INTRODUCTION

This paper provides an analysis of selected socio-economic data from the “2001 Census of Population and Housing” for New South Wales State Electoral Districts.

Data for each characteristic is presented in two tables. The first table ranks each Electoral District, in descending order, on the relative value of the selected data item. The second lists the same information for each electorate in alphabetical order. An average score for each data item has been included in each table in this publication. The mean score is shown at the end of each table while the median (middle) score is denoted within each table by the 47th ranked score. The rankings have also been carried over into the alphabetically sorted Electorate tables in this publication. The political party holding the seat as at January 2003 is also listed.

Regional data for each characteristic is also presented in the tables showing average population and average proportion of population for regions defined as *Metropolitan* electorates, *Central Coast* electorates, *Illawarra* electorates, *Newcastle* electorates, *North Coast* electorates and *Country* electorates. The advice of Antony Green in defining these regions is gratefully acknowledged.

All data has been extracted from the Census 2001 and Census 1996 spreadsheet data provided to the NSW Parliamentary Library by the Australian Bureau of Statistics. The data used presents the 2001 census data in relation to the New South Wales state electoral boundaries as redistributed in 1998. This publication also calculates rates of change over the five year period between Census 1996 and Census 2001 expressed as a positive or negative percentage figure relative to the particular characteristic in the Census 1996 spreadsheet data.

Electorate square kilometre size was extracted from the 1998 NSW State Electoral Redistribution report. Enrolment figures which appear in the Appendices are extracted from New South Wales Enrolment Statistics supplied by the State Electoral Office. The ranked tables that appear in this publication have been produced using Microsoft Excel.

All tables should be read in conjunction with the definitions provided at the end of this paper (pp143-149).

SUMMARY OF KEY FINDINGS

Following is a brief summary of the ranked data contained in the census characteristics tables generated for this publication. Please note that this summary and the tables are based on the population in each State Electoral District (SED) on Census night, 7th August, 2001.

Population

The State Electoral District (SED) with the lowest total population is Miranda (56,792).
The SED with the highest total population is Port Jackson (105,429).
The SED total population average was 68,496.

Population Growth

The SED with the lowest population growth rate is Murray-Darling (-3.03%).
The SED with the highest population growth rate is Port Jackson (+30.04%).
The SED population growth average was +5.46%.

SEDs which have grown significantly in terms of total population between 1996 and 2001 include Port Jackson (+30.04%), Macquarie Fields (+26.01%), Camden (+25.16%), The Hills (+22.15%) and Riverstone (+20.88%)

SEDs which have total population below 65,000 and have reduced in terms of population growth include Murray-Darling (-3.03%), Northern Tablelands (-2.78%), Lismore (-2.14%), Lachlan (-1.79%) and Wagga Wagga (-1.25%).

Population Density

The Electoral District with the lowest population density is Murray-Darling (0.18 persons per square kilometre).
The Electoral District with the highest population density is Bligh (6,731 persons per square kilometre).
The SED population density per square kilometre average is 1,216 persons.

Square kilometres

The ranking of Electorates by square kilometres is, at the extremes of the table, the inverse of the population density table.

The largest SED is Murray-Darling (344,642.90 sq.km.).
The smallest SED is Coogee (10.86 sq.km.).
The average square kilometre size of a SED is 8,607.51.

These figures were extracted from the *1998 New South Wales State Electoral Redistribution report*.

Proportion of Australian Citizens 18 Years or over

This table ranks SED's based on the proportion of the total population within each SED who are Australian citizens aged 18 and over. This table essentially shows the *proportion* of the total SED population who are entitled to vote.

Newcastle has the largest proportion of Australian citizens aged 18 or over (73.11%).
Port Jackson has the lowest proportion of Australian citizens aged 18 or over (52.53%).
The SED average is 64.72%.

Australian Citizens 18 Years or over

This table ranks SED's based on the number of Australian citizens who are aged 18 and over. This table essentially shows the **number** of Australian citizens aged 18 and over within the SED who are entitled to vote.

Port Jackson has the greatest number of Australian citizens aged 18 and over (55,380).
Miranda has the lowest number of Australian citizens aged 18 and over (39,721).
The SED average is 44,102.

Again, the growth rate of Australian Citizens 18 years and over in SEDs such as Macquarie Fields (+26.99%), Camden (+27.22%), The Hills (+23.55%) and Riverstone (+20.82%) are notably higher than the average growth rate of 4.73%.

Persons who changed address since 1996

The State Electoral District (SED) with the most "sedentary" population was Smithfield, while the SED with the most "mobile" population was North Shore.

The lowest proportion of total population aged 5 and over who changed address since 1996 was in Smithfield (28.90%).

The greatest proportion of total population aged 5 and over who changed address since 1996 was in North Shore (53.54%).

The SED average was 38.59% or 26,543.

Age Groups

In summary, the Age Group tables show the following rankings for SED's:

The greatest proportion of persons aged under 5: Mount Druitt (9.65%)

The lowest proportion of persons aged under 5: Bligh (2.97%)
