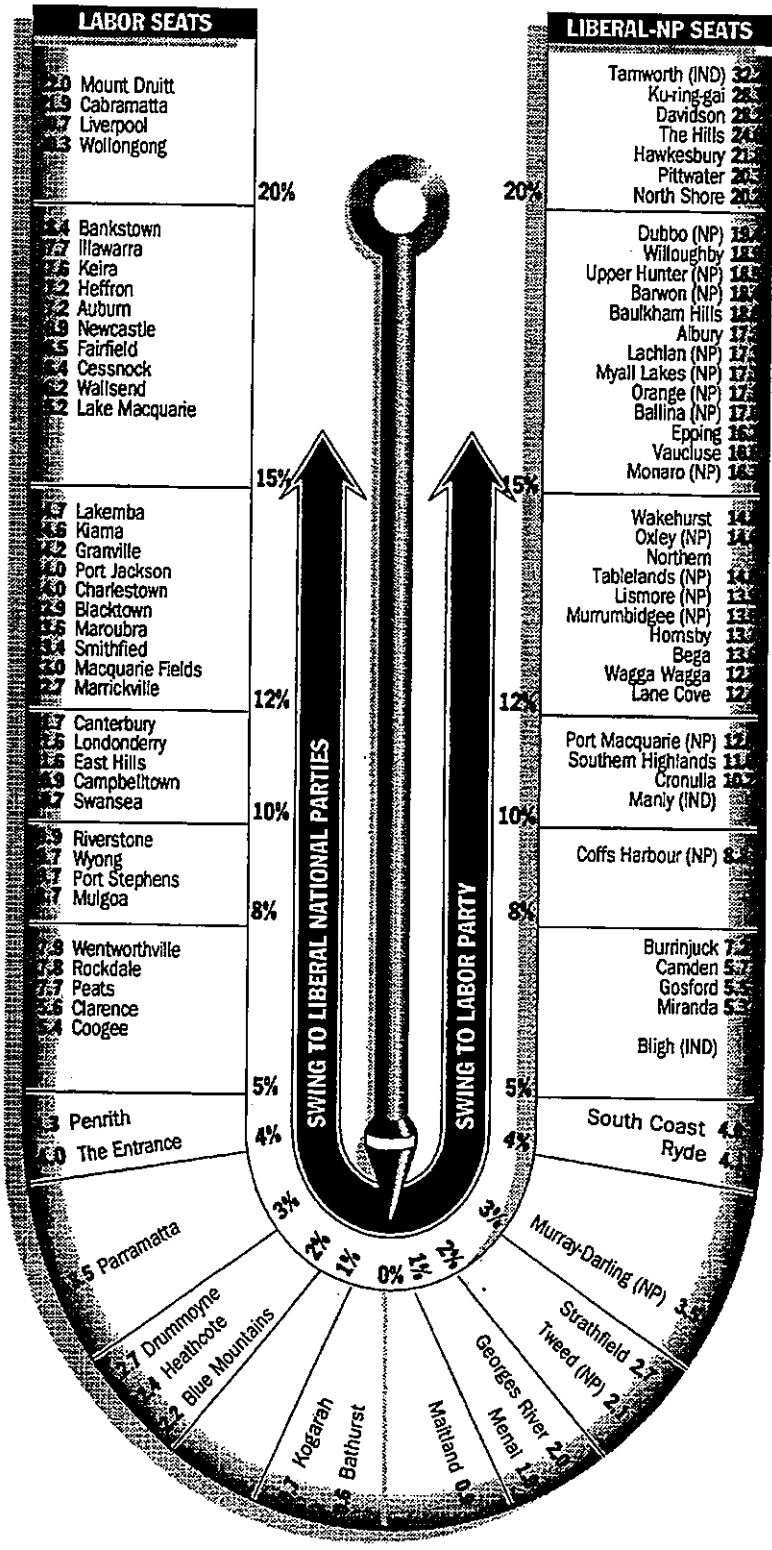

This paper provides an analysis of selected socio-economic data from the 1996 Census of Population and Housing for New South Wales State Electoral Districts as determined by the 1998 redistribution. For the effects of the redistribution, see Antony Green's background paper *1997/98 New South Wales Redistribution: Analysis of Final Boundaries (no.4/98)*.

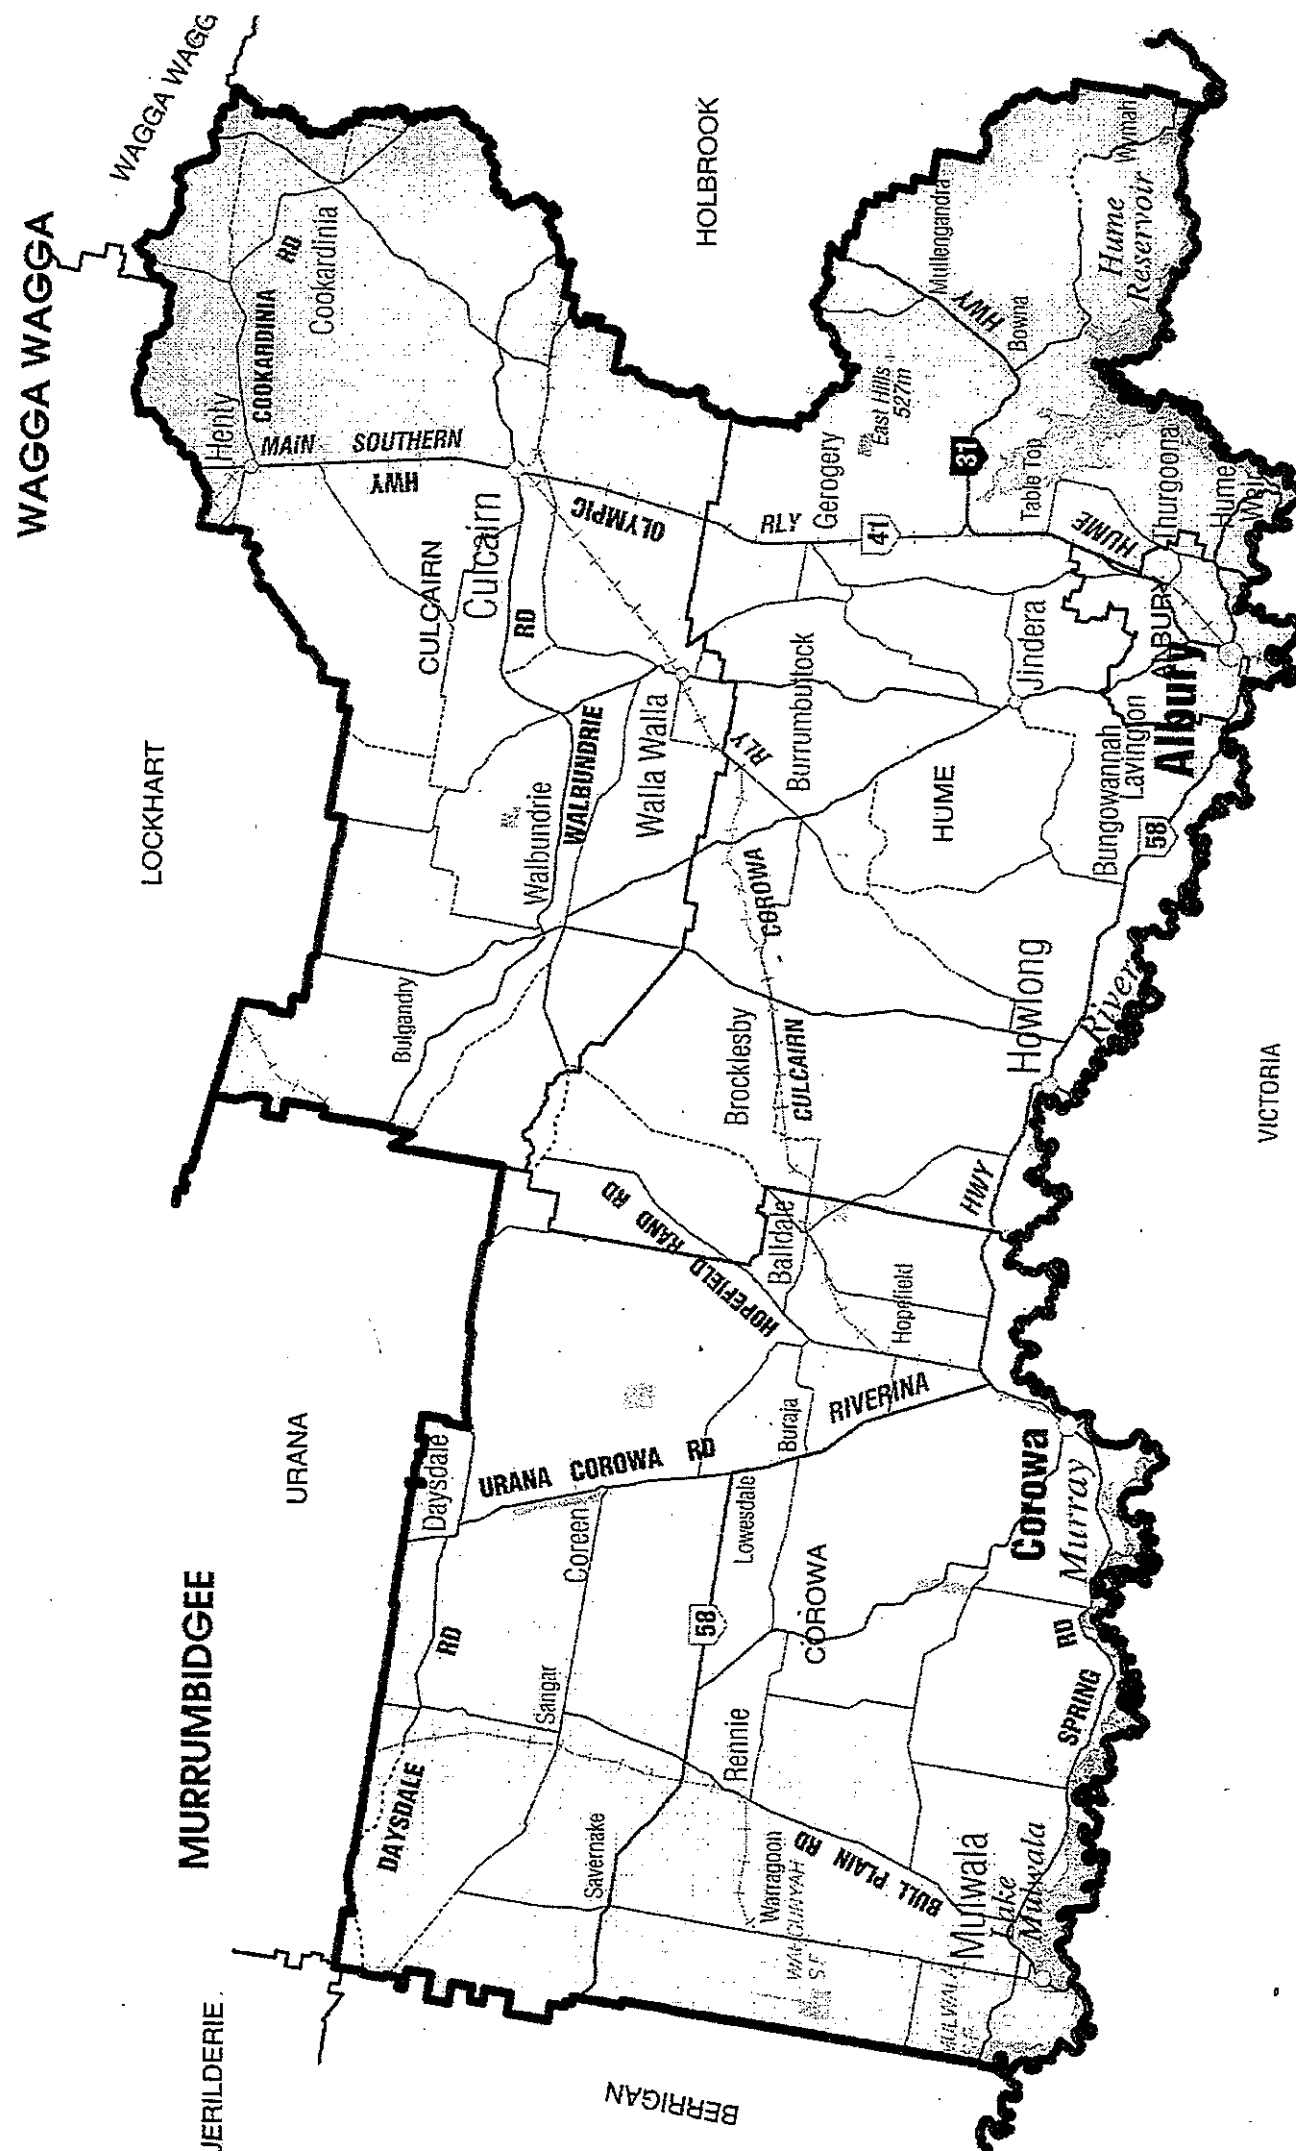

Data for each electorate is presented in two tables along with a corresponding map. The maps have been reproduced, with permission, from the *1998 New South Wales Redistribution of Electorates Report*. The political party shown for each electorate is based on the party notionally holding the seat as calculated in Antony Green's paper cited above. A table detailing the 2-party vote, primary vote and votes transferred has been extracted from the same publication and included in each electorate profile.

Selected characteristics have been extracted from the *Census96* spreadsheet data provided to the NSW Parliamentary Library by the Australian Bureau of Statistics. The data used presents the 1996 census data in relation to the New South Wales state electoral boundaries as redistributed in 1998. Electoral square kilometre size was extracted from the *1998 New South Wales Redistribution of Electorates report*.

For a more detailed analysis of 1996 Census data by electorate see the background paper *New South Wales State Electoral Districts Ranked by 1996 Census Characteristics (no.1/99)*.

**Please note: Each table should be read in conjunction with the definitions and notes on pages 187-189.**

**Voting Figures**

Tables detailing the 2-party vote, primary vote and votes transferred have been extracted from the NSW Parliamentary Library Research publication *1997/98 New South Wales Redistribution: Analysis of Final Boundaries by Antony Green Background Paper 4/98*.

These tables provide a summary for all new electorates in the following format.

CHARLESTOWN (43418)			PRIMARY VOTE			OLD ELECTORATES			
2-PARTY VOTE			ALP	21570	56.8%	Charlestown	32770	93.5%	
ALP	22759	64.0%	LIB	10265	27.0%	Wallsend	5386	88.1%	
LIB	12787	36.0%	GRN	238	0.6%	Newcastle	1974	88.0%	
			OTH	5924	15.6%		-----		
							40130	92.4%	
							Informal	2133	5.3%
							Formal	37997	

The first line contains the name of the electorate, and the enrolment at December 1997. The first two columns contain total two-party preferred and primary votes and percentages, calculated by adding up the transferred booth and declaration votes.

The third column provides information on the votes transferred from the old electorates. For example, in the case of Charlestown, it lists the number of votes transferred from Charlestown, Wallsend and Newcastle. This is the total of the booth and declaration votes transferred, and includes both formal and informal votes. It is not the number of electors transferred.

The percentage figure on the right is the number of votes transferred expressed as a percentage of the number of electors transferred. In general this percentage is kept in the range 85-95%. Where the value is outside of this range, "\*\*\*\*" appears on the listing.

A total of all votes transferred to the new Charlestown is provided, along with total informal and formal votes and relevant percentages.
